Identification No.)

601 Riverside Avenue
Jacksonville, Florida, 32204
(Address of principal executive offices, including zip code)

(904) 854-8100
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class
FNF Common Stock, \$0.0001 par value

Trading Symbol
FNF

Name of Each Exchange on Which Registered
New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes or No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes or No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer	<input checked="" type="checkbox"/>	Accelerated Filer	<input type="checkbox"/>
Non-accelerated Filer	<input type="checkbox"/>	Smaller reporting Company	<input type="checkbox"/>
		Emerging growth company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. Yes No

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the shares of FNF common stock held by non-affiliates of the registrant as of June 30, 2021 was \$11,843,458,910 based on the closing price of \$43.46 as reported by The New York Stock Exchange.

The number of shares outstanding of the Registrant's common stock as of January 31, 2022 were:

FNF Common Stock 283,570,222

The information in Part III hereof for the fiscal year ended December 31, 2021, will be filed within 120 days after the close of the fiscal year that is the subject of this Report.

PART I

Item 1. Business

Introductory Note

The following describes the business of Fidelity National Financial, Inc. and its subsidiaries. Except where otherwise noted, all references to "we," "us," "our", the "Company" or "FNF" are to Fidelity National Financial, Inc. and its subsidiaries, taken together.

Overview

We are a leading provider of (i) title insurance, escrow and other title-related services, including trust activities, trustee sales guarantees, recordings and reconveyances and home warranty products and (ii) transaction services to the real estate and mortgage industries. FNF is one of the nation's largest title insurance companies operating through its title insurance underwriters - Fidelity National Title Insurance Company ("FNTIC"), Chicago Title Insurance Company ("Chicago Title"), Commonwealth Land Title Insurance Company ("Commonwealth Land Title"), Alamo Title Insurance and National Title Insurance of New York Inc. - which collectively issue more title insurance policies than any other title company in the United States. Through our subsidiary ServiceLink Holdings, LLC ("ServiceLink"), we provide mortgage transaction services including title-related services and facilitation of production and management of mortgage loans. We are also a leading provider of insurance solutions serving retail annuity and life customers and institutional clients through our wholly-owned subsidiary, F&G Annuities & Life ("F&G").

As of December 31, 2021, we had the following reporting segments:

- *Title.* This segment consists of the operations of our title insurance underwriters and related businesses, which provide title insurance and escrow and other title-related services including trust activities, trustee sales guarantees, and home warranty products. This segment also includes our transaction services business, which includes other title-related services used in the production and management of mortgage loans, including mortgage loans that experience default.
- *F&G.* This segment primarily consists of operations of our annuities and life insurance related businesses. This segment issues a broad portfolio of annuity and life insurance products, including deferred annuities (fixed indexed and fixed rate annuities), immediate annuities, and indexed universal life ("IUL") insurance, through its retail distribution channels. This segment also provides funding agreements and pension risk transfer ("PRT") solutions through its institutional channels.
- *Corporate and Other.* This segment consists of the operations of the parent holding company, our real estate technology subsidiaries, other smaller, non-title businesses and certain unallocated corporate overhead expenses and eliminations of revenues and expenses between it and our Title segment.

Competitive Strengths

We believe that our competitive strengths include the following:

Corporate principles. A cornerstone of our management philosophy and operating success is the six fundamental precepts upon which we were founded, which are:

- Autonomy and entrepreneurship;
- Bias for action;
- Customer-oriented and motivated;
- Minimize bureaucracy;
- Employee ownership; and
- Highest standard of conduct.

These six precepts are emphasized to our employees from the first day of employment and are integral to many of our strategies described below.

Title

Leading residential and commercial title insurance company. We are one of the largest title insurance companies in the United States and a leading provider of title insurance and escrow and other title-related services for real estate transactions. Through the third quarter of 2021, our insurance companies had a 32.6% share of the U.S. title insurance market, according to the American Land Title Association ("ALTA"). While residential title insurance comprises the majority of our business, we are also a significant provider of commercial real estate title insurance in the United States. Our network of independent title agents and employees in our direct operations that service the commercial real estate markets is one of the largest in the

industry. Our commercial network combined with our financial strength makes our title insurance operations attractive to large national lenders that require the underwriting and issuing of larger commercial title policies.

Established relationships with our customers. We have strong relationships with the customers who use our title services. Our distribution network, which includes more than 1,300 direct residential title offices and approximately 5,400 agents, is among the largest in the United States. We also benefit from strong brand recognition in our multiple title brands that allows us to access a broader client base than if we operated under a single consolidated brand and provides our customers with a choice among brands.

Strong value proposition for our customers as a leading provider of services and technology solutions to the title insurance industry. Through our Title segment, we provide our customers with title insurance and escrow and other title-related services that support their ability to effectively close real estate transactions. We help make the real estate closing process more efficient for our customers by offering a single point of access to a broad platform of title-related products and resources necessary to close real estate transactions.

Industry leading margins and disciplined operating focus. We have been able to maintain competitive operating margins in part by monitoring our businesses in a disciplined manner through continual evaluation of business activity and management of our cost structure. When compared to our industry competitors, we also believe that our structure is more efficiently designed, which allows us to operate with lower overhead costs.

Proven management team. The managers of our operating businesses have successfully built our Title segment over an extended period of time, resulting in our business attaining the size, scope and presence in the industry that it has today. Our managers have demonstrated their leadership ability during numerous acquisitions through which we have grown and throughout a number of business cycles and significant periods of industry change.

We believe that our Title segment's competitive strengths position us well to take advantage of future changes to the real estate market.

F&G

Diversified products and distribution relationships. We have five distribution channels across retail and institutional markets. Our three retail channels include agent-based independent marketing organizations ("IMOs"), banks and broker dealers. We have deep, long-tenured relationships with our network of leading IMOs and their agents to serve the needs of the middle-income market and develop competitive annuity and life products to align with their evolving needs. Upon FNF's ownership and F&G's subsequent rating upgrades in mid-2020, we launched into banks and broker dealers and are now distributing through 17 partners. Further, in 2021, we launched two institutional channels to originate funding agreement-backed notes ("FABN") and PRT transactions. The FABN program offers funding agreements to institutional clients by means of capital markets transactions through investment banks. The PRT solutions business was launched by building an experienced team and then working with brokers and institutional consultants for distribution. These markets leverage our existing team's spread-based capabilities as well as our strategic partnership with Blackstone Inc. ("Blackstone").

Proven track record of managing net investment spread and flagship product expertise. We have a long track record of consistently managing net investment spread to achieve or exceed targeted lifetime returns. Our flagship fixed indexed annuities ("FIA") product allows for active management, and our disciplined approach to pricing our business has resulted in strong and stable net investment spread, even during periods of economic turmoil. Our team of product developers has a history of innovation and collaboration in developing our flagship FIA products. Our customers value FIAs, which provide a portion of the gains of an underlying market index, while also providing principal protection. We believe this mix of "some upside but limited downside" fills the need for middle-income Americans who must save for retirement but want to limit the risk of decline in their savings.

Investment management capabilities and expertise. We believe our investment portfolio is well matched to our liabilities and well diversified across a range of high-quality asset classes. Our active management strategy leverages the expertise of Blackstone to provide a competitive advantage through sourcing investment grade, proprietary private debt and allowing F&G to leverage the breadth and depth of Blackstone's credit platforms and analysts.

Efficient and scalable administrative model. Our third-party administration model provides for scalable, cost-efficient, and nimble operations.

We believe that our competitive strengths position us well to grow the F&G segment.

Strategy

Title

Our strategy in the Title segment is to maximize operating profits by increasing our market share and managing operating expenses throughout the real estate business cycle. To accomplish our goals, we intend to do the following:

- *Continue to operate multiple title brands independently.* We believe that in order to maintain and strengthen our title insurance customer base, we must operate our strongest brands in a given marketplace independently of each other. Our national and regional brands include FNTIC, Chicago Title, Commonwealth Land Title, Lawyers Title, Ticor Title, Alamo Title, and National Title of New York. In our largest markets, we operate multiple brands. This approach allows us to continue to attract customers who identify with a particular brand and allows us to utilize a broader base of local agents and local operations than we would have with a single consolidated brand.
- *Consistently deliver superior customer service.* We believe customer service and consistent product delivery are the most important factors in attracting and retaining customers. Our ability to provide superior customer service and consistent product delivery requires continued focus on providing high quality service and products at competitive prices. Our goal is to continue to improve the experience of our customers, in all aspects of our business.
- *Manage our operations successfully through business cycles.* Our Title segment operates in a cyclical industry and our ability to diversify our revenue base within our title insurance business and manage the duration of our investments may allow us to better operate in this cyclical business. Maintaining a broad geographic revenue base, utilizing both direct and independent agency operations and pursuing both residential and commercial title insurance business help diversify our title insurance revenues. We continue to monitor, evaluate and execute upon the consolidation of administrative functions, legal entity structure, and office consolidation, as necessary, to respond to the continually changing marketplace. We maintain shorter durations on our investment portfolio to mitigate our interest rate risk. A more detailed discussion of our investment strategies is included in “Investment Policies and Investment Portfolio.”
- *Continue to improve our products and technology.* As a national provider of real estate transaction products and services, we participate in an industry that is subject to significant change, frequent new product and service introductions and evolving industry standards. We believe that our future success will depend in part on our ability to anticipate industry changes and offer products and services that meet evolving industry standards. In connection with our service offerings, we are continuing to deploy new information system technologies to our direct and agency operations. We expect to continue to improve the process of ordering title and escrow services and the delivery of our products to our customers.
- *Maintain values supporting our strategy.* We believe that our continued focus on and support of our long-established corporate culture will reinforce and support our business strategy. Our goal is to foster and support a corporate culture where our employees and agents seek to operate independently and maintain profitability at the local level while forming close customer relationships by meeting customer needs and improving customer service. Utilizing a relatively flat managerial structure and providing our employees with a sense of individual ownership support this goal.
- *Effectively manage costs based on economic factors.* We believe that our focus on our operating margins is essential to our continued success in the title insurance business. Regardless of the business cycle in which we may be operating, we seek to continue to evaluate and manage our cost structure and make appropriate adjustments where economic conditions dictate. This continual focus on our cost structure helps us to better maintain our operating margins.

F&G

Through a diversified growth strategy, our F&G segment seeks to deliver consistent and increasing earnings driven by asset growth. To accomplish our goals, we intend to do the following:

- *Serve the growing needs of the retirement markets by collaborating with our distribution partners to deliver peace of mind solutions.* We believe the demand for retirement and principal protection products will continue to grow. We offer valuable products and capabilities tailored to serve this growing demographic need. Our new and existing distribution partners strategically align with a diverse and growing demographic in both our retail and institutional channels.
- *Enhance the F&G experience.* With products that provide downside protection coupled with opportunity for market upside, we are focused on giving our policyholders peace of mind. We work closely with agents and other partners who help their clients select the best products for their individual needs. Our customer care professionals provide

personalized support, and we offer self-serve options through our digital platforms. Our culture embodies values that drive employee retention and engagement, to best serve all aspects of the product lifecycle.

- *Continue to modernize and scale our business capabilities.* We participate in a regulated industry that is subject to dynamic competition and evolving industry standards. We believe that our future success will depend in part on our ability to anticipate industry changes and offer products and services that meet evolving industry standards. In connection with our service offerings, we continue to deploy new information system technologies to enhance capabilities and provide the infrastructure to successfully grow our business. Additionally, we benefit from Blackstone's asset origination capabilities and expertise which enhances investment yield while maintaining credit quality, broadens our asset diversification and ensures asset and liability cash flows are well matched.

Acquisitions, Dispositions, Minority Owned Operating Subsidiaries and Financings

Acquisitions have been an important part of our growth strategy and dispositions have been an important aspect of our strategy of returning value to shareholders. On an ongoing basis, with assistance from our advisors, we actively evaluate possible transactions, such as acquisitions and dispositions of business units and operating assets and business combination transactions.

In the future, we may seek to sell certain investments or other assets to increase our liquidity. In the past we have obtained majority and minority investments in entities and securities where we see the potential to achieve above market returns. Fundamentally our goal is to acquire quality companies that are run by best in class management teams and that have attractive organic and acquired growth opportunities. We leverage our operational expertise and track record of growing industry-leading companies along with our active interaction with the acquired company's management directly or through our board of directors, to ultimately provide value for our shareholders.

There can be no assurance that any suitable opportunities will arise or that any particular transaction will be completed. We have made a number of acquisitions and dispositions over the past several years to strengthen and expand our service offerings and customer base in our various businesses, to expand into other businesses or where we otherwise saw value, and to monetize investments in assets and businesses.

Intellectual Property

We rely on a combination of contractual restrictions, internal security practices, and copyright and trade secret law to establish and protect our software, technology, and expertise across our businesses. Further, we have developed a number of brands that have accumulated substantial goodwill in the marketplace, and we rely on trademark law to protect our rights in that area. We intend to continue our policy of taking all measures we deem necessary to protect our copyright, trade secret, and trademark rights. These legal protections and arrangements afford only limited protection of our proprietary rights, and there is no assurance that our competitors will not independently develop or license products, services, or capabilities that are substantially equivalent or superior to ours.

Technology and Research and Development

As a national provider of real estate transaction products and services, we participate in an industry that is subject to significant regulatory requirements, frequent new product and service introductions, and evolving industry standards. We believe that our future success depends in part on our ability to anticipate industry changes and offer products and services that meet evolving industry standards. In connection with our Title segment service offerings, we are continuing to deploy new information system technologies to our direct and agency operations. We continue to improve the process of ordering title and escrow services and improve the delivery of our products to our customers. In order to meet new regulatory requirements, we also continue to expand our data collection and reporting abilities.

Loss Reserves

For information about our loss reserves, see Item 7 of Part II of this Annual Report, under *Management's Discussion and Analysis of Financial Condition and Results of Operations* — Critical Accounting Estimates.

Title Insurance

Market for title insurance. According to Demotech Performance of Title Insurance Companies 2021 Edition, an annual compilation of financial information from the title insurance industry that is published by Demotech Inc. ("Demotech"), an independent firm, total operating income for the entire U.S. title insurance industry has increased over the last five years from approximately \$14.9 billion in 2016 to \$20.7 billion in 2020, which represents a \$3.8 billion increase from 2019. The size of the industry is closely tied to various macroeconomic factors, including, but not limited to, growth in the gross domestic product, inflation, unemployment, the availability of credit, consumer confidence, interest rates, and sales volumes and prices for new and existing homes, as well as the volume of refinancing of previously issued mortgages.

Most real estate transactions consummated in the U.S. require the use of title insurance by a lending institution before the transaction can be completed. Generally, revenues from title insurance policies are directly correlated with the value of the property underlying the title policy, and appreciation or depreciation in the overall value of the real estate market are major factors in total industry revenues. Industry revenues are also driven by factors affecting the volume of real estate closings, such as the state of the economy, the availability of mortgage funding, and changes in interest rates, which affect demand for new mortgage loans and refinancing transactions.

The U.S. title insurance industry is concentrated among a handful of industry participants. According to Demotech, the top four title insurance groups accounted for 79% of net premiums written in 2020. Approximately 34 independent title insurance companies accounted for the remaining 21% of net premiums written in 2020. Consolidation has created opportunities for increased financial and operating efficiencies for the industry's largest participants and should continue to drive profitability and market share in the industry.

Our Title segment revenue is closely related to the level of real estate activity that includes sales, mortgage financing and mortgage refinancing. For further discussion of current trends in real estate activity in the United States, see discussion under *Business Trends and Conditions* included in Item 7 of Part II of this Annual Report, which is incorporated by reference into this Item 1 of Part I.

Title Insurance Policies. Generally, real estate buyers and mortgage lenders purchase title insurance to insure good and marketable title to real estate and priority of lien. A brief generalized description of the process of issuing a title insurance policy is as follows:

- The customer, typically a real estate salesperson or broker, escrow agent, attorney or lender, places an order for a title policy.
- Company personnel note the specifics of the title policy order and place a request with the title company or its agents for a preliminary report or commitment.
- After the relevant historical data on the property is compiled, the title officer prepares a preliminary report that documents the current status of title to the property, any exclusions, exceptions and/or limitations that the title company might include in the policy, and specific issues that need to be addressed and resolved by the parties to the transaction before the title policy will be issued.
- The preliminary report is circulated to all the parties for satisfaction of any specific issues.
- After the specific issues identified in the preliminary report are satisfied, an escrow agent closes the transaction in accordance with the instructions of the parties and the title company's conditions.
- Once the transaction is closed and all monies have been released, the title company issues a title insurance policy.

In real estate transactions financed with a mortgage, virtually all real property mortgage lenders require their borrowers to obtain a title insurance policy at the time a mortgage loan is made. This lender's policy insures the lender against any defect affecting the priority of the mortgage in an amount equal to the outstanding balance of the related mortgage loan. An owner's policy is typically also issued, insuring the buyer against defects in title in an amount equal to the purchase price. In a refinancing transaction, only a lender's policy is generally purchased because ownership of the property has not changed. In the case of an all-cash real estate purchase, no lender's policy is issued but typically an owner's title policy is issued.

