**FIDELITY NATIONAL FINANCIAL, INC. AND SUBSIDIARIES**  
**NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**  
**(Unaudited)**

**Note A — Basis of Financial Statements**

The financial information in this report presented for interim periods is unaudited and includes the accounts of Fidelity National Financial, Inc. and its subsidiaries (collectively, “we,” “us,” “our,” the “Company” or “FNF”) prepared in accordance with U.S. generally accepted accounting principles (“GAAP”) and the instructions to Form 10-Q and Article 10 of Regulation S-X. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. All adjustments made were of a normal, recurring nature. This report should be read in conjunction with our Annual Report on Form 10-K (our “Annual Report”) for the year ended December 31, 2021.

**Description of the Business**

We are a leading provider of (i) title insurance, escrow and other title-related services, including loan sub-servicing, valuations, default services and home warranty products, (ii) technology to the real estate and mortgage industries and (iii) annuity and life insurance products. FNF is one of the nation’s largest title insurance companies operating through its title insurance underwriters - Fidelity National Title Insurance Company (“FNTIC”), Chicago Title Insurance Company (“Chicago Title”), Commonwealth Land Title Insurance Company (“Commonwealth Title”), Alamo Title Insurance and National Title Insurance of New York Inc. - which collectively issue more title insurance policies than any other title company in the United States. Through our subsidiary, ServiceLink Holdings, LLC (“ServiceLink”), we provide mortgage transaction services, including title-related services and facilitation of production and management of mortgage loans. We are also a leading provider of insurance solutions serving retail annuity and life customers and institutional clients through our wholly-owned subsidiary, F&G Annuities & Life (“F&G”).

For information about our reportable segments refer to Note H *Segment Information*.

**Recent Developments**

*Repayment of 5.50% Senior Notes*

On September 1, 2022, we repaid the remaining \$400 million in outstanding principal amount of our 5.50% Senior Notes due September 2022.

*Acquisition of AllFirst Title Insurance Agency (“AllFirst”)*

On August 9, 2022, we acquired approximately 74% of the outstanding equity of AllFirst for approximately \$127 million in cash consideration. AllFirst and its portfolio brands, FirsTitle, Excel Title Group, Allegiance Title Company, Guaranty Title, Smith Brothers Abstract, Aggieldand Title Company, and Guaranty Title New Mexico provide title examination, title plant, abstract, and settlement services for residential, commercial, farm and ranch sales, and energy projects in 121 counties throughout Texas, Oklahoma, New Mexico, and Arkansas. For further information related to the acquisition of AllFirst, refer to Note N *Acquisitions*.

*Note Receivable from Cannae*

In November 2017, in conjunction with the split-off of our former portfolio company investments into a separate company, Cannae Holdings, Inc. (“Cannae”), we issued to Cannae a revolver note, which we and Cannae amended and restated on May 12, 2022 (as amended and restated, the “Cannae Revolver”).

The Cannae Revolver in the aggregate principal amount of up to \$100 million accrues interest quarterly at the Adjusted Term SOFR Rate, as defined in the Amended and Restated Revolver Note, plus 450 basis points and matures on November 17, 2025. The maturity date is automatically extended for additional five-year terms unless notice of non-renewal is otherwise provided by either FNF or Cannae, in their sole discretion.

During the nine months ended September 30, 2022, Cannae borrowed approximately \$85 million under the Cannae Revolver.

We account for the Cannae Revolver as a financing receivable. Interest income is recorded ratably in periods in which principal is outstanding. Uncollectible financing receivables are written off or impaired when, based on all available information, it is probable that a loss has occurred.

### *F&G Distribution*

On March 14, 2022, our Board of Directors approved a dividend to our shareholders, on a pro rata basis, of 15% of the common stock of F&G (the "F&G Distribution"). We intend to retain control of F&G through our approximate 85% ownership stake. The proposed F&G Distribution is intended to be structured as a taxable dividend to our shareholders and is subject to various conditions including the final approval of our Board of Directors, the effectiveness of appropriate filings with the U.S. Securities and Exchange Commission (the "SEC"), and any applicable regulatory approvals. The record date and distribution settlement date will be determined by our Board of Directors prior to the distribution. Upon completion of the F&G Distribution, our shareholders as of the record date are expected to own stock in both publicly traded companies. On October 26, 2022, F&G filed Amendment number 2 to its Form 10 registration statement with the SEC. The proposed F&G Distribution is targeted to be completed in the fourth quarter of 2022. However, there can be no assurance regarding the timeframe for completing the F&G Distribution or that the conditions of the F&G Distribution will be met.

### *Income Tax*

Income tax expense was \$115 million and \$213 million in the three months ended September 30, 2022 and 2021, respectively, and \$434 million and \$555 million in the nine months ended September 30, 2022 and 2021, respectively. Income tax expense as a percentage of earnings before income taxes was 28% and 23% in the three months periods ended September 30, 2022 and 2021, respectively, and 29% and 23% in the nine months ended September 30, 2022 and 2021, respectively. The increase in income tax expense as a percentage of earnings before taxes in the three months ended September 30, 2022 as compared to the corresponding period in 2021 is primarily attributable to the recording of a valuation allowance in the 2022 period for tax benefits associated with deferred tax assets related to recognized valuation losses on equity securities for which it is more likely than not that we will not be able to realize for tax purposes. The increase in income tax expense as a percentage of earnings before taxes in the nine months ended September 30, 2022 as compared to the corresponding period in 2021 is primarily attributable to the recording of a valuation allowance in the 2022 period for tax benefits associated with deferred tax assets related to realized losses on the past sales of discontinued operations and the aforementioned recognized valuation losses on equity securities for which it is more likely than not that we will not be able to realize for tax purposes.

### *Earnings Per Share*

Basic earnings per share, as presented on the Condensed Consolidated Statement of Earnings, is computed by dividing net earnings available to common shareholders in a given period by the weighted average number of common shares outstanding during such period. In periods when earnings are positive, diluted earnings per share is calculated by dividing net earnings available to common shareholders by the weighted average number of common shares outstanding plus assumed conversions of potentially dilutive securities. For periods when we recognize a net loss, diluted loss per share is equal to basic loss per share as the impact of assumed conversions of potentially dilutive securities is considered to be antidilutive. We have granted certain stock options, shares of restricted stock and certain other convertible share based payments, which have been treated as common share equivalents for purposes of calculating diluted earnings per share for periods in which positive earnings have been reported.

Options or other instruments, which provide the ability to purchase shares of our common stock that are antidilutive, are excluded from the computation of diluted earnings per share. There were fewer than 1 million antidilutive instruments outstanding during the three and nine months ended September 30, 2022 and 2021.

### *Recent Accounting Pronouncements*

#### *Pronouncements Not Yet Adopted*

In August 2018, the Financial Accounting Standards Board ("FASB") issued ASU 2018-12, Financial Services-Insurance (Topic 944), Targeted Improvements to the Accounting for Long-Duration Contracts, as clarified and amended by ASU 2019-09, Financial Services-Insurance: Effective Date and ASU 2020-11, Financial Services-Insurance: Effective Date and Early Application, effective for fiscal years beginning after December 15, 2022 including interim periods within those fiscal years. This update introduced the following requirements: assumptions used to measure cash flows for traditional and limited-payment contracts must be reviewed at least annually with the effect of changes in those assumptions being recognized in the statement of operations; the discount rate applied to measure the liability for future policy benefits and limited-payment contracts must be updated at each reporting date with the effect of changes in the rate being recognized in other

comprehensive income; market risk benefits ("MRBs") associated with deposit contracts must be measured at fair value, with the effect of the change in the fair value attributable to a change in the instrument-specific credit risk being recognized in other comprehensive income; deferred acquisition costs are no longer required to be amortized in proportion to premiums, gross profits, or gross margins; instead, those balances must be amortized on a constant level basis over the expected term of the related contracts; deferred acquisition costs must be written off for unexpected contract terminations; and disaggregated rollforwards of beginning to ending balances of the liability for future policy benefits, policyholder account balances, MRBs, separate account liabilities and deferred acquisition costs, as well as information about significant inputs, judgments, assumptions, and methods used in measurement are required to be disclosed. The amendments in this ASU may be early adopted as of the beginning of an annual reporting period for which financial statements have not yet been issued, including interim financial statements.

We have identified specific areas that will be impacted by the new guidance. This guidance will bring significant changes to how we account for certain insurance and annuity products within our business and expand disclosures. As part of the implementation process, to date our progress includes, but is not limited to the following: identifying and documenting contracts and contract features in scope of the guidance; identifying actuarial models, systems, and processes to be updated; building and running models; generating and analyzing preliminary output; evaluating and finalizing key accounting policies; evaluating transition requirements and impacts; and establishing, documenting, and executing appropriate internal controls. We will not early adopt this standard and have selected the full retrospective transition method, which requires the new guidance be applied as of the beginning of the earliest period presented or January 1, 2021, referred to as the transition date.

Adoption of this standard is expected to increase total stockholders' equity as of the transition date, January 1, 2021, up to \$200 million, net of tax. The most significant drivers of this transition adjustment are the reversal of intangible balances previously recorded as an adjustment to unrealized gains (losses) on available for sale securities, the remeasurement of the liability for future policyholder benefits using a discount rate assumption that reflects upper-medium grade fixed-income instruments, and the recognition of MRBs. As we continue the implementation process the adjustments estimated are subject to change.

In March 2022, the FASB issued ASU 2022-02, Financial Instruments-Credit Losses (Topic 326): Troubled Debt Restructurings and Vintage Disclosures. The amendments in this update eliminate the Troubled Debt Restructuring ("TDR") recognition and measurement guidance for creditors and, instead, require that an entity evaluate whether the modification represents a new loan or a continuation of an existing loan. The amendments also enhance existing disclosure requirements and introduce new requirements related to certain modifications of receivables made to borrowers experiencing financial difficulty. Additionally, these amendments require that an entity disclose current-period gross write-offs by year of origination for financing receivables and net investment in leases within the scope of Subtopic 326-20. The guidance is effective for entities that have adopted ASU 2016-13 Financial Instruments – Credit Losses: Measurement of Credit Losses on Financial Instruments (Topic 326) for fiscal years beginning after December 15, 2022, including interim periods within those fiscal years, though early adoption is permitted. We do not expect this guidance to have a material impact on our Consolidated Financial Statements and related disclosures upon adoption. We do not currently plan to early adopt this standard.

In June 2022, the FASB issued ASU 2022-03, Fair Value Measurement (Topic 820): Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions. The amendments in this update affect all entities that have investments in equity securities measured at fair value that are subject to a contractual sale restriction and clarify that a contractual restriction on the sale of an equity security is not considered part of the unit of account of the equity security and, therefore, is not considered in measuring fair value. The amendments also clarify that an entity cannot, as a separate unit of account, recognize and measure a contractual sale restriction. Additionally, the amendments require the following disclosures for equity securities subject to contractual sale restrictions: the fair value of equity securities subject to contractual sale restrictions reflected in the balance sheet, the nature and remaining duration of the restriction(s), and the circumstances that could cause a lapse in the restriction(s). The amendments in this update do not change the principles of fair value measurement, rather, they clarify those principles when measuring the fair value of an equity security subject to a contractual sale restriction and improve current GAAP by reducing diversity in practice, reducing the cost and complexity in measuring fair value, and increasing comparability of financial information across reporting entities that hold those investments. The amendments in this update are effective for public business entities for fiscal years beginning after December 15, 2023, and interim periods within those fiscal years, though early adoption is permitted. We do not currently expect to early adopt this standard and are in the process of assessing this standard and its impact on our accounting and disclosures.

**Note B — Summary of Reserve for Title Claim Losses**

A summary of the reserve for title claim losses follows:

	Nine months ended September 30,	
	2022	2021
	(Dollars in millions)	
Beginning balance	\$ 1,883	\$ 1,623
Change in insurance recoverable	(107)	(10)
Claim loss provision related to:		
Current year	251	278
Total title claim loss provision	251	278
Claims paid, net of recoupments related to:		
Current year	(11)	(6)
Prior years	(163)	(151)
Total title claims paid, net of recoupments	(174)	(157)
Ending balance of claim loss reserve for title insurance	\$ 1,853	\$ 1,734
Provision for title insurance claim losses as a percentage of title insurance premiums	4.5 %	4.5 %

Several lawsuits have been filed by various parties against Chicago Title Company and Chicago Title Insurance Company as its principal (collectively, the “Named Companies”). Generally, plaintiffs claim they are investors who were solicited by Gina Champion-Cain through her former company, ANI Development LLC (“ANI”), or other affiliates to provide funds that purportedly were to be used for high-interest, short-term loans to parties seeking to acquire California alcoholic beverage licenses. Plaintiffs contend they were told that under California state law, alcoholic beverage license applicants are required to deposit into escrow an amount equal to the license purchase price while their applications remain pending with the State. Plaintiffs further alleged that employees of Chicago Title Company participated with Ms. Champion-Cain and her entities in a fraud scheme involving an escrow account maintained by Chicago Title Company into which some of the plaintiffs’ funds were deposited.

In connection with the alcoholic beverage license scheme, a lawsuit styled, *Securities and Exchange Commission v. Gina Champion-Cain and ANI Development, LLC*, was filed in the United States District Court for the Southern District of California asserting claims for securities fraud against Ms. Champion-Cain and certain of her affiliated entities. A receiver was appointed by the court to preserve the assets of the defendant affiliated entities (the “receivership entities”), pay their debts, operate the businesses and pursue any claims they may have against third-parties. Pursuant to the authority granted to her by the federal court, on January 7, 2022, a lawsuit styled, *Krista Freitag v. Chicago Title Co. and Chicago Title Ins. Co.*, was filed in San Diego County Superior Court by the receiver on behalf of the receivership entities against the Named Companies. The receiver seeks compensatory, incidental, consequential, and punitive damages, and seeks the recovery of attorneys’ fees. In turn, the Named Companies petitioned the Federal Court to sue ANI, via the receiver, to pursue indemnity and other claims against the receivership entities as joint tortfeasors, which was granted.

On April 26, 2022, the Named Companies reached a conditional settlement with the receiver and several other investor claimants, which if approved by the federal court, will bar any future claims against the Named Companies related to the alcoholic beverage license scheme. Following an August 31, 2022 hearing on the motion to approve the settlement, the federal court ordered supplemental briefing on whether certain indemnity claims are permitted against the receivership estate. The supplemental briefs were submitted, and a decision on the motion to approve the settlement is pending with the federal court. As part of the proposed settlement, the Named Companies and the receiver have agreed to stay the federal action pending a decision on the motion.

The following lawsuits remain pending in the Superior Court of San Diego County for the State of California, most of which involve claimants who have objected to the Named Companies’ settlement with the receiver. Since any future claims against the Named Companies will be barred if the federal court approves the settlement, these remaining state court cases were stayed until October 31, 2022, and an unopposed motion has been filed seeking a further extension of the stay until the federal court rules on the motion to approve the settlement. The state court cases were initially set for jury trial on December 2, 2022, but the trial date has been

continued until May 12, 2023. While they have not been consolidated into one action, they have been deemed by the court to be related and are assigned to the same judge for purposes of judicial economy.

On December 13, 2019, a lawsuit styled, *Kim Funding, LLC, Kim H. Peterson, Joseph J. Cohen, ABC Funding Strategies, LLC, Payson R. Stevens; Kamaljit K. Kapur and The Payson R. Stevens & Kamaljit Kaur Kapur Trust Dated March 28, 2014 v. Chicago Title Co., Chicago Title Ins. Co., Thomas Schwiebert, Adelle Ducharme, and Betty Elixman*, was filed in San Diego County Superior Court. Plaintiffs claim losses of more than \$250 million as a result of the alleged fraud scheme, and also seek statutory, treble, and punitive damages, as well as the recovery of attorneys' fees. The Named Companies have filed a cross-complaint against Ms. Champion-Cain, and others. The Named Companies have reached a conditional settlement with members of ABC Funding Strategies, LLC plaintiffs under confidential terms.

On March 6, 2020, a lawsuit styled, *Wakefield Capital, LLC, Wakefield Investments, LLC, 2Budz Holding, LLC, Doug and Kristine Heidrich, and Jeff and Heidi Orr v. Chicago Title Co. and Chicago Title Ins. Co.*, was filed in San Diego County Superior Court. Plaintiffs claim losses in excess of \$7 million as a result of the alleged fraud scheme, and also seek punitive damages, recovery of attorneys' fees, and disgorgement.

On June 29, 2020, a lawsuit styled, *Susan Heller Fenley Separate Property Trust, DTD 03/04/2010, Susan Heller Fenley Inherited Roth IRA, Shelley Lynn Tarditi Trust and ROJ, LLC v. Chicago Title Co., Chicago Title Ins. Co., Thomas Schwiebert, Adelle Ducharme, and Betty Elixman*, was filed in San Diego County Superior Court. Plaintiffs claim losses in excess of \$6 million as a result of the alleged fraud scheme, and seek statutory, treble, and punitive damages. The Named Companies have filed a cross-complaint against Ms. Champion-Cain, and others.

On July 7, 2020, a cross-claim styled, *Laurie Peterson v. Chicago Title Co., Chicago Title Ins. Co., Thomas Schwiebert, Adelle Ducharme, and Betty Elixman*, was filed in an existing lawsuit styled, *Banc of California, National Association v. Laurie Peterson*, which is pending in San Diego County Superior Court. Cross-complaint plaintiff was sued by a bank to recover in excess of \$35 million that she allegedly guaranteed to repay for certain investments made by the Banc of California in the alcoholic beverage license scheme. Cross-complaint plaintiff has, in turn, sued the Named Companies in that action seeking in excess of \$250 million in monetary losses as well as exemplary damages and attorneys' fees. The Named Companies have filed a cross-complaint against Ms. Champion-Cain and others, and the Named Companies have been substituted in as the Plaintiff following a settlement with the bank.

On September 3, 2020, a cross-claim styled, *Kim H. Peterson Trustee of the Peterson Family Trust dated April 14 1992 v. Chicago Title Co., Chicago Title Ins. Co., Thomas Schwiebert, Adelle Ducharme, and Betty Elixman*, was filed in an existing lawsuit styled, *CalPrivate Bank v. Kim H. Peterson Trustee of the Peterson Family Trust dated April 14 1992*, which is pending in Superior Court of San Diego County for the State of California. Cross-complaint plaintiff was sued by a bank to recover in excess of \$12 million that the trustee allegedly guaranteed to repay for certain investments made by CalPrivate Bank in the alcoholic beverage license scheme. Cross-complaint plaintiff has, in turn, sued the Named Companies in that action seeking in excess of \$250 million in monetary losses as well as exemplary damages and attorneys' fees.

On November 2, 2020, a lawsuit styled, *CalPrivate Bank v. Chicago Title Co. and Chicago Title Ins. Co.*, was also filed in the Superior Court of San Diego County for the State of California. Plaintiff claims losses in excess of \$12 million based upon business loan advances made in the alcoholic beverage license scheme and seeks punitive damages and the recovery of attorneys' fees. The Named Companies have filed a cross-complaint against Ms. Champion-Cain, and others.

Chicago Title Company has also resolved a number of other pre-suit claims and previously-disclosed lawsuits from both individual and groups of alleged investors under confidential terms. Based on the facts and circumstances of the remaining claims, including the settlements already reached, we have recorded reserves included in our reserve for title claim losses, which we believe are adequate to cover losses related to this matter, and believe that our reserves for title claim losses are adequate.

We continually update loss reserve estimates as new information becomes known, new loss patterns emerge or as other contributing factors are considered and incorporated into the analysis of reserve for claim losses. Estimating future title loss payments is difficult because of the complex nature of title claims, the long periods of time over which claims are paid, significantly varying dollar amounts of individual claims and other factors.

Due to the uncertainty inherent in the process and to the judgment used by management, the ultimate liability may be greater or less than our current reserves. If actual claims loss development varies from what is currently expected and is not offset by other factors, it is possible that additional reserve adjustments may be

required in future periods in order to maintain our recorded reserve within a reasonable range of our actuary's central estimate.

## Note C — Fair Value of Financial Instruments

Our measurement of fair value is based on assumptions used by market participants in pricing the asset or liability, which may include inherent risk, restrictions on the sale or use of an asset, or non-performance risk, which may include our own credit risk. We estimate an exchange price is the price in an orderly transaction between market participants to sell the asset or transfer the liability (“exit price”) in the principal market, or the most advantageous market for that asset or liability in the absence of a principal market as opposed to the price that would be paid to acquire the asset or assume a liability (“entry price”). We categorize financial instruments carried at fair value into a three-level fair value hierarchy, based on the priority of inputs to the respective valuation technique, along with net asset value. The hierarchy for fair value measurement is defined as follows:

*Level 1* - Values are unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.

*Level 2* - Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Such inputs include market interest rates and volatilities, spreads, and yield curves.

*Level 3* - Certain inputs are unobservable (supported by little or no market activity) and significant to the fair value measurement. Unobservable inputs reflect the Company’s best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date based on the best information available in the circumstances.