Title insurance premiums paid in connection with a title insurance policy are based on (and typically are a percentage of) either the amount of the mortgage loan or the purchase price of the property insured. Applicable state insurance regulations or regulatory practices may limit the maximum, or in some cases the minimum, premium that can be charged on a policy. Title insurance premiums are due in full at the closing of the real estate transaction.

The amount of the insured risk or "face amount" of insurance under a title insurance policy is generally equal to either the amount of the loan secured by the property or the purchase price of the property. The title insurer is also responsible for the cost of defending the insured title against covered claims. The insurer's actual exposure at any given time; however, generally is less than the total face amount of policies outstanding because the coverage of a lender's policy is reduced and eventually terminated as a result of payments on the mortgage loan. A title insurer also generally does not know when a property has been sold or refinanced except when it issues the replacement coverage. Because of these factors, the total liability of a title underwriter on outstanding policies cannot be precisely determined.

Title insurance companies typically issue title insurance policies directly through branch offices or through affiliated title agencies, or indirectly through independent third party agencies unaffiliated with the title insurance company. Where the policy is issued through a branch or wholly-owned subsidiary agency operation, the title insurance company typically performs or directs the title search, and the premiums collected are retained by the title company. Where the policy is issued through an independent agent, the agent generally performs the title search (in some areas searches are performed by approved attorneys), examines the title, collects the premium and retains a majority of the premium. The remainder of the premium is remitted to the title insurance company as compensation, part of which is for bearing the risk of loss in the event a claim is made under the

policy. The percentage of the premium retained by an agent varies from region to region and is sometimes regulated by the states. The title insurance company is obligated to pay title claims in accordance with the terms of its policies, regardless of whether the title insurance company issues policies through its direct operations or through independent agents.

Prior to issuing policies, title insurers and their agents attempt to reduce the risk of future claim losses by accurately performing title searches and examinations. A title insurance company's predominant expense relates to such searches and examinations, the preparation of preliminary title reports, policies or commitments, the maintenance of "title plants," which are indexed compilations of public records, maps and other relevant historical documents, and the facilitation and closing of real estate transactions. Claim losses generally result from errors made in the title search and examination process, from hidden defects such as fraud, forgery, incapacity, or missing heirs of the property, and from closing-related errors.

Residential real estate business results from the construction, sale, resale and refinancing of residential properties, while commercial real estate business results from similar activities with respect to properties with a business or commercial use. Commercial real estate title insurance policies insure title to commercial real property, and generally involve higher coverage amounts and yield higher premiums. Residential real estate transaction volume is primarily affected by macroeconomic and seasonal factors while commercial real estate transaction volume is affected primarily by fluctuations in local supply and demand conditions for commercial space.

Direct and Agency Operations. We provide title insurance services through our direct operations and through independent title insurance agents who issue title policies on behalf of our title insurance companies. Our title insurance companies determine the terms and conditions upon which they will insure title to the real property according to our underwriting standards, policies and procedures.

Direct Operations. Our direct operations include both the operations of our underwriters and those of affiliated agencies. In our direct operations, the title insurer issues the title insurance policy and retains the entire premium paid in connection with the transaction. Our direct operations provide the following benefits:

- higher margins because we retain the entire premium from each transaction instead of paying a commission to an independent agent;
- continuity of service levels to a broad range of customers; and
- additional sources of income through escrow and closing services.

We have approximately 1,300 offices throughout the U.S. primarily providing residential real estate title insurance. We continuously monitor the number of direct offices to make sure that it remains in line with our strategy and the current economic environment. Our commercial real estate title insurance business is operated primarily through our direct operations. We maintain direct operations for our commercial title insurance business in all the major real estate markets including Atlanta, Boston, Chicago, Dallas, Houston, Los Angeles, New York, Philadelphia, Phoenix, Seattle and Washington D.C.

Agency Operations. In our agency operations, the search and examination function is performed by an independent agent or the agent may purchase the search product from us. In either case, the agent is responsible to ensure that the search and examination is completed. The agent thus retains the majority of the title premium collected, with the balance remitted to the title underwriter for bearing the risk of loss in the event that a claim is made under the title insurance policy. Independent agents may select among several title underwriters based upon their relationship with the underwriter, the amount of the premium "split" offered by the underwriter, the overall terms and conditions of the agency agreement and the scope of services offered to the agent. Premium splits vary by geographic region, and in some states are fixed by insurance regulatory requirements. Our relationship with each agent is governed by an agency agreement defining how the agent issues a title insurance policy on our behalf. The agency agreement also sets forth the agent's liability to us for policy losses attributable to the agent's errors. An agency agreement is usually terminable without cause upon 30 days notice or immediately for cause. In determining whether to engage or retain an independent agent, we consider the agent's experience, financial condition and loss history. For each agent with whom we enter into an agency agreement, we maintain financial and loss experience records. We also conduct periodic audits of our agents and strategically manage the number of agents with which we transact business in an effort to reduce future expenses and manage risks. As of December 31, 2021, we transact business with approximately 5,400 agents.

Fees and Premiums. One method of analyzing our business is to examine the level of premiums generated by direct and agency operations.

The following table presents the percentages of our title insurance premiums generated by direct and agency operations:

	Year Ended December 31,					
	2021		2020		2019	
	Amount	%	Amount	%	Amount	%
	(Dollars in millions)					
Direct	\$ 3,571	41.8 %	\$ 2,699	42.9 %	\$ 2,381	44.6 %
Agency	4,982	58.2	3,599	57.1	2,961	55.4
Total title insurance premiums	\$ 8,553	100.0 %	\$ 6,298	100.0 %	\$ 5,342	100.0 %

The premium for title insurance is due in full when the real estate transaction is closed. We recognize title insurance premium revenues from direct operations upon the closing of the transaction. Premium revenues from agency operations include an accrual based on estimates of the volume of transactions that have closed in a particular period for which premiums have not yet been reported to us. The accrual for agency premiums is necessary because of the lag between the closing of these transactions and the reporting of these policies to us by the agent, and is based on estimates utilizing historical information.

Escrow, Title-Related and Other Fees. In addition to fees for underwriting title insurance policies, we derive a significant amount of our revenues from escrow and other title-related services including closing and trust activities, trustee sales guarantees, recordings and reconveyances, and home warranty products. The escrow and other services provided by us include all of those typically required in connection with residential and commercial real estate purchases and refinance activities. Escrow, title-related and other fees included in our Title segment represented approximately 28.1%, 29.7%, and 28.9% of total Title segment revenues in 2021, 2020, and 2019, respectively.

Sales and Marketing. We market and distribute our title and escrow products and services to customers in the residential and commercial market sectors of the real estate industry through customer solicitation by sales personnel. Although in many instances the individual homeowner is the beneficiary of a title insurance policy, we do not focus our marketing efforts on the homeowner. We actively encourage our sales personnel to develop new business relationships with persons in the real estate community, such as real estate sales agents and brokers, financial institutions, independent escrow companies and title agents, real estate developers, mortgage brokers and attorneys who order title insurance policies for their clients. While our smaller, local clients remain important, large customers, such as national residential mortgage lenders, real estate investment trusts and developers are an important part of our business. The buying criteria of locally based clients differ from those of large, geographically diverse customers in that the former tend to emphasize personal relationships and ease of transaction execution, while the latter generally place more emphasis on consistent product delivery across diverse geographical regions and the ability of service providers to meet their information systems requirements for electronic product delivery.

Claims. An important part of our operations is the handling of title and escrow claims. We employ a large staff of attorneys in our claims department. Our claims processing centers are located in Omaha, Nebraska and Jacksonville, Florida. In-house claims counsel are also located in other parts of the country.

Claims result from a wide range of causes. These causes generally include, but are not limited to, search and exam errors, forgeries, incorrect legal descriptions, signature and notary errors, unrecorded liens, mechanics' liens, the failure to pay off existing liens, mortgage lending fraud, mishandling or theft of settlement funds (including independent agency theft), and mistakes in the escrow process. Under our policies, we are required to defend insureds when covered claims are filed against their interest in the property. Some claimants seek damages in excess of policy limits. Those claims are based on various legal theories, including in some cases allegations of negligence or an intentional tort. We occasionally incur losses in excess of policy limits. Experience shows that most policy claims and claim payments are made in the first five years after the policy has been issued, although claims may also be reported and paid many years later.

Title losses due to independent agency defalcations typically occur when the independent agency misappropriates funds from escrow accounts under its control. Such losses are usually discovered when the independent agency fails to pay off an outstanding mortgage loan at closing (or immediately thereafter) from the proceeds of the new loan. Once the previous lender determines that its loan has not been paid off timely, it will file a claim against the title insurer.

Claims can be complex, vary greatly in dollar amounts and are affected by economic and market conditions and the legal environment existing at the time claims are processed. In our commercial title business, we may issue policies with face amounts well in excess of \$100 million, and from time to time claims are submitted with respect to large policies. We believe we are appropriately reserved with respect to all claims (large and small) that we currently face. Occasionally we experience large

losses from title policies that have been issued or from our escrow operations, or overall worsening loss payment experience, which require us to increase our title loss reserves. These events are unpredictable and adversely affect our earnings. Claims can result in litigation in which we may represent our insured and/or ourselves. We consider this type of litigation to be an ordinary course aspect of the conduct of our business.

Reinsurance and Coinsurance. Within our Title segment, we limit our maximum loss exposure by reinsuring risks with other insurers under excess of loss and case-by-case (“facultative”) reinsurance agreements. Reinsurance agreements generally provide that the reinsurer is liable for loss and loss adjustment expense payments exceeding the amount retained by the ceding company. However, the ceding company remains primarily liable to the insured whether or not the reinsurer is able to meet its contractual obligations. Facultative reinsurance agreements are entered into with other title insurers when the transaction to be insured will exceed state statutory or self-imposed limits. Excess of loss reinsurance coverage protects us from a large loss from a single loss occurrence. Our excess of loss reinsurance coverage is split into four contracts. The first excess of loss reinsurance contract provides an \$80 million limit of coverage from a single loss occurrence for residential and commercial losses in excess of a \$20 million retention per single loss occurrence (“First XOL Contract”). The second excess of loss reinsurance contract (“Second XOL Contract”) provides an additional \$300 million limit of coverage from a single loss occurrence for commercial loss, with the Company co-participating at approximately 10%. The third excess of loss reinsurance contract (“Third XOL Contract”) provides an additional \$80 million limit of coverage from a single loss occurrence for commercial loss, with the Company co-participating at approximately 10%. The fourth excess of loss reinsurance contract (“Fourth XOL Contract”) provides an additional \$220 million limit of coverage from a single loss occurrence for commercial loss, with the Company co-participating at approximately 10%. Subject to the Company’s retention and co-participation on the Second, Third and Fourth XOL Contracts, the maximum coverage from a single loss occurrence provided under our excess of loss reinsurance coverage is \$620 million. Each XOL Contract provides for one reinstatement of its respective limit, so the aggregate limit of coverage is \$1.24 billion.

In addition to reinsurance, we carry errors and omissions insurance and fidelity bond coverage, each of which can provide protection to us in the event of certain types of losses that can occur in our businesses.

Our policy is to be selective in choosing our reinsurers, seeking only those companies that we consider to be financially stable and adequately capitalized. In an effort to minimize exposure to the insolvency of a reinsurer, we periodically review the financial condition of our reinsurers.

We also use coinsurance in our commercial title business to provide coverage in amounts greater than we would be willing or able to provide individually. In coinsurance transactions, each individual underwriting company issues a separate policy and assumes a portion of the overall total risk. As a coinsurer we are only liable for the portion of the risk we assume.

We also earn a small amount of additional income, which is reflected in our direct premiums, by assuming reinsurance for certain risks of other title insurers.

Competition. Competition in the title insurance industry is based primarily on service and price. The number and size of competing companies varies in the different geographic areas in which we conduct our business. In our principal markets, competitors include other major title underwriters such as First American Financial Corporation, Old Republic International Corporation, Stewart Information Services Corporation, Westcor Land Title Insurance Company, and WFG National Title Insurance Company, as well as numerous regional title insurance companies, underwritten title companies and independent agency operations at the regional and local level. The addition or removal of regulatory barriers might result in changes to competition in the title insurance business. New competitors may include diversified financial services companies that have greater financial resources than we do and possess other competitive advantages. Competition among the major title insurance companies, expansion by regional companies and any new entrants with alternative products could affect our business operations and financial condition.

Regulation. Our insurance subsidiaries, including title insurers, underwritten title companies and insurance agencies, are subject to extensive regulation under applicable state laws. Each of the insurers is subject to a holding company act in its state of domicile, which regulates, among other matters, the ability to pay dividends and enter into transactions with affiliates. The laws of most states in which we transact business establish supervisory agencies with broad administrative powers relating to issuing and revoking licenses to transact business, regulating trade practices, licensing agents, approving policy forms, accounting practices, financial practices, establishing reserve and capital and surplus as regards policyholders (“capital and surplus”) requirements, defining suitable investments for reserves and capital and surplus and approving rate schedules. The process of state regulation of changes in rates ranges from states that set rates, to states where individual companies or associations of companies prepare rate filings that are submitted for approval, to a few states in which rate changes do not need to be filed for approval.

Since we are governed by both state and federal governments and the applicable insurance laws and regulations are constantly subject to change, it is not possible to predict the potential effects on our insurance operations of any laws or regulations that may become more restrictive in the future or if new restrictive laws will be enacted.

Pursuant to statutory accounting requirements of the various states in which our title insurers are domiciled, these insurers must defer a portion of premiums as an unearned premium reserve for the protection of policyholders (in addition to their reserves for known claims) and must maintain qualified assets in an amount equal to the statutory requirements. The level of unearned premium reserve required to be maintained at any time is determined by a statutory formula based upon either the age, number of policies, and dollar amount of policy liabilities underwritten, or the age and dollar amount of statutory premiums written. As of December 31, 2021, the combined statutory unearned premium reserve required and reported for our title insurers was \$1,742 million. In addition to statutory unearned premium reserves and reserves for known claims, each of our insurers maintains surplus funds for policyholder protection and business operations.

Each of our insurance subsidiaries is regulated by the insurance regulatory authority in its respective state of domicile, as well as that of each state in which it is licensed. The insurance commissioners of their respective states of domicile are the primary regulators of our insurance subsidiaries. Each of the insurers is subject to periodic regulatory financial examination by regulatory authorities.

Under the statutes governing insurance holding companies in most states, insurers may not enter into certain transactions, including sales, reinsurance agreements and service or management contracts, with their affiliates unless the regulatory authority of the insurer's state of domicile has received notice at least 30 days prior to the intended effective date of such transaction and has not objected to, or has approved, the transaction within the 30-day period.

In addition to state-level regulation, our title insurance and certain other real estate businesses are subject to regulation by federal agencies, including the Consumer Financial Protection Bureau ("CFPB"). The CFPB was established under the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 ("Dodd-Frank"), which also included regulation over financial services and other lending related businesses. The CFPB has broad authority to regulate, among other areas, the mortgage and real estate markets in matters pertaining to consumers. This authority includes the enforcement of the Truth-in-Lending Act ("TILA") and the Real Estate Settlement Procedures Act (individually, "RESPA", and together, "TILA-RESPA Integrated Disclosure" or "TRID") formerly placed with the Department of Housing and Urban Development.

As a holding company with no significant business operations of our own, we depend on dividends or other distributions from our subsidiaries as the principal source of cash to meet our obligations, including the payment of interest on and repayment of principal of any debt obligations, and to pay any dividends to our shareholders. The payment of dividends or other distributions to us by our insurers is regulated by the insurance laws and regulations of their respective states of domicile. In general, an insurance company subsidiary may not pay an "extraordinary" dividend or distribution unless the applicable insurance regulator has received notice of the intended payment at least 30 days prior to payment and has not objected to or has approved the payment within the 30-day period. In general, an "extraordinary" dividend or distribution is statutorily defined as a dividend or distribution that, together with other dividends and distributions made within the preceding 12 months, exceeds the greater of:

- 10% of the insurer's statutory surplus as of the immediately prior year end; or
- the statutory net income of the insurer during the prior calendar year.

The laws and regulations of some jurisdictions also prohibit an insurer from declaring or paying a dividend except out of its earned surplus or require the insurer to obtain prior regulatory approval. During 2022, our directly owned title insurers can pay dividends or make distributions to us of approximately \$831 million; however, insurance regulators have the authority to prohibit the payment of ordinary dividends or other payments by our title insurers to us (such as a payment under a tax sharing agreement or for other services) if they determine that such payment could be adverse to our policyholders. There are no restrictions on our retained earnings regarding our ability to pay dividends to shareholders.

The combined statutory capital and surplus of our title insurers was approximately \$1,903 million and \$1,699 million as of December 31, 2021 and 2020, respectively. The combined statutory earnings of our title insurers were \$936 million, \$629 million, and \$583 million for the years ended December 31, 2021, 2020, and 2019, respectively.

As a condition to continued authority to underwrite policies in the states in which our insurers conduct their business, they are required to pay certain fees and file information regarding their officers, directors and financial condition.

Pursuant to statutory requirements of the various states in which our insurers are domiciled, such insurers must maintain certain levels of minimum capital and surplus. Required levels of minimum capital and surplus are not significant to the insurers individually or in the aggregate. Each of our title insurers has complied with the minimum statutory requirements as of December 31, 2021.

Our underwritten title companies, primarily those domiciled in California, are also subject to certain regulation by insurance regulatory or banking authorities relating to their net worth and working capital. Minimum net worth and working capital requirements for each underwritten title company is less than \$1 million. These companies were in compliance with their respective minimum net worth and working capital requirements at December 31, 2021.

From time to time we receive inquiries and requests for information from state insurance departments, attorneys general and other regulatory agencies about various matters relating to our business. Sometimes these take the form of civil investigative demands or subpoenas. We cooperate with all such inquiries and we have responded to or are currently responding to inquiries from multiple governmental agencies. Various governmental entities are studying the title insurance product, market, pricing, and business practices, and potential regulatory and legislative changes, which may materially affect our business and operations. From time to time, we are assessed fines for violations of regulations or other matters or enter into settlements with such authorities that may require us to pay fines or claims or take other actions. For further discussion, see Item 3, Legal Proceedings.

Before a person can acquire control of a U.S. insurance company, prior written approval must be obtained from the insurance commissioner of the state in which the insurer is domiciled. Prior to granting approval of an application to acquire control of a domestic insurer, the state insurance commissioner will consider such factors as the financial strength of the applicant, the integrity and management of the applicant's Board of Directors and executive officers, the acquirer's plans for the insurer's Board of Directors and executive officers, the acquirer's plans for the future operations of the domestic insurer and any anti-competitive results that may arise from the consummation of the acquisition of control. Generally, state statutes provide that control over a domestic insurer is presumed to exist if any person, directly or indirectly, owns, controls, holds with the power to vote, or holds proxies representing 10% or more of the voting securities of the domestic insurer. Because a person acquiring 10% or more of our common shares would indirectly control the same percentage of the stock of our insurers, the insurance change of control laws would likely apply to such a transaction.

The National Association of Insurance Commissioners ("NAIC") has adopted an instruction requiring an annual certification of reserve adequacy by a qualified actuary. Because all of the states in which our title insurers are domiciled require adherence to NAIC filing procedures, each such insurer, unless it qualifies for an exemption, must file an actuarial opinion with respect to the adequacy of its reserves.

Title Insurance Ratings. Our title insurance underwriters are regularly assigned ratings by independent agencies designed to indicate their financial condition and/or claims paying ability. The rating agencies determine ratings by quantitatively and qualitatively analyzing financial data and other information. Our title subsidiaries include Alamo Title, Chicago Title, Commonwealth Land Title, FNTIC and National Title of New York. Standard & Poor's Ratings Group ("S&P") and Moody's Investors Service ("Moody's") provide ratings for the entire FNF family of companies as a whole as follows:

	<u>S&P</u>	<u>Moody's</u>
FNF family of companies	A	A2

The relative position of each of our ratings among the ratings scale assigned by each rating agency is as follows:

- An S&P "A" rating is the third highest rating of 11 ratings for S&P. According to S&P, an insurer rated "A" has strong capacity to meet its financial commitments, but is somewhat more susceptible to adverse effects of changes in circumstances and economic conditions than insurers with "AAA" or "AA" ratings.
- A Moody's "A2" rating is the third highest rating of 9 ratings for Moody's. Moody's states that companies rated "A2" are judged to be upper-medium grade and are subject to low credit risk.

Demotech provides financial strength/stability ratings for each of our title insurance underwriters individually, as follows:

Alamo Title Insurance	A'
Chicago Title Insurance Company	A"
Commonwealth Land Title Insurance Company	A'
Fidelity National Title Insurance Company	A'
National Title Insurance of New York	A'

Demotech states that its ratings of "A"(A double prime)" and "A' (A prime)" reflect its opinion that the insurer possesses "Unsurpassed" ability to maintain liquidity of invested assets, quality reinsurance, acceptable financial leverage and realistic pricing while simultaneously establishing loss and loss adjustment expense reserves at reasonable levels. The A" and A' ratings are the two highest ratings of Demotech's six ratings.

The ratings of S&P, Moody's, and Demotech described above are not designed to be, and do not serve as, measures of protection or valuation offered to investors. These financial strength ratings should not be relied on with respect to making an

investment in our securities. See “Item 1A. Risk Factors — If the rating agencies downgrade our Company, our results of operations and competitive position in the title insurance industry may suffer” for further information.

Investment Policies and Investment Portfolio. Within our Title segment, our investment policy is designed to maximize total return through investment income and capital appreciation consistent with moderate risk of principal, while providing adequate liquidity. Our insurance subsidiaries, including title insurers, underwritten title companies and insurance agencies, are subject to extensive regulation under applicable state laws. The various states in which we operate our underwriters regulate the types of assets that qualify for purposes of capital, surplus, and statutory unearned premium reserves. Our investment policy specifically limits duration and non-investment grade allocations in the FNF fixed-income portfolio. Maintaining shorter durations on the investment portfolio allows for the mitigation of interest rate risk. Equity securities and preferred stock are utilized to take advantage of perceived value or for strategic purposes. Due to the magnitude of the investment portfolio in relation to our claims loss reserves, durations of investments are not specifically matched to the cash outflows required to pay claims.

As of December 31, 2021 and 2020, the carrying amount of total investments within our Title segment, which approximates the fair value, excluding investments in unconsolidated affiliates, was approximately \$3.7 billion.

We purchase investment grade fixed maturity securities, selected non-investment grade fixed maturity securities, preferred stock and equity securities. The securities in our portfolio are subject to economic conditions and normal market risks and uncertainties.

The following table presents certain information regarding the investment ratings of our fixed maturity securities and preferred stock portfolio at December 31, 2021 and 2020:

Rating(1)	December 31,							
	2021				2020			
	Amortized Cost	% of Total	Fair Value	% of Total	Amortized Cost	% of Total	Fair Value	% of Total
	(Dollars in millions)							
Aaa/AAA	\$ 589	25.0 %	\$ 597	24.9 %	\$ 514	21.9 %	\$ 536	21.7 %
Aa/AA	157	6.7	164	6.8	201	8.6	214	8.7
A	532	22.6	548	22.8	671	28.7	714	29.0
Baa/BBB	798	33.9	809	33.7	726	31.0	756	30.7
Lower	205	8.7	206	8.6	147	6.3	151	6.1
Other (2)	72	3.1	77	3.2	83	3.5	94	3.8
	<u>\$ 2,353</u>	<u>100.0 %</u>	<u>\$ 2,401</u>	<u>100.0 %</u>	<u>\$ 2,342</u>	<u>100.0 %</u>	<u>\$ 2,465</u>	<u>100.0 %</u>

(1) Ratings as assigned by Moody's or S&P if a Moody's rating is unavailable.

(2) This category is composed of unrated securities.

The following table presents certain information regarding contractual maturities of our fixed maturity securities at December 31, 2021:

Maturity	December 31, 2021			
	Amortized Cost	% of Total	Fair Value	% of Total
	(Dollars in millions)			
One year or less	\$ 321	16.2 %	\$ 325	16.0 %
After one year through five years	1,273	64.4	1,297	64.0
After five years through ten years	248	12.5	257	12.7
After ten years	88	4.4	93	4.6
Mortgage-backed/asset-backed securities	49	2.5	55	2.7
	<u>\$ 1,979</u>	<u>100.0 %</u>	<u>\$ 2,027</u>	<u>100.0 %</u>

Expected maturities may differ from contractual maturities because certain borrowers have the right to call or prepay obligations with or without call or prepayment penalties. Because of the potential for prepayment on mortgage-backed and asset-backed securities, they are not categorized by contractual maturity.

At December 31, 2021 and 2020, we held \$136 million and \$138 million, respectively, in investments that are accounted for using the equity method of accounting.

As of December 31, 2021 and 2020, other long-term investments were \$91 million and \$33 million, respectively. Other long-term investments include other investments carried at fair value and company-owned life insurance policies carried at cash surrender value.

Short-term investments, which consist primarily of commercial paper and money market instruments that have an original maturity of one year or less, are carried at amortized cost, which approximates fair value. As of December 31, 2021 and 2020, short-term investments amounted to \$118 million and \$312 million, respectively.

Our investment results for the years ended December 31, 2021, 2020 and 2019 were as follows:

	December 31,		
	2021	2020	2019
	(Dollars in millions)		
Net investment income (1)	\$ 108	\$ 152	\$ 206
Average invested assets	\$ 3,759	\$ 3,736	\$ 3,768
Effective return on average invested assets	2.9 %	4.1 %	5.5 %

(1) Net investment income as reported in our Consolidated Statements of Earnings has been adjusted in the presentation above to provide the tax equivalent yield on tax exempt investments and to exclude interest earned on cash and cash equivalents. Net investment income includes fees earned by holding customer funds in escrow (off-balance sheet) during facilitation of tax-deferred property exchanges. See Note E *Investments* to our Consolidated Financial Statements included in Item 8 of Part II of this Annual Report for a detail of our interest income.

F&G

Through our wholly-owned subsidiary, F&G, and its wholly-owned insurance subsidiaries, we market a broad portfolio of deferred annuities (fixed indexed and fixed rate annuities), immediate annuities, indexed universal life insurance, funding agreements and pension risk transfer solutions.

For more than 60 years, F&G has helped middle-income Americans prepare for retirement and for their loved ones' financial security. We partner with leading IMOs and their agents to serve the needs of the middle-income market and develop competitive products to align with their evolving needs. During 2020, F&G entered into the bank and broker dealer distribution channels to connect with even more customers. As of December 31, 2021, F&G has approximately 576,000 policyholders who count on the safety and protection features our fixed annuity and life insurance products provide.

Through the efforts of F&G's approximately 600 employees, most of whom are located in Des Moines, Iowa, and through a network of approximately 240 IMOs and 17 leading banks and independent broker dealers, representing approximately 63,000 independent agents and advisers, we offer various types of fixed annuities and life insurance products. Our fixed annuities serve as a retirement and savings tool for which our customers rely on principal protection and predictable income streams. In addition, our IUL insurance products provide our customers with a complementary product that allows them to build on their savings and provide a payment to their designated beneficiaries upon the policyholder's death. Our most popular products are FIAs that tie contractual returns to specific market indices, such as the S&P 500 Index. Our customers value our FIAs, which provide a portion of the gains of an underlying market index, while also providing principal protection. We believe this mix of "some upside but limited downside" fills the need for middle-income Americans who must save for retirement but who want to limit the risk of decline in their savings.

For the year ended December 31, 2021, FIAs generated approximately 45% of our total sales. The remaining 55% of sales were primarily generated from funding agreements (24%), fixed rate annuities (18%), PRT sales (12%) and IUL (1%) during the year. We invest the proceeds primarily in fixed income securities, options and futures that hedge the index credit of our FIA and IUL liabilities by replicating the market index returns to our policyholders. We invest predominantly in call options on the S&P 500 Index. The majority of our products contain provisions that permit us to adjust annually the formula by which we provide index credits in response to changing market conditions. In addition, our annuity contracts generally either cannot be surrendered or include surrender charges that discourage early redemptions.

Product and Market Expertise. F&G's expertise in annuities, life insurance, funding agreements, PRT solutions and other products will allow us to continue to introduce innovative products and solutions designed to meet customers' changing needs. We work hand-in-hand with our distributors and institutional advisors to devise the most suitable solutions for the ever-changing market.

Annuities. Through F&G's insurance subsidiaries, we issue a broad portfolio of deferred annuities (FIA and fixed rate annuities) and immediate annuities. A deferred annuity is a type of contract that accumulates value on a tax deferred basis and typically begins making specified periodic or lump sum payments a certain number of years after the contract has been issued. An immediate annuity is a type of contract that begins making specified payments within one annuity period (e.g., one month or one year) and typically pays principal and earnings in equal payments over some period of time.

Deferred Annuities - FIAs. Our FIAs allow contract owners the possibility of earning returns linked to the performance of a specified market index, predominantly the S&P 500 Index, while providing principal protection. The contracts include a provision for a minimum guaranteed surrender value calculated in accordance with applicable law. A market index tracks the performance of a specific group of stocks representing a particular segment of the market, or in some cases an entire market. For example, the S&P 500 Composite Stock Price Index is an index of 500 stocks intended to be representative of a broad segment of the market. All FIA products allow policyholders to allocate funds once a year among several different crediting strategies, including one or more index-based strategies and a traditional fixed rate strategy. High surrender charges apply for early withdrawal, typically from seven to fourteen years after purchase.

The contractholder account value of a FIA contract is equal to the sum of deposits paid, premium bonuses, if any, (described below), and index credits based on the change in the relevant market index (subject to a cap, spread and/or a participation rate) less any fees for riders and any withdrawals taken to-date. Caps (a maximum rate that may be credited) generally range from 1% to 5% when measured annually and 1% to 3% when measured monthly, spreads (a credited rate determined by deducting a specific rate from the index return) generally range from 0% to 3% when measured annually, and participation rates (a credited rate equal to a percentage of index return) generally range from 100% to 140% of the performance of the applicable market index. The cap, spread and participation rate can typically be reset annually and in some instances every two to five years. Certain riders provide a variety of benefits, such as the ability to increase their cap, lifetime income or additional liquidity for a set fee. As this fee is fixed, the contractholder may lose principal if the index credits received do not exceed the amount of such fee.

Approximately 33% of the FIA sales for the year ended December 31, 2021 involved "premium bonuses" or vesting bonuses. Premium bonuses increase the initial annuity deposit by a specified rate of 2% to 3%. The vesting bonuses, which range from 1% to 9%, increase the initial annuity deposit liability but are subject to adjustment for unvested amounts in the event of surrender by the policyholder prior to the end of the vesting period. We made compensating adjustments in the commission paid to the agent or the surrender charges on the policy to offset the premium bonus.

Approximately 33% of our FIA contracts were issued with a guaranteed minimum withdrawal benefit ("GMWB") rider for the year ended December 31, 2021. With this rider, a contract owner can elect to receive guaranteed payments for life from the FIA contract without requiring the owner to annuitize the FIA contract value. The amount of the income benefit available is determined by the growth in the policy's benefit base value as defined in the FIA contract rider. Typically this accumulates for 10 years based on a guaranteed rate of 3% to 8%. Guaranteed withdrawal payments may be stopped and restarted at the election of the contract owner. Some of the FIA contract riders that we offer include an additional death benefit or an increase in benefit amounts under chronic health conditions. Rider fees range from 0% to 1%.

As of December 31, 2021, the distribution of the FIA account values by cap rate and by strategy was as follows:

Strategy	Cap rate			Total
	0% to 3%	3% to 5%	> 5%	
	(In millions)			
1 year gain trigger	\$ 585	\$ 258	\$ 22	\$ 865
1-2 year monthly average	781	380	129	1,290
1-3 year monthly point-to-point	4,770	24	—	4,794
1-3 year annual point-to-point	2,502	1,921	693	5,116
3 year step forward	—	18	88	106
	<u>\$ 8,638</u>	<u>\$ 2,601</u>	<u>\$ 932</u>	<u>\$ 12,171</u>

As of December 31, 2021, the distribution of the FIA account values by cap rate and by index was as follows:

Index	Cap rate			Total
	0% to 3%	3% to 5%	> 5%	
(In millions)				
S&P 500	\$ 8,587	\$ 2,400	\$ 895	\$ 11,882
Dow Jones	—	95	—	95
Nasdaq	—	1	—	1
Balanced ETF	—	5	—	5
Gold	51	100	37	188
	<u>\$ 8,638</u>	<u>\$ 2,601</u>	<u>\$ 932</u>	<u>\$ 12,171</u>

Deferred Annuities - Fixed Rate Annuities. Fixed rate annuities include annual reset and multi-year rate guaranteed policies. Fixed rate annual reset annuities issued by us have an annual interest rate (the "crediting rate") that is guaranteed for the first policy year. After the first policy year, we have the discretionary ability to change the crediting rate once annually to any rate at or above a guaranteed minimum rate. Multi-year guaranteed annuities ("MYGA") are similar to fixed rate annual reset annuities except that the initial crediting rate is guaranteed for a specified number of years before it may be changed at our discretion. As of December 31, 2021, crediting rates on outstanding (i) single-year guaranteed annuities generally ranged from 2% to 6% and (ii) MYGA ranged from 1% to 6%. The average crediting rate on all outstanding fixed rate annuities at December 31, 2021 was 3%.