*Net asset value* ("NAV") - Certain equity investments are measured using NAV as a practical expedient in determining fair value. In addition, our unconsolidated affiliates (primarily limited partnerships) are primarily accounted for using the equity method of accounting with fair value determined using NAV as a practical expedient. Our carrying value reflects our pro rata ownership percentage as indicated by NAV in the limited partnership financial statements, which we may adjust if we determine NAV is not calculated consistent with investment company fair value principles. The underlying investments of the limited partnerships may have significant unobservable inputs, which may include, but are not limited to, comparable multiples and weighted average cost of capital rates applied in valuation models or a discounted cash flow model. Additionally, management meets quarterly with the general partner to determine whether any credit or other market events have occurred since prior quarter financial statements to ensure any material events are properly included in current quarter valuation and investment income.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment’s level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Our assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the investment.

When a determination is made to classify an asset or liability within Level 3 of the fair value hierarchy, the determination is based upon the significance of the unobservable inputs to the overall fair value measurement. Because certain securities trade in less liquid or illiquid markets with limited or no pricing information, the determination of fair value for these securities is inherently more difficult. In addition to the unobservable inputs, Level 3 fair value investments may include observable components, which are components that are actively quoted or can be validated to market-based sources.

The carrying amounts and estimated fair values of our financial instruments for which the disclosure of fair values is required, including financial assets and liabilities measured and carried at fair value on a recurring basis, with the exception of investment contracts, portions of other long-term investments and debt, which are disclosed later within this footnote, was summarized according to the hierarchy previously described, as follows (in millions):

	September 30, 2022				
	Level 1	Level 2	Level 3	NAV	Fair Value
<b>Assets</b>

### Valuation Methodologies

#### Cash and Cash Equivalents

The carrying amounts reported in the unaudited Condensed Consolidated Balance Sheets for these instruments approximate fair value.

#### Fixed Maturity Preferred and Equity Securities

We measure the fair value of our securities based on assumptions used by market participants in pricing the security. The most appropriate valuation methodology is selected based on the specific characteristics of the fixed maturity, preferred or equity security, and we will then consistently apply the valuation methodology to measure the security's fair value. Our fair value measurement is based on a market approach, which utilizes prices and other relevant information generated by market transactions involving identical or comparable securities. Sources of inputs to the market approach include third-party pricing services, independent broker quotations, or pricing matrices. We use observable and unobservable inputs in our valuation methodologies. Observable inputs include benchmark yields, reported trades, broker-dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, and reference data including market research publications. In addition, market indicators and industry and economic events are monitored and further market data will be acquired when certain thresholds are met.

For certain security types, additional inputs may be used, or some of the inputs described above may not be applicable. The significant input used in the fair value measurement of equity securities for which the market approach valuation technique is employed is yield for comparable securities. Increases or decreases in the yields would result in lower or higher, respectively, fair value measurements. For broker-quoted only securities, quotes from market makers or broker-dealers are obtained from sources recognized to be market participants. We believe the broker quotes are prices at which trades could be executed based on historical trades executed at broker-quoted or slightly higher prices.

We analyze the third-party valuation methodologies and related inputs to perform assessments to determine the appropriate level within the fair value hierarchy. However, we did not adjust prices received from third parties as of September 30, 2022 or December 31, 2021.

Certain equity investments are measured using NAV as a practical expedient in determining fair value.

#### *Derivative Financial Instruments*

The fair value of call options is based upon valuation pricing models, which represents what we would expect to receive or pay at the balance sheet date if we canceled the options, entered into offsetting positions, or exercised the options. Fair values for these instruments are determined internally, based on industry accepted valuation pricing models, which use market-observable inputs, including interest rates, yield curve volatilities, and other factors.

The fair value of futures contracts (specifically for fixed indexed annuity ("FIA") contracts) represents the cumulative unsettled variation margin (open trade equity, net of cash settlements), which represents what we would expect to receive or pay at the balance sheet date if we canceled the contracts or entered into offsetting positions. These contracts are classified as Level 1.

The fair value measurement of the FIA/indexed universal life ("IUL") embedded derivatives included in contractholder funds is determined through a combination of market observable information and significant unobservable inputs using the option budget method. The market observable inputs are the market value of option and treasury rates. The significant unobservable inputs are the budgeted option cost (i.e., the expected cost to purchase call options in future periods to fund the equity indexed linked feature), surrender rates, mortality multiplier and non-performance spread. The mortality multiplier at September 30, 2022 was applied to the 2012 Individual Annuity mortality tables. Increases or decreases in the market value of an option in isolation would result in a higher or lower, respectively, fair value measurement. Increases or decreases in treasury rates, mortality multiplier, surrender rates, or non-performance spread in isolation would result in a lower or higher fair value measurement, respectively. Generally, a change in any one unobservable input would not directly result in a change in any other unobservable input.

The fair value of the reinsurance-related embedded derivatives in the funds withheld reinsurance agreements with Kubera Insurance (SAC) Ltd. ("Kubera") (effective October 31, 2021, this agreement was novated from Kubera to Somerset Reinsurance Ltd. ("Somerset"), a certified third party reinsurer) and ASPIDA Life Re Ltd ("Aspida Re") are estimated based upon the fair value of the assets supporting the funds withheld from reinsurance liabilities. The fair value of the assets is based on a quoted market price of similar assets (Level 2), and therefore the fair value of the embedded derivative is based on market-observable inputs and classified as Level 2. See Note L *F&G Reinsurance* for further discussion on F&G reinsurance agreements.

#### *Other long-term investments*

We hold a fund-linked note, which provides for an additional payment at maturity based on the value of an embedded derivative based on the actual return of a dedicated return fund. Fair value of the embedded derivative is based on an unobservable input, the NAV of the fund at the balance sheet date. The embedded derivative is similar to a call option on the NAV of the fund with a strike price of zero since F&G will not be required to make any additional payments at maturity of the fund-linked note in order to receive the NAV of the fund on the maturity date. A Black-Scholes model determines the NAV of the fund as the fair value of the call option regardless of the values used for the other inputs to the option pricing model. The NAV of the fund is provided by the fund manager at the end of each calendar month and represents the value an investor would receive if it withdrew its investment on the balance sheet date. Therefore, the key unobservable input used in the Black-Scholes model is the value of the fund. As the value of the fund increases or decreases, the fair value of the embedded derivative will increase or decrease. See further discussion on the available-for-sale embedded derivative in Note E *Derivative Financial Instruments*.

The fair value of the credit-linked note is based on a weighted average of a broker quote and a discounted cash flow analysis. The discounted cash flow approach is based on the expected portfolio cash flows and amortization schedule reflecting investment expectations, adjusted for assumptions on the portfolio's default and recovery rates, and the note's discount rate. The fair value of the note is provided by the fund manager at the end of each quarter.

Quantitative information regarding significant unobservable inputs used for recurring Level 3 fair value measurements of financial instruments carried at fair value as of September 30, 2022 and December 31, 2021 are as follows:

	Fair Value at September 30, 2022		Valuation Technique	Unobservable Input(s)	Range (Weighted average) September 30, 2022

The following tables summarize changes to the Company's financial instruments carried at fair value and classified within Level 3 of the fair value hierarchy for the three and nine months ended September 30, 2022 and 2021. This summary excludes any impact of amortization of value of business acquired ("VOBA"), deferred acquisition cost ("DAC"), and deferred sales inducements ("DSI"). The gains and losses below may include changes in fair value due in part to observable inputs that are a component of the valuation methodology.

**Valuation Methodologies and Associated Inputs for Financial Instruments Not Carried at Fair Value**

The following discussion outlines the methodologies and assumptions used to determine the fair value of our financial instruments not carried at fair value. Considerable judgment is required to develop these assumptions used to measure fair value. Accordingly, the estimates shown are not necessarily indicative of the amounts that would be realized in a one-time, current market exchange of all of our financial instruments.

*Mortgage Loans*

The fair value of mortgage loans is established using a discounted cash flow method based on internal credit rating, maturity and future income. This yield-based approach is sourced from our third-party vendor. The internal ratings for mortgages in good standing are based on property type, location, market conditions, occupancy, debt service coverage, loan-to-value, quality of tenancy, borrower, and payment record. The inputs used to measure the fair value of our mortgage loans are classified as Level 3 within the fair value hierarchy.

*Investments in Unconsolidated affiliates*

In our F&G segment, the fair value of Investments in unconsolidated affiliates is determined using NAV as a practical expedient and are included in the NAV column in the table below. In our title segment, Investments in unconsolidated affiliates are accounted for under the equity method of accounting. In our title segment, Investments in unconsolidated affiliates were \$197 million and \$136 million as of September 30, 2022 and December 31, 2021, respectively.

*Policy Loans (included within Other long-term investments)*

Fair values for policy loans are estimated from a discounted cash flow analysis, using interest rates currently being offered for loans with similar credit risk. Loans with similar characteristics are aggregated for purposes of the calculations.

*Company Owned Life Insurance*

Company owned life insurance ("COLI") is a life insurance program used to finance certain employee benefit expenses. The fair value of COLI is based on net realizable value, which is generally cash surrender value. COLI is classified as Level 3 within the fair value hierarchy.

*Other Invested Assets (included within Other long-term investments)*

The fair value of bank loans is estimated using a discounted cash flow method with the discount rate based on weighted average cost of capital ("WACC"). This yield-based approach is sourced from a third-party vendor and the WACC establishes a market participant discount rate by determining the hypothetical capital structure for the asset should it be underwritten as of each period end. Other invested assets are classified as Level 3 within the fair value hierarchy.

*Investment Contracts*

Investment contracts include deferred annuities (FIAs and fixed rate annuities), indexed IULs, funding agreements and pension risk transfer solutions ("PRT") and immediate annuity contracts without life contingencies. The FIA/ IUL embedded derivatives, included in contractholder funds, are excluded as they are carried at fair value. The fair value of the FIA, fixed rate annuity and IUL contracts is based on their cash surrender value (i.e. the cost the Company would incur to extinguish the liability) as these contracts are generally issued without an annuitization date. The fair value of funding agreements and PRT and immediate annuity contracts without life contingencies is derived by calculating a new fair value interest rate using the updated yield curve and treasury spreads as of the respective reporting date. The Company is not required to, and has not, estimated the fair value of the liabilities under contracts that involve significant mortality or morbidity risks, as these liabilities fall within the definition of insurance contracts that are exceptions from financial instruments that require disclosures of fair value.

*Other*

Federal Home Loan Bank of Atlanta ("FHLB") common stock, Accounts receivable and Notes receivable are carried at cost, which approximates fair value. FHLB common stock is classified as Level 2 within the fair value hierarchy. Accounts receivable and Notes receivable are classified as Level 3 within the fair value hierarchy.

*Debt*

The fair value of debt is based on quoted market prices. The inputs used to measure the fair value of our outstanding debt are classified as Level 2 within the fair value hierarchy.

The following tables provide the carrying value and estimated fair value of our financial instruments that are carried on the unaudited Condensed Consolidated Balance Sheets at amounts other than fair value, summarized according to the fair value hierarchy previously described.

**September 30, 2022**

For investments for which NAV is used as a practical expedient for fair value, we do not have any significant restrictions in our ability to liquidate our positions in these investments, other than obtaining general partner approval, nor do we believe it is probable a price less than NAV would be received in the event of a liquidation.

We review the fair value hierarchy classifications each reporting period. Changes in the observability of the valuation attributes may result in a reclassification of certain financial assets or liabilities. Such reclassifications are reported as transfers in and out of Level 3, or between other levels, at the beginning fair value for the reporting period in which the changes occur. The transfers into and out of Level 3 were related to changes in the primary pricing source and changes in the observability of external information used in determining the fair value.

**Note D — Investments**

Our fixed maturity securities investments have been designated as available-for-sale ("AFS"), and are carried at fair value, net of allowance for expected credit losses, with unrealized gains and losses included in AOCI, net of associated adjustments for VOBA, DAC, DSI, unearned revenue ("UREV"), SOP 03-1 reserves, and deferred income taxes. Our preferred and equity securities investments are carried at fair value with unrealized gains and losses included in net earnings. The Company's consolidated investments at September 30, 2022 and December 31, 2021 are summarized as follows (in millions):

	September 30, 2022				
	Amortized Cost	Allowance for Expected Credit Losses	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value

<b>Total available-for-sale securities</b>	<b>\$ 30,705</b>	<b>\$ (8)</b>	<b>\$ 1,518</b>	<b>\$ (225)</b>	<b>\$ 31,990</b>

Securities held on deposit with various state regulatory authorities had a fair value of \$16,517 million and \$22,343 million at September 30, 2022 and December 31, 2021, respectively.

As of September 30, 2022 and December 31, 2021, the Company held no material investments that were non-income producing for a period greater than twelve months.

As of September 30, 2022 and December 31, 2021, the Company's accrued interest receivable balance was \$330 million and \$253 million, respectively. Accrued interest receivable is classified within Prepaid expenses and other assets within the unaudited Condensed Consolidated Balance Sheets.

In accordance with our FHLB agreements, the investments supporting the funding agreement liabilities are pledged as collateral to secure the FHLB funding agreement liabilities and are not available to us for general purposes. The collateral investments had a fair value of \$3,125 million and \$2,469 million as of September 30, 2022 and December 31, 2021, respectively.

The amortized cost and fair value of fixed maturity securities by contractual maturities, as applicable, are shown below. Actual maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations.

### *Allowance for Expected Credit Loss*

We regularly review AFS securities for declines in fair value that we determine to be credit related. For our fixed maturity securities, we generally consider the following in determining whether our unrealized losses are credit related, and if so, the magnitude of the credit loss:

- The extent to which the fair value is less than the amortized cost basis;
- The reasons for the decline in value (credit event, currency or interest-rate related, including general credit spread widening);
- The financial condition of and near-term prospects of the issuer (including issuer's current credit rating and the probability of full recovery of principal based upon the issuer's financial strength);
- Current delinquencies and nonperforming assets of underlying collateral;
- Expected future default rates;
- Collateral value by vintage, geographic region, industry concentration or property type;
- Subordination levels or other credit enhancements as of the balance sheet date as compared to origination; and
- Contractual and regulatory cash obligations and the issuer's plans to meet such obligations.

We recognize an allowance for current expected credit losses on fixed maturity securities in an unrealized loss position when it is determined, using the factors discussed above, a component of the unrealized loss is related to credit. We measure the credit loss using a discounted cash flow model that utilizes the single best estimate cash flow and the recognized credit loss is limited to the total unrealized loss on the security (i.e. the fair value floor). Cash flows are discounted using the implicit yield of bonds at their time of purchase and the current book yield for asset and mortgage backed securities as well as variable rate securities. We recognize the expected credit losses in Recognized gains and losses, net in the Consolidated Statements of Earnings, with an offset for the amount of non-credit impairments recognized in AOCI. We do not measure a credit loss allowance on accrued investment income because we write-off accrued interest through Interest and investment income when collectability concerns arise.

We consider the following in determining whether write-offs of a security's amortized cost is necessary:

- We believe amounts related to securities have become uncollectible;

- We intend to sell a security; or
- It is more likely than not that we will be required to sell a security prior to recovery.

If we intend to sell a fixed maturity security or it is more likely than not that we will be required to sell the security before recovery of its amortized cost basis and the fair value of the security is below amortized cost, we will write down the security to current fair value, with a corresponding charge, net of any amount previously recognized as an allowance for expected credit loss, to Recognized gains and losses, net in the accompanying Consolidated Statements of Earnings. If we do not intend to sell a fixed maturity security or it is more likely than not that we will not be required to sell a fixed maturity security before recovery of its amortized cost basis but believe amounts related to a security are uncollectible (generally based on proximity to expected credit loss), an impairment is deemed to have occurred and the amortized cost is written down to the estimated recovery value with a corresponding charge, net of any amount previously recognized as an allowance for expected credit loss, to Recognized gains and losses, net in the accompanying Consolidated Statements of Earnings. The remainder of unrealized loss is held in AOCI. As of September 30, 2022 and December 31, 2021, our allowance for expected credit losses for AFS securities was \$22 million and \$8 million, respectively.

Purchased credit deteriorated ("PCD") financial assets are AFS securities purchased at a discount, where part of that discount is attributable to credit. Credit loss allowances are calculated for these securities as of the date of their acquisition, with the initial allowance serving to increase amortized cost. There were no purchases of PCD AFS securities during the three and nine months ended September 30, 2022 or 2021.

The fair value and gross unrealized losses of AFS securities, excluding securities in an unrealized loss position with an allowance for expected credit loss, aggregated by investment category and duration of fair value below amortized cost as of September 30, 2022 and December 31, 2021 were as follows (dollars in millions):

	September 30, 2022

<b>Total available-for-sale securities</b>	<b>\$ 11,443</b>	<b>\$ (185)</b>	<b>\$ 646</b>	<b>\$ (40)</b>	<b>\$ 12,089</b>	<b>\$ (225)</b>
Total number of available-for-sale securities in an unrealized loss position less than twelve months						2,056
Total number of available-for-sale securities in an unrealized loss position twelve months or longer						68
Total number of available-for-sale securities in an unrealized loss position						2,124

We determined the increase in unrealized losses as of September 30, 2022 was caused by higher treasury rates as well as wider spreads. This is in part due to the Federal Reserve's action to increase rates in efforts to combat inflation. Inflation in the first three quarters of 2022 has been compounded by supply chain issues stemming from additional COVID-19 restrictions in China, as well as higher energy prices as a result of the Russian-Ukrainian conflict. For securities in an unrealized loss position as of September 30, 2022, our allowance for expected credit loss was \$22 million. We believe that unrealized loss position for which we have not recorded an allowance for expected credit loss as of September 30, 2022 was primarily attributable to interest rate increases, near-term illiquidity, and uncertainty caused by Russia's invasion of Ukraine as opposed to issuer specific credit concerns.

## Mortgage Loans

Our mortgage loans are collateralized by commercial and residential properties.

### Commercial Mortgage Loans

Commercial mortgage loans ("CMLs") represented approximately 5% of our total investments as of September 30, 2022. We primarily invest in mortgage loans on income producing properties including industrial properties, retail buildings, multifamily properties and office buildings. We diversify our CML portfolio by geographic region and property type to attempt to reduce concentration risk. We continuously evaluate CMLs based on relevant current information to ensure properties are performing at a consistent and acceptable level to secure the related debt. The distribution of CMLs, gross of valuation allowances, by property type and geographic region is reflected in the following tables (dollars in millions):

Property Type:	September 30, 2022		December 31, 2021	
	Gross Carrying Value	% of Total	Gross Carrying Value	% of Total
Hotel	\$ 18	1 %	\$ 19	1 %

Allowance for expected credit loss	(8)		(6)	
<b>Total commercial mortgage loans</b>	<b>\$ 2,333</b>		<b>\$ 2,168</b>	

Loan-to-value ("LTV") and debt service coverage ("DSC") ratios are measures commonly used to assess the risk and quality of mortgage loans. The LTV ratio is expressed as a percentage of the amount of the loan relative to the value of the underlying property. A LTV ratio in excess of 100% indicates the unpaid loan amount exceeds the underlying collateral. The DSC ratio, based upon the most recently received financial statements, is expressed as a percentage of the amount of a property's net income to its debt service payments. A DSC ratio of less than 1.00 indicates that a property's operations do not generate sufficient income to cover debt payments.

The following tables present the recorded investment in CMLs by LTV and DSC ratio categories and estimated fair value by the indicated loan-to-value ratios at September 30, 2022 and December 31, 2021 presented at gross carrying value (dollars in millions):

	Debt-Service Coverage Ratios			Total Amount	% of Total	Estimated Fair Value	% of Total
	>1.25	1.00 - 1.25	<1.00				
<b>September 30, 2022</b>							
LTV Ratios:							
Less than 50%	\$ 492	\$ 5	\$ 11	\$ 508	22 %	\$ 475	24 %
50% to 60%	669	—	—	669	29 %	582	29 %
60% to 75%	1,155	—	—	1,155	48 %	954	46 %
75% to 85%	\$ —	\$ —	\$ 9	\$ 9	1 %	6	1 %
Commercial mortgage loans	\$ 2,316	\$ 5	\$ 20	\$ 2,341	100 %	\$ 2,017	100 %
<b>December 31, 2021</b>							
LTV Ratios:							
Less than 50%	\$ 626	\$ 33	\$ 9	\$ 668	31 %	\$ 745	33 %
50% to 60%	470	—	—	470	22 %	481	21 %
60% to 75%	1,036	—	—	1,036	47 %	1,039	46 %
Commercial mortgage loans	\$ 2,132	\$ 33	\$ 9	\$ 2,174	100 %	\$ 2,265	100 %

We recognize a mortgage loan as delinquent when payments on the loan are greater than 30 days past due. At September 30, 2022 we had one CML that was delinquent in principal or interest payments as shown in the risk rating exposure table below. At December 31, 2021 we had no CMLs that were delinquent in principal or interest payments.

### Residential Mortgage Loans

Residential mortgage loans ("RMLs") represented approximately 5% of our total investments as of September 30, 2022. Our residential mortgage loans are closed end, amortizing loans and 100% of the properties are located in the United States. We diversify our RML portfolio by state to attempt to reduce concentration risk. The distribution of RMLs by state with highest-to-lowest concentration are reflected in the following tables (dollars in millions):

U.S. State:	September 30, 2022	
	Amortized Cost	% of Total
Florida	\$ 331	15 %
Texas	232	10 %
New Jersey	175	8 %
Pennsylvania	155	7 %
California	145	7 %
New York	140	6 %
Georgia	126	6 %
All Other States (1)	926	41 %
<b>Total residential mortgage loans</b>	<b>\$ 2,230</b>	<b>100 %</b>

(1) The individual concentration of each state is equal to or less than 5% as of September 30, 2022.

U.S. State:	December 31, 2021	
	Amortized Cost	% of Total
Florida	\$ 231	15 %
Texas	167	10 %
New Jersey	150	10 %
All other states (1)	1,027	65 %
<b>Total residential mortgage loans</b>	<b>\$ 1,575</b>	<b>100 %</b>

(1) The individual concentration of each state is less than 9% as of December 31, 2021.

Residential mortgage loans have a primary credit quality indicator of either a performing or nonperforming loan. We define non-performing residential mortgage loans as those that are 90 or more days past due or in nonaccrual status, which is assessed monthly. The credit quality of RML's as of September 30, 2022 and December 31, 2021, was as follows (dollars in millions):

Performance indicators:	September 30, 2022		December 31, 2021	
	Carrying Value	% of Total	Carrying Value	% of Total
Performing	\$ 2,165	97 %	\$ 1,533	95 %
Non-performing	65	3 %	73	5 %
<b>Total residential mortgage loans, gross of valuation allowance</b>	<b>\$ 2,230</b>	<b>100 %</b>	<b>\$ 1,606</b>	<b>100 %</b>
Allowance for expected loan loss	(30)	— %	(25)	— %
<b>Total residential mortgage loans</b>	<b>\$ 2,200</b>	<b>100 %</b>	<b>\$ 1,581</b>	<b>100 %</b>

Non-accrual loans by amortized cost as of September 30, 2022 and December 31, 2021, were as follows (in millions):

Amortized cost of loans on non-accrual	September 30, 2022		December 31, 2021	
Residential mortgage:	\$	64	\$	72
Commercial mortgage:		9		—
<b>Total non-accrual loans</b>	<b>\$</b>	<b>73</b>	<b>\$</b>	<b>72</b>

Immaterial interest income was recognized on non-accrual financing receivables for the three and nine months ended September 30, 2022.

It is our policy to cease to accrue interest on loans that are over 90 days delinquent. For loans less than 90 days delinquent, interest is accrued unless it is determined that the accrued interest is not collectible. If a loan becomes over 90 days delinquent, it is our general policy to initiate foreclosure proceedings unless a workout arrangement to bring the loan current is in place. As of September 30, 2022 and December 31, 2021, we had \$64 million and \$72 million, respectively, of residential mortgage loans that were over 90 days past due, of which \$33 million and \$39 million were in the process of foreclosure as of September 30, 2022 and December 31, 2021, respectively.

#### *Allowance for Expected Credit Loss*

We estimate expected credit losses for our commercial and residential mortgage loan portfolios using a probability of default/loss given default model. Significant inputs to this model include, where applicable, the loans' current performance, underlying collateral type, location, contractual life, LTV, DSC and Debt to Income or FICO. The model projects losses using a two year reasonable and supportable forecast and then reverts over a three year period to market-wide historical loss experience. Changes in our allowance for expected credit losses on mortgage loans are recognized in Recognized gains and losses, net in the accompanying unaudited Condensed Consolidated Statements of Earnings.

The allowances for our mortgage loan portfolio is summarized as follows (in millions):

	Three months ended September 30, 2022			Nine months ended September 30, 2022		
	Residential Mortgage	Commercial Mortgage	Total	Residential Mortgage	Commercial Mortgage	Total
<b>Beginning Balance</b>	\$ 29	\$ 6	\$ 35	\$ 25	\$ 6	\$ 31
Provision for loan losses	1	2	3	5	2	7
<b>Ending Balance</b>	<u>\$ 30</u>	<u>\$ 8</u>	<u>\$ 38</u>	<u>\$ 30</u>	<u>\$ 8</u>	<u>\$ 38</u>

	Three months ended September 30, 2021			Nine months ended September 30, 2021		
	Residential Mortgage	Commercial Mortgage	Total	Residential Mortgage	Commercial Mortgage	Total
<b>Beginning Balance</b>	\$ 28	\$ 6	\$ 34	\$ 37	\$ 2	\$ 39
Provision for loan losses	(1)	—	(1)	(10)	4	(6)
<b>Ending Balance</b>	<u>\$ 27</u>	<u>\$ 6</u>	<u>\$ 33</u>	<u>\$ 27</u>	<u>\$ 6</u>	<u>\$ 33</u>

An allowance for expected credit loss is not measured on accrued interest income for commercial mortgage loans as we have a process to write-off interest on loans that enter into non-accrual status (over 90 days past due). Allowances for expected credit losses are measured on accrued interest income for residential mortgage loans and were immaterial as of September 30, 2022 and December 31, 2021.

### Interest and Investment Income

The major sources of Interest and investment income reported on the accompanying unaudited Condensed Consolidated Statements of Earnings were as follows (in millions):

	Three months ended		Nine months ended	
	September 30, 2022	September 30, 2021	September 30, 2022	September 30, 2021
Fixed maturity securities, available-for-sale	\$ 379	\$ 313	\$ 1,062	\$ 944
Equity securities	7	6	23	16

Investment expense	(50)	(43)	(145)	(125)
<b>Interest and investment income</b>	<b>\$ 411</b>	<b>\$ 508</b>	<b>\$ 1,352</b>	<b>\$ 1,424</b>

### Recognized Gains and Losses, net

Details underlying Recognized gains and losses, net reported on the accompanying unaudited Condensed Consolidated Statements of Earnings were as follows (in millions):

	Three months ended		Nine months ended	
	September 30, 2022	September 30, 2021	September 30, 2022	September 30, 2021
Net realized (losses) gains on fixed maturity available-for-sale securities	\$ (57)	\$ 22	\$ (153)	\$ 75
Net realized/unrealized losses on equity securities (1)	(51)	(193)	(423)	(281)
Net realized/unrealized (losses) gains on preferred securities (2)	(8)	(4)	(216)	2
Realized (losses) gains on other invested assets	(54)	—	(64)	8
Change in allowance for expected credit losses	(8)	1	(20)	7
Derivatives and embedded derivatives:				
Realized (losses) gains on certain derivative instruments	(74)	138	(59)	318
Unrealized losses on certain derivative instruments	(70)	(141)	(787)	(34)
Change in fair value of reinsurance related embedded derivatives (3)	94	23	357	23
Change in fair value of other derivatives and embedded derivatives	(2)	—	(10)	3
Realized (losses) gains on derivatives and embedded derivatives	(52)	20	(499)	310
<b>Recognized gains and losses, net</b>	<b>\$ (230)</b>	<b>\$ (154)</b>	<b>\$ (1,375)</b>	<b>\$ 121</b>

(1) Includes net valuation losses of \$52 million and \$194 million for the three months ended September 30, 2022 and 2021, respectively, and net valuation losses of \$440 million and \$285 million for the nine months ended September 30, 2022 and 2021, respectively.

(2) Includes net valuation losses of \$6 million and \$1 million for the three months ended September 30, 2022 and 2021, respectively, and net valuation (losses) gains of \$(213) million and \$4 million for the nine months ended September 30, 2022 and 2021, respectively.

(3) Change in fair value of reinsurance related embedded derivatives is due to activity related to the reinsurance treaties with Kubera (novated from Kubera to Sommerset effective October 31, 2021) and Aspida Re.

The proceeds from the sale of fixed-maturity securities and the gross gains and losses associated with those transactions were as follows (in millions):

	Three months ended		Nine months ended	
	September 30, 2022	September 30, 2021	September 30, 2022	September 30, 2021
Proceeds	\$ 731	\$ 1,816	\$ 2,566	\$ 2,685
Gross gains	3	30	8	98
Gross losses	(58)	(8)	(157)	(24)

### ***Unconsolidated Variable Interest Entities***

We own investments in VIEs that are not consolidated within our financial statements. A VIE is an entity that does not have sufficient equity to finance its own activities without additional financial support, where investors lack certain characteristics of a controlling financial interest, or where the entity is structured with non-substantive voting rights. VIEs are consolidated by their 'primary beneficiary', a designation given to an entity that receives both the benefits from the VIE as well as the substantive power to make its key economic decisions. While we participate in the benefits from VIEs in which we invest, but do not consolidate, the substantive power to make the key economic decisions for each respective VIE resides with entities not under our common control. It is for this reason that we are not considered the primary beneficiary for the VIE investments that are not consolidated.

We invest in various limited partnerships and limited liability companies primarily as a passive investor. These investments are primarily in credit funds with a bias towards current income, real assets, or private equity. Limited partnership and limited liability company interests are accounted for under the equity method and are included in Investments in unconsolidated affiliates on our unaudited Condensed Consolidated Balance Sheets. In addition, we invest in structured investments, which may be VIEs, but for which we are not the primary beneficiary. These structured investments typically invest in fixed income investments and are managed by third parties and include asset-backed securities, commercial mortgage-backed securities and residential mortgage-backed securities included in fixed maturity securities available for sale on our unaudited Condensed Consolidated Balance Sheets.

Our maximum exposure to loss with respect to these VIEs is limited to the investment carrying amounts reported in our unaudited Condensed Consolidated Balance Sheets for limited partnerships and the amortized costs of our fixed maturity securities, in addition to any required unfunded commitments (also refer to Note F *Commitments and Contingencies*).

The following table summarizes the carrying value and the maximum loss exposure of our unconsolidated VIEs as of September 30, 2022 and December 31, 2021 (in millions).

	September 30, 2022		December 31, 2021	
	Carrying Value	Maximum Loss Exposure	Carrying Value	Maximum Loss Exposure
Investment in limited partnerships	\$ 2,789	\$ 4,403	\$ 2,350	\$ 3,496
Fixed maturity securities	14,524	16,177	12,382	12,802
Total unconsolidated VIE investments	\$ 17,313	\$ 20,580	\$ 14,732	\$ 16,298

**Concentrations**

Our underlying investment concentrations that exceed 10% of shareholders equity are as follows (in millions):

	<b>September 30, 2022</b>
Blackstone Wave Asset Holdco (1)	\$ 902

(1) Represents a special purpose vehicle that holds investments in numerous limited partnership investments whose underlying investments are further diversified by holding interest in multiple individual investments and industries.

**Investment in Cannae Holdings, Inc. ("Cannae")**

Included in equity securities as of December 31, 2021 were 5,775,598 shares of Cannae common stock (NYSE: CNNE). The fair value of this investment based on quoted market prices as of December 31, 2021 was \$203 million. During the nine months ended September 30, 2022, we sold all 5,775,598 shares of CNNE common stock back to Cannae for approximately \$109 million in the aggregate. As of September 30, 2022, we held no shares of CNNE common stock.

**Note E — Derivative Financial Instruments**

The carrying amounts of derivative instruments, including derivative instruments embedded in FIA and IUL contracts, and reinsurance is as follows (in millions):

	September 30, 2022	December 31, 2021
<b>Assets:</b>		
<b>Derivative investments:</b>		
Call options	\$ 108	\$ 816
<b>Other long-term investments:</b>		
Other embedded derivatives	22	33

<b>Benefits and other changes in policy reserves:</b>				
FIA/ IUL embedded derivatives	\$ (166)	\$ (320)	\$ (1,108)	\$ 35

**Additional Disclosures**
**FIA/IUL Embedded Derivative and Call Options and Futures**

We have FIA and IUL contracts that permit the holder to elect an interest rate return or an equity index linked component, where interest credited to the contracts is linked to the performance of various equity indices, primarily the S&P 500 Index. This feature represents an embedded derivative under GAAP. The FIA/IUL embedded derivatives are valued at fair value and included in the liability for contractholder funds in the accompanying unaudited Condensed Consolidated Balance Sheets with changes in fair value included as a component of Benefits and other changes in policy reserves in the unaudited Condensed Consolidated Statements of Earnings. See a description of the fair value methodology used in Note C *Fair Value of Financial Instruments*.

We purchase derivatives consisting of a combination of call options and futures contracts (specifically for FIA contracts) on the applicable market indices to fund the index credits due to FIA/IUL contractholders. The

call options are one, two, three, and five year options purchased to match the funding requirements of the underlying policies. On the respective anniversary dates of the indexed policies, the index used to compute the interest credit is reset and we purchase new call options to fund the next index credit. We manage the cost of these purchases through the terms of our FIA/IUL contracts, which permit us to change caps, spreads or participation rates, subject to guaranteed minimums, on each contract's anniversary date. The change in the fair value of the call options and futures contracts is generally designed to offset the portion of the change in the fair value of the FIA/IUL embedded derivatives related to index performance through the current credit period. The call options and futures contracts are marked to fair value with the change in fair value included as a component of Recognized gains and losses, net, in the accompanying unaudited Condensed Consolidated Statements of Earnings. The change in fair value of the call options and futures contracts includes the gains and losses recognized at the expiration of the instrument term or upon early termination and the changes in fair value of open positions.

Other market exposures are hedged periodically depending on market conditions and our risk tolerance. Our FIA/IUL hedging strategy economically hedges the equity returns and exposes us to the risk that unhedged market exposures result in divergence between changes in the fair value of the liabilities and the hedging assets. We use a variety of techniques, including direct estimation of market sensitivities, to monitor this risk daily. We intend to continue to adjust the hedging strategy as market conditions and our risk tolerance changes.

#### Credit Risk

We are exposed to credit loss in the event of non-performance by our counterparties on the call options and reflect assumptions regarding this non-performance risk in the fair value of the call options. The non-performance risk is the net counterparty exposure based on the fair value of the open contracts less collateral held. We maintain a policy of requiring all derivative contracts to be governed by an International Swaps and Derivatives Association ("ISDA") Master Agreement.

Information regarding our exposure to credit loss on the call options we hold is presented in the following table (in millions):

Counterparty	Credit Rating (Fitch/Moody's/S&P) (1)	September 30, 2022			
		Notional Amount	Fair Value	Collateral	Net Credit Risk
Merrill Lynch	AA/*A+	\$ 3,937	\$ 14	\$ —	\$ 14

### Collateral Agreements

We are required to maintain minimum ratings as a matter of routine practice as part of our over-the-counter derivative agreements on ISDA forms. Under some ISDA agreements, we have agreed to maintain certain financial strength ratings. A downgrade below these levels provides the counterparty under the agreement the right to terminate the open option contracts between the parties, at which time any amounts payable by us or the counterparty would be dependent on the market value of the underlying option contracts. Our current rating does not allow any counterparty the right to terminate ISDA agreements. In certain transactions, both us and the counterparty have entered into a collateral support agreement requiring either party to post collateral when the net exposures exceed pre-determined thresholds. For all counterparties, except Merrill Lynch, this threshold is set to zero. As of September 30, 2022 and December 31, 2021 counterparties posted \$116 million and \$790 million, respectively, of collateral of which \$91 million and \$576 million, respectively, is included in cash and cash equivalents with an associated payable for this collateral included in accounts payable and accrued liabilities on the unaudited Condensed Consolidated Balance Sheets. Accordingly, the maximum amount of loss due to credit risk that we would incur if parties to the call options failed completely to perform according to the terms of the contracts was \$14 million at September 30, 2022 and \$42 million at December 31, 2021.

We are required to pay counterparties the effective federal funds rate each day for cash collateral posted to F&G for daily mark to market margin changes. We reinvest derivative cash collateral to reduce the interest cost. Cash collateral is invested in overnight investment sweep products, which are included in cash and cash equivalents in the accompanying unaudited Condensed Consolidated Balance Sheets.

We held 224 and 329 futures contracts at September 30, 2022 and December 31, 2021, respectively. The fair value of the futures contracts represents the cumulative unsettled variation margin (open trade equity, net of cash settlements). We provide cash collateral to the counterparties for the initial and variation margin on the futures contracts, which is included in cash and cash equivalents in the accompanying unaudited Condensed Consolidated Balance Sheets. The amount of cash collateral held by the counterparties for such contracts was \$2 million and \$3 million at September 30, 2022 and December 31, 2021, respectively.

### Reinsurance Related Embedded Derivatives

F&G entered into a reinsurance agreement with Kubera effective December 31, 2018, to cede certain multi-year guaranteed annuity ("MYGA") and deferred annuity business on a coinsurance funds withheld basis, net of applicable existing reinsurance. Effective October 31, 2021, this agreement was novated from Kubera to Somerset, a certified third-party reinsurer. Additionally, F&G entered into a reinsurance agreement with Aspida Re effective January 1, 2021, and amended in August 2021 and September 2022, to cede a quota share of certain deferred annuity business on a funds withheld basis. Fair value movements in the funds withheld balances associated with these arrangements creates an obligation for F&G to pay Somerset and Aspida Re at a later date, which results in embedded derivatives. These embedded derivatives are considered total return swaps with contractual returns that are attributable to the assets and liabilities associated with the reinsurance arrangements. The fair value of the total return swap is based on the change in fair value of the underlying

assets held in the funds withheld portfolio. Investment results for the assets that support the coinsurance with funds withheld reinsurance arrangements, including gains and losses from sales, were passed directly to the reinsurers pursuant to contractual terms of the reinsurance arrangements. The reinsurance related embedded derivatives are reported in prepaid expenses and other assets if in a net gain position, or accounts payable and accrued liabilities, if in a net loss position, on the unaudited Condensed Consolidated Balance Sheets and the related gains or losses are reported in Recognized gains and losses, net on the unaudited Condensed Consolidated Statements of Earnings.

**Note F — Commitments and Contingencies**  
**Legal and Regulatory Contingencies**

In the ordinary course of business, we are involved in various pending and threatened litigation matters related to our operations, some of which include claims for punitive or exemplary damages. With respect to our title insurance operations, this customary litigation includes but is not limited to a wide variety of cases arising out of or related to title and escrow claims, for which we make provisions through our loss reserves. See Note B *Summary of Reserve for Title Claim Losses* for further discussion. Additionally, like other companies, our ordinary course litigation includes a number of class action and purported class action lawsuits, which make allegations related to aspects of our operations. We believe that no actions, other than the matters discussed below, if any, depart from customary litigation incidental to our business.

We review lawsuits and other legal and regulatory matters (collectively “legal proceedings”) on an ongoing basis when making accrual and disclosure decisions. When assessing reasonably possible and probable outcomes, management bases its decision on its assessment of the ultimate outcome assuming all appeals have been exhausted. For legal proceedings in which it has been determined that a loss is both probable and reasonably estimable, a liability based on known facts and that represents our best estimate has been recorded. Our accrual for legal and regulatory matters was \$16 million and \$12 million as of September 30, 2022 and December 31, 2021, respectively. None of the amounts we have currently recorded are considered to be material to our financial condition individually or in the aggregate. Actual losses may materially differ from the amounts recorded and the ultimate outcome of our pending legal proceedings is generally not yet determinable. While some of these matters could be material to our operating results or cash flows for any particular period if an unfavorable outcome results, at present we do not believe that the ultimate resolution of currently pending legal proceedings, either individually or in the aggregate, will have a material adverse effect on our financial condition.

Two lawsuits have been filed related to FNF’s acquisition of F&G. On August 4, 2020, a stockholder derivative lawsuit styled, *City of Miami General Employees’ and Sanitation Employees’ Retirement Trust v. Fidelity National Financial, et al.*, was filed in the Court of Chancery of the State of Delaware against the Company, its Board of Directors and others alleging breach of fiduciary duties as directors and officers relating to FNF’s acquisition of F&G. The Company’s Board of Directors (“Board”) designated a Special Litigation Committee (the “SLC”) consisting of three of the Board’s Directors, and authorized the SLC, among other things, to investigate and evaluate the claims and allegations asserted in the lawsuit. The Board gave the SLC the sole authority and power to consider and determine whether or not prosecution of the claims asserted in the lawsuit is in the best interest of the Company and its shareholders, and what action the Company should take with respect to the lawsuit. On January 24, 2022, the SLC, acting on behalf of FNF, and the other parties to the lawsuit reached an agreement to settle the action subject to various terms and conditions. On June 21, 2022, an order was entered approving the settlement and dismissing the case with prejudice.

On August 17, 2020, a lawsuit styled, *In the Matter of FGL Holdings*, was filed in the Grand Court of the Cayman Islands related to FNF’s acquisition of F&G where dissenting shareholders, Kingfishers LP, Kingstown 1740 Fund LP, Kingstown Partners II LP, Kingstown Partners Master Ltd., and Ktown LP, asserted statutory appraisal rights relative to their ownership of 12,000,000 shares of F&G stock. They sought a judicial determination of the fair value of their shares of F&G stock as of the date of valuation under the law of the Cayman Islands, together with interest. On September 5, 2022 the Grand Court of the Cayman Islands decided in favor of F&G. The dissenters failed to appeal, and their appeal period expired on October 20, 2022.