As of December 31, 2021, the distribution of the fixed rate annuity account values by crediting rate was as follows (in millions):

Crediting rate	1% to 2%	2% to 3%	3% to 4%	4% to 5%	5% to 6%	Total
Account value (gross)	\$ 352	\$ 1,688	\$ 2,219	\$ 413	\$ 4	\$ 4,676

As of December 31, 2021, the fixed rate annuity expiring guaranty account values, net of reinsurance, by year were as follows (in millions):

Year of expiry:	Account Value
2022	\$ 1,014
2023	1,107
2024	918
2025	548
2026	925
Thereafter	164
Total	<u>\$ 4,676</u>

Withdrawal Options for Deferred Annuities. After the first year following the issuance of a deferred annuity policy, holders of deferred annuities are typically permitted penalty-free withdrawals up to a contractually specified amount. The penalty-free withdrawal amount is typically 10% of the prior year account value for FIAs, and is typically up to accumulated interest for fixed rate annuities, subject to certain restrictions. Withdrawals in excess of allowable penalty-free amounts are assessed a surrender charge if such withdrawals are made during the penalty period of the deferred annuity policy. The penalty period typically ranges from seven to fourteen years for FIAs and three to ten years for fixed rate annuities. This surrender charge initially ranges from 8% to 15% of the contract value for FIAs and is 9% of the contract value for fixed rate annuities and generally decreases by approximately one to two percentage points per year during the penalty period. The average surrender charge is 8% for our FIAs and 7% for our fixed rate annuities as of December 31, 2021.

The following table summarizes our deferred annuity account values and surrender charge protection as of December 31, 2021 (dollars in millions):

SURRENDER CHARGE EXPIRATION BY YEAR	Fixed Rate and Fixed Indexed Annuities Account Value	Percent of Total	Weighted Average Surrender Charge
Out of surrender charge	\$ 2,606	10 %	— %
2022	1,260	5 %	4 %
2023-2025	5,162	19 %	6 %
2026-2027	4,400	16 %	7 %
2028-2029	5,038	19 %	8 %
Thereafter	8,206	31 %	10 %
Total	\$ 26,672	100 %	7 %

Subsequent to the penalty period, the policyholder may elect to take the proceeds of the surrender either in a single payment or in a series of payments over the life of the policyholder or for a fixed number of years (or a combination of these payment options). In addition to the foregoing withdrawal rights, policyholders may also elect to have additional withdrawal benefits by purchasing a GMWB.

We also sell single premium immediate annuities (or "SPIAs"), which provide a series of periodic payments for a fixed period of time or for the life of the policyholder, according to the policyholder's choice at the time of issue. The amounts, frequency and length of time of the payments are fixed at the outset of the annuity contract. SPIAs are often purchased by persons at or near retirement age who desire a steady stream of payments over a future period of years.

The following table presents the deposits on annuity policies issued for the year ended December 31, 2021 and the seven months ended December 31, 2020 as well as reserves required by U.S. generally accepted accounting principles ("U.S. GAAP") for all policies in force as of December 31, 2021 and 2020:

	Year Ended December 31, 2021		Seven Months Ended December 31, 2020	
	Deposits on Annuity Policies	U.S. GAAP Reserves	Deposits on Annuity Policies	U.S. GAAP Reserves
Products (net of reinsurance)	(In millions)		(In millions)	
Fixed indexed annuities	\$ 4,420	\$ 23,370	\$ 1,966	\$ 20,239
Fixed rate annuities	878	6,369	631	5,144
Single premium immediate annuities	46	2,114	29	2,240
	\$ 5,344	\$ 31,853	\$ 2,626	\$ 27,623

Life Insurance. We currently offer IUL insurance policies and have previously sold universal life, term and whole life insurance products. Holders of universal life insurance policies earn returns on their policies, which are credited to the policyholder's cash value account. The insurer periodically deducts its expenses and the cost of life insurance protection from the cash value account. The balance of the cash value account is credited interest at a fixed rate or returns based on the performance of a market index, or both, at the option of the policyholder, using a method similar to that described above for FIAs.

Almost all of the life insurance policies in force, except for the return of premium benefits on term life insurance products and universal life contracts issued after March 1, 2010, are subject to an arrangement with Wilton Reassurance Company ("Wilton Re"). See section titled "Reinsurance-Wilton Re Transaction" in Item 1. Business.

As of December 31, 2021, the distribution of the retained IUL account values by cap rate and by strategy was as follows:

Strategy	Cap rate					Total
	2.5-5.0%	5.0-7.5%	7.5-10.0%	10.0-12.5%	12.5+%	
	(In millions)					
1 year annual point-to-point, Gold Index	\$ —	\$ —	\$ —	\$ —	\$ 65	\$ 65
1 year monthly point-to-point, S&P Index	40	—	—	—	—	40
1 year annual point-to-point with 100% par rate, S&P Index	13	2	78	341	101	535
1 year annual point-to-point with 140% par rate, S&P Index	3	4	30	—	—	37
	\$ 56	\$ 6	\$ 108	\$ 341	\$ 166	\$ 677

Funding Agreements. In June 2021, we established a FABN program, pursuant to which Fidelity & Guaranty Life Insurance Company (“FGL Insurance”) may issue funding agreements to a special purpose statutory trust for spread lending purposes. The maximum aggregate principal amount permitted to be outstanding at any one time under the FABN Program is currently \$5.0 billion. As of December 31, 2021, we had approximately \$1.9 billion outstanding under the FABN program. In January 2022, we issued an additional \$0.4 billion funding agreement. We also issue funding agreements through the Federal Home Loan Bank of Atlanta (“FHLB”).

Pension Risk Transfer. In July 2021, we entered the pension risk transfer market, pursuant to which FGL Insurance and Fidelity & Guaranty Life Insurance Company of New York (“FGL NY Insurance”) may issue group annuity contracts to discharge pension plan liabilities from a pension plan sponsor. As of December 31, 2021, we closed pension risk transfer transactions that represent pension obligations of \$1.1 billion.

Distribution. We distribute our annuity and life insurance products through three main channels of distribution: independent agents, banks, and broker dealers.

In our independent agent channel, the sale of our products typically occurs as part of a four-party, three stage sales process between FGL Insurance, an IMO, the agent and the customer. FGL Insurance designs, manufactures, issues, and services the product. The IMOs will typically sign contracts with multiple insurance carriers to provide their agents with a broad and competitive product portfolio. The IMO provides training and discusses product options with agents in preparation for meetings with clients. The IMO staff also provide assistance to the agent during the selling and application process. The agent may get customer leads from the IMOs. The agent conducts a fact finding and presents suitable product choices to the customers. We monitor the business issued by each distribution partner for pricing metrics, mortality, persistency, as well as market conduct and suitability.

We offer our products through a network of approximately 240 IMOs, representing approximately 56,000 agents. We identify “Power Partners” as those who have demonstrated the ability to generate significant production for our F&G business. We currently have 26 Power Partners, comprised of 16 annuity IMOs and 10 life insurance IMOs. During the year ended December 31, 2021, these Power Partners accounted for approximately 93% of our sales volume within the IMO channel. We believe that our relationships with these IMOs are strong. The average tenure of the top ten Power Partners is approximately 17 years.

Our Power Partners play an important role in the development of our products by providing feedback integral to the development process and by securing “shelf space” for new products. Over the last ten years, the majority of our best-selling products have been developed with our Power Partners. We intend to continue to involve Power Partners in the development of our products in the future. We took a similar approach in launching products as a new entrant into the bank and broker dealer channels by partnering with one of the largest broker dealers in the industry.

In 2020, F&G launched a set of fixed rate annuity and FIA products to banks and broker dealers, and gained selling agreements with some of the largest banks and broker dealers in the United States. We offer our products through a network of approximately 17 banks and broker dealers, representing approximately 7,000 financial advisers. The financial advisers at our bank and broker dealer partners are able to offer their clients guaranteed rates of return, protected growth, and income for life through our Secure series of annuity products. We employ a hybrid distribution model in this channel, whereby some financial institutions partner directly with F&G and our sales team, and others work with an intermediary. As such, we partner with a select number of financial institution intermediaries who have expertise in the channel and maintain the appropriate field wholesaling forces to be successful in this channel. In 2021, the top 5 firms represented 98% of channel sales. The first full year of sales in banks and broker dealers represented almost 29% of annuity sales in a year that marked record sales for F&G.

The top five states for the distribution of FGL Insurance’s products in the year ended December 31, 2021 were California, Florida, Texas, New Jersey and Ohio, which together accounted for 38% of FGL Insurance’s premiums.

In addition, beginning in 2021, our institutional business offers funding agreement products to institutional clients by means of capital markets transactions through investment banks. Funding agreements are also executed through the FHLB. In 2021, we also entered the PRT solutions business by building an experienced team and then working with brokers and institutional consultants for distribution. These institutional solutions leverage our existing team's spread-based capabilities as well as our strategic partnership with Blackstone.

Investments. Within our F&G segment, we embrace a long-term conservative investment philosophy, investing nearly all the insurance premiums we receive in a wide range of fixed income interest-bearing securities.

FGL Insurance, and certain subsidiaries of F&G, entered into investment management agreements ("IMAs") with Blackstone ISG-I Advisors LLC ("BISGA"), pursuant to which BISGA was appointed as investment manager of F&G's general accounts (the "F&G Accounts"). BISGA delegated certain investment services to its affiliates, Blackstone Real Estate Special Situations Advisors L.L.C. and GSO Capital Advisors II LLC, pursuant to separate sub-management agreements executed between BISGA and each affiliate. Additionally, three other subsidiaries of F&G entered into IMAs with BISGA on substantially the same terms as the FGL Insurance IMA.

BISGA manages the bulk of the investment portfolio. For certain asset classes, we utilize experienced third party companies. As of December 31, 2021, 93% of our \$37 billion investment portfolio was managed by BISGA, with 6% managed by other third parties, and the remaining 1% internally managed. BISGA appointed MVB Management, an entity owned by affiliates of our Chairman, as Sub-Adviser of the FGL Account pursuant to a sub-advisory agreement (the "Sub-Advisory Agreement"). Under the Sub-Advisory Agreement, MVB Management will provide portfolio review, and consulting services, including such recommendations as the Investment Manager shall reasonably request. Payment or reimbursement of the sub-advisory fee to MVB Management is solely the obligation of BISGA and is not an obligation of FGL Insurance or F&G. Subject to certain conditions, the Sub-Advisory Agreement cannot be terminated by BISGA unless FGL Insurance terminates the FGL Insurance IMA.

Our investment strategy is designed to (i) achieve strong absolute returns, (ii) provide consistent yield and investment income, and (iii) preserve capital. We base all of our decisions on fundamental, bottom-up research, coupled with a top-down view that respects the cyclicity of certain asset classes. The types of assets in which we may invest are influenced by various state laws, which prescribe qualified investment assets applicable to insurance companies. Additionally, we define risk tolerance across a wide range of factors, including credit risk, liquidity risk, concentration (issuer and sector) risk, and caps on specific asset classes, which in turn establish conservative risk thresholds.

Our investment portfolio consists of high quality fixed maturities, including publicly issued and privately issued corporate bonds, municipal and other government bonds, asset-backed securities ("ABS"), residential mortgage-backed securities ("RMBS"), commercial mortgage-backed securities ("CMBS"), commercial mortgage loans ("CMLs"), residential mortgage loans ("RMLs"), limited partnership investments, and fund investments. We also maintain holdings in floating rate, and less rate-sensitive investments, including senior tranches of collateralized loan obligations ("CLOs"), non-agency RMBS, and various types of ABS. It is our expectation that our investment portfolio will broaden in scope and diversity to include other asset classes held by life and annuity insurance writers. We also have a small amount of equity holdings required as part of our funding arrangements with the FHLB.

Over the last year, we continued to work with BISGA and the other third party asset managers to broaden the portfolio's exposure to include United States dollar ("USD") denominated emerging market bonds, highly rated preferred stocks and hybrids, and structured securities including ABS. As a result of these portfolio repositionings, we currently maintain:

- a well matched asset/liability profile (asset duration, including cash and cash equivalents, of 6.4 years vs. liability duration of 7.2 years); and
- an exposure to less rate-sensitive assets of 27% of invested assets which is made up of 17% being floating rate assets and 10% being non-floating rate assets with duration of less than 6 months.

For further discussion of portfolio activity, see Item 7 of Part II of this Annual Report, under Management's Discussion and Analysis of Financial Condition and Results of Operations-Investment Portfolio.

Derivatives. Our FIA and IUL contracts permit the holder to elect to receive a return based on an interest rate or the performance of a market index, most typically the S&P 500 Index. We purchase derivatives consisting predominantly of call options and, to a lesser degree, futures contracts (specifically for FIA contracts) on the equity indices underlying the applicable policy. These derivatives are used to fund the index credits due to policyholders under the FIA and IUL contracts based upon policyholders' contract elections. The majority of all such call options are one-year options purchased to match the funding requirements underlying the FIA/IUL contracts. On the anniversary dates of the FIA/IUL contracts, the market index used to compute the annual index credit under the contracts is reset. At such time, we purchase new call options to fund the next index credit. We manage the cost of these purchases through the terms of our FIA/IUL contracts, which permit us to change caps or

participation rates, subject to certain guaranteed minimums on each contract anniversary date. The change in the fair value of the call options and futures contracts is generally designed to offset the equity market related change in the fair value of the FIA/IUL contract's related reserve liability. The call options and futures contracts are marked to fair value with the change in fair value included as a component of "Net investment gains (losses)". The change in fair value of the call options and futures contracts includes the gains and losses recognized at the expiration of the instruments term or upon early termination and the changes in fair value of open positions.

Outsourcing. Our F&G segment outsources the following functions to third-party service providers:

- new business administration (data entry and policy issue only);
- service of existing policies;
- underwriting administration of life insurance applications;
- life reinsurance administration;
- call centers;
- information technology development and maintenance;
- investment accounting and custody; and
- co-located data centers and hosting of financial systems.

We closely manage our outsourcing partners and integrate their services into our operations. We believe that outsourcing such functions allows us to focus capital and our employees on our core business operations and perform differentiating functions, such as investment, actuarial, product development and risk management functions. In addition, we believe an outsourcing model provides predictable pricing, service levels and volume capabilities and allows us to benefit from technological developments that enhance our customer self-service and sales processes. We believe that we have a good relationship with our principal outsource service providers.

Ratings. Within our F&G segment, access to funding and our related cost of borrowing, the attractiveness of certain of our products to customers and requirements for derivatives collateral posting are affected by our credit ratings and insurance financial strength ratings, which are periodically reviewed by the rating agencies. Financial strength ratings and credit ratings are important factors affecting public confidence in an insurer and its competitive position in marketing products.

As of the date of this Annual Report, A.M. Best Company ("A.M. Best"), Fitch Ratings ("Fitch"), Moody's, and S&P had issued credit ratings, financial strength ratings and/or outlook statements regarding us, as listed below. Credit ratings represent the opinions of rating agencies regarding an entity's ability to repay its indebtedness. Financial strength ratings represent the opinions of rating agencies regarding the ability of an insurance company to meet its financial obligations under an insurance policy and generally involve quantitative and qualitative evaluations by rating agencies of a company's financial condition and operating performance. Generally, rating agencies base their financial strength ratings upon information furnished to them by the insurer and upon their own investigations, studies and assumptions. Financial strength ratings are based upon factors of concern to policyholders, agents and intermediaries and are not directed toward the protection of investors. Credit and financial strength ratings are not recommendations to buy, sell or hold securities and they may be revised or revoked at any time at the sole discretion of the rating organization.

In addition to the financial strength ratings, rating agencies use an "outlook statement" to indicate a medium or long term trend that, if continued, may lead to a rating change. A positive outlook indicates a rating may be raised and a negative outlook indicates a rating may be lowered. A stable outlook is assigned when ratings are not likely to be changed. A developing outlook is assigned when a rating may be raised, lowered, or affirmed. Outlooks should not be confused with expected stability of the issuer's financial or economic performance. A rating may have a "stable" outlook to indicate that the rating is not expected to change, but a "stable" outlook does not preclude a rating agency from changing a rating at any time without notice.

The rating organizations may take various actions, positive or negative. Such actions are beyond our control and we cannot predict what these actions may be and the timing thereof.

A.M. Best, S&P, Fitch and Moody's review their ratings of insurance companies from time to time. There can be no assurance that any particular rating will continue for any given period of time or that it will not be changed or withdrawn entirely if, in their judgment, circumstances so warrant. While the degree to which ratings adjustments will affect sales and persistency is unknown, we believe if our ratings were to be negatively adjusted for any reason, we could experience a material decline in the sales of our products and the persistency of our existing business. See "Item 1A. Risk Factors".