From time to time we receive inquiries and requests for information from state insurance departments, attorneys general and other regulatory agencies about various matters relating to our business. Sometimes these take the form of civil investigative demands or subpoenas. We cooperate with all such inquiries and we have responded to or are currently responding to inquiries from multiple governmental agencies. Also, regulators and courts have been dealing with issues arising from foreclosures and related processes and documentation. Various governmental entities are studying the title insurance product, market, pricing, and business practices,

and potential regulatory and legislative changes, which may materially affect our business and operations. From time to time, we are assessed fines for violations of regulations or other matters or enter into settlements with such authorities, which may require us to pay fines or claims or take other actions. We do not anticipate such fines and settlements, either individually or in the aggregate, will have a material adverse effect on our financial condition.

### F&G Commitments

In our F&G segment, we have unfunded investment commitments as of September 30, 2022 based upon the timing of when investments are executed compared to when the actual investments are funded, as some investments require that funding occur over a period of months or years. A summary of unfunded commitments by invested asset class as of September 30, 2022 is included below (in millions):

Asset Type	September 30, 2022
<b>Unconsolidated VIEs:</b>	
Limited partnerships	\$ 1,615
Whole loans	459
Fixed maturity securities, ABS	150
Other fixed maturity securities, AFS	104
Commercial mortgage loans	12
Other assets	126
Residential mortgage loans	4
Committed amounts included in liabilities	3
<b>Total</b>	<b>\$ 2,473</b>

### Note G — Dividends

On November 3, 2022, our Board of Directors declared cash dividends of \$0.45 per share, payable on December 30, 2022, to FNF common shareholders of record as of December 16, 2022.

### Note H — Segment Information

Summarized financial information concerning our reportable segments is shown in the following tables.

As of and for the three months ended September 30, 2022:

	Title	F&G	Corporate and Other	Total
	(In millions)			
Title premiums	\$ 1,654	\$ —	\$ —	\$ 1,654

The activities in our segments include the following:

- *Title*. This segment consists of the operations of our title insurance underwriters and related businesses. This segment provides core title insurance and escrow and other title-related services including loan sub-servicing, valuations, default services, and home warranty products.
- *F&G*. This segment primarily consists of the operations of our annuities and life insurance related businesses. This segment issues a broad portfolio of annuity and life products, including deferred annuities (fixed indexed and fixed rate annuities), immediate annuities and indexed universal life insurance. This segment also provides funding agreements and PRT solutions.
- *Corporate and Other*. This segment consists of the operations of the parent holding company, our real estate technology subsidiaries and our remaining real estate brokerage businesses. This segment also includes certain other unallocated corporate overhead expenses and eliminations of revenues and expenses between it and our Title segment.

#### Note I — Supplemental Cash Flow Information

The following supplemental cash flow information is provided with respect to certain cash payment and non-cash investing and financing activities (in millions).

	Nine months ended September 30,	
	2022	2021
Cash paid for:		
Interest	\$ 99	\$ 85
Income taxes	293	488
Deferred sales inducements	60	65
Non-cash investing and financing activities:		
Change in proceeds of sales of investments available for sale receivable in period	150	(215)
Change in purchases of investments available for sale payable in period	157	465
Lease liabilities recognized in exchange for lease right-of-use assets	59	32
Remeasurement of lease liabilities	52	65

**Note J — Revenue Recognition**
**Disaggregation of Revenue**

Total revenues			\$ 3,207	\$ 3,892	\$ 9,003	\$ 10,846

Our Direct title insurance premiums are recognized as revenue at the time of closing of the underlying transaction as the earnings process is then considered complete. Regulation of title insurance rates varies by state. Premiums are charged to customers based on rates predetermined in coordination with each states' respective Department of Insurance. Cash associated with such revenue is typically collected at closing of the underlying real estate transaction. Premium revenues from agency title operations are recognized when the underlying title order and transaction closing, if applicable, are complete.

Revenues from our home warranty business are generated from contracts with customers to provide warranty for major home appliances. Substantially all of our home warranty contracts are one year in length and revenue is recognized ratably over the term of the contract.

Escrow fees and Other title-related fees and income in our Title segment are closely related to Direct title insurance premiums and are primarily associated with managing the closing of real estate transactions, including the processing of funds on behalf of the transaction participants, gathering and recording the required closing documents, providing notary and home inspection services, and other real estate or title-related activities. Revenue is primarily recognized upon closing of the underlying real estate transaction or completion of services. Cash associated with such revenue is typically collected at closing.

Revenues from ServiceLink, excluding its title premiums, escrow fees and loan subservicing fees primarily include revenues from real estate appraisal services and foreclosure processing and facilitation services. Revenues from real estate appraisal services are recognized when all appraisal work is complete, a

final report is issued to the client and the client is billed. Revenues from foreclosure processing and facilitation services are primarily recognized upon completion of the services and when billing to the client is complete.

Life insurance premiums in our F&G segment reflect premiums for life-contingent PRT, traditional life insurance products and life-contingent immediate annuity products, which are recognized as revenue when due from the policyholder. We have ceded the majority of our traditional life business to unaffiliated third party reinsurers. While the base contract has been reinsured, we continue to retain the return of premium rider. Insurance and investment product fees and other consist primarily of the cost of insurance on IUL policies, unearned revenue ("UREV") on IUL policies, policy rider fees primarily on FIA policies and surrender charges assessed against policy withdrawals in excess of the policyholder's allowable penalty-free amounts.

Premium and annuity deposit collections for FIA, fixed rate annuities, immediate annuities and PRT without life contingency, and amounts received for funding agreements are reported in the financial statements as deposit liabilities (i.e., contractholder funds) instead of as sales or revenues. Similarly, cash payments to customers are reported as decreases in the liability for contractholder funds and not as expenses. Sources of revenues for products accounted for as deposit liabilities include net investment income, surrender, cost of insurance and other charges deducted from contractholder funds, and net realized gains (losses) on investments. Components of expenses for products accounted for as deposit liabilities are interest-sensitive and index product benefits (primarily interest credited to account balances or the hedging cost of providing index credits to the policyholder), amortization of VOBA, DAC, and DSI, other operating costs and expenses, and income taxes.

Real estate technology revenues are primarily comprised of subscription fees for use of software provided to real estate professionals. Subscriptions are only offered on a month-by-month basis and fees are billed monthly. Revenue is recognized in the month services are provided.

Loan subservicing revenues are generated by certain subsidiaries of ServiceLink and are associated with the servicing of mortgage loans on behalf of its customers. Revenue is recognized when the underlying work is performed and billed. Loan subservicing revenues are subject to the recognition requirements of ASC Topic 860.

Interest and investment income consists primarily of interest payments received on fixed maturity security holdings and dividends received on equity and preferred security holdings along with the investment income of limited partnerships.

We do not disclose the value of unsatisfied performance obligations for (i) contracts with an original expected length of one year or less, primarily related to revenue from our home warranty business, and (ii) contracts for which we recognize revenue at the amount to which we have the right to invoice for services performed.

### **Contract Balances**

The following table provides information about trade receivables and deferred revenue:

	September 30, 2022		December 31, 2021
	(In millions)		
Trade receivables	\$	412	\$ 524
Deferred revenue (contract liabilities)		271	144

Deferred revenue is recorded primarily for our home warranty contracts. Revenues from home warranty products are recognized over the life of the policy, which is primarily one year. The unrecognized portion is recorded as deferred revenue in accounts payable and other accrued liabilities in the unaudited Condensed Consolidated Balance Sheets. During the three months and nine months ended September 30, 2022, we recognized \$53 million and \$92 million of revenue, respectively, which was included in deferred revenue at the beginning of the respective period.

**Note K —Value of Business Acquired, Deferred Acquisition Costs and Deferred Sales Inducements**

A summary of the changes in the carrying amounts of our VOBA, DAC and DSI intangible assets is as follows (in millions):

	VOBA	DAC	DSI	Total
<b>Balance at January 1, 2022</b>	\$ 1,185	\$ 761	\$ 88	\$ 2,0
Deferrals	—	513	60	5
Amortization	(210)	(121)	(37)	(3)
Interest	19	20	1	
Unlocking	(5)	(3)	5	
Adjustment for net unrealized investment (gains) losses	707	198	65	9
<b>Balance at September 30, 2022</b>	<u>\$ 1,696</u>	<u>\$ 1,368</u>	<u>\$ 182</u>	<u>\$ 3,2</u>
	VOBA	DAC	DSI	Total
<b>Balance at January 1, 2021</b>	\$ 1,466	\$ 222	\$ 36	\$ 1,7
Deferrals	—	427	65	4
Amortization	(376)	(34)	(26)	(4)
Interest	23	8	1	
Unlocking	(1)	1	(1)	
Adjustment for net unrealized investment (gains) losses	38	(18)	(1)	
Purchase price allocation adjustments	61	—	—	
<b>Balance at September 30, 2021</b>	<u>\$ 1,211</u>	<u>\$ 606</u>	<u>\$ 74</u>	<u>\$ 1,8</u>

Amortization of VOBA, DAC, and DSI is based on the current and future expected gross margins or profits recognized, including investment gains and losses. The interest accrual rate utilized to calculate the accretion of interest on VOBA ranged from 0% to 4.71%. The adjustment for unrealized net investment losses (gains) represents the amount of VOBA, DAC, and DSI that would have been amortized if such unrealized gains and losses had been recognized. This is referred to as the “shadow adjustments” as the additional amortization is reflected in AOCI rather than the unaudited Condensed Consolidated Statements of Earnings. As of September 30, 2022 and September 30, 2021, the VOBA balances included cumulative adjustments for net unrealized investment gains (losses) of \$(474) million and \$245 million, respectively, the DAC balances included cumulative adjustments for net unrealized investment gains (losses) of \$(159) million and \$44 million, respectively, and the DSI balance included net unrealized investment gains (losses) of \$(57) million and \$6 million, respectively.

For the in-force liabilities as of September 30, 2022, the estimated amortization expense for VOBA in future fiscal periods is as follows (in millions):

Fiscal Year	Estimated Amortization Expense
2022	\$ (23)
2023	(9)
2024	170
2025	151
2026	134
Thereafter	798

**Note L — F&G Reinsurance**

F&G reinsures portions of its policy risks with other insurance companies. The use of indemnity reinsurance does not discharge an insurer from liability on the insurance ceded. The insurer is required to pay in full the amount of its insurance liability regardless of whether it is entitled to or able to receive payment from the reinsurer. The portion of risks exceeding F&G's retention limit is reinsured. F&G primarily seeks reinsurance coverage in order to limit its exposure to mortality losses and enhance capital management. If the underlying policy being reinsured is an insurance contract, F&G follows reinsurance accounting when there is adequate risk transfer or deposit accounting if there is inadequate risk transfer. If the underlying policy being reinsured is an investment contract, the effects of the agreement are accounted for as a separate investment contract.

The effects of reinsurance on net premiums earned and net benefits incurred (benefits paid and reserve changes) for the three and nine months ended September 30, 2022 and September 30, 2021 were as follows (in millions):

	Three months ended				Nine months ended			
	September 30, 2022		September 30, 2021		September 30, 2022		September 30, 2021	
	Net Premiums Earned	Net Benefits Incurred	Net Premiums Earned	Net Benefits Incurred	Net Premiums Earned	Net Benefits Incurred	Net Premiums Earned	Net Benefits Incurred
Direct	\$ 642	\$ 1,319	\$ 412	\$ 461	\$ 1,248	\$ 2,016	\$ 500	\$ 1,646
Ceded	(31)	(727)	(32)	(276)	(98)	(1,634)	(103)	(912)
Net	\$ 611	\$ 592	\$ 380	\$ 185	\$ 1,150	\$ 382	\$ 397	\$ 734

Amounts payable or recoverable for reinsurance on paid and unpaid claims are not subject to periodic or maximum limits. F&G did not write off any significant reinsurance balances during the nine months ended September 30, 2022 and September 30, 2021. F&G did not commute any ceded reinsurance treaties during the nine months ended September 30, 2022 and September 30, 2021.

F&G estimates expected credit losses on reinsurance recoverables using a probability of default/loss given default model. Significant inputs to the model include the reinsurer's credit risk, expected timing of recovery, industry-wide historical default experience, senior unsecured bond recovery rates, and credit enhancement features. As of September 30, 2022 and September 30, 2021, the expected credit loss reserve was \$19 million and \$19 million, respectively. There were no significant changes in the expected credit loss reserve for the three and nine months ended September 30, 2022 and September 30, 2021.

No policies issued by F&G have been reinsured with any foreign company, which is controlled, either directly or indirectly, by a party not primarily engaged in the business of insurance.

F&G has not entered into any reinsurance agreements in which the reinsurer may unilaterally cancel any reinsurance for reasons other than non-payment of premiums or other similar credit issues.

F&G has entered into a Funds Withheld Coinsurance Agreement with Aspida Re, a Bermuda reinsurer. In accordance with the terms of this agreement, F&G ceded to the reinsurer, on a funds withheld coinsurance basis, certain multiyear guaranteed annuity business written effective January 1, 2021. The agreement was originally executed January 15, 2021 and amended in August 2021 and September 2022. For reinsured policies issued prior to September 1, 2022, the policies are ceded on a 50% quota share basis. For reinsured policies issued on or after September 1, 2022, the policies are ceded on a 75% quota share basis, capped at \$350 million cession per month. The effects of this agreement are accounted for as a separate investment contract.

Effective May 1, 2020, F&G entered into an indemnity reinsurance agreement with Canada Life Assurance Company United States Branch, a third party reinsurer, to reinsure FIA policies with guaranteed minimum withdrawal benefit ("GMWB"). In accordance with the terms of this agreement, F&G cedes a quota share percentage of the net retention of guarantee payments in excess of account value for GMWB. This treaty was subsequently amended effective January 1, 2021 and January 1, 2022, and now covers FIA policies with GMWB issued from January 1, 2020 to December 31, 2023. The effects of this agreement are not accounted for as reinsurance as it does not satisfy the risk transfer requirements for GAAP; therefore, deposit accounting is applied.

### ***Concentration of Reinsurance Risk***

F&G has a significant concentration of reinsurance risk with third party reinsurers, Aspida Re, Wilton Reassurance Company (“Wilton Re”), and Somerset, that could have a material impact on our financial position in the event that any of these reinsurers fails to perform its obligations under the various reinsurance treaties. Aspida Re has an A- issuer credit rating from AM Best as of September 30, 2022, and the risk of non-performance is further mitigated through the funds withheld arrangement. Wilton Re has an A+ issuer credit rating from AM Best and an A issuer credit rating from Fitch as of September 30, 2022. Somerset has an A- issuer credit rating from AM Best and a BBB+ issuer credit rating from S&P as of September 30, 2022, and the risk of non-performance is further mitigated through the funds withheld arrangement. On September 30, 2022, the net amounts recoverable from Aspida Re, Wilton Re, and Somerset were \$2,304 million, \$1,241 million, and \$591 million, respectively. We monitor both the financial condition of individual reinsurers and risk concentration arising from similar activities and economic characteristics of reinsurers to attempt to reduce the risk of default by such reinsurers. We believe that all amounts due from Aspida Re, Wilton Re, and Somerset for periodic treaty settlements are collectible as of September 30, 2022.

There have been no other material changes in the reinsurance and the intercompany reinsurance agreements described in our Annual Report on Form 10-K for the year ended December 31, 2021.

### **Note M — F&G Insurance Subsidiary Financial Information and Regulatory Matters**

Our U.S. insurance subsidiaries, FGL Insurance, FGL NY Insurance, and Raven Re, file financial statements with state insurance regulatory authorities and the National Association of Insurance Commissioners (“NAIC”) that are prepared in accordance with Statutory Accounting Principles (“SAP”) prescribed or permitted by such authorities, which may vary materially from GAAP. Prescribed SAP includes the Accounting Practices and Procedures Manual of the NAIC as well as state laws, regulations and administrative rules. Permitted SAP encompasses all accounting practices not so prescribed. The principal differences between SAP financial statements and financial statements prepared in accordance with GAAP are that SAP financial statements do not reflect VOBA, DAC, and DSI, some bond portfolios may be carried at amortized cost, assets and liabilities are presented net of reinsurance, contractholder liabilities are generally valued using more conservative assumptions and certain assets are non-admitted. Accordingly, SAP operating results and SAP capital and surplus may differ substantially from amounts reported in the GAAP basis financial statements for comparable items.

F&G Cayman Re Ltd and F&G Life Re Ltd (Bermuda) file financial statements with their respective regulators that are based on U.S. GAAP.

FGL Insurance applies Iowa-prescribed accounting practices that permit Iowa-domiciled insurers to report equity call options used to economically hedge FIA index credits at amortized cost for statutory accounting purposes and to calculate FIA statutory reserves such that index credit returns will be included in the reserve only after crediting to the annuity contract. This resulted in a \$145 million and \$106 million decrease to statutory capital and surplus at September 30, 2022 and December 31, 2021, respectively.

FGL Insurance’s statutory carrying value of Raven Reinsurance Company (“Raven Re”) reflects the effect of permitted practices Raven Re received to treat the available amount of a letter of credit as an admitted asset, which increased Raven Re’s statutory capital and surplus by \$35 million and \$85 million at September 30, 2022 and December 31, 2021, respectively.

Raven Re is also permitted to follow Iowa prescribed statutory accounting practice for its reserves on reinsurance assumed from FGL Insurance. Without such permitted statutory accounting practices, Raven Re’s statutory capital and surplus (deficit) and its risk-based capital would not fall below the minimum regulatory requirements. The letter of credit facility is collateralized by NAIC 1 rated debt securities. If the permitted practice was revoked, the letter of credit could be replaced by the collateral assets with Nomura’s consent. FGL Insurance’s statutory carrying value of Raven Re was \$66 million and \$115 million at September 30, 2022 and December 31, 2021, respectively.

As of September 30, 2022, FGL NY Insurance did not follow any prescribed or permitted statutory accounting practices that differ from the NAIC’s statutory accounting practices.

The prescribed and permitted statutory accounting practices have no impact on our unaudited Condensed Consolidated Financial Statements, which are prepared in accordance with GAAP.

**Note N — Acquisitions***AllFirst*

On August 9, 2022, we acquired approximately 74% of the outstanding equity of AllFirst for approximately \$127 million in cash consideration.

The acquisition was accounted for as a business combination under FASB Accounting Standards Codification Topic 805, Business Combinations ("Topic 805"). The purchase price has been allocated to AllFirst's assets acquired and liabilities assumed based on their fair values as of August 9, 2022. Goodwill has been recorded based on the amount that the purchase price exceeds the fair value of the net assets acquired. Goodwill consists primarily of intangible assets that do not qualify for separate recognition. The goodwill recorded is expected to be deductible for tax purposes. In connection with the acquisition, we recorded preliminary fair value estimates for goodwill, other intangibles, other assets, other liabilities and non-controlling interest of \$71 million, \$83 million, \$43 million, \$20 million and \$45 million, respectively.

The gross carrying value and weighted average estimated useful lives of Other intangible assets acquired in the AllFirst acquisition consist of the following (dollars in millions):

	<u>Gross Carrying Value</u>	<u>Weighted Average Estimated Useful Life (in years)</u>
Other intangible assets:		
Customer relationships	\$ 72	10
Trade name	9	10
Non-compete agreements	1	5
Software	1	2
Total Other intangible assets	<u>\$ 83</u>	

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The statements contained in this Quarterly Report on Form 10-Q that are not purely historical are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, including statements regarding our expectations, hopes, intentions or strategies regarding the future. All forward-looking statements included in this document are based on information available to us on the date hereof, and we assume no obligation to update any such forward-looking statements. It is important to note that our actual results could vary materially from those forward-looking statements contained herein due to many factors, including, but not limited to: the potential impact of the consummation of the proposed F&G spin-off transaction on relationships, including employees, suppliers, customers and competitors; our ability to successfully realize the anticipated benefits of the proposed spin-off transaction; the ability to satisfy any necessary conditions (including any applicable regulatory approvals) to consummate the spin-off transaction within the estimated timeframe or at all; changes in general economic, business and political conditions, including changes in the financial markets; weakness or adverse changes in the level of real estate activity, which may be caused by, among other things, high or increasing interest rates, a limited supply of mortgage funding, or a weak U.S. economy; our potential inability to find suitable acquisition candidates, acquisitions in lines of business that will not necessarily be limited to our traditional areas of focus, or difficulties in consummating and integrating acquisitions; our dependence on distributions from our title insurance underwriters as our main source of cash flow; significant competition that our operating subsidiaries face; compliance with extensive government regulation of our operating subsidiaries; and other risks detailed in the "Statement Regarding Forward-Looking Information," "Risk Factors" and other sections of our Annual Report on Form 10-K (our "Annual Report") for the year ended December 31, 2021 and other filings with the SEC.

The following discussion should be read in conjunction with our Annual Report.

### Overview

For a description of our business, including descriptions of segments and recent business developments, see the discussion in Note A *Basis of Financial Statements* in the accompanying unaudited Condensed Consolidated Financial Statements included in Item 1 of Part I of this Report, which is incorporated by reference into this Part I, Item 2.

### Business Trends and Conditions

#### Title

Our Title segment revenue is closely related to the level of real estate activity that includes sales, mortgage financing and mortgage refinancing. Declines in the level of real estate activity or the average price of real estate sales will adversely affect our title insurance revenues.

We have found that residential real estate activity is generally dependent on the following factors:

- mortgage interest rates;
- mortgage funding supply;
- housing inventory and home prices;
- supply and demand for commercial real estate; and
- the strength of the United States economy, including employment levels.

The most recent forecast of the Mortgage Bankers Association ("MBA"), as of October 23, 2022, estimates (actual for fiscal year 2021) the size of the U.S. residential mortgage originations market as shown in the following table for 2021 - 2024 in its "Mortgage Finance Forecast" (in trillions):

	2024	2023	2022	2021
Purchase transactions	\$ 1.7	\$ 1.5	\$ 1.6	\$ 1.9
Refinance transactions	\$ 0.6	\$ 0.5	\$ 0.7	\$ 2.5
Total U.S. mortgage originations forecast	\$ 2.3	\$ 2.0	\$ 2.3	\$ 4.4

As of October 23, 2022, the MBA expects residential purchase transactions to decrease in 2022 and 2023 before increasing in 2024. Additionally, the MBA expects residential refinance transactions and overall mortgage originations to decrease in 2022 and 2023 before increasing in 2024.

The Federal Reserve raised the benchmark interest rate from near zero as of March 2022 to a range between 3% and 3.25% as of September 2022, moving most recently in 75 basis point increments in an effort to combat inflation. Average interest rates for a 30-year fixed rate mortgage increased to 5.6% and 4.8% for the three and nine months ended September 30, 2022, respectively, as compared to 2.9% and 2.9% for the corresponding periods of 2021. On November 3, 2022, the Federal Reserve raised the benchmark interest rate by an additional 75 basis points.

A shortage in the supply of homes for sale, increasing home prices, rising mortgage interest rates, inflation and disrupted labor markets created some volatility in the residential real estate market in 2021, which has continued into 2022. Additionally, geopolitical uncertainties associated with the war in Ukraine have created additional volatility in the global economy in 2022. Existing-home sales decreased 24% in September 2022 as compared to the corresponding period in 2021 while median existing-home sales prices rose to \$384,800 in September 2022, an 8% increase over the corresponding period in 2021.

Other economic indicators used to measure the health of the U.S. economy, including the unemployment rate, have remained strong. The unemployment rate was 3.5% in September 2022, which equals the record low set in February 2020, as compared to 4.7% in September 2021.

Because commercial real estate transactions tend to be generally driven by supply and demand for commercial space and occupancy rates in a particular area rather than by interest rate fluctuations, we believe that our commercial real estate title insurance business is less dependent on the industry cycles discussed above than our residential real estate title business. Commercial real estate transaction volume is also often linked to the availability of financing. Factors including U.S. tax reform and a shift in U.S. monetary policy have had, or are expected to have, varying effects on availability of financing in the U.S. Lower corporate and individual tax rates and corporate tax-deductibility of capital expenditures have provided increased capacity and incentive for investments in commercial real estate. In 2021 and the first nine months of 2022, we experienced strong demand in commercial real estate markets and, therefore, experienced relatively high volumes and fee-per-file in our commercial business when compared to historical results.

We continually monitor mortgage origination trends and believe that, based on our ability to produce industry leading operating margins through all economic cycles, we are well positioned to adjust our operations for adverse changes in real estate activity and to take advantage of increased volume when demand increases.

*Seasonality.* Historically, real estate transactions have produced seasonal revenue fluctuations in the real estate industry. The first calendar quarter is typically the weakest quarter in terms of revenue due to the generally low volume of home sales during January and February. The second and third calendar quarters are typically the strongest quarters in terms of revenue, primarily due to a higher volume of residential transactions in the spring and summer months. The fourth quarter is typically strong due to the desire of commercial entities to complete transactions by year-end. We have noted short-term fluctuations through recent years in resale and refinance transactions as a result of changes in interest rates. Due to COVID-19 and the Federal Reserve's actions in 2020 in response to the pandemic, seasonality deviated from historical patterns in 2021. In 2022, the rapid rise in mortgage rates and resulting decline in housing affordability are adding pressure to the normal second half seasonal decline in purchase transactions.

#### *F&G*

The following factors represent some of the key trends and uncertainties that have influenced the development of our F&G segment and its historical financial performance, and we believe these key trends and uncertainties will continue to influence the business and financial performance of our F&G segment in the future.

#### **COVID-19 Pandemic**

While still evolving, the COVID-19 pandemic has caused significant economic and financial turmoil in the U.S. and around the world. At this time, it is still not possible to estimate the longer term-effects the COVID-19 pandemic could have on our F&G segment or our consolidated financial statements. Increased economic uncertainty and increased unemployment that could potentially result from the spread of COVID-19 and its variants may result in F&G policyholders seeking sources of liquidity and withdrawing at rates greater than was previously expected. Additionally, adverse events or conditions resulting from COVID-19 could also have a negative effect on its sales of new policies and could result in more volatility from the impact of mortality experience. As of September 30, 2022, F&G has not seen a sustained elevated level of adverse policyholder experience from the impact of COVID-19 on the overall business. The full extent to which the COVID-19

pandemic impacts our F&G segment's financial condition, results of operations, liquidity or prospects will depend on future developments, which cannot be predicted at this time.

#### ***Market Conditions***

Market volatility has affected, and may continue to affect, our business and financial performance in varying ways. Volatility can pressure sales and reduce demand as consumers hesitate to make financial decisions. To enhance the attractiveness and profitability of our products and services, we continually monitor the behavior of our customers, as evidenced by annuitization rates and lapse rates, which vary in response to changes in market conditions. See Item 1A of Part I of our Annual Report on Form 10-K for the year ended December 31, 2021 for further discussion of risk factors that could affect market conditions.

#### ***Interest Rate Environment***

Some of our F&G products include guaranteed minimum crediting rates, most notably our fixed rate annuities. As of September 30, 2022, our reserves, net of reinsurance, and average crediting rate on our fixed rate annuities were \$6.0 billion and 3%, respectively. We are required to pay the guaranteed minimum crediting rates even if earnings on our investment portfolio decline, which would negatively impact earnings. In addition, we expect more policyholders to hold policies with comparatively high guaranteed rates for a longer period in a low interest rate environment. Conversely, a rise in average yield on our investment portfolio would increase earnings if the average interest rate we pay on our products does not rise correspondingly. Similarly, we expect that policyholders would be less likely to hold policies with existing guarantees as interest rates rise and the relative value of other new business offerings are increased, which would negatively impact our earnings and cash flows.

See Item 7A of Part II of our Annual Report on Form 10-K for the year ended December 31, 2021 for a more detailed discussion of interest rate risk.

#### ***Aging of the U.S. Population***

We believe that the aging of the U.S. population will increase the demand for our FIA and IUL products. As the “baby boomer” generation prepares for retirement, we believe that demand for retirement savings, growth, and income products will grow. Over 10,000 people will turn 65 each day in the United States over the next 15 years, and according to the U.S. Census Bureau, the proportion of the U.S. population over the age of 65 is expected to grow from 17% in 2021 to 21% in 2035. The impact of this growth may be offset to some extent by asset outflows as an increasing percentage of the population begins withdrawing assets to convert their savings into income.

#### ***Industry Factors and Trends Affecting Our Results of Operations***

We operate in the sector of the insurance industry that focuses on the needs of middle-income Americans. The underserved middle-income market represents a major growth opportunity for us. As a tool for addressing the unmet need for retirement planning, we believe that many middle-income Americans have grown to appreciate the financial certainty that we believe annuities such as our FIA products afford. Accordingly, the FIA market grew from nearly \$12 billion of sales in 2002 to \$66 billion of sales in 2021. Additionally, this market demand has positively impacted the IUL market as it has expanded from \$100 million of annual premiums in 2002 to \$2 billion of annual premiums in 2021.

See Item 7 of Part II of our Annual Report on Form 10-K for the year ended December 31, 2021 for a more detailed discussion of industry factors and trends affecting our Results of Operations.

## Results of Operations

### Consolidated Results of Operations

*Net Earnings.* The following table presents certain financial data for the periods indicated:

	Three months ended September 30,		Nine months ended September 30,	
	2022	2021	2022	2021
(In millions)				
<b>Revenues:</b>				
Direct title insurance premiums	\$ 688	\$ 896	\$ 2,314	\$ 2,546
Agency title insurance premiums	966	1,318	3,268	3,632
Escrow, title-related and other fees	1,372	1,324	3,444	3,123
Interest and investment income	411	508	1,352	1,424
Recognized gains and losses, net	(230)	(154)	(1,375)	121
<b>Total revenues</b>	<b>3,207</b>	<b>3,892</b>	<b>9,003</b>	<b>10,846</b>

#### *Revenues.*

Total revenues decreased by \$685 million in the three months ended September 30, 2022 and decreased by \$1,843 million in the nine months ended September 30, 2022 compared to the corresponding periods in 2021.

Net earnings from continuing operations decreased by \$446 million in the three months ended September 30, 2022 and decreased by \$814 million in the nine months ended September 30, 2022 compared to the corresponding periods in 2021.

The change in revenue and net earnings from our reportable segments is discussed in further detail at the segment level below.

#### *Expenses.*

Our operating expenses consist primarily of Personnel costs; Other operating expenses, which in our title business are incurred as orders are received and processed; Agent commissions, which are incurred as title agency revenue is recognized; and Benefits and other changes in policy reserves, which in our F&G segment are charged to earnings in the period they are earned by the policyholder based on their selected strategy. For traditional life and immediate annuities, policy benefit claims are charged to expense in the period that the claims are incurred, net of reinsurance recoveries. Title insurance premiums, escrow and title-related fees are generally recognized as income at the time the underlying transaction closes or other service is provided. Direct title operations revenue often lags approximately 45-60 days behind expenses and therefore gross margins may fluctuate. The changes in the market environment, mix of business between direct and agency operations and the contributions from our various business units have historically impacted margins and net earnings. We have implemented programs and have taken necessary actions to maintain expense levels consistent with revenue

streams. However, a short-term lag exists in reducing controllable fixed costs and certain fixed costs are incurred regardless of revenue levels.

Personnel costs include base salaries, commissions, benefits, stock-based compensation and bonuses paid to employees, and are one of our most significant operating expenses.

Agent commissions represent the portion of premiums retained by our third-party agents pursuant to the terms of their respective agency contracts.

Benefit expenses for deferred annuity, FIA and IUL policies include index credits and interest credited to contractholder account balances and benefit claims in excess of contract account balances, net of reinsurance recoveries. Other changes in policy reserves include the change in the fair value of the FIA embedded derivative and the change in the reserve for secondary guarantee benefit payments. Other changes in policy reserves also include the change in reserves for life insurance products.

Other operating expenses consist primarily of facilities expenses, title plant maintenance, premium taxes (which insurance underwriters are required to pay on title premiums in lieu of franchise and other state taxes), appraisal fees and other cost of sales on ServiceLink product offerings and other title-related products, postage and courier services, computer services, professional services, travel expenses, general insurance and bad debt expense on our trade and notes receivable.

The Provision for title claim losses includes an estimate of anticipated title and title-related claims, and escrow losses.

The change in expenses attributable to our reportable segments is discussed in further detail at the segment level below.

Income tax expense was \$115 million and \$213 million in the three months ended September 30, 2022 and 2021, respectively, and \$434 million and \$555 million in the nine months ended September 30, 2022 and 2021, respectively. Income tax expense as a percentage of earnings before income taxes was 28% and 23% in the three months ended September 30, 2022 and 2021, respectively and 29% and 23% in the nine months ended September 30, 2022 and 2021, respectively. The increase in income tax expense as a percentage of earnings before taxes in the three months ended September 30, 2022 as compared to the corresponding period in 2021 is primarily attributable to the recording of a valuation allowance in the 2022 period for tax benefits associated with deferred tax assets related to recognized valuation losses on equity securities for which it is more likely than not that we will not be able to realize for tax purposes. The increase in income tax expense as a percentage of earnings before taxes in the nine months ended September 30, 2022 as compared to the corresponding period in 2021 is primarily attributable to the recording of a valuation allowance in the 2022 period for tax benefits associated with deferred tax assets related to realized losses on the past sales of discontinued operations and the aforementioned recognized valuation losses on equity securities for which it is more likely than not that we will not be able to realize for tax purposes.

The Inflation Reduction Act of 2022 (the "IRA") was signed into law on August 16, 2022. Among other changes, the IRA introduced a 15% corporate alternative minimum tax ("CAMT") on adjusted financial statement income and a 1% excise tax on treasury stock repurchases. The effective date of these provisions will be January 1, 2023. We do not anticipate that the IRA will have a material effect on our current or future financial condition or results from operations.

**Title**

The following table presents the results from operations of our Title segment:

	Three months ended September 30,		Nine months ended September 30,	
	2022	2021	2022	2021
(In millions)				
Revenues:				
Direct title insurance premiums	\$ 688	\$ 896	\$ 2,314	\$ 2,546
Agency title insurance premiums	966	1,318	3,268	3,632
Escrow, title-related and other fees	623	849	1,994	2,433
Interest and investment income	62	27	124	83
Recognized gains and losses, net	(48)	(169)	(472)	(258)
Total revenues	2,291	2,921	7,228	8,436
Expenses:				
Personnel costs	725	838	2,322	2,418
Agent commissions	747	1,010	2,521	2,787
Other operating expenses	372	451	1,178	1,281
Depreciation and amortization	38	36	105	103
Provision for title claim losses	74	100	251	278
Total expenses	1,956	2,435	6,377	6,867
Earnings from continuing operations, before income taxes and equity in earnings of unconsolidated affiliates	\$ 335	\$ 486	\$ 851	\$ 1,569
Orders opened by direct title operations (in thousands)	363	688	1,328	2,153
Orders closed by direct title operations (in thousands)	278	527	1,006	1,692
Fee per file (in dollars)	\$ 3,621	\$ 2,581	\$ 3,323	\$ 2,310

Total revenues for the Title segment decreased by \$630 million, or 22%, in the three months ended September 30, 2022 and decreased by \$1,208 million, or 14% in the nine months ended September 30, 2022 from the corresponding periods in 2021.

The following table presents the percentages of title insurance premiums generated by our direct and agency operations:

	Three months ended September 30,				Nine months ended September 30,			
	2022	% of Total	2021	% of Total	2022	% of Total	2021	% of Total
(Dollars in millions)								
Title premiums from direct operations	\$ 688	42 %	\$ 896	40 %	\$ 2,314	41 %	\$ 2,546	41 %
Title premiums from agency operations	966	58	1,318	60	3,268	59	3,632	59
Total title premiums	\$ 1,654	100 %	\$ 2,214	100 %	\$ 5,582	100 %	\$ 6,178	100 %

Title premiums decreased by \$560 million, or 25% in the three months ended September 30, 2022 from the corresponding period in 2021. The decrease was comprised of a decrease in Title premiums from direct operations of \$208 million, or 23%, and a decrease in Title premiums from agency operations of \$352 million, or 27%.

Title premiums decreased by 9.6% in the nine months ended September 30, 2022 as compared to the corresponding period in 2021. The decrease is comprised of a decrease in Title premiums from direct operations of \$232 million, or 9%, and a decrease in Title premiums from agency operations of \$364 million or 10%.

The following table presents the percentages of opened and closed title insurance orders generated by purchase and refinance transactions by our direct operations:

	Three months ended September 30,		Nine months ended September 30,	
	2022	2021	2022	2021
Opened title insurance orders from purchase transactions (1)	76 %	50 %	70 %	48 %
Opened title insurance orders from refinance transactions (1)	24	50	30	52
	100 %	100 %	100 %	100 %
Closed title insurance orders from purchase transactions (1)	76 %	50 %	66 %	43 %
Closed title insurance orders from refinance transactions (1)	24	50	34	57
	100 %	100 %	100 %	100 %

(1) Percentages exclude consideration of an immaterial number of non-purchase and non-refinance orders.

Title premiums from direct operations decreased in the three and nine months ended September 30, 2022 from the corresponding periods in 2021. The decreases were primarily attributable to decreased closed order volume, partially offset by increases in the average fee per file, which were driven by increases in the proportion of purchase transactions versus refinance transactions.

We experienced a significant decrease in closed title insurance order volume from refinance transactions in the three and nine months ended September 30, 2022 from the corresponding periods in 2021. Closed title insurance order volume from purchase transactions also decreased in the three and nine months ended September 30, 2022 when compared to the corresponding periods in 2021. Total closed order volume was 278,000 in the three months ended September 30, 2022 compared to 527,000 in the three months ended September 30, 2021 and 1,006,000 in the nine months ended September 30, 2022 compared to 1,692,000 in the nine months ended September 30, 2021. This represented an overall decrease of 47% and 41% in the three and nine months ended September 30, 2022, respectively, from the corresponding periods in 2021. The decreases were primarily attributable to higher average mortgage interest rates and the surge in residential refinance transactions in 2020 and the first half of 2021, resulting in a decline in the population of eligible refinance candidates in the three and nine months ended September 30, 2022 when compared to the corresponding periods in 2021.

Total opened title insurance order volume decreased in the three and nine months ended September 30, 2022 from the corresponding periods in 2021. The decrease was attributable to decreased opened title orders from refinance and purchase transactions.

The average fee per file in our direct operations was \$3,621 and \$3,323 in the three and nine months ended September 30, 2022, respectively, compared to \$2,581 and \$2,310 in the three and nine months ended September 30, 2021, respectively. The increases in average fee per file in the three and nine-month periods reflect an increased proportion of purchase transactions relative to total closed orders and an increased commercial market compared to the corresponding periods in 2021. The fee per file tends to change as the mix of refinance and purchase transactions changes, because purchase transactions involve the issuance of both a lender's policy and an owner's policy, resulting in higher fees, whereas refinance transactions only require a lender's policy, resulting in lower fees.

Title premiums from agency operations decreased \$352 million, or 27%, in the three months ended September 30, 2022 and decreased \$364 million, or 10%, in the nine months ended September 30, 2022 from the corresponding periods in 2021. The current trends in the agency business reflect a softening residential purchase environment in many markets throughout the country and a dramatic decline in residential refinance transactions, consistent with recent trends in our direct business.

Escrow, title-related and other fees decreased by \$226 million, or 27%, in the three months ended September 30, 2022 and decreased \$439 million or 18% in the nine months ended September 30, 2022 from the

corresponding periods in 2021. Escrow fees decreased by \$120 million, or 33%, in the three months ended September 30, 2022 and \$259 million, or 24% in the nine months ended September 30, 2022 from the corresponding periods in 2021. The decreases in the three and nine-month periods were primarily attributable to the significant decrease in residential refinance transactions, which have relatively higher escrow fees per transaction than residential purchase and commercial transactions. Other fees, excluding escrow fees, decreased by \$106 million, or 22%, in the three months ended September 30, 2022 and decreased by \$181 million, or 13% in the nine months ended September 30, 2022 from the corresponding periods in 2021. The decreases in Other fees in the three and nine-month periods were attributable to various immaterial items.

Interest and investment income levels are primarily a function of securities markets, interest rates and the amount of cash available for investment. Interest and investment income increased \$35 million, or 130%, in the three months ended September 30, 2022 and increased \$41 million, or 49% in the nine months ended September 30, 2022 from the corresponding period in 2021. The increases in the three and nine-month periods were primarily attributable to increased income from our tax-deferred property exchange business and higher yields on our short-term investments when compared to the corresponding periods in 2021.

Net recognized losses were \$48 million and \$169 million in the three months ended September 30, 2022 and 2021, respectively. Net recognized losses were \$472 million and \$258 million in the nine months ended September 30, 2022 and 2021, respectively. The variations in net recognized losses in the three and nine months ended September 30, 2022 compared to the corresponding periods in 2021 are primarily attributable to fluctuations in non-cash valuation changes on our equity and preferred security holdings in addition to various other immaterial items.

Personnel costs include base salaries, commissions, benefits, stock-based compensation and bonuses paid to employees, and are one of our most significant operating expenses. Personnel costs decreased \$113 million, or 13%, in the three months ended September 30, 2022 and decreased \$96 million, or 4% in the nine months ended September 30, 2022 compared to the corresponding periods in 2021. The decreases in the three and nine-month periods are due to lower average head count in the 2022 periods in response to the significant decline in refinance orders and the recent declines in purchase and commercial orders, partially offset by an increase in the 401(k) match in the 2022 periods. Personnel costs as a percentage of total revenues from direct title premiums and escrow, title-related and other fees were 55% and 48% for the three months ended September 30, 2022 and 2021, respectively and 54% and 49% for the nine-month periods ended September 30, 2022 and 2021, respectively. Average employee count in the Title segment was 24,485 and 27,799 in the three months ended September 30, 2022 and 2021, respectively, and 25,914 and 27,164 in the nine months ended September 30, 2022 and 2021, respectively.

Other operating expenses decreased by \$79 million, or 18%, in the three months ended September 30, 2022, and decreased by \$103 million, or 8% in the nine months ended September 30, 2022 from the corresponding periods in 2021. Other operating expenses as a percentage of total revenue excluding agency premiums, interest and investment income, and recognized gains and losses were 28% and 26% in the three months ended September 30, 2022 and 2021, respectively, and 27% and 26% in the nine months ended September 30, 2022 and 2021, respectively.