Potential Impact of a Ratings Downgrade. F&G is required to maintain minimum ratings as a matter of routine practice as part of its over-the-counter derivatives agreements on ISDA forms. Under some ISDA agreements, we have agreed to maintain certain financial strength ratings. Please refer to *Note F. Derivative Financial Instruments* to our audited Consolidated Financial Statements included in Item 8 of Part II of this Annual Report for disclosure around the Company's requirement to maintain minimum ratings.

If the insurance subsidiaries held net short positions against a counterparty, and the subsidiaries' financial strength ratings were below the levels required in the ISDA agreement with the counterparty, the counterparty would demand immediate further collateralization, which could negatively impact overall liquidity. Based on the fair value of our derivatives as of December 31, 2021, we hold no net short positions against a counterparty; therefore, there is currently no potential exposure for us to post collateral.

A downgrade of the financial strength rating of one of our principal insurance subsidiaries could affect our competitive position in the insurance industry and make it more difficult for us to market our products, as potential customers may select companies with higher financial strength ratings. A downgrade of the financial strength rating could also impact our borrowing costs.

Risk Management. Risk management is a critical part of our business. We seek to assess risk to our business through a formalized process involving (i) identifying short-term and long-term strategic and operational objectives, (ii) development of risk appetite statements that establish what the company is willing to accept in terms of risks to achieving its goals and objectives, (iii) identifying the levers that control the risk appetite of the company, (iv) establishing the overall limits of risk acceptable for a given risk driver, (v) establishing operational risk limits that are aligned with the tolerances, (vi) assigning risk

limit quantification and mitigation responsibilities to individual team members within functional groups, (vii) analyzing the potential qualitative and quantitative impact of individual risks, including but not limited to stress and scenario testing covering over eight economic and insurance related risks, (viii) mitigating risks by appropriate actions and (ix) identifying, documenting and communicating key business risks in a timely fashion.

The responsibility for monitoring, evaluating and responding to risk is assigned first to our management and employees, second to those occupying specialist functions, such as legal compliance and risk teams, and third to those occupying supervisory functions, such as internal audit and the board of directors.

Reinsurance. Within our F&G segment, we cede insurance to other insurance companies. We use reinsurance to diversify risks and earnings, to manage loss exposures, to enhance our capital position, and to manage new business volume. The effects of certain reinsurance agreements are not accounted for as reinsurance as they do not reinsure insurance contracts or they do not transfer the risks of the reinsured policies.

In instances where we are the ceding company, we pay a premium to a reinsurer in exchange for the reinsurer assuming a portion of our liabilities under the policies we issued and collect expense allowances in return for our administration of the ceded policies. Use of reinsurance does not discharge our liability as the ceding company because we remain directly liable to our policyholders and are required to pay the full amount of our policy obligations in the event that our reinsurers fail to satisfy their obligations. We collect reimbursement from our reinsurers when we pay claims on policies that are reinsured.

We monitor the credit risk related to the ability of our reinsurers to honor their obligations under various agreements. To minimize the risk of credit loss on such contracts, we generally diversify our exposures among many reinsurers and limit the amount of exposure to each based on financial strength ratings, which are reviewed annually. We are able to further manage risk via funds withheld arrangements.

See “Item 7A. Quantitative and Qualitative Disclosures About Market Risk” for further discussion on credit risk and counterparty risk.

See “Item 1A. Risk Factors” for further discussion of credit risk related to reinsurance agreements. A description of significant ceded reinsurance transactions appears below.

Wilton RE Transaction. Pursuant to the agreed upon terms, Wilton Re purchased through a 100% quota share reinsurance agreement certain FGL Insurance life insurance policies that are subject to redundant reserves, reported on a statutory basis, under Regulation XXX and Guideline AXXX, as well as another block of FGL Insurance’s in-force traditional, universal life and IUL insurance policies. The effects of this agreement are accounted for as reinsurance as the ceded policies qualify as insurance products and because the agreement satisfies the risk transfer requirements for GAAP.

Hannover Reinsurance Transaction. FGL Insurance has a reinsurance agreement with Hannover Life Reassurance Company of America (Bermuda) Ltd. (“Hannover Re”), an unaffiliated reinsurer, to reinsure an in-force block of its FIA and fixed deferred annuity contracts with GMWB and Guaranteed Minimum Death Benefit (“GMDB”) guarantees. In accordance with the terms of this agreement, we cede 70% net retention of secondary guarantee payments in excess of account value for GMWB and GMDB guarantees. The effects of this agreement are not accounted for as reinsurance as it does not satisfy the risk transfer requirements for GAAP; therefore, deposit accounting is applied.

Canada Life Transaction. Effective May 1, 2020, FGL Insurance entered into an indemnity reinsurance agreement with Canada Life Assurance Company United States Branch, a third-party reinsurer, to reinsure FIA policies with GMWB. In accordance with the terms of this agreement, FGL Insurance cedes a quota share percentage of the net retention of guarantee payments in excess of account value for GMWB. The effects of this agreement are not accounted for as reinsurance as it does not satisfy the risk transfer requirements for GAAP; therefore, deposit accounting is applied.

Kubera Reinsurance Transactions. FGL Insurance entered into a reinsurance agreement with Kubera Insurance (SAC) Ltd. (“Kubera”), an unaffiliated reinsurer, effective December 31, 2018, to cede certain MYGA and deferred annuity GAAP and statutory reserves on a coinsurance funds withheld basis, net of applicable existing reinsurance. Effective October 31, 2021, this agreement was novated from Kubera to Somerset, a certified third party reinsurer. As the policies ceded to Somerset are investment contracts, there is no significant insurance risk present and therefore the reinsurance agreement is accounted for as a separate investment contract. The presentation of this agreement is similar to other reinsurance agreements that apply reinsurance accounting as discussed in further detail within *Note O. Reinsurance* to our Consolidated Financial Statements included in Item 8 of Part II of this Annual Report.

FGL Insurance has a reinsurance agreement with Kubera to cede certain FIA statutory reserves on a coinsurance funds withheld basis, net of applicable existing reinsurance. In accordance with the terms of this agreement, F&G cedes a quota share percentage of FIA policies for certain issue years to Kubera. Effective October 31, 2021, this agreement was amended to increase the ceded reserves from approximately \$4 billion to approximately \$10 billion. As the policies ceded to Kubera are

investment contracts, there is no significant insurance risk present and therefore the reinsurance agreement is accounted for as a separate investment contract.

Aspida Re Transaction. FGL Insurance has a reinsurance agreement with Aspida Re, an unaffiliated reinsurer, to cede certain MYGA business, on a funds withheld coinsurance basis, net of applicable existing reinsurance. As the policies ceded to Aspida Re are investment contracts, there is no significant insurance risk present and therefore the reinsurance agreement is accounted for as a separate investment contract. The presentation of this agreement is similar to other reinsurance agreements that apply reinsurance accounting as discussed in further detail within *Note O. Reinsurance* to our Consolidated Financial Statements included in Item 8 of Part II of this Annual Report.

The CARVM Facility. Life insurance companies operating in the United States must calculate required reserves for life and annuity policies based on statutory principles. The insurance division has adopted the methodology contained in the NAIC Valuation Manual (VM) as the prescribed methodology for the insurance industry. The industry has reduced or eliminated redundancies thereby increasing capital using a variety of techniques including reserve facilities.

FGL Insurance has a reinsurance treaty with Raven Reinsurance Company ("Raven Re"), its wholly-owned captive reinsurance company, to cede the Commissioners Annuity Reserve Valuation Method (CARVM) liability for annuity benefits where surrender charges are waived. In connection with the CARVM reinsurance agreement, FGL Insurance and Raven Re entered into an agreement with Nomura Bank International plc ("NBI") to establish a reserve financing facility in the form of a letter of credit issued by NBI. The financing facility has \$85 million available to draw on as of December 31, 2021. The facility may terminate earlier than the current termination date of October 1, 2022, in accordance with the terms of the Reimbursement Agreement. Under the terms of the reimbursement agreement, in the event the letter of credit is drawn upon, Raven Re is required to repay the amounts utilized, and Fidelity & Guaranty Life Holdings, Inc. ("FGLH") is obligated to repay the amounts utilized if Raven Re fails to make the required reimbursement. FGLH also is required to make capital contributions to Raven Re in the event that Raven Re's statutory capital and surplus falls below certain defined levels. As of December 31, 2021 and December 31, 2020, Raven Re's statutory capital and surplus was \$62 million and \$29 million, respectively, in excess of the minimum level required under the Reimbursement Agreement. As this letter of credit is provided by an unaffiliated financial institution, Raven Re is permitted to carry the letter of credit as an admitted asset on the Raven Re statutory balance sheet.

Regulation - U.S. FGL Insurance, Fidelity & Guaranty Life Insurance Company of New York ("FGL NY Insurance") and Raven Re are subject to comprehensive regulation and supervision in their domiciles, Iowa, New York and Vermont, respectively, and in each state in which they do business. FGL Insurance does business throughout the United States, except for New York. FGL NY Insurance only does business in New York. Raven Re is a special purpose captive reinsurance company that only provides reinsurance to FGL Insurance under the CARVM Treaty. FGL Insurance's principal insurance regulatory authority is the Iowa Insurance Division ("IID"); however, state insurance departments throughout the United States also monitor FGL Insurance's insurance operations as a licensed insurer. The New York State Department of Financial Services ("NYDFS") regulates the operations of FGL NY Insurance. The purpose of these regulations is primarily to protect policyholders and beneficiaries and not general creditors and shareholders of those insurers. Many of the laws and regulations to which FGL Insurance and FGL NY Insurance are subject are regularly re-examined and existing or future laws and regulations may become more restrictive or otherwise adversely affect their operations.

Generally, insurance products underwritten by and rates used by FGL Insurance and FGL NY Insurance must be approved by the insurance regulators in each state in which they are sold. Those products are also substantially affected by federal and state tax laws. For example, changes in tax law could reduce or eliminate the tax-deferred accumulation of earnings on the deposits paid by the holders of annuities and life insurance products, which could make such products less attractive to potential purchasers. A shift away from life insurance and annuity products could reduce FGL Insurance's and FGL NY Insurance's income from the sale of such products, as well as the assets upon which FGL Insurance and FGL NY Insurance earn investment income. In addition, insurance products may also be subject to the Employee Retirement Income Security Act of 1974 ("ERISA").

State insurance authorities have broad administrative powers over FGL Insurance and FGL NY Insurance with respect to all aspects of the insurance business including:

- licensing to transact business;
- licensing agents;
- prescribing which assets and liabilities are to be considered in determining statutory surplus;
- regulating premium rates for certain insurance products;
- approving policy forms and certain related materials;
- determining whether a reasonable basis exists as to the suitability of the annuity purchase recommendations producers make;

- regulating unfair trade and claims practices;
- establishing reserve requirements and solvency standards;
- regulating the amount of dividends that may be paid in any year;
- regulating the availability of reinsurance or other substitute financing solutions, the terms thereof and the ability of an insurer to take credit on its financial statements for insurance ceded to reinsurers or other substitute financing solutions;
- fixing maximum interest rates on life insurance policy loans and minimum accumulation or surrender values; and
- regulating the type, amounts, and valuations of investments permitted, transactions with affiliates, and other matters.

State insurance laws and regulations require FGL Insurance, FGL NY Insurance and Raven Re to file reports, including financial statements, with state insurance departments in each state in which they do business, and their operations and accounts are subject to examination by those departments at any time. FGL Insurance, FGL NY Insurance and Raven Re prepare statutory financial statements in accordance with accounting practices and procedures prescribed or permitted by these departments.

The NAIC has approved a series of statutory accounting principles and various model regulations that have been adopted, in some cases with certain modifications, by all state insurance departments. These statutory principles are subject to ongoing change and modification. Moreover, compliance with any particular regulator's interpretation of a legal or accounting issue may not result in compliance with another regulator's interpretation of the same issue, particularly when compliance is judged in hindsight. Any particular regulator's interpretation of a legal or accounting issue may change over time to FGL Insurance's or FGL NY Insurance's detriment, or changes to the overall legal or market environment, even absent any change of interpretation by a particular regulator, may cause FGL Insurance and FGL NY Insurance to change their views regarding the actions they need to take from a legal risk management perspective, which could necessitate changes to FGL Insurance's or FGL NY Insurance's practices that may, in some cases, limit their ability to grow and improve profitability.

State insurance departments conduct periodic examinations of the books and records, financial reporting, policy and rate filings, market conduct and business practices of insurance companies domiciled in their states, generally once every three to five years. Examinations are generally carried out in cooperation with the insurance departments of other states under guidelines promulgated by the NAIC. State insurance departments also have the authority to conduct examinations of non-domiciliary insurers that are licensed in their states.

The Iowa insurance law and the New York insurance law regulate the amount of dividends that may be paid in any year by FGL Insurance and FGL NY Insurance, respectively.

Each year, FGL NY Insurance may pay a certain limited amount of ordinary dividends or other distributions without being required to obtain the prior consent of or the NYDFS. However, to pay any dividends or distributions (including the payment of any dividends or distributions for which prior consent is not required), FGL NY Insurance must provide advance written notice to the NYDFS.

Pursuant to Iowa insurance law, ordinary dividends are payments, together with all other such payments within the preceding twelve months, that do not exceed the greater of (i) 10% of FGL Insurance's statutory surplus as regards policyholders as of December 31 of the preceding year; or (ii) the net gain from operations of FGL Insurance (excluding realized capital gains) for the 12-month period ending December 31 of the preceding year.

Dividends in excess of FGL Insurance's ordinary dividend capacity are referred to as extraordinary and require prior approval of the Iowa Commissioner. In deciding whether to approve a request to pay an extraordinary dividend, Iowa insurance law requires the Iowa Commissioner to consider the effect of the dividend payment on FGL Insurance's surplus and financial condition generally and whether the payment of the dividend will cause FGL Insurance to fail to meet its required RBC ratio. Dividends may only be paid out of statutory earned surplus.

Any payment of dividends by FGL Insurance is subject to the regulatory restrictions described above and the approval of such payment by the board of directors of FGL Insurance, which must consider various factors, including general economic and business conditions, tax considerations, FGL Insurance's strategic plans, financial results and condition, FGL Insurance's expansion plans, any contractual, legal or regulatory restrictions on the payment of dividends and its effect on RBC and such other factors the board of directors of FGL Insurance considers relevant. For example, payments of dividends could reduce FGL Insurance's RBC and financial condition and lead to a reduction in FGL Insurance's financial strength rating. See section titled "Risks Relating to Our Business-A financial strength ratings downgrade, potential downgrade, or any other negative action by a rating agency could make our products less attractive and increase our cost of capital, and thereby adversely affect our financial condition and results of operations" in Item 1A. Risk Factors.

FGL NY Insurance has historically not paid dividends.

FGL Insurance and FGL NY Insurance are subject to the supervision of the regulators in states where they are licensed to transact business. Regulators have discretionary authority in connection with the continuing licensing of these entities to limit or prohibit sales to policyholders if, in their judgment, the regulators determine that such entities have not maintained the minimum surplus or capital or that the further transaction of business will be hazardous to policyholders.

In order to enhance the regulation of insurers' solvency, the NAIC adopted a model law to implement RBC requirements for life, health and property and casualty insurance companies. All states have adopted the NAIC's model law or a substantially similar law. RBC is used to evaluate the adequacy of capital and surplus maintained by an insurance company in relation to risks associated with: (i) asset risk, (ii) insurance risk, (iii) interest rate risk, and (iv) business risk. In general, RBC is calculated by applying factors to various asset, premium and reserve items, taking into account the risk characteristics of the insurer. Within a given risk category, these factors are higher for those items with greater underlying risk and lower for items with lower underlying risk. The RBC formula is used as an early warning regulatory tool to identify possible inadequately capitalized insurers for purposes of initiating regulatory action, and not as a means to rank insurers generally. Insurers that have less statutory capital than the RBC calculation requires are considered to have inadequate capital and are subject to varying degrees of regulatory action depending upon the level of capital inadequacy. As of the most recent annual statutory financial statements filed with insurance regulators, the RBC ratios for FGL Insurance and FGL NY Insurance each exceeded the minimum RBC requirements.

It is desirable to maintain an RBC ratio in excess of the minimum requirements in order to maintain or improve our financial strength ratings. We ended the year with an RBC ratio above our 400% target for FGL Insurance. See section titled "Risks Relating to Our Business-A financial strength ratings downgrade, potential downgrade, or any other negative action by a rating agency, could make our product offerings less attractive and increase our cost of capital, and thereby adversely affect our financial condition and results of operations" in Item 1A. Risk Factors.

The NAIC has developed a set of financial relationships or tests known as the Insurance Regulatory Information System ("IRIS") to assist state regulators in monitoring the financial condition of U.S. insurance companies and identifying companies that require special attention or action by insurance regulatory authorities. A ratio falling outside the prescribed "usual range" is not considered a failing result. Rather, unusual values are viewed as part of the regulatory early monitoring system. In many cases, it is not unusual for financially sound companies to have one or more ratios that fall outside the usual range. Insurance companies generally submit data annually to the NAIC, which in turn analyzes the data using prescribed financial data ratios, each with defined "usual ranges". Generally, regulators will begin to investigate or monitor an insurance company if its ratios fall outside the usual ranges for four or more of the ratios. IRIS consists of a statistical phase and an analytical phase whereby financial examiners review insurers' annual statements and financial ratios. The statistical phase consists of 12 key financial ratios based on year-end data that are generated from the NAIC database annually; each ratio has a "usual range" of results. As of December 31, 2021, FGL Insurance, FGL NY Insurance and Raven Re had two, three and two ratios outside the usual range, respectively. The IRIS ratios for total affiliated investments to capital and surplus and change in premium for FGL Insurance were outside the usual range. The IRIS ratios for change in premium, change in product mix, and change in reserving ratio for FGL NY Insurance were outside the usual range. The IRIS ratios for change in premium and adequacy of investment income for Raven Re were outside the usual range.

In all instances in prior years, regulators have been satisfied upon follow-up that no regulatory action was required. FGL Insurance, FGL NY Insurance and Raven Re are not currently subject to regulatory restrictions based on these ratios.

State insurance laws require insurers to analyze the adequacy of reserves. The respective appointed actuaries for FGL Insurance, FGL NY Insurance and Raven Re must each submit an opinion on an annual basis that their respective reserves, when considered in light of the respective assets FGL Insurance, FGL NY Insurance and Raven Re hold with respect to those reserves, make adequate provision for the contractual obligations and related expenses of FGL Insurance, FGL NY Insurance and Raven Re. FGL Insurance, FGL NY Insurance and Raven Re have filed all of the required opinions with the insurance departments in the states in which they do business.

States regulate the extent to which insurers are permitted to take credit on their financial statements for the financial obligations that the insurers cede to reinsurers. Where an insurer cedes obligations to a reinsurer that is neither licensed nor accredited by the state insurance department, the ceding insurer is not permitted to take such financial statement credit unless the unlicensed or unaccredited reinsurer secures the liabilities it will owe under the reinsurance contract. Under the laws regulating credit for reinsurance issued by such unlicensed or unaccredited reinsurers, the permissible means of securing such liabilities are (i) the establishment of a trust account by the reinsurer to hold certain qualifying assets in a qualified U.S. financial institution, such as a member of the Federal Reserve, with the ceding insurer as the exclusive beneficiary of such trust account with the unconditional right to demand, without notice to the reinsurer, that the trustee pay over to it the assets in the trust account equal to the liabilities owed by the reinsurer; (ii) the posting of an unconditional and irrevocable letter of credit by a qualified U.S. financial institution in favor of the ceding company allowing the ceding company to draw upon the letter of credit up to the amount of the unpaid liabilities of the reinsurer and (iii) a "funds withheld" arrangement by which the ceding

company withholds transfer to the reinsurer of the assets, which support the liabilities to be owed by the reinsurer, with the ceding insurer retaining title to and exclusive control over such assets. In addition, on January 1, 2014, the NAIC Model Credit for Reinsurance Act became effective in Iowa, which adds the concept of “certified reinsurer”, whereby a ceding insurer may take financial statement credit for reinsurance provided by an unaccredited and unlicensed reinsurer, which has been certified by the Iowa Commissioner. The Iowa Commissioner certifies reinsurers based on several factors, including their financial strength ratings, and imposes collateral requirements based on such factors. Effective January 1, 2020 reciprocal jurisdiction was added and adopted in Iowa. FGL Insurance and FGL NY Insurance are subject to such credit for reinsurance rules in Iowa and New York, respectively, insofar as they enter into any reinsurance contracts with reinsurers that are neither licensed nor accredited in Iowa and New York, respectively.

F&G, as the parent company of FGL Insurance and the indirect parent company of FGL NY Insurance, is subject to the insurance holding company laws in Iowa and New York. These laws generally require each insurance company directly or indirectly owned by the holding company to register with the insurance department in the insurance company’s state of domicile and to furnish annually financial and other information about the operations of companies within the holding company system. Generally, all transactions between insurers and affiliates within the holding company system are subject to regulation and must be fair and reasonable, and may require prior notice and approval or non-disapproval by its domiciliary insurance regulator.

Most states, including Iowa and New York, have insurance laws that require regulatory approval of a direct or indirect change of control of an insurer or an insurer’s holding company. Such laws prevent any person from acquiring control, directly or indirectly, of F&G Annuities & Life, FGL US Holdings, CF Bermuda, FGLH, FGL Insurance or FGL NY Insurance unless that person has filed a statement with specified information with the insurance regulators and has obtained their prior approval. In addition, investors deemed to have a direct or indirect controlling interest are required to make regulatory filings and respond to regulatory inquiries. Under most states’ statutes, including those of Iowa and New York, acquiring 10% or more of the voting stock of an insurance company or its parent company is presumptively considered a change of control, although such presumption may be rebutted. Accordingly, any person who acquires 10% or more of our voting securities or that of F&G Annuities & Life, FGL US Holdings, CF Bermuda, FGLH, FGL Insurance or FGL NY Insurance without the prior approval of the insurance regulators of Iowa and New York will be in violation of those states’ laws and may be subject to injunctive action requiring the disposition or seizure of those securities by the relevant insurance regulator or prohibiting the voting of those securities and to other actions determined by the relevant insurance regulator.

Each state has insurance guaranty association laws under which insurers doing business in the state may be assessed by state insurance guaranty associations for certain obligations of insolvent insurance companies to policyholders and claimants. Typically, states assess each member insurer in an amount related to the member insurer’s proportionate share of the business written by all member insurers in the state. Although no prediction can be made as to the amount and timing of any future assessments under these laws, FGL Insurance and FGL NY Insurance have established reserves that they believe are adequate for assessments relating to insurance companies that are currently subject to insolvency proceedings.

State insurance laws and regulations include numerous provisions governing the marketplace activities of insurers, including provisions governing the form and content of disclosure to consumers, illustrations, advertising, sales and complaint process practices. State regulatory authorities generally enforce these provisions through periodic market conduct examinations. In addition, FGL Insurance and FGL NY Insurance must file, and in many jurisdictions and for some lines of business obtain regulatory approval for, rates and forms relating to the insurance written in the jurisdictions in which they operate. FGL Insurance is currently the subject of four ongoing market conduct examinations in various states. Market conduct examinations can result in monetary fines or remediation and generally require FGL Insurance to devote significant resources to the management of such examinations. FGL Insurance does not believe that any of the current market conduct examinations it is subject to will result in any fines or remediation orders that will be material to its business.

FGL Insurance, FGL NY Insurance, and Raven Re are subject to state laws and regulations that require diversification of their investment portfolios and limit the amount of investments in certain asset categories, such as below investment grade fixed income securities, equity, real estate, other equity investments and derivatives. Failure to comply with these laws and regulations would cause investments exceeding regulatory limitations to be treated as either non-admitted assets for purposes of measuring surplus or as not qualified as an asset held for reserve purposes and, in some instances, would require divestiture or replacement of such non-qualifying investments. We believe that the investment portfolios of FGL Insurance, FGL NY Insurance, and Raven Re as of December 31, 2021 complied in all material respects with such regulations.

Our operations are subject to certain federal and state laws and regulations that require financial institutions and other businesses to protect the security and confidentiality of personal information, including health-related and customer information, and to notify customers and other individuals about their policies and practices relating to their collection and disclosure of health-related and customer information and their practices relating to protecting the security and confidentiality of such information. These laws and regulations require notice to affected individuals, law enforcement agencies, regulators and

others if there is a breach of the security of certain personal information, including social security numbers, and require holders of certain personal information to protect the security of the data. Our operations are also subject to certain federal regulations that require financial institutions and creditors to implement effective programs to detect, prevent, and mitigate identity theft. In addition, our ability to make telemarketing calls and to send unsolicited e-mail or fax messages to consumers and customers and our uses of certain personal information, including consumer report information, are regulated. Federal and state governments and regulatory bodies may be expected to consider additional or more detailed regulation regarding these subjects and the privacy and security of personal information.

In recent years, the U.S. Securities and Exchange Commission (“SEC”) and state securities regulators have questioned whether FIAs, such as those sold by us, should be treated as securities under the federal and state securities laws rather than as insurance products exempted from such laws. Treatment of these products as securities would require additional registration and licensing of these products and the agents selling them, as well as cause us to seek additional marketing relationships for these products, any of which may impose significant restrictions on our ability to conduct operations as currently operated. Under the Dodd-Frank Act, annuities that meet specific requirements, including requirements relating to certain state suitability rules, are specifically exempted from being treated as securities by the SEC. We expect the types of FIAs that FGL Insurance and FGL NY Insurance sell will meet these requirements and; therefore, are exempt from being treated as securities by the SEC and state securities regulators. However, there can be no assurance that federal or state securities laws or state insurance laws and regulations will not be amended or interpreted to impose further requirements on FIAs.

The Dodd-Frank Act made sweeping changes to the regulation of financial services entities, products and markets. Certain provisions of the Dodd-Frank Act are applicable to us, our competitors or those entities with which we do business. These provisions may impact us in many ways, including, but not limited to, having an effect on the overall business climate, requiring the allocation of certain resources to government affairs, and increasing our legal and compliance related activities and the costs associated therewith.

We may offer certain insurance and annuity products to employee benefit plans governed by ERISA and/or the Code, including group annuity contracts designated to fund tax-qualified retirement plans. ERISA and the Code provide (among other requirements) standards of conduct for employee benefit plan fiduciaries, including investment managers and investment advisers with respect to the assets of such plans, and holds fiduciaries liable if they fail to satisfy fiduciary standards of conduct.

State and federal regulators have been adopting stronger consumer protection regulations that may materially impact our company, business, distribution, and products. The NAIC adopted an amended Suitability in Annuity Transactions Model Regulation in February 2020 incorporating a requirement that agents act in the best interest of consumers without putting their own financial interests or insurer’s interests ahead of consumer interests. The best interest requirement is satisfied by complying with four regulatory obligations relating to care, disclosure, conflict of interest, and documentation. The amended model regulation also requires agents to provide certain disclosures to consumers, obligates insurers to supervise agent compliance with the new requirements, and prohibits sales contests or other incentives based on sales of specific annuities within a limited period of time.

At this time nineteen states have adopted the revised NAIC model regulation, including FGL Insurance’s domiciliary state of Iowa, and at least another six states are considering adoption of the revised NAIC model regulation. Management has instituted new business procedures to comply with these revised requirements where required. FGL NY Insurance separately instituted new business procedures in response to the New York Department of Financial Services (NYDFS) best interest rule adopted in August 2019 which deviates from the NAIC model regulation and is considered more onerous in certain respects including its broader application to life insurance sales. Management is monitoring an ongoing legal challenge to nullify the NYDFS rule.

In December 2020 the U. S. Department of Labor (DOL) issued its final version of an investment advice rule replacing the previous “Fiduciary Rule” that had been challenged by industry participants and vacated in March 2018 by the United States Fifth Circuit Court of Appeals. The new investment advice rule reinstates the five-part test for determining whether a person is considered a fiduciary for purposes of ERISA and the Internal Revenue Code and sets forth a new prohibited transaction class exemption (PTE) referred to as PTE 2020-02. The rule’s preamble also contains the DOL’s reinterpretation of elements of the five-part test that appears to encompass more insurance agents selling IRA products and withdraws the agency’s longstanding position that rollover recommendations out of employer plans are not subject to ERISA. The new rule took effect on February 16, 2021.

The DOL investment advice rule leaves in place PTE 84-24 which is a longstanding class exemption providing prohibited transaction relief for insurance agents selling annuity products provided certain disclosures are made to the plan fiduciary, which is the policyholder in the case of an IRA, and certain other conditions are met. Among other things, these disclosures include the agent’s relationship to the insurer and commissions received in connection with the annuity sale. FGL Insurance, along with FGL NY Insurance, designed and launched a compliance program in January 2022 requiring all agents selling IRA products to submit an acknowledgment with each IRA application indicating the agent has satisfied PTE 84-24 requirements on

a precautionary basis in case the agent acted or is found to have acted as a fiduciary. Meanwhile the DOL has publicly announced its intention to consider future rulemaking that would revoke or modify PTE 84-24.

Management believes these current and emerging developments relating to market conduct standards for the financial services industry may over time materially affect the way in which our agents do business, the role of IMOs, sale of IRA products including IRA-to-IRA and employer plan rollovers, how the company supervises its distribution force, compensation practices, and liability exposure and costs. In addition to implementing the compliance procedures described above, management is monitoring further developments closely and will be working with IMOs and distributors to adapt to evolving regulatory requirements and risks.

Regulation - Bermuda. F&G Life Re is a Bermuda exempted company incorporated under the Companies Act 1981, as amended (the "Companies Act") and registered as a Class C insurer under the Insurance Act 1978, as amended, and its related regulations (the "Insurance Act"). F&G Life Re is regulated by the BMA.

Bermuda has been awarded full equivalence for commercial insurers under Europe's Solvency II regime applicable to insurance companies, which regime came into effect on January 1, 2016. In addition, the Insurance Act required BMA approval of increases in control or dispositions of control of an insurance company.

The BMA utilizes a risk-based approach when it comes to licensing and supervising insurance and reinsurance companies. As part of the BMA's risk-based system, an assessment of the inherent risks within each particular class of insurer or reinsurer is used to determine the limitations and specific requirements that may be imposed. Thereafter the BMA keeps its analysis of relative risk within individual institutions under review on an ongoing basis, including through the scrutiny of audited financial statements, and, as appropriate, meeting with senior management during onsite visits.

The Insurance Act imposes on Bermuda insurance companies solvency and liquidity standards, as well as auditing and reporting requirements. Certain significant aspects of the Bermuda insurance regulatory framework are set forth below.

Minimum Solvency Margin. The Insurance Act provides that the value of the assets of an insurer must exceed the value of its liabilities by an amount greater than its prescribed minimum solvency margin.

The minimum solvency margin that must be maintained by a Class C insurer is the greater of: (i) \$500,000; (ii) 1.5% of assets; and (iii) 25% of that insurer's enhanced capital requirement ("ECR"). An insurer may file an application under the Insurance Act to waive the aforementioned requirements.

ECR and Bermuda Solvency Capital Requirements ("BSCR"). Class C insurers are required to maintain available capital and surplus at a level equal to or in excess of the applicable ECR, which is established by reference to either the applicable BSCR model or an approved internal capital model. Furthermore, to enable the BMA to better assess the quality of the insurer's capital resources, a Class C insurer is required to disclose the makeup of its capital in accordance with its 3-tiered capital system. An insurer may file an application under the Insurance Act to have the aforementioned ECR requirements waived.

Restrictions on Dividends and Distributions. In addition to the requirements under the Companies Act (as discussed below), the Insurance Act limits the maximum amount of annual dividends and distributions that may be paid or distributed by F&G Life Re without prior regulatory approval.

F&G Life Re is prohibited from declaring or paying a dividend if it fails to meet its minimum solvency margin, or ECR, or if the declaration or payment of such dividend would cause such breach. If F&G Life Re were to fail to meet its minimum solvency margin on the last day of any financial year, it would be prohibited from declaring or paying any dividends during the next financial year without the approval of the BMA.

In addition, as a Class C insurer, F&G Life Re must: (i) not make any payment from its long-term business fund for any purpose other than a purpose of the insurer's long-term business, except in so far as such payment can be made out of any surplus certified by the insurer's approved actuary to be available for distribution otherwise than to policyholders; and (ii) not declare or pay a dividend to any person other than a policyholder unless the value of the assets of its long-term business fund, as certified by the insurer's approved actuary, exceeds the extent (as to certified) of the liabilities of the insurer's long-term business. In the event a dividend complies with the above, F&G Life Re must ensure the amount of any such dividend does not exceed the aggregate of (i) that excess and (ii) any other funds properly available for the payment of dividend, being funds arising out of business of the insurer other than long-term business.

Furthermore, as a Class C insurer, F&G Life Re must not declare or pay a dividend to any person other than a policyholder unless the value of the assets of the insurer, as certified by its approved actuary, exceeds its liabilities (as so certified) by the greater of its margin of solvency or its ECR and the amount of any such dividend shall not exceed that excess.

The Companies Act also limits F&G Life Re's ability to pay dividends and make distributions to its shareholders. F&G Life Re is not permitted to declare or pay a dividend, or make a distribution out of its contributed surplus, if it is, or would after the payment be, unable to pay its liabilities as they become due or if the realizable value of its assets would be less than its liabilities.

Reduction of Capital. F&G Life Re may not reduce its total statutory capital by 15% or more, as set out in its previous year’s financial statements, unless it has received the prior approval of the BMA. Total statutory capital consists of the insurer’s paid in share capital, its contributed surplus (sometimes called additional paid in capital) and any other fixed capital designated by the BMA as statutory capital.