Agent commissions represent the portion of premiums retained by agents pursuant to the terms of their respective agency contracts. Agent commissions and the resulting percentage of agent premiums that we retain vary according to regional differences in real estate closing practices and state regulations.

The following table illustrates the relationship of agent premiums and agent commissions, which has remained relatively consistent since 2021:

	Three months ended September 30,				Nine months ended September 30,			
	2022	%	2021	%	2022	%	2021	%
	(Dollars in millions)							
Agent premiums	\$ 966	100 %	\$ 1,318	100 %	\$ 3,268	100 %	\$ 3,632	100 %
Agent commissions	747	77 %	1,010	77 %	2,521	77 %	2,787	77 %
Net retained agent premiums	\$ 219	23 %	\$ 308	23 %	\$ 747	23 %	\$ 845	23 %

The claim loss provision for title insurance was \$74 million and \$100 million for the three months ended September 30, 2022 and 2021, respectively, and \$251 million and \$278 million for the nine months ended September 30, 2022 and 2021, respectively. The provision reflects an average provision rate of 4.5% of title premiums in all periods. We continually monitor and evaluate our loss provision level, actual claims paid, and the loss reserve position each quarter. This loss provision rate is set to provide for losses on current year policies, but due to development of prior years and our long claim duration, it periodically includes amounts of estimated adverse or positive development on prior years' policies.

## **F&G**

### **Segment Overview**

Through our wholly owned F&G subsidiary, we have five distribution channels across retail and institutional markets. Our three retail channels include agent-based IMOs, banks and broker dealers. We have deep, long-tenured relationships with our network of leading IMOs and their agents to serve the needs of the middle-income market and develop competitive annuity and life products to align with their evolving needs. Upon FNF's ownership and F&G's subsequent rating upgrades in mid-2020, we launched into banks and broker dealers. Further, in 2021, we launched two institutional channels to originate Funding Agreement Backed Note ("FABN") and PRT transactions. The FABN Program offers funding agreements to institutional clients by means of capital markets transactions through investment banks. The funding agreements issued under the FABN Program are in addition to those issued to the Federal Home Loan Bank of Atlanta ("FHLB"). The PRT solutions business was launched by building an experienced team and then working with brokers and institutional consultants for distribution. These markets leverage our existing team's spread-based capabilities as well as our strategic partnership with Blackstone.

In setting the features and pricing of our flagship FIA products relative to our targeted net margin, we take into account our expectations regarding (1) the difference between the net investment income we earn and the sum of the interest credited to policyholders and the cost of hedging our risk on the policies; (2) fees, including surrender charges and rider fees, partly offset by vesting bonuses that we pay our policyholders; and (3) a number of related expenses, including benefits and changes in reserves, acquisition costs, and general and administrative expenses.

On March 14, 2022, our Board of Directors approved a dividend to our shareholders, on a pro rata basis, of 15% of the common stock of F&G (the "F&G Distribution"). We intend to retain control of F&G through our approximate 85% ownership stake. The proposed F&G Distribution is intended to be structured as a taxable dividend to our shareholders and is subject to various conditions including the final approval of our Board of Directors, the effectiveness of appropriate filings with the U.S. Securities and Exchange Commission (the "SEC"), and any applicable regulatory approvals. The record date and distribution settlement date will be determined by our Board of Directors prior to the distribution. Upon completion of the F&G Distribution, our shareholders as of the record date are expected to own stock in both publicly traded companies. On October 26, 2022, F&G filed Amendment number 2 to its Form 10 registration statement with the SEC. The proposed F&G Distribution is targeted to be completed in the fourth quarter of 2022. However, there can be no assurance regarding the timeframe for completing the F&G Distribution or that the conditions of the F&G Distribution will be met.

### **Key Components of Our Historical Results of Operations**

Through our insurance subsidiaries, we issue a broad portfolio of deferred annuities (FIA and fixed rate annuities), indexed universal life insurance (IUL), immediate annuities, funding agreements and PRT solutions. A deferred annuity is a type of contract that accumulates value on a tax deferred basis and typically begins making specified periodic or lump sum payments a certain number of years after the contract has been issued. IUL insurance is a complementary type of contract that accumulates value in a cash value account and provides a payment to designated beneficiaries upon the policyholder's death. An immediate annuity is a type of contract that begins making specified payments within one annuity period (e.g., one month or one year) and typically makes payments of principal and interest earnings over a period of time.

Under U.S. GAAP, premium collections for FIAs, fixed rate annuities, immediate annuities and PRT without life contingency, and deposits received for funding agreements are reported in the financial statements as deposit liabilities (i.e., contractholder funds) instead of as sales or revenues. Similarly, cash payments to customers are reported as decreases in the liability for contractholder funds and not as expenses. Sources of revenues for products accounted for as deposit liabilities are net investment income, surrender, cost of insurance and other charges deducted from contractholder funds, and net realized gains (losses) on investments. Components of expenses for products accounted for as deposit liabilities are interest-sensitive and index product

benefits (primarily interest credited to account balances or the hedging cost of providing index credits to the policyholder), amortization of VOBA, DAC and DSI, other operating costs and expenses, and income taxes.

F&G hedges certain portions of its exposure to product related equity market risk by entering into derivative transactions. We purchase derivatives consisting predominantly of call options and, to a lesser degree, futures contracts (specifically for FIA contracts) on the equity indices underlying the applicable policy. These derivatives are used to offset the reserve impact of the index credits due to policyholders under the FIA and IUL contracts. The majority of all such call options are one-year options purchased to match the funding requirements underlying the FIA/IUL contracts. We attempt to manage the cost of these purchases through the terms of our FIA/IUL contracts, which permit us to change caps, spread, or participation rates on each policy's annual anniversary, subject to certain guaranteed minimums that must be maintained. The call options and futures contracts are marked to fair value with the change in fair value included as a component of net investment gains (losses). The change in fair value of the call options and futures contracts includes the gains and losses recognized at the expiration of the instruments' terms or upon early termination and the changes in fair value of open positions.

Earnings from products accounted for as deposit liabilities are primarily generated from the excess of net investment income earned over the sum of interest credited to policyholders and the cost of hedging our risk on FIA/IUL policies. With respect to FIAs/IULs, the cost of hedging our risk includes the expenses incurred to fund the index credits. Proceeds received upon expiration or early termination of call options purchased to fund annual index credits are recorded as part of the change in fair value of derivatives, and are largely offset by an expense for index credits earned on annuity contractholder fund balances.

Our profitability depends in large part upon the amount of assets under management ("AUM" — see "*Non-GAAP Financial Measures*" section), the excess of net investment income earned over the sum of interest credited to policyholders and the cost of hedging our risk on indexed product policies earned on our average assets under management ("AAUM" — see "*Non-GAAP Financial Measures*"), our ability to manage our operating expenses and the costs of acquiring new business (principally commissions to agents and bonuses credited to policyholders). As we grow AUM, earnings generally increase. AUM increases when cash inflows, which include sales, exceed cash outflows. Managing the excess of net investment income earned over the sum of interest credited to policyholders and the cost of hedging our risk on indexed product policies involves the ability to maximize returns on our AUM and minimize risks such as interest rate changes and defaults or impairment of investments. It also includes our ability to manage interest rates credited to policyholders and costs of the options and futures purchased to fund the annual index credits on the FIA/IULs. We analyze returns on AAUM, VOBA, pre- and post-DAC and DSI as well as pre- and post-tax to measure our profitability in terms of growth and improved earnings.

In June 2021, we established a FABN Program, pursuant to which FGL Insurance may issue funding agreements to a special purpose statutory trust (the "Trust") for spread lending purposes. The maximum aggregate principal amount permitted to be outstanding at any one time under the FABN Program is currently \$5.0 billion. We also issue funding agreements through the FHLB.

In July 2021, we entered the PRT market, pursuant to which FGL Insurance and FGL NY Insurance may issue group annuity contracts to discharge pension plan liabilities from a pension plan sponsor. Life contingent PRT premiums are included in life insurance premiums and other fees below.

### **Non-GAAP Financial Measures**

In addition to reporting financial results in accordance with GAAP, this document includes non-GAAP financial measures, which the Company believes are useful to help investors better understand its financial performance, competitive position and prospects for the future. Management believes these non-GAAP financial measures may be useful in certain instances to provide additional meaningful comparisons between current results and results in prior operating periods. Our non-GAAP measures may not be comparable to similarly titled measures of other organizations because other organizations may not calculate such non-GAAP measures in the same manner as we do. The presentation of this financial information is not intended to be considered in isolation of or as a substitute for, or superior to, the financial information prepared and presented in accordance with GAAP. By disclosing these non-GAAP financial measures, the Company believes it offers investors a greater understanding of, and an enhanced level of transparency into, the means by which the Company's management operates the Company. Any non-GAAP measures should be considered in context with the GAAP financial presentation and should not be considered in isolation or as a substitute for GAAP net earnings, net earnings attributable to common shareholders, or any other measures derived in accordance with

GAAP as measures of operating performance or liquidity. Reconciliations of these non-GAAP financial measures to the most directly comparable GAAP measures are provided within.

***Adjusted Net Earnings Attributable to Common Shareholders***

Adjusted net earnings attributable to common shareholders (“Adjusted net earnings”) is a non-GAAP economic measure we use to evaluate financial performance each period. Adjusted net earnings is calculated by adjusting net earnings (loss) from continuing operations attributable to common shareholders to eliminate:

- (i) Recognized (gains) and losses, net: the impact of net investment gains/losses, including changes in allowance for expected credit losses and other than temporary impairment (“OTTI”) losses, recognized in operations; and the effect of changes in fair value of the reinsurance related embedded derivative;
- (ii) Indexed product related derivatives: the impacts related to changes in the fair value, including both realized and unrealized gains and losses, of index product related derivatives and embedded derivatives, net of hedging cost;
- (iii) Purchase price amortization: the impacts related to the amortization of certain intangibles (internally developed software, trademarks and value of distribution asset (“VODA”)) recognized as a result of acquisition activities;
- (iv) Transaction costs: the impacts related to acquisition, integration and merger related items;
- (v) Other “non-recurring,” “infrequent” or “unusual items”: Management excludes certain items determined to be “non-recurring,” “infrequent” or “unusual” from adjusted net earnings when incurred if it is determined these expenses are not a reflection of the core business and when the nature of the item is such that it is not reasonably likely to recur within two years and/or there was not a similar item in the preceding two years.
- (vi) Amortization of actuarial intangibles and SOP 03-1 reserve offset: The intangibles amortization and SOP 03-1 change offsets related to the above mentioned adjustments; and
- (vii) Income taxes: the income tax impact related to the above mentioned adjustments is measured using an effective tax rate, as appropriate by tax jurisdiction.

While these adjustments are an integral part of the overall performance of F&G, market conditions and/or the non-operating nature of these items can overshadow the underlying performance of the core business. Accordingly, management considers this to be a useful measure internally and to investors and analysts in analyzing the trends of our operations. Adjusted net earnings should not be used as a substitute for net earnings (loss). However, we believe the adjustments made to net earnings (loss) in order to derive adjusted net earnings provide an understanding of our overall results of operations.

For example, we could have strong operating results in a given period, yet report net income that is materially less, if during such period the fair value of our derivative assets hedging the FIA and IUL index credit obligations decreased due to general equity market conditions but the embedded derivative liability related to the index credit obligation did not decrease in the same proportion as the derivative assets because of non-equity market factors such as interest rate and non-performance credit spread movements. Similarly, we could also have poor operating results in a given period yet show net earnings (loss) that is materially greater, if during such period the fair value of the derivative assets increases but the embedded derivative liability did not increase in the same proportion as the derivative assets. We hedge our index credits with a combination of static and dynamic strategies, which can result in earnings volatility, the effects of which are generally likely to reverse over time. Our management and board of directors review adjusted net earnings and net earnings (loss) as part of their examination of our overall financial results. However, these examples illustrate the significant impact derivative and embedded derivative movements can have on our net earnings (loss). Accordingly, our management performs a review and analysis of these items, as part of their review of our hedging results each period.

Amounts attributable to the fair value accounting for derivatives hedging the FIA and IUL index credits and the related embedded derivative liability fluctuate from period to period based upon changes in the fair values of call options purchased to fund the annual index credits, changes in the interest rates and non-performance credit spreads used to discount the embedded derivative liability, and the fair value assumptions reflected in the

embedded derivative liability. The accounting standards for fair value measurement require the discount rates used in the calculation of the embedded derivative liability to be based on risk-free interest rates adjusted for our non-performance as of the reporting date. The impact of the change in fair values of FIA-related derivatives, embedded derivatives and hedging costs has been removed from net earnings (loss) in calculating adjusted net earnings.

We have updated our non-GAAP measure definition for Adjusted net earnings as of September 30, 2022 to remove the alternative investments adjustment that was previously made for the difference between actual net investment income earned on our alternative investments compared to management's long-term expectation of net investment income for these types of investments. All prior periods have been restated to remove this adjustment.

***Assets Under Management ("AUM")***

AUM is a non-GAAP measure that we use to assess the rate of return on assets available for reinvestment. AUM is calculated as the sum of:

- (i) total invested assets at amortized cost, excluding derivatives, net of reinsurance qualifying for risk transfer in accordance with GAAP;
- (ii) related party loans and investments;
- (iii) accrued investment income;
- (iv) the net payable/receivable for the purchase/sale of investments; and
- (v) cash and cash equivalents, excluding derivative collateral, at the beginning of the period and the end of each month in the period, divided by the total number of months in the period plus one.

Management considers this non-GAAP financial measure to be useful internally and to investors and analysts when assessing the rate of return on assets available for reinvestment.

***Average Assets Under Management ("AAUM")***

AAUM is calculated as AUM at the beginning of the period and the end of each month in the period, divided by the total number of months in the period plus one. Management considers this non-GAAP financial measure to be useful internally and to investors and analysts when assessing the rate of return on assets available for reinvestment.

***Yield on AAUM***

Yield on AAUM is calculated by dividing annualized net investment income by AAUM. Management considers this non-GAAP financial measure to be useful internally and to investors and analysts when assessing the level of return earned on AAUM.

***Sales***

Annuity, IUL, funding agreement and non-life contingent PRT sales are not derived from any specific GAAP income statement accounts or line items and should not be viewed as a substitute for any financial measure determined in accordance with GAAP. Sales from these products are recorded as deposit liabilities (i.e. contractholder funds) within the Company's consolidated financial statements in accordance with GAAP. Life contingent PRT sales are recorded as premiums in revenues within the consolidated financial statements. Management believes that presentation of sales, as measured for management purposes, enhances the understanding of our business and helps depict longer term trends that may not be apparent in the results of operations due to the timing of sales and revenue recognition.

### F&G Results of Operations

The results of operations of our F&G segment for the three and nine months ended September 30, 2022 and September 30, 2021 were as follows (in millions):

	Three months ended		Nine months ended	
	September 30, 2022	September 30, 2021	September 30, 2022	September 30, 2021
<b>Revenues:</b>				
Life insurance premiums and other fees (a)	\$ 702	\$ 431	\$ 1,364	\$ 557
Interest and investment income	340	481	1,216	1,341
Recognized gains and losses, net	(140)	15	(863)	370
<b>Total revenues</b>	<b>902</b>	<b>927</b>	<b>1,717</b>	<b>2,268</b>
<b>Expenses:</b>				
Benefits and other changes in policy reserves	592	185	382	734
Personnel costs	46	32	110	93
Other operating expenses	28	22	77	76
Depreciation and amortization	87	210	351	419
Interest expense	6	6	23	21
<b>Total expenses</b>	<b>759</b>	<b>455</b>	<b>943</b>	<b>1,343</b>
<b>Earnings before income taxes</b>	<b>143</b>	<b>472</b>	<b>774</b>	<b>925</b>
Income tax (expense) benefit	(28)	(96)	(193)	(189)
<b>Net earnings from continuing operations</b>	<b>\$ 115</b>	<b>\$ 376</b>	<b>\$ 581</b>	<b>\$ 736</b>
Earnings (loss) from discontinued operations, net of tax	—	(3)	—	8
<b>Net earnings</b>	<b>\$ 115</b>	<b>\$ 373</b>	<b>\$ 581</b>	<b>\$ 744</b>

(a) Included within Escrow, title-related and other fees in Condensed Consolidated Statements of Earnings

The following table summarizes sales by product type of our F&G segment (in millions) (see "Non-GAAP Financial Measures"):

	Three months ended		Nine months ended	
	September 30, 2022	September 30, 2021	September 30, 2022	September 30, 2021
Fixed indexed annuities (FIA)	\$ 1,109	\$ 1,073	\$ 3,185	\$ 3,255
Fixed rate annuities (MYGA)	1,108	458	2,668	1,437
Total annuity	2,217	1,531	5,853	4,692
Indexed universal life (IUL)	36	24	92	59
Funding agreements (FABN/FHLB)	—	1,150	1,443	2,275
Pension risk transfer (PRT)	620	371	1,147	371
<b>Total Gross Sales</b>	<b>\$ 2,873</b>	<b>\$ 3,076</b>	<b>\$ 8,535</b>	<b>\$ 7,397</b>
Sales attributable to flow reinsurance to third parties	(660)	(229)	(1,440)	(718)
<b>Total Net Sales</b>	<b>\$ 2,213</b>	<b>\$ 2,847</b>	<b>\$ 7,095</b>	<b>\$ 6,679</b>

- Total annuity sales increased during the three and nine months ended September 30, 2022 compared to the three and nine months ended September 30, 2021, and reflect pricing actions taken to align to the macro environment.
- Funding agreements, reflecting new FABN and FHLB agreements during the three and nine months ended September 30, 2022, were lower compared to the three and nine months ended September 30, 2021, reflect F&G's expansion into institutional markets during 2021 and are subject to fluctuation period to period.
- PRT sales increased during the three and nine months ended September 30, 2022 compared to the three and nine months ended September 30, 2021, reflect entrance into the PRT market in the second half of 2021, and are also subject to fluctuation period to period.

**Revenues****Life insurance premiums and other fees**

Life insurance premiums and other fees primarily reflect premiums on life-contingent PRTs and traditional life insurance products, which are recognized as revenue when due from the policyholder, as well as policy rider fees primarily on FIA policies, the cost of insurance on IUL policies and surrender charges assessed against policy withdrawals in excess of the policyholder's allowable penalty-free amounts (up to 10% of the prior year's value, subject to certain limitations). The following table summarizes the Life insurance premiums and other fees, included within Escrow, title-related and other fees on the Condensed Consolidated Statements of Earnings (in millions), for the three and nine months ended September 30, 2022 and September 30, 2021:

	Three months ended		Nine months ended	
	September 30, 2022	September 30, 2021	September 30, 2022	September 30, 2021
Life-contingent pension risk transfer premiums	\$ 605	\$ 371	\$ 1,125	\$ 371
Traditional life insurance premiums	4	6	11	14
Life-contingent immediate annuity premiums	3	4	15	12
Surrender charges	14	7	37	25
Policyholder fees and other income	76	43	176	135
<b>Life insurance premiums and other fees</b>	<b>\$ 702</b>	<b>\$ 431</b>	<b>\$ 1,364</b>	<b>\$ 557</b>

- Life insurance premiums and other fees for the three and nine months ended September 30, 2022 increased compared to the three and nine months ended September 30, 2021, primarily reflecting our entrance into the PRT market in the second half of 2021. As noted above, PRT premiums are subject to fluctuation period to period. In addition, surrender charges increased for the three and nine months ended September 30, 2022, compared to the three and nine months ended September 30, 2021, primarily reflecting the market value adjustment feature that results in relatively higher surrender charges when market interest rates are higher and relatively lower surrender charges when market interest rates are lower.

## Interest and investment income

Below is a summary of interest and investment income (in millions):

	Three months ended		Nine months ended	
	September 30, 2022	September 30, 2021	September 30, 2022	September 30, 2021
Fixed maturity securities, available-for-sale	\$ 364	\$ 300	\$ 1,019	\$ 903
Equity securities	14	12	48	40
Mortgage loans	48	34	136	90
Limited partnerships	(55)	173	116	417
Other investments	18	4	38	12
Gross investment income	389	523	1,357	1,462
Investment expense	(49)	(42)	(141)	(121)
<b>Interest and investment income</b>	<b>\$ 340</b>	<b>\$ 481</b>	<b>\$ 1,216</b>	<b>\$ 1,341</b>

Our AAUM and yield on AAUM are summarized as follows (annualized) (dollars in millions) (see "Non-GAAP Financial Measures"):

	Three months ended		Nine months ended	
	September 30, 2022	September 30, 2021	September 30, 2022	September 30, 2021
AAUM	\$ 41,081	\$ 32,692	\$ 39,246	\$ 30,706
Yield on AAUM (at amortized cost)	3.31 %	5.89 %	4.13 %	5.82 %

- AAUM was higher for the three and nine months ended September 30, 2022 compared to the three and nine months ended September 30, 2021, reflecting net new business asset flows, offset by net reinsurance and other activity.
- Interest and investment income was lower for the three months ended September 30, 2022 compared to the three months ended September 30, 2021, primarily due to \$255 million lower returns on limited partnerships and \$10 million of all other rate impacts, partially offset by \$124 million from invested asset growth.
- Interest and investment income was lower for the nine months ended September 30, 2022 compared to the nine months ended September 30, 2021 primarily due to \$436 million from lower returns on limited partnerships and \$62 million of all other rate impacts, partially offset by \$373 million from invested asset growth.