Regulation - Cayman. F&G Cayman Re is licensed as a class D insurer in the Cayman Islands by the Cayman Islands Monetary Authority (“CIMA”). As a regulated insurance company, F&G Cayman Re is subject to the supervision of CIMA and CIMA may at any time direct F&G Cayman Re, in relation to a policy, a line of business or the entire business, to cease or refrain from committing an act or pursuing a course of conduct and to perform such acts as in the opinion of CIMA are necessary to remedy or ameliorate the situation.

The laws and regulations of the Cayman Islands require that, among other things, F&G Cayman Re maintain minimum levels of statutory capital, surplus and liquidity, meet solvency standards, submit to periodic examinations of its financial condition and restrict payments of dividends and reductions of capital. Statutes, regulations and policies that F&G Cayman Re is subject to may also restrict the ability of F&G Cayman Re to write insurance and reinsurance policies, make certain investments and distribute funds. Any failure to meet the applicable requirements or minimum statutory capital requirements could subject it to further examination or corrective action by CIMA, including restrictions on dividend payments, limitations on our writing of additional business or engaging in finance activities, supervision or liquidation.

Sustainability

FNF’s work to address Environmental, Social and Governance (“ESG”) issues is important to who we are as a company. Our Company and our Board of Directors are committed to addressing ESG issues to better serve our employees, business partners, and the communities impacted by our business. To honor that commitment, our management team leads our ESG efforts with oversight from the Audit Committee, who reports our ESG progress and efforts to the Board of Directors.

Building a sustainable business starts with being transparent about our business practices, corporate governance, environmental impact, and our commitments to our stakeholders. In 2019, we shared our inaugural Sustainability report. Since then, we have continued to enhance our ESG efforts and publish updates on our progress annually.

FNF’s core ESG commitments include:

Protecting Property Owners: The safety and security of our customers is our top priority. This means ensuring rigorous information security and internal auditing protocols, and monitoring to help ensure the safety of funds and private information when it is in our custody. We are also always working hard to educate and protect our customers from fraud, through enhancing our fraud prevention programs.

Preserving the Environment: FNF works to integrate environmental management practices into our operations, including our facilities. As part of our commitment to preserve the environment, we understand that we not only have a duty to protect the local environments where we operate, but that environmental change also poses risks and opportunities to our business. In 2021, we conducted our first climate risk assessment to understand climate-related risks that may impact our business and to manage these risks through our enterprise risk management systems.

We have a number of efforts underway to reduce our environmental footprint across our locations. Our efforts include: monitoring and mitigating our carbon footprint, eliminating the use of plastic water bottles, and participating in recycling programs. As part of a traditionally paper-intensive industry, we have implemented customer-focused technology to significantly reduce paper consumption in real estate transactions, moving the title insurance industry in a more sustainable direction.

Supporting Our Employees and Communities: As one of our greatest assets, we are committed to providing our employees with opportunities to expand their knowledge base and develop skills for career advancement. Additionally, we are committed to building a diverse and inclusive workplace, and we strongly believe that the diversity of our clients should be reflected among our employees. With over 1,300 locations throughout the United States and Canada and over 28,000 employees, we are positioned to make a difference within the communities in which we operate. Through local community involvement, corporate initiatives, and philanthropic giving – as well as an active community volunteer ethos – we work hard each day to support the communities in which we live. This community outreach and support has become even more pertinent in the ongoing battle against COVID-19, and we continue to provide resources to ensure the health and safety of our employees, their families, our customers, and our community.

Operating Ethically: Our reputation for integrity is one of our most important assets, and each of our employees and directors is expected to contribute to the care and preservation of that asset. We operate in ways that are fair, transparent, and compliant with applicable regulations. We implement strong governance practices, policies, training, and reporting avenues to encourage and promote that all employees adhere to the highest standards for business integrity.

Human Capital Resources

Employees

As of January 31, 2022, we had 28,290 full-time equivalent employees, which includes 27,054 in our Title segment, 627 in our F&G segment and 609 in our Corporate and other segment. In our Title segment, we monitor our staffing levels based on current economic activity. In our F&G segment, our employee base increased approximately 40% during 2021 as our F&G business continues to grow. None of our employees are subject to collective bargaining agreements. We believe that our relations with employees are generally good.

Diversity

Diversity is a key component of FNF's success. We believe that the diversity of our employees allows us to offer our clientele meaningful customized products and services. FNF aims to have diverse and inclusive practices in all aspects of our business operations; particularly for hiring, compensation, and opportunity. We are committed to being an equal opportunity employer and enhancing diversity and inclusion efforts across our business. Our goal is to foster an inclusive workplace where each employee, regardless of race, ethnicity, sexual orientation, or gender identification, receives equal access to opportunities throughout the organization.

FNF's Code of Business Conduct & Ethics prohibits discrimination and harassment. We have a written nondiscrimination policy that is distributed to all employees as part of our employee handbook, which employees must acknowledge annually. Our employees participate in annual trainings including Code of Business Conduct and Ethics Training, and Reporting Harassment: Everyone's Responsibility Training.

We have many women in leadership roles throughout our organization. As of January 31, 2022, out of the 23,710 U.S. based employees under FNF, 71% of the total workforce are women and 29% are men. Two out of eleven board members are women; 40% percent of the members of FNF's Executive Team are women; and 67% of FNF's Non-Executive Managers are women. Our annual Women in Leadership Program for female executives, managers, and future managers is designed to encourage and promote women into more active leadership roles within FNF.

Our Board of Directors leads by example in its commitment to diversity. In 2018, our board codified its commitment to diversity when selecting new director nominees, including candidates with a diversity of age, gender, nationality, race, ethnicity, and sexual orientation by integrating it into the director selection criteria in our Corporate Governance Guidelines.

Training and Personal Development

We believe that our employees are one of our greatest assets, and we are committed to providing opportunities for them to expand their knowledge base and develop opportunities for advancement, which in turn results in improved employee performance and morale.

FNF offers a variety of training and educational opportunities for employees. We provide training on escrow policies and procedures, advanced escrow processing and practices, title loss reduction, title underwriting, advanced title practices and procedures, fraud prevention, as well as software, soft skills, sales, and time management trainings. Our Commercial Sales University is a course for new commercial sales reps and our Leadership Development Program provides employees mentorship from senior executives.

Leadership Development Program: Our Leadership Development Program helps employees advance their careers through professional development. Candidates are nominated once a year by their manager to participate in an intensive program, where they are asked to prepare and present a managers' report and to participate in the process of preparing an annual budget. In addition, the program includes thought-provoking discussions between candidates and our management team about leadership, business, the economy, and other industry-related topics. This process enables candidates to gain a better understanding of our Company culture and management expectations. Candidates also gain access to mentorship and engagement with senior executives.

Many departments provide Continuing Education (CE) and Continuing Legal Education (CLE) opportunities for state land title and legal associations. Some offices provide financial assistance to join professional organizations and offer education reimbursement.

Financial Information by Operating Segment

For financial information by operating segment, see Note J *Segment Information* to our Consolidated Financial Statements included in Item 8 of Part II of this Annual Report.

Statement Regarding Forward-Looking Information

The statements contained in this Annual Report or in our other documents or in oral presentations or other statements made by our management that are not purely historical are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), including statements regarding our expectations, hopes, intentions, or strategies regarding the future. These statements relate to, among other things, future financial and operating results of the Company. In many cases, you can identify forward-looking statements by terminology such as "may," "will," "should," "expect," "plan," "anticipate," "believe," "estimate," "predict," "potential," or "continue," or the negative of these terms and other comparable terminology. Actual results could differ materially from those anticipated in these statements as a result of a number of factors, including, but not limited to the following:

- adverse changes in the level of real estate activity, which may be caused by, among other things, high or increasing interest rates, a limited supply of mortgage funding, increased mortgage defaults, or a weak U.S. economy;
- the severity of our title insurance claims;
- downgrade of our credit rating by rating agencies;
- compliance with extensive government regulation of our operating subsidiaries and adverse changes in applicable laws or regulations or in their application by regulators;
- potential impact of the consummation of the F&G acquisition on relationships, including employees, suppliers, customers and competitors;
- regulatory investigations of the title insurance industry;
- loss of key personnel that could negatively affect our financial results and impair our operating abilities;
- our business concentration in the States of California and Texas are the source of approximately 14.6% and 13.0%, respectively, of our title insurance premiums;
- our potential inability to find suitable acquisition candidates, as well as the risks associated with acquisitions in lines of business that will not necessarily be limited to our traditional areas of focus, or difficulties integrating acquisitions;
- our dependence on distributions from our title insurance underwriters as our main source of cash flow;
- competition from other title insurance companies;
- changes in general economic, business, and political conditions, including changes in the financial markets and COVID-19 conditions;
- impacts to our business operations caused by the occurrence of a catastrophe or global crisis, including the spread of COVID-19 variants; and
- other risks detailed in "Risk Factors" below and elsewhere in this document and in our other filings with the SEC.

We are not under any obligation (and expressly disclaim any such obligation) to update or alter our forward-looking statements, whether as a result of new information, future events or otherwise. You should carefully consider the possibility that actual results may differ materially from our forward-looking statements.

Additional Information

Our website address is www.fnf.com. We make available free of charge on or through our website our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and all amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practicable after such material is electronically filed with or furnished to the SEC. However, the information found on our website is not part of this or any other report.

Item 1A. Risk Factors

In addition to the normal risks of business, we are subject to significant risks and uncertainties, including those listed below and others described elsewhere in this Annual Report. Any of the risks described herein could result in a significant or material adverse effect on our results of operations or financial condition.

Risk Factors Relating to Our Business

We have recorded goodwill as a result of prior acquisitions, and an economic downturn could cause these balances to become impaired, requiring write-downs that would reduce our operating income.

Goodwill aggregated approximately \$4,539 million, or 7.5% of our total assets, as of December 31, 2021. Current accounting rules require that goodwill be assessed for impairment at least annually or whenever changes in circumstances indicate that the carrying amount may not be recoverable from estimated future cash flows. Factors that may be considered a change in circumstance indicating the carrying value of our intangible assets, including goodwill, may not be recoverable include, but are not limited to, significant underperformance relative to historical or projected future operating results, a significant decline in our stock price and market capitalization, and negative industry or economic trends. For the years ended December 31, 2021, 2020 and 2019, no goodwill impairment charge was recorded. However, if there is an economic downturn in the future, the carrying amount of our goodwill may no longer be recoverable, and we may be required to record an impairment charge, which would have a negative impact on our results of operations and financial condition. We will continue to monitor our market capitalization and the impact of the economy to determine if there is an impairment of goodwill in future periods.

Our substantial indebtedness could adversely affect our ability to raise additional capital to fund our operations, limit our ability to react to changes in the economy or our industry and prevent us from meeting our obligations under our indebtedness.

As of December 31, 2021, our outstanding debt was \$3,096 million. Our high degree of leverage could have important consequences, including the following: (i) a substantial portion of our cash flow from operations is dedicated to the payment of principal and interest on indebtedness, thereby reducing the funds available for operations, future business opportunities and capital expenditures; (ii) our ability to obtain additional financing for working capital, capital expenditures, debt service requirements, acquisitions and general corporate purposes in the future may be limited; (iii) we may be unable to adjust rapidly to changing market conditions; (iv) the debt service requirements of our other indebtedness could make it more difficult for us to satisfy our financial obligations; and (v) we may be vulnerable in a downturn in general economic conditions or in our business and we may be unable to carry out activities that are important to our growth.

Our ability to make scheduled payments of the principal of, or to pay interest on, or to refinance indebtedness depends on and is subject to our financial and operating performance, which in turn is affected by general and regional economic, financial, competitive, business and other factors beyond our control. If we are unable to generate sufficient cash flow to service our debt or to fund our other liquidity needs, we will need to restructure or refinance all or a portion of our debt, which could cause us to default on our obligations and impair our liquidity. Any refinancing of our indebtedness could be at higher interest rates and may require us to comply with more stringent covenants that could further restrict our business operations. We from time to time may increase the amount of our indebtedness, modify the terms of our financing arrangements, issue dividends, make capital expenditures and take other actions that may substantially increase our leverage.

The pattern of amortizing our DAC, DSI, and VOBA balances relies on assumptions and estimates made by management. Changes in these assumptions and estimates could impact our results of operations and financial condition.

Amortization of our deferred acquisition costs ("DAC"), deferred sales inducements ("DSI") and value of business acquired ("VOBA") balances depends on the actual and expected profits generated by the respective lines of business that incurred the expenses. Expected profits are dependent on assumptions regarding a number of factors including investment returns, benefit payments, expenses, mortality, and policy lapse. Due to the uncertainty associated with establishing these assumptions, we cannot, with precision, determine the exact pattern of profit emergence. As a result, amortization of these balances will vary from period to period. Any difference in actual experience versus expected results could require us to, among other things, accelerate the amortization of DAC, DSI and VOBA that would reduce profitability for such lines of business in the current period.

For additional information, see Item 7 of Part II of this Annual Report, under Management's Discussion and Analysis of Financial Condition and Results of Operations-Critical Accounting Policies and Estimates.

We may face losses if our actual experience differs significantly from our reserving assumptions.

Our profitability depends significantly upon the extent to which our actual experience is consistent with the assumptions used in setting rates for our products and establishing liabilities for future life insurance, annuity, and PRT policy benefits and

claims. However, due to the nature of the underlying risks and the high degree of uncertainty associated with the determination of the liabilities for unpaid policy benefits and claims, we cannot determine precisely the amounts we will ultimately pay to settle these liabilities. As a result, we may experience volatility in our profitability and our reserves from period to period. To the extent that actual experience is less favorable than our underlying assumptions, we could be required to increase our liabilities, which may reduce our profitability and impact our financial strength.

We have minimal experience to date on policyholder behavior for our GMWB products that we began issuing in 2008. If emerging experience deviates from our assumptions on GMWB utilization, it could have a significant effect on our reserve levels and related results of operations. Based on experience on GMWB utilization, which continues to emerge, we updated our GMWB utilization assumption during 2019, with a favorable impact on reserves. We will continue to monitor the GMWB utilization assumption and update our best estimate as applicable.

See Item 7 of Part II of this Annual Report, under Management's Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies and Estimates.

Our management has historically sought to grow through acquisitions, both in our current lines of business as well as in lines of business outside of our traditional areas of focus or geographic areas. This expansion of our business subjects us to associated risks, such as risks and uncertainties associated with new companies, the diversion of management's attention and lack of experience in operating unrelated businesses, and may affect our credit and ability to repay our debt.

Our management has historically sought to grow through acquisitions, both in our current lines of business, as well as lines of business that are not directly tied to or synergistic with our current operations. Accordingly, we have in the past acquired, and may in the future acquire, businesses in industries or geographic areas with which management is less familiar than we are with our current businesses. These activities involve risks that could adversely affect our operating results, due to uncertainties involved with new companies, diversion of management's attention and lack of substantial experience in operating such businesses. There can be no guarantee that we will not enter into transactions or make acquisitions that will cause us to incur additional debt, increase our exposure to market and other risks and cause our credit or financial strength ratings to decline.

We are a holding company and depend on distributions from our subsidiaries for cash.

We are a holding company whose primary assets are the securities of our operating subsidiaries. Our ability to pay interest on our outstanding debt and our other obligations and to pay dividends is dependent on the ability of our subsidiaries to pay dividends or make other distributions or payments to us. If our operating subsidiaries are not able to pay dividends to us, we may not be able to meet our obligations or pay dividends on our common stock.

Our title insurance subsidiaries must comply with state laws, which require them to maintain minimum amounts of working capital, surplus and reserves, and place restrictions on the amount of dividends that they can distribute to us. Compliance with these laws will limit the amounts our regulated subsidiaries can dividend to us. During 2022, our title insurers may pay dividends or make distributions to us of approximately \$831 million; however, insurance regulators have the authority to prohibit the payment of ordinary dividends or other payments by our title insurers to us if they determine that such payment could be adverse to our policyholders.

Our F&G subsidiaries are also subject to state laws with respect to the payment of dividends. The Iowa insurance law and the New York insurance law regulate the amount of dividends that may be paid in any year by FGL Insurance and FGL NY Insurance, respectively. Compliance with these state regulations will limit the amounts that FGL Insurance and FGL NY Insurance may dividend to us. Any dividends in excess of a threshold amount are subject to advance state notice or approval.

The maximum dividend permitted by law is not necessarily indicative of an insurer's actual ability to pay dividends, which may be constrained by business and regulatory considerations, such as the impact of dividends on surplus, which could affect an insurer's ratings or competitive position, the amount of premiums that can be written and the ability to pay future dividends. Further, depending on business and regulatory conditions, we may in the future need to retain cash in our underwriters or even contribute cash to one or more of them in order to maintain their ratings or their statutory capital position. Such a requirement could be the result of investment losses, reserve charges, adverse operating conditions in the current economic environment or changes in interpretation of statutory accounting requirements by regulators.

Our business could be interrupted or compromised if we experience difficulties arising from outsourcing relationships.