## Recognized gains and losses, net

Below is a summary of the major components included in recognized gains and losses, net (in millions):

	Three months ended		Nine months ended	
	September 30, 2022	September 30, 2021	September 30, 2022	September 30, 2021
Net realized and unrealized (losses) gains on fixed maturity available-for-sale securities, equity securities and other invested assets	\$ (81)	\$ (6)	\$ (350)	\$ 58
Change in allowance for expected credit losses	(7)	1	(14)	3
Net realized and unrealized (losses) gains on certain derivatives instruments	(144)	(3)	(846)	284
Change in fair value of reinsurance related embedded derivatives	94	23	357	23
Change in fair value of other derivatives and embedded derivatives	(2)	—	(10)	2
<b>Recognized gains and losses, net</b>	<b>\$ (140)</b>	<b>\$ 15</b>	<b>\$ (863)</b>	<b>\$ 370</b>

- For the three and nine months ended September 30, 2022, net realized and unrealized gains (losses) on fixed maturity available-for-sale securities, equity securities and other invested assets is primarily the result of mark-to-market losses on our equity securities and realized losses on fixed maturity available-for-sale securities.
- For the three and nine months ended September 30, 2021, net realized and unrealized gains (losses) on fixed maturity available-for-sale securities, equity securities and other invested assets is primarily the result of realized gains and losses on fixed maturity available-for-sale securities.
- For all periods, net realized and unrealized gains (losses) on certain derivative instruments primarily relate to the net realized and unrealized gains (losses) on options and futures used to hedge FIA and IUL products, including gains on option and futures expiration. See the table below for primary drivers of gains (losses) on certain derivatives.
- The fair value of reinsurance related embedded derivative is based on the change in fair value of the underlying assets held in the funds withheld ("FWH") portfolio.

We utilize a combination of static (call options) and dynamic (long futures contracts) instruments in our hedging strategy. A substantial portion of the call options and futures contracts are based upon the S&P 500 Index with the remainder based upon other equity, bond and gold market indices.

The components of the realized and unrealized gains (losses) on certain derivative instruments hedging our indexed annuity and universal life products are summarized in the table below (dollars in millions):

	Three months ended		Nine months ended	
	September 30, 2022	September 30, 2021	September 30, 2022	September 30, 2021
Call options:				
(Losses) gains on option expiration	\$ (79)	\$ 134	\$ (75)	\$ 303
Change in unrealized (losses) gains	(70)	(140)	(783)	(30)
Futures contracts:				
(Losses) gains on futures contracts expiration	(4)	—	(6)	8
Change in unrealized gains (losses)	(1)	—	(4)	(4)
Foreign currency forward:				
Gains on foreign currency forward	10	3	22	7
Total net change in fair value	\$ (144)	\$ (3)	\$ (846)	\$ 284
<b>Annual Point-to-Point Change in S&amp;P 500 Index during the periods</b>	(5)%	1 %	(25)%	16 %

- Realized gains and losses on certain derivative instruments are directly correlated to the performance of the indices upon which the call options and futures contracts are based and the value of the derivatives at the time of expiration compared to the value at the time of purchase. Gains (losses) on option expiration reflect the movement during each period on options settled during the respective period.
- The change in unrealized gains (losses) due to fair value of call options is primarily driven by the underlying performance of the S&P 500 Index during each respective period relative to the S&P 500 Index on the policyholder buy dates.
- The net change in fair value of the call options and futures contracts was primarily driven by movements in the S&P 500 Index relative to the policyholder buy dates.

The average index credits to policyholders are as follows:

	Three months ended		Nine months ended	
	September 30, 2022	September 30, 2021	September 30, 2022	September 30, 2021
Average Crediting Rate	— %	6 %	1 %	5 %
S&P 500 Index:				
Point-to-point strategy	— %	4 %	1 %	5 %
Monthly average strategy	— %	4 %	2 %	3 %
Monthly point-to-point strategy	— %	11 %	1 %	7 %
3 year high water mark	13 %	19 %	12 %	14 %

- Actual amounts credited to contractholder fund balances may differ from the index appreciation due to contractual features in the FIA contracts and certain IUL contracts (caps, spreads and participation rates), which allow F&G to manage the cost of the options purchased to fund the annual index credits.
- The credits for the periods presented were based on comparing the S&P 500 Index on each issue date in the period to the same issue date in the respective prior year periods.

## Benefits and expenses

### *Benefits and other changes in policy reserves*

Below is a summary of the major components included in Benefits and other changes in policy reserves (in millions):

	Three months ended		Nine months ended	
	September 30, 2022	September 30, 2021	September 30, 2022	September 30, 2021
PRT agreements	\$ 603	\$ 371	\$ 1,124	\$ 371
FIA/IUL market related liability movements	(209)	(547)	(1,323)	(611)
Index credits, interest credited & bonuses	122	289	483	725
Annuity payments and other	76	72	98	249
<b>Total benefits and other changes in policy reserves</b>	<b>\$ 592</b>	<b>\$ 185</b>	<b>\$ 382</b>	<b>\$ 734</b>

- PRT agreements increased for the three and nine months ended September 30, 2022, compared to the three and nine months ended September 30, 2021, and reflects F&G's entrance into the PRT market in the second half of 2021. PRT agreements are subject to fluctuation period to period.
- The FIA/IUL market related liability movements during the three and nine months ended September 30, 2022 and September 30, 2021, respectively, are mainly driven by changes in the equity markets, non-performance spreads, and risk free rates during the periods. Additionally, the three and nine months ended September 2021 include the system implementation and assumption review process impacts discussed below. The change in risk free rates and non-performance spreads (decreased) the FIA market related liability by (\$189) million and (\$29) million during the three months ended September 30, 2022 and September 30, 2021, respectively. The change in risk free rates and non-performance spreads (decreased) the FIA market related liability by (\$747) million and (\$160) million during the nine months ended September 30, 2022 and September 30, 2021, respectively. The remaining changes in market value of the market related liability movements for all periods was driven by equity market impacts. See table in the net investment gains/losses discussion above for summary and discussion of net unrealized gains (losses) on certain derivative instruments.

- Annually, typically in the third quarter, we review assumptions associated with reserves for policy benefits and product guarantees. There were no significant impacts during the third quarter of 2022. During the third quarter of 2021, we implemented a new actuarial valuation system, and as a result, our third quarter 2021 assumption updates include model refinements and assumption updates resulting from the implementation. The system implementation and assumption review process included refinements in the calculation of the fair value of the embedded derivative component of our fixed indexed annuities. These changes, taken together, resulted in a decrease in contractholder funds and future policy reserves of \$397 million for the three and nine months ended September 30, 2021.
- Index credits, interest credited & bonuses for the three and nine months ended September 30, 2022 were lower compared to the three and nine months ended September 30, 2021 and primarily reflected lower index credits on FIA policies as a result of market movement during the respective periods. Refer to average policyholder index discussion above for details on drivers.

### ***Amortization of intangibles***

Below is a summary of the major components included in depreciation and amortization (in millions):

	Three months ended		Nine months ended	
	September 30, 2022	September 30, 2021	September 30, 2022	September 30, 2021
Amortization of DAC, VOBA, and DSI	\$ 86	\$ 204	\$ 368	\$ 436
Interest	(14)	(12)	(40)	(32)
Unlocking	9	18	3	1
Amortization of other intangible assets and other depreciation	6	—	20	14
<b>Total depreciation and amortization</b>	<b>\$ 87</b>	<b>\$ 210</b>	<b>\$ 351</b>	<b>\$ 419</b>

- Amortization of VOBA, DAC and DSI is based on current and future expected gross margins (pre-tax operating income before amortization). The amortization for the periods presented is the result of actual gross profits ("AGPs") in the period.
- Annually, typically in the third quarter, we review assumptions associated with the amortization of intangibles. There were no significant impacts during the third quarter of 2022. During the third quarter of 2021, we implemented a new actuarial valuations system and as a result, our third quarter 2021 assumption updates include model refinements and assumption updates resulting from the implementation. The changes, taken together, increased amortization of intangibles by \$136 million for the three and nine months ended September 30, 2021.

### **Other items affecting net earnings**

#### ***Income tax expense (benefit)***

Below is a summary of the major components included in income tax expense (benefit) (dollars in millions):

	Three months ended		Nine months ended	
	September 30, 2022	September 30, 2021	September 30, 2022	September 30, 2021
Income before taxes	\$ 143	\$ 472	\$ 774	\$ 925
Income tax expense before valuation allowance	28	96	155	203
Change in valuation allowance	—	—	38	(14)
<b>Federal income tax expense (benefit)</b>	<b>\$ 28</b>	<b>\$ 96</b>	<b>\$ 193</b>	<b>\$ 189</b>
Effective rate	20 %	20 %	25 %	20 %

- Income tax expense for the three months ended September 30, 2022 of \$28 million, was lower compared to income tax expense of \$96 million for the three months ended September 30, 2021,

reflecting lower income before taxes. The effective tax rate for the three months ended September 30, 2022, was 20%, in line with the effective tax rate for the three months ended September 30, 2021.

- Income tax expense for the nine months ended September 30, 2022 was \$193 million, inclusive of a change in the valuation allowance of \$38 million, compared to income tax expense of \$189 million, inclusive of a change in the valuation allowance of \$(14) million for the nine months ended September 30, 2021. The effective tax rate was 25% and 20% for the nine months ended September 30, 2022 and September 30, 2021, respectively. The increase in the effective tax rate for the nine months ended September 30, 2022 is primarily related to the valuation allowance recorded on realized capital losses on the sale of discontinued operations, for which it is more likely than not that we will not be able to realize for tax purposes.

### Adjusted Net Earnings (See Non-GAAP Financial Measures)

The table below shows the adjustments made to reconcile Net earnings from continuing operations to Adjusted net earnings (in millions):

	Three months ended		Nine months ended	
	September 30, 2022	September 30, 2021	September 30, 2022	September 30, 2021
Net earnings (loss) from continuing operations attributable to common shareholders	\$ 115	\$ 376	\$ 581	\$ 736
<b>Non-GAAP adjustments:</b>				
Recognized (gains) and losses, net:				
Net realized and unrealized gains (losses) on fixed maturity available-for-sale securities, equity securities and other invested assets	70	5	336	(58)
Change in allowance for expected credit losses	6	(2)	13	(5)
Change in fair value of reinsurance related embedded derivatives	(94)	(23)	(357)	(23)
Change in fair value of other derivatives and embedded derivatives	(7)	(3)	(11)	(9)
Recognized (gains) and losses, net	(25)	(23)	(19)	(95)
Indexed product related derivatives	(148)	14	(566)	(167)
Purchase price amortization	5	7	16	20
Transaction costs and other non-recurring items (a)	4	(283)	8	(279)
Amortization of actuarial intangibles and SOP-03-1 reserve offset on non-GAAP adjustments	33	12	87	110
Income taxes on non-GAAP adjustments	28	57	100	84
Adjusted net earnings	\$ 12	\$ 160	\$ 207	\$ 409

- (a) For the three and nine months ended September 30, 2021, reflects a one-time favorable adjustment to benefits and other changes in policy reserves and depreciation and amortization resulting from an actuarial system conversion which reflects modeling enhancement and other refinements of \$284..

The commentary below is intended to provide additional information on the significant income and expense items that are reflected in ANE results for each time period. Those significant income and expense items are reported after actuarial intangibles and SOP 03-1 reserve offsets and taxes.

- Adjusted net earnings of \$12 million for the three months ended September 30, 2022 is comprised of alternative investments net investment loss of \$(10) million. Alternative investments net investment income based on management's long-term expected return of approximately 10% was \$83 million. Actual net investment income was lower due to declines in fair value of these investments. Additionally, we recognized \$(5) million expense from other net unfavorable items.
- Adjusted net earnings of \$160 million for the three months ended September 30, 2021 is comprised of alternative investments net investment income of \$108 million. Alternative investments net investment income based on management's long-term expected return of approximately 9% was \$49 million. Actual net investment income was higher due to increases in fair value of these investments. Additionally, we recognized \$7 million income from net favorable mortality experience and other

reserve changes and \$20 million of net favorable items, primarily income from CLO redemption and other income.

- Adjusted net earnings of \$207 million for the nine months ended September 30, 2022 is comprised of alternative investments net investment income of \$66 million. Alternative investments net investment income based on management's long-term expected return of approximately 10% was \$174 million. Actual net investment income was lower due to declines in fair value of these investments. Additionally, we recognized \$9 million income from net favorable mortality experience and other reserve changes, \$33 million income from actuarial assumption updates and \$20 million income from CLO redemption and other income; offset by \$(47) million from other net unfavorable items, primarily income tax expense due to a valuation allowance recorded against deferred tax assets related to the past sale of discontinued operations.
- Adjusted net earnings of \$409 million for the nine months ended September 30, 2021 is comprised of alternative investments net investment income of \$241 million. Alternative investments net investment income based on management's long-term expected return of approximately 10% was \$103 million. Actual net investment income was higher due to increases in fair value of these investments. Additionally, we recognized \$17 million income from net favorable mortality experience and other reserve changes, \$8 million income from actuarial intangibles unlocking and \$36 million income of other net favorable items, primarily net investment income related to CLO gains.

### Investment Portfolio

The types of assets in which we may invest are influenced by various state laws, which prescribe qualified investment assets applicable to insurance companies. Within the parameters of these laws, we invest in assets giving consideration to four primary investment objectives: (i) maintain robust absolute returns; (ii) provide reliable yield and investment income; (iii) preserve capital and (iv) provide liquidity to meet policyholder and other corporate obligations.

Our investment portfolio is designed to contribute stable earnings and balance risk across diverse asset classes and is primarily invested in high quality fixed income securities.

As of September 30, 2022 and December 31, 2021, the fair value of our investment portfolio was approximately \$38 billion and \$39 billion, respectively, and was divided among the following asset classes and sectors (dollars in millions):

	September 30, 2022		December 31, 2021	
	Fair Value	Percent	Fair Value	Percent
Fixed maturity securities, available for sale:				
United States Government full faith and credit	\$ 179	— %	\$ 50	— %

<b>Total investments</b>	<b>\$ 37,726</b>	<b>100 %</b>	<b>\$ 38,975</b>	<b>100 %</b>

(a) Includes investment grade non-redeemable preferred stocks (\$724 million and \$928 million as of September 30, 2022 and December 31, 2021, respectively).

Insurance statutes regulate the type of investments that our life insurance subsidiaries are permitted to make and limit the amount of funds that may be used for any one type of investment. In light of these statutes and regulations, and our business and investment strategy, we generally seek to invest in (i) corporate securities rated investment grade by established nationally recognized statistical rating organizations (each, an “NRSRO”), (ii) U.S. Government and government-sponsored agency securities, or (iii) securities of comparable investment quality, if not rated.

As of September 30, 2022 and December 31, 2021, our fixed maturity available-for-sale ("AFS") securities portfolio was approximately \$29 billion and \$30 billion, respectively. The following table summarizes the credit quality, by NRSRO rating, of our fixed income portfolio (dollars in millions):

Rating	September 30, 2022		December 31, 2021	
	Fair Value	Percent	Fair Value	Percent
AAA	\$ 1,040	3 %	\$ 660	2 %
AA	2,026	7 %	2,181	7 %
A	7,320	25 %	7,667	26 %
BBB	7,986	27 %	10,462	35 %
Not rated <sup>(b)</sup>	8,969	31 %	6,642	22 %
Total investment grade	27,341	93 %	27,612	92 %
BB	1,043	4 %	1,372	5 %
B and below <sup>(a)</sup>	305	1 %	432	1 %
Not rated <sup>(b)</sup>	670	2 %	546	2 %
Total below investment grade	2,018	7 %	2,350	8 %
<b>Total</b>	<b>\$ 29,359</b>	<b>100 %</b>	<b>\$ 29,962</b>	<b>100 %</b>

(a) Includes \$52 million and \$68 million at September 30, 2022 and December 31, 2021, respectively, of non-agency residential mortgage-backed securities ("RMBS") that carry a NAIC 1 designation.

(b) Securities denoted as not-rated by an NRSRO were classified as investment or non-investment grade according to the securities' respective NAIC designation.

The NAIC's Securities Valuation Office ("SVO") is responsible for the day-to-day credit quality assessment and valuation of securities owned by state regulated insurance companies. Insurance companies report ownership of securities to the SVO when such securities are eligible for regulatory filings. The SVO conducts credit analysis on these securities for the purpose of assigning an NAIC designation or unit price. Typically, if a security has been rated by an NRSRO, the SVO utilizes that rating and assigns an NAIC designation based upon the following system:

NAIC Designation	NRSRO Equivalent Rating
1	AAA/AA/A
2	BBB
3	BB
4	B
5	CCC and lower
6	In or near default

The NAIC uses designation methodologies for non-agency RMBS, including RMBS backed by subprime mortgage loans and for commercial mortgage-backed securities ("CMBS"). The NAIC's objective with the designation methodologies for these structured securities is to increase accuracy in assessing expected losses and to use the improved assessment to determine a more appropriate capital requirement for such structured securities. Prior to 2021, the NAIC designations for structured securities, including subprime and Alternative A-paper ("Alt-A") RMBS, were based upon a comparison of the bond's amortized cost to the NAIC's loss expectation for each security. Securities where modeling does not generate an expected loss in all scenarios are given the highest designation of NAIC 1. In 2021, the NAIC eliminated the comparison of non-legacy (issued after 2012) bond's amortized cost to the NAIC's loss expectation and instead assigned a NAIC designation based on the loss expectation alone. Several of our RMBS securities carry a NAIC 1 designation while the NRSRO rating indicates below investment grade. The revised methodologies reduce regulatory reliance on rating agencies and allow for greater regulatory input into the assumptions used to estimate expected losses from such structured securities. In the tables below, we present the rating of structured securities based on ratings from the NAIC rating methodologies described above (which in some cases do not correspond to rating agency designations). All NAIC designations (e.g., NAIC 1-6) are based on the NAIC methodologies.

The tables below presents our fixed maturity securities by NAIC designation as of September 30, 2022 and December 31, 2021 (dollars in millions):

NAIC Designation	September 30, 2022		
	Amortized Cost	Fair Value	Percent of Total Fair Value
1	\$ 20,253	\$ 17,464	60 %
2	11,554	9,691	33 %
3	1,685	1,539	5 %
4	552	532	2 %

<b>Total fixed maturity available-for-sale securities</b>	<b>\$ 34,183</b>	<b>\$ 29,359</b>	<b>\$ 28,724</b>	<b>\$ 29,962</b>

### Non-Agency RMBS Exposure

Our investment in non-agency RMBS securities is predicated on the conservative and adequate cushion between purchase price and NAIC 1 rating, general lack of sensitivity to interest rates, positive convexity to prepayment rates and correlation between the price of the securities and the unfolding recovery of the housing market.

The fair value of our investments in subprime and Alt-A RMBS securities was \$42 million and \$58 million as of September 30, 2022, respectively, and \$52 million and \$75 million as of December 31, 2021, respectively.

The following tables summarize our exposure to subprime and Alt-A RMBS by credit quality using NAIC designations, NRSRO ratings and vintage year as of September 30, 2022 and December 31, 2021 (dollars in millions):

NAIC Designation:	September 30, 2022		December 31, 2021	
	Fair Value	Percent of Total	Fair Value	Percent of Total
1	\$ 92	92 %	\$ 116	91 %
2	3	3 %	4	3 %
3	3	3 %	2	2 %
4	—	— %	1	1 %
5	2	2 %	4	3 %
6	—	— %	—	— %
<b>Total</b>	<b>\$ 100</b>	<b>100 %</b>	<b>\$ 127</b>	<b>100 %</b>
<b>NRSRO:</b>

2005 and prior	48	48 %	62	49 %
<b>Total</b>	<b>\$ 100</b>	<b>100 %</b>	<b>\$ 127</b>	<b>100 %</b>

(a) Securities denoted as not-rated by an NRSRO were classified as investment or non-investment grade according to the securities' respective NAIC designation.

### ABS and CLO Exposures

Our ABS exposures are largely diversified by underlying collateral and issuer type. Our CLO exposures are generally senior tranches of CLOs, which have leveraged loans as their underlying collateral.

As of September 30, 2022, the CLO and ABS positions were trading at a net unrealized loss position of \$(307) million and \$(445) million, respectively. As of December 31, 2021, the CLO and ABS positions were trading at a net unrealized gain position of \$145 million and \$37 million, respectively.

### Municipal Bond Exposure

Our municipal bond exposure is a combination of general obligation bonds (fair value of \$187 million and \$258 million and an amortized cost of \$232 million and \$247 million as of September 30, 2022 and December 31, 2021, respectively) and special revenue bonds (fair value of \$1,003 million and \$1,183 million and an amortized cost of \$1,232 million and \$1,138 million as of September 30, 2022 and December 31, 2021, respectively).

Across all municipal bonds, the largest issuer represented 6% of the category, less than 1% of the entire portfolio and is rated NAIC 1. Our focus within municipal bonds is on NAIC 1 rated instruments, and 96% of our municipal bond exposure is rated NAIC 1.

## **Mortgage Loans**

### *Commercial Mortgage Loans*

We diversify our commercial mortgage loans ("CMLs") portfolio by geographic region and property type to attempt to reduce concentration risk. We continuously evaluate CMLs based on relevant current information to ensure properties are performing at a level to secure the related debt. LTV and DSC ratios are utilized to assess the risk and quality of CMLs. As of September 30, 2022 and December 31, 2021, our mortgage loans on real estate portfolio had a weighted average DSC ratio of 2.5 times and 2.4 times, respectively, and a weighted average LTV ratio of 57% and 56%, respectively. See Note D to the unaudited Condensed Consolidated Financial Statements included in this report for additional information on our CMLs, including our distribution by property type, geographic region and LTV and DSC ratios.

We consider a CML delinquent when a loan payment is greater than 30 days past due. For mortgage loans that are determined to require foreclosure, the carrying value is reduced to the fair value of the underlying collateral, net of estimated costs to obtain and sell at the point of foreclosure. At September 30, 2022, we had one CML that was delinquent in principal or interest payments and none in the process of foreclosure. As of December 31, 2021, we had no CMLs that were delinquent in principal or interest payments or in process of foreclosure.

### *Residential Mortgage Loans*

F&G's residential mortgage loans ("RMLs") are closed end, amortizing loans and 100% of the properties are in the United States. F&G diversifies its RML portfolio by state to attempt to reduce concentration risk. RMLs have a primary credit quality indicator of either a performing or nonperforming loan. F&G defines non-performing RMLs as those that are 90 or more days past due and/or in nonaccrual status.

Loans are placed on nonaccrual status when they are over 90 days delinquent. If a loan becomes over 90 days delinquent, it is our general policy to initiate foreclosure proceedings unless a workout arrangement to bring the loan current can be put in place. See Note D to the unaudited Condensed Consolidated Financial Statements included in this report for additional information on our RMLs.

## Unrealized Losses

The amortized cost and fair value of the fixed maturity securities and the equity securities that were in an unrealized loss position as of September 30, 2022 and December 31, 2021, were as follows (in millions):

	September 30, 2022				
	Number of securities	Amortized Cost	Allowance for Expected Credit Losses	Unrealized Losses	Fair Value
Fixed maturity securities, available for sale:

Corporate securities:					
Finance, insurance and real estate	366	1,365	—	(31)	1,334
Manufacturing, construction and mining	97	281	—	(3)	278
Utilities, energy and related sectors	280	1,243	—	(46)	1,197
Wholesale/retail trade	313	1,188	—	(33)	1,155
Services, media and other	339	1,486	—	(39)	1,447
Hybrid securities	3	3	—	—	3
Non-agency residential mortgage backed securities	46	316	(2)	(3)	311
Commercial mortgage backed securities	89	616	(1)	(11)	604
Asset backed securities	375	4,603	(2)	(38)	4,563
<b>Total fixed maturity available for sale securities</b>	<b>2,036</b>	<b>\$ 11,709</b>	<b>(5)</b>	<b>(216)</b>	<b>\$ 11,488</b>
Equity securities	20	259	—	(33)	226
<b>Total investments</b>	<b>2,056</b>	<b>\$ 11,968</b>	<b>\$ (5)</b>	<b>\$ (249)</b>	<b>\$ 11,714</b>

The gross unrealized loss position on the fixed maturity available-for-sale and equity portfolio was \$5,060 million and \$249 million as of September 30, 2022 and December 31, 2021, respectively. Most components of the portfolio exhibited price depreciation caused by higher treasury rates and wider spreads as of September 30, 2022. The total amortized cost of all securities in an unrealized loss position was \$32,378 million and \$11,968 million as of September 30, 2022 and December 31, 2021, respectively. The average market value/book value of the investment category with the largest unrealized loss position was 83% for Finance, insurance and real estate as of September 30, 2022. In the aggregate, Finance, insurance and real estate represented 19% of the total unrealized loss position as of September 30, 2022. The average market value/book value of the investment category with the largest unrealized loss position was 96% for Utilities, energy and related sectors as of December 31, 2021. In aggregate, Utilities, energy and related sectors represented 18% of the total unrealized loss position as of December 31, 2021.

The amortized cost and fair value of fixed maturity available for sale securities under watch list analysis and the number of months in a loss position with investment grade securities (NRSRO rating of BBB/Baa or higher) as of September 30, 2022 and December 31, 2021, were as follows (dollars in millions):

	September 30, 2022

### ***Expected Credit Losses and Watch List***

F&G prepares a watch list to identify securities to evaluate for expected credit losses. Factors used in preparing the watch list include fair values relative to amortized cost, ratings and negative ratings actions and other factors. Detailed analysis is performed for each security on the watch list to further assess the presence of credit impairment loss indicators and, where present, calculate an allowance for expected credit loss or direct write-down of a security's amortized cost.

At September 30, 2022, our watch list included one hundred eighty-five securities in an unrealized loss position with an amortized cost of \$2,051 million, allowance for expected credit losses of \$0 million, unrealized losses of \$683 million and a fair value of \$1,368 million.

At December 31, 2021, our watch list included seven securities in an unrealized loss position with an amortized cost of \$132 million, allowance for expected credit losses of \$0 million, unrealized losses of \$7 million and a fair value of \$125 million.

The watch list excludes structured securities as we have separate processes to evaluate the credit quality on the structured securities.

There were 60 and 36 structured securities with a fair value of \$150 million and \$45 million to which we had potential credit exposure as of September 30, 2022 and December 31, 2021, respectively. Our analysis of these structured securities, which included cash flow testing, resulted in allowances for expected credit losses of \$15 million and \$8 million as of September 30, 2022 and December 31, 2021, respectively.

### ***Exposure to Sovereign Debt***

There have been no material changes in the exposure to sovereign debt described in our Annual Report on Form 10-K for the year ended December 31, 2021.

### ***Interest and Investment Income***

For discussion regarding our net investment income and net investment gains (losses) refer to Note D to the unaudited Condensed Consolidated Financial Statements included in Item 1 of Part I of this Report.

### ***AFS Securities***

For additional information regarding our AFS securities, including the amortized cost, gross unrealized gains (losses), and fair value as well as the amortized cost and fair value of fixed maturity AFS securities by contractual maturities, as of September 30, 2022 and December 31, 2021, refer to Note D to the unaudited Condensed Consolidated Financial Statements included in Item 1 of Part I of this Report.

### ***Concentrations of Financial Instruments***

For certain information regarding our concentrations of financial instruments, refer to Note D to the unaudited Condensed Consolidated Financial Statements included in Item 1 of Part I of this Report.

There have been no other material changes in the concentrations of financial instruments described in our Annual Report on Form 10-K for the year ended December 31, 2021.

### ***Derivatives***

We are exposed to credit loss in the event of nonperformance by our counterparties on call options. We attempt to reduce this credit risk by purchasing such options from large, well-established financial institutions.

We also hold cash and cash equivalents received from counterparties for call option collateral, as well as U.S. Government securities pledged as call option collateral, if our counterparty's net exposures exceed pre-determined thresholds.

We are required to pay counterparties the effective federal funds rate each day for cash collateral posted to F&G for daily mark to market margin changes. We reduce the negative interest cost associated with cash collateral posted from counterparties under various ISDA agreements by reinvesting derivative cash collateral. This program permits collateral cash received to be invested in short term Treasury securities, bank deposits and

commercial paper rated A1/P1, which are included in Cash and cash equivalents in the accompanying unaudited Condensed Consolidated Balance Sheets.

See Note E to the unaudited Condensed Consolidated Financial Statements included in Item 1 of Part I of this Report for additional information regarding our derivatives and our exposure to credit loss on call options.

### Corporate and Other

The Corporate and Other segment consists of the operations of the parent holding company and our real estate technology subsidiaries. This segment also includes certain other unallocated corporate overhead expenses and eliminations of revenues and expenses between it and our Title segment.

The following table presents the results of operations of our Corporate and Other segment (in millions):

	Three months ended September 30,		Nine months ended September 30,	
	2022	2021	2022	2021
<b>Revenues:</b>				
Escrow, title-related and other fees	\$ 47	\$ 44	\$ 86	\$ 133
Interest and investment income	9	—	12	—
Recognized gains and losses, net	(42)	—	(40)	9
Total revenues	14	44	58	142
<b>Expenses:</b>				
Personnel costs	25	24	26	85
Other operating expenses	30	25	74	75
Depreciation and amortization	6	6	18	18
Interest expense	22	21	66	62
Total expenses	83	76	184	240
Loss from continuing operations, before income taxes and equity in earnings of unconsolidated affiliates	\$ (69)	\$ (32)	\$ (126)	\$ (98)

The revenue in the Corporate and Other segment represents revenue generated by our non-title real estate technology subsidiaries as well as mark-to-market valuation changes on certain corporate deferred compensation plans.

Total revenues in the Corporate and Other segment decreased \$30 million, or 68%, in the three months ended September 30, 2022 and decreased \$84 million, or 59% in the nine months ended September 30, 2022 from the corresponding periods in 2021. The decrease in the three-month period is primarily attributable to a \$41 million dollar impairment of cost method investments in the 2022 period when compared to the corresponding period in 2021, partially offset by other immaterial items. The decrease in the nine-month period is primarily attributable to a \$60 million decrease in valuations associated with our deferred compensation plan assets, which decreased both revenue and personnel costs and the aforementioned \$41 million dollar impairment of cost method investments in the 2022 period when compared to the corresponding period in 2021, partially offset by other immaterial items.

Personnel costs in the Corporate and Other segment increased \$1 million, or 4%, in the three months ended September 30, 2022, and decreased \$59 million, or 69% in the nine months ended September 30, 2022 from the corresponding periods in 2021. The decreases in the three and nine-month periods were primarily attributable to the aforementioned \$60 million decrease in valuations associated with our deferred compensation plan assets, which decreased both revenue and personnel costs.

Other operating expenses in the Corporate and Other segment increased \$5 million, or 20%, in the three months ended September 30, 2022 and decreased \$1 million, or 1% in the nine months ended September 30, 2022 from the corresponding periods in 2021. The increase in the three-month period and the decrease in the nine-month period were attributable to various immaterial items.

Interest expense in the Corporate and Other segment increased \$1 million, or 5%, in the three months ended September 30, 2022 and increased \$4 million or 6%, in the nine months ended September 30, 2022 from the corresponding periods in 2021. The increases were primarily attributable to increased average debt outstanding in the three and nine months ended September 30, 2022 from the corresponding periods in 2021.

## Liquidity and Capital Resources

*Cash Requirements.* Our current cash requirements include personnel costs, operating expenses, claim payments, taxes, payments of interest and principal on our debt, capital expenditures, business acquisitions, stock repurchases and dividends on our common stock. We paid dividends of \$0.44 per share in the third quarter of 2022, or approximately \$120 million to our common shareholders. On November 3, 2022, our Board of Directors declared cash dividends of \$0.45 per share, payable on December 30, 2022, to FNF common shareholders of record as of December 16, 2022. There are no restrictions on our retained earnings regarding our ability to pay dividends to our shareholders, although there are limits on the ability of certain subsidiaries to pay dividends to us, as described below. The declaration of any future dividends is at the discretion of our Board of Directors.

As of September 30, 2022, we had cash and cash equivalents of \$2,474 million, short term investments of \$1,386 million and available capacity under our Revolving Credit Facility of \$800 million. We continually assess our capital allocation strategy, including decisions relating to the amount of our dividend, reducing debt, repurchasing our stock, investing in growth of our subsidiaries, making acquisitions and/or conserving cash. We believe that all anticipated cash requirements for current operations will be met from internally generated funds, through cash dividends from subsidiaries, cash generated by investment securities, potential sales of non-strategic assets, potential issuances of additional debt or equity securities, and borrowings on our Revolving Credit Facility. Our short-term and long-term liquidity requirements are monitored regularly to ensure that we can meet our cash requirements. We forecast the needs of all of our subsidiaries and periodically review their short-term and long-term projected sources and uses of funds, as well as the asset, liability, investment and cash flow assumptions underlying such forecasts.

Our insurance subsidiaries generate cash from premiums earned and their respective investment portfolios, and these funds are adequate to satisfy the payments of claims and other liabilities. Due to the magnitude of our investment portfolio in relation to our title claim loss reserves, we do not specifically match durations of our investments to the cash outflows required to pay claims, but do manage outflows on a shorter time frame.

Our two significant sources of internally generated funds are dividends and other payments from our subsidiaries. As a holding company, we receive cash from our subsidiaries in the form of dividends and as reimbursement for operating and other administrative expenses we incur. The reimbursements are paid within the guidelines of management agreements among us and our subsidiaries. Our insurance subsidiaries are restricted by state regulation in their ability to pay dividends and make distributions. Each applicable state of domicile regulates the extent to which our title underwriters can pay dividends or make other distributions. As of December 31, 2021, \$2,375 million of our net assets were restricted from dividend payments without prior approval from the relevant departments of insurance. We anticipate that our title insurance subsidiaries will pay or make dividends in the remainder of 2022 of approximately \$215 million. Our underwritten title companies and non-insurance subsidiaries are not regulated to the same extent as our insurance subsidiaries.

The maximum dividend permitted by law is not necessarily indicative of an insurer's actual ability to pay dividends, which may be constrained by business and regulatory considerations, such as the impact of dividends on surplus, which could affect an insurer's ratings or competitive position, the amount of premiums that can be written and the ability to pay future dividends. Further, depending on business and regulatory conditions, we may in the future need to retain cash in our underwriters or even contribute cash to one or more of them in order to maintain their ratings or their statutory capital position. Such a requirement could be the result of investment losses, reserve charges, adverse operating conditions in the current economic environment or changes in statutory accounting requirements by regulators.

Cash flow from our operations will be used for general corporate purposes including to reinvest in operations, repay debt, pay dividends, repurchase stock, pursue other strategic initiatives and/or conserve cash.

*Operating Cash Flow.* Our cash flows provided by operations for the nine months ended September 30, 2022 and 2021 totaled \$2,977 million and \$2,600 million, respectively. The increase in cash provided by operating activities in the period in 2022 of \$377 million is primarily attributable to the increase in future policy benefits of \$799 million, which was primarily related to cash received for PRT transactions, the change in funds

withheld from reinsurers of \$566 million, the change in trade receivables of \$195 million and the change in income taxes of \$261 million, partially offset by the decrease in net earnings of \$822 million and the timing of receipts and payments of prepaid assets and payables, and other individually immaterial items.

*Investing Cash Flows.* Our cash flows used in investing activities for the nine months ended September 30, 2022 and 2021 were \$7,890 million and \$4,863 million, respectively. The increase in cash used in investing activities in the period in 2022 of \$3,027 million is primarily attributable to decreased proceeds from sales, calls and maturities of investment securities of \$1,465 million and net purchases of short-term investments of \$1,367 million in the period in 2022 as compared to net proceeds from sales and maturities of short-term investments of \$92 million in the corresponding period in 2021, partially offset by other individually immaterial items.

*Capital Expenditures.* Total capital expenditures for property and equipment and capitalized software were \$107 million and \$93 million for the nine months ended September 30, 2022 and 2021, respectively.

*Financing Cash Flows.* Our cash flows provided by financing activities for the nine months ended September 30, 2022 and 2021 were \$3,027 million and \$4,692 million, respectively. The decrease in cash provided by financing activities in the period in 2022 of \$1,665 million is primarily attributable to the repayment of our 5.50% Senior Notes of \$400 million as compared to cash received associated with our 3.20% Notes offering in the corresponding period in 2021 of \$449 million, the net change in secured trust deposits of \$328 million, decreased cash inflows from contractholder account deposits of \$251 million, and increased purchases of treasury stock of \$143 million, partially offset by other individually immaterial items.

*Financing Arrangements.* For a description of our financing arrangements see Note G *Notes Payable* included in Item 8 of Part II of our Annual Report on Form 10-K for the year ended December 31, 2021.

*Capital Stock Transactions.* On August 3, 2021, our Board of Directors approved the 2021 Repurchase Program (the "Repurchase Program") under which we may purchase up to 25 million shares of our FNF common stock through July 31, 2024. We repurchased 12,369,565 shares of FNF common stock during the nine months ended September 30, 2022 for approximately \$511 million, at an average price of \$41.31 per share. Subsequent to September 30, 2022 and through market close on November 7, 2022, we repurchased a total of 475,000 shares for approximately \$18 million, at an average price of \$38.39 under this program. Since the original commencement of the Repurchase Program, we repurchased a total of 15,824,565 FNF common shares for approximately \$678 million, at an average price of \$42.80 per share.

*Equity and Preferred Security Investments.* Our equity and preferred security investments may be subject to significant volatility. Currently prevailing accounting standards require us to record the change in fair value of equity and preferred security investments held as of any given period end within earnings. Our results of operations in future periods is anticipated to be subject to such volatility.

*Off-Balance Sheet Arrangements.* Other than our unfunded investment commitments discussed below, there have been no significant changes to our off-balance sheet arrangements since our Annual Report on Form 10-K for the year ended December 31, 2021.

We have unfunded investment commitments as of September 30, 2022 based upon the timing of when investments are executed compared to when the actual investments are funded, as some investments require that funding occur over a period of months or years. Please refer to Note F *Commitments and Contingencies* to the unaudited Condensed Consolidated Financial Statements included in Item 1 of Part I of this Quarterly Report for additional details on unfunded investment commitments.

### **Critical Accounting Policies**

There have been no material changes to our critical accounting policies described in our Annual Report on Form 10-K for the year ended December 31, 2021.

### **Item 3. *Quantitative and Qualitative Disclosures about Market Risk***

There have been no material changes in the market risks described in our Annual Report on Form 10-K for the year ended December 31, 2021.

**Item 4. Controls and Procedures**

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our principal executive officer and principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures, as such term is defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended. Based on this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures are effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 is: (a) recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms; and (b) accumulated and communicated to management, including our principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

There were no changes in our internal control over financial reporting that occurred during the quarter ended September 30, 2022 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

**PART II****Item 1. Legal Proceedings**

See discussion of legal proceedings in Note F *Commitment and Contingencies* to the unaudited Condensed Consolidated Financial Statements included in Item 1 of Part I of this Quarterly Report, which is incorporated by reference into this Item 1 of Part II.

**Item 1A. Risk Factors**

The risk factors disclosed in "Item 1A. Risk Factors" included in our Annual Report on Form 10-K for the year ended December 31, 2021, are hereby incorporated by reference. In addition, we identified the following additional risk factors during the nine months ended September 30, 2022:

**Risk Factors Related to the F&G Distribution***The proposed F&G Distribution is subject to inherent risks*

As previously announced, we plan to dividend to our shareholders, on a pro rata basis, 15% of the common stock of our wholly-owned subsidiary, F&G, targeted to be completed in the fourth quarter of 2022. The F&G Distribution is subject to inherent risks and uncertainties, including, but not limited to: diversion of management's attention and the potential impact of the consummation of the F&G Distribution on relationships, including with employees, suppliers, customers and competitors; our ability to successfully realize the anticipated benefits of the F&G Distribution; the ability to satisfy any necessary conditions (including any applicable regulatory approvals) to consummate the F&G Distribution within the estimated timeframe or at all; the final terms and conditions of the F&G Distribution, including the nature of agreements and arrangements between FNF and F&G following any such transaction, the costs of any such transaction, and the nature and amount of indebtedness incurred by F&G. We cannot provide any assurances regarding the timeframe for completing the F&G Distribution, nor can we provide any assurances that we will be successful in completing the proposed F&G Distribution.

*The F&G Distribution could adversely affect our earnings*

F&G contributes to a significant portion of our earnings. We have begun to pursue the F&G Distribution. Although there can be no assurance that this process will result in a consummated transaction, any separation of a portion of F&G's business could adversely affect our earnings.

**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

The following table summarizes repurchases of equity securities by FNF during the three months ended September 30, 2022:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs (2)
07/1/2022 - 07/31/2022	631,945	\$ 37.24	631,945	14,313,055
08/01/2022 - 08/31/2022	2,000,000	\$ 39.93	2,000,000	12,313,055
09/01/2022 - 09/30/2022	2,662,620	\$ 38.21	2,662,620	9,650,435
Total	5,294,565	\$ 38.74	5,294,565	

(1) On August 3, 2021 our Board of Directors approved the Repurchase Program, under which we may purchase up to 25 million shares of our FNF common stock through July 31, 2024.

(2) As of the last day of the applicable month.

Chief Financial Officer  
(Principal Financial and Accounting Officer)

## CERTIFICATIONS

I, Michael J. Nolan, certify that:

1. I have reviewed this annual report on Form 10-Q of Fidelity National Financial, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - (a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
  - (a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - (b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