If we do not maintain an effective outsourcing strategy or third-party providers do not perform as contracted, we may experience operational difficulties, increased costs and a loss of business that could have a material adverse effect on our results of operations. If there is a delay in our third-party providers' introduction of our new products or if our third-party providers are unable to service our customers appropriately, we may experience a loss of business that could have a material adverse effect on our results of operations. In addition, our reliance on third-party service providers that we do not control does not relieve us of our responsibilities and requirements. Any failure or negligence by such third-party service providers in carrying out their

contractual duties may result in us becoming subjected to liability to parties who are harmed and ensuing litigation. Any litigation relating to such matters could be costly, expensive and time-consuming, and the outcome of any such litigation may be uncertain. Moreover, any adverse publicity arising from such litigation, even if the litigation is not successful, could adversely affect our reputation and sales of our products.

See section titled "Outsourcing" in Item 1. Business for functions we outsource to third-party service providers.

If we are unable to attract and retain national marketing organizations and independent agents, sales of our products may be reduced.

Within our F&G operating segment, we must attract and retain our network of IMOs and independent agents to sell our products. Insurance companies compete vigorously for productive agents. We compete with other life insurance companies for marketers and agents primarily on the basis of our financial position, support services, compensation and product features. Such marketers and agents may promote products offered by other life insurance companies that offer a larger variety of products than we do. If we are unable to attract and retain a sufficient number of marketers and agents to sell our products, our ability to compete and our revenues would suffer.

Failure of our enterprise-wide risk management processes could result in unexpected monetary losses, damage to our reputation, additional costs or impairment of our ability to conduct business effectively.

As a large insurance entity and a publicly traded company, we have always had risk management functions, policies and procedures throughout our operations and management. These functions include but are not limited to departments dedicated to enterprise risk management and information technology risk management, information security, business continuity, lender strategy and development, and vendor risk management. These policies and procedures have evolved over the years as we continually reassess our processes both internally and to comply with changes in the regulatory environment. Due to limitations inherent in any internal process, if our risk management processes prove unsuccessful at identifying and responding to risks, we could incur unexpected monetary losses, damage to our reputation, additional costs or impairment of our ability to conduct business effectively.

If we experience changes in the rate or severity of title insurance claims, it may be necessary for us to record additional charges to our claim loss reserve. This may result in lower net earnings and the potential for earnings volatility.

By their nature, claims are often complex, vary greatly in dollar amounts and are affected by economic and market conditions and the legal environment existing at the time of settlement of the claims. Estimating future title loss payments is difficult because of the complex nature of title claims, the long periods of time over which claims are paid, significantly varying dollar amounts of individual claims and other factors. From time to time, we experience large losses or an overall worsening of our loss payment experience in regard to the frequency or severity of claims that require us to record additional charges to our claims loss reserve. There are currently pending several large claims, which we believe can be defended successfully without material loss payments. However, if unanticipated material payments are required to settle these claims, it could result in or contribute to additional charges to our claim loss reserves. These loss events are unpredictable and adversely affect our earnings.

At each quarter end, our recorded reserve for claim losses is initially the result of taking the prior recorded reserve for claim losses, adding the current provision to that balance and subtracting actual paid claims from that balance, resulting in an amount that management then compares to our actuary's central estimate provided in the actuarial calculation. Due to the uncertainty and judgment used by both management and our actuary, our ultimate liability may be greater or less than our current reserves and/or our actuary's calculation. If the recorded amount is within a reasonable range of the actuary's central estimate, but not at the central estimate, management assesses other factors in order to determine our best estimate. These factors, which are both qualitative and quantitative, can change from period to period and include items such as current trends in the real estate industry (which management can assess, but for which there is a time lag in the development of the data used by our actuary), any adjustments from the actuarial estimates needed for the effects of unusually large or small claims, improvements in our claims management processes, and other cost saving measures. Depending upon our assessment of these factors, we may or may not adjust the recorded reserve. If the recorded amount is not within a reasonable range of the actuary's central estimate, we would record a charge or credit and reassess the provision rate on a go forward basis.

If the rating agencies downgrade our insurance companies, our results of operations and competitive position in the title insurance industry may suffer.

Ratings have always been an important factor in establishing the competitive position of insurance companies. Our title insurance subsidiaries are rated by S&P, Moody's, and Demotech. Our F&G insurance subsidiaries are rated by A.M. Best, Fitch, Moody's, and S&P. Ratings reflect the opinion of a rating agency with regard to an insurance company's or insurance holding company's financial strength, operating performance and ability to meet its obligations to policyholders and are not evaluations directed to investors. Our ratings are subject to continued periodic review by rating agencies and the continued

retention of those ratings cannot be assured. If our ratings are reduced from their current levels by those entities, our results of operations could be adversely affected.

If our claim loss prevention procedures fail, we could incur significant claim losses.

In the ordinary course of our title insurance business, we assume risks related to insuring clear title to residential and commercial properties. We have established procedures to mitigate the risk of loss from title claims, including extensive underwriting and risk assessment procedures. We also mitigate the risk of large claim losses by reinsuring risks with other insurers under excess of loss and case-by-case (“facultative”) reinsurance agreements. Reinsurance agreements generally provide that the reinsurer is liable for loss and loss adjustment expense payments exceeding the amount retained by the ceding company. However, the ceding company remains primarily liable to the insured whether or not the reinsurer is able to meet its contractual obligations. If inherent limitations cause our claim loss risk mitigation procedures to fail, we could incur substantial losses having an adverse effect on our results of operations or financial condition.

Our use of independent agents for a significant amount of our title insurance policies could adversely impact the frequency and severity of title claims.

In our agency operations, an independent agent performs the search and examination function or the agent may purchase a search product from us. In either case, the agent is responsible for ensuring that the search and examination is completed. The agent thus retains the majority of the title premium collected, with the balance remitted to the title underwriter for bearing the risk of loss in the event that a claim is made under the title insurance policy. Our relationship with each agent is governed by an agency agreement defining how the agent issues a title insurance policy on our behalf. The agency agreement also sets forth the agent’s liability to us for policy losses attributable to the agent’s errors. For each agent with whom we enter into an agency agreement, financial and loss experience records are maintained. Periodic audits of our agents are also conducted and the number of agents with whom we transact business is strategically managed in an effort to reduce future expenses and manage risks. Despite efforts to monitor the independent agents with which we transact business, there is no guarantee that an agent will comply with their contractual obligations to us. Furthermore, we cannot be certain that, due to changes in the regulatory environment and litigation trends, we will not be held liable for errors and omissions by agents. Accordingly, our use of independent agents could adversely impact the frequency and severity of title claims.

Risk Factors Relating to the Geographic Concentrations of our Business Segments

Because we are dependent upon California and Texas for approximately 14.6% and 13.0% and of our title insurance premiums, respectively, our Title segment may be adversely affected by regulatory conditions in California and/or Texas.

California and Texas are the two largest sources of revenue for our Title segment. In 2021, California-based premiums accounted for approximately 30.0% of premiums earned by our direct operations and 1.0% of our agency premium revenues, while Texas-based premiums accounted for 17.4% of premiums earned by our direct operations and 9.2% of our agency premium revenues. In the aggregate, California and Texas accounted for approximately 14.6% and 13.0%, respectively, of our total title insurance premiums for 2021. A significant part of our revenues and profitability are therefore subject to our operations in California and Texas and to the prevailing regulatory conditions in these states. Adverse regulatory developments in California and Texas, which could include reductions in the maximum rates permitted to be charged, inadequate rate increases or more fundamental changes in the design or implementation of the California and Texas title insurance regulatory framework, could have a material adverse effect on our results of operations and financial condition.

Concentration in certain states for the distribution of our life insurance and annuity products in our F&G segment may subject us to losses attributable to economic downturns or catastrophes in those states.

Our top five states for the distribution of our life insurance and annuity products in our F&G segment are California, Florida, Texas, New Jersey and Ohio. Any adverse economic developments or catastrophes in these states could have an adverse impact on our F&G segment.

Risk Factors Relating to Government Regulation of the Insurance Industry

Our subsidiaries must comply with extensive regulations. These regulations may increase our costs or impede or impose burdensome conditions on actions that we might seek to take to increase the revenues of those subsidiaries.

Our insurance businesses are subject to extensive regulation by state insurance authorities in each state in which they operate. These agencies have broad administrative and supervisory power relating to the following, among other matters:

- licensing requirements;
- trade and marketing practices;
- accounting and financing practices;
- disclosure requirements on key terms of mortgage loans;
- capital and surplus requirements;
- the amount of dividends and other payments made by insurance subsidiaries;
- investment practices;
- rate schedules;
- deposits of securities for the benefit of policyholders;
- establishing reserves; and
- regulation of reinsurance.

Most states also regulate insurance holding companies like us with respect to acquisitions, changes of control and the terms of transactions with our affiliates. State regulations may impede or impose burdensome conditions on our ability to increase or maintain rate levels or on other actions that we may want to take to enhance our operating results. In addition, we may incur significant costs in the course of complying with regulatory requirements. Further, various state legislatures have in the past considered offering a public alternative to the title industry in their states, as a means to increase state government revenues. Although we think this situation is unlikely, if one or more such takeovers were to occur they could adversely affect our business. We cannot be assured that future legislative or regulatory changes will not adversely affect our business operations. See “Item 1. *Business* — Regulation” for further discussion of the current regulatory environment.

Our ServiceLink subsidiary provides mortgage transaction services including title-related services and facilitation of production and management of mortgage loans. Certain of these businesses are subject to federal and state regulatory oversight. For example, ServiceLink’s LoanCare business services and subservices mortgage loans secured primarily by residential real estate throughout the United States. LoanCare is subject to extensive federal, state and local regulatory oversight, including federal and state regulatory examinations, information gathering requests, inquiries, and investigations by governmental and regulatory agencies, including the CFPB. In connection with formal and informal inquiries by those agencies, LoanCare receives numerous requests, subpoenas, and orders for documents, testimony and information in connection with various aspects of its or its clients’ regulated activities.

LoanCare is also required to maintain a variety of licenses, both federal and state. License requirements are in a frequent state of renewal and reexamination as regulations change or are reinterpreted. In addition, federal and state statutes establish specific guidelines and procedures that debt collectors must follow when collecting consumer accounts. LoanCare’s failure to comply with any of these laws, should the states take an opposing interpretation, could have an adverse effect on LoanCare in the event and to the extent that they apply to some or all of its servicing activities.

State regulation of the rates we charge for title insurance could adversely affect our results of operations.

Our insurance subsidiaries are subject to extensive rate regulation by the applicable state agencies in the jurisdictions in which they operate. Title insurance rates are regulated differently in various states, with some states requiring the subsidiaries to file and receive approval of rates before such rates become effective and some states promulgating the rates that can be charged. In general, premium rates are determined on the basis of historical data for claim frequency and severity as well as related production costs and other expenses. In all states in which our title subsidiaries operate, our rates must not be excessive, inadequate or unfairly discriminatory. Premium rates are likely to prove insufficient when ultimate claims and expenses exceed historically projected levels. Premium rate inadequacy may not become evident quickly and may take time to correct, and could adversely affect our business operating results and financial conditions.

Our F&G business is highly regulated and subject to numerous legal restrictions and regulations.

State insurance regulators, the NAIC and federal regulators continually reexamine existing laws and regulations and may impose changes in the future. New interpretations of existing laws and the passage of new legislation may harm our ability to sell new policies, increase our claims exposure on policies we issued previously and adversely affect our profitability and financial strength. We are also subject to the risk that compliance with any particular regulator’s interpretation of a legal or accounting issue may not result in compliance with another regulator’s interpretation of the same issue, particularly when compliance is judged in hindsight. Regulators and other authorities have the power to bring administrative or judicial

proceedings against us, which could result in, among other things, suspension or revocation of our licenses, cease and desist orders, fines, civil penalties, criminal penalties or other disciplinary action, which could materially harm our results of operations and financial condition.

We cannot predict what form any future changes in these or other areas of regulation affecting the insurance industry might take or what effect, if any, such proposals might have on us if enacted into law. In addition, because our activities are relatively concentrated in a small number of lines of business, any change in law or regulation affecting one of those lines of business could have a disproportionate impact on us as compared to other more diversified insurance companies. See section titled “Regulation” in Item 1. Business for further discussion of the impact of regulations on our business.

State Regulation

Our business is subject to government regulation in each of the states in which we conduct business and is concerned primarily with the protection of policyholders and other customers rather than shareholders. Such regulation is vested in state agencies having broad administrative and discretionary authority, which may include, among other things, premium rates and increases thereto, underwriting practices, reserve requirements, marketing practices, advertising, privacy, policy forms, reinsurance reserve requirements, acquisitions, mergers and capital adequacy. At any given time, we and our insurance subsidiaries may be the subject of a number of ongoing financial or market conduct, audits or inquiries. From time to time, regulators raise issues during such examinations or audits that could have a material impact on our business.

We have received inquiries from a number of state regulatory authorities regarding our use of the U.S. Social Security Administration’s Death Master File (“Death Master File”) and compliance with state claims practices regulations and unclaimed property or escheatment laws. We have established procedures to periodically compare our in-force life insurance and annuity policies against the Death Master File or similar databases; investigate any identified potential matches to confirm the death of the insured; determine whether benefits are due; and attempt to locate the beneficiaries of any benefits due or, if no beneficiary can be located, escheat the benefit to the state as unclaimed property. We believe we have established sufficient reserves with respect to these matters; however, it is possible that third parties could dispute these amounts and additional payments or additional unreported claims or liabilities could be identified which could be significant and could have a material adverse effect on our results of operations.

Under insurance guaranty fund laws in most states, insurance companies doing business therein can be assessed up to prescribed limits for policyholder losses incurred by insolvent companies. We cannot predict the amount or timing of any such future assessments and therefore the liability we have established for these potential assessments may not be adequate. In addition, regulators may change their interpretation or application of existing laws and regulations such as the case with broadening the scope of carriers that must contribute towards Long Term Care insolvencies.

NAIC

Although our business is subject to regulation in each state in which we conduct business, in many instances the state regulatory models emanate from the NAIC. Some of the NAIC pronouncements, particularly as they affect accounting issues, take effect automatically in the various states without affirmative action by the states. Statutes, regulations and interpretations may be applied with retroactive impact, particularly in areas such as accounting and reserve requirements. The NAIC continues to work to reform state regulation in various areas, including comprehensive reforms relating to cyber security regulations, best interest standards, RBC and life insurance reserves.

Our insurance subsidiaries are subject to minimum capitalization requirements based on RBC formulas for life insurance companies that establish capital requirements relating to insurance, business, asset, interest rate and certain other risks. Changes to statutory reserve or risk-based capital requirements may increase the amount of reserves or capital our insurance companies are required to hold and may impact our ability to pay dividends. In addition, changes in statutory reserve or risk-based capital requirements may adversely impact our financial strength ratings. Changes currently under consideration include adding an operational risk component, factors for asset credit risk, and group wide capital calculations.

“Fiduciary” Rule Proposals

The DOL investment advice rule leaves in place PTE 84-24 which is a longstanding class exemption providing prohibited transaction relief for insurance agents selling annuity products provided certain disclosures are made to the plan fiduciary, which is the policyholder in the case of an IRA, and certain other conditions are met. Among other things, these disclosures include the agent’s relationship to the insurer and commissions received in connection with the annuity sale. F&G, along with FGL NY Insurance, designed and launched a compliance program in January 2022 requiring all agents selling IRA products to submit an acknowledgment with each IRA application indicating the agent has satisfied PTE 84-24 requirements on a precautionary basis in case the agent acted or is found to have acted as a fiduciary. Meanwhile the DOL has publicly announced its intention to consider future rulemaking that would revoke or modify PTE 84-24.

Management believes these current and emerging developments relating to market conduct standards for the financial services industry may over time materially affect the way in which our agents do business, the role of IMOs, sale of IRA products including IRA-to-IRA and employer plan rollovers, how the company supervises its distribution force, compensation practices, and liability exposure and costs. In addition to implementing the compliance procedures described above, management is monitoring further developments closely and will be working with IMOs and distributors to adapt to these evolving regulatory requirements and risks.

Bermuda and Cayman Islands Regulation

Our business is subject to regulation in Bermuda and the Cayman Islands, including the BMA and the CIMA. These regulations may limit or curtail our activities, including activities that might be profitable, and changes to existing regulations may affect our ability to continue to offer our existing products and services, or new products and services we may wish to offer in the future.

Our reinsurance subsidiary, F&G Life Re, is registered in Bermuda under the Bermuda Insurance Act and subject to the rules and regulations promulgated thereunder. The BMA has sought regulatory equivalency, which enables Bermuda's commercial insurers to transact business with the EU on a "level playing field." In connection with its initial efforts to achieve equivalency under the European Union's Directive (2009/138/EC) ("Solvency II"), the BMA implemented and imposed additional requirements on the companies it regulates. The European Commission in 2016 granted Bermuda's commercial insurers full equivalence in all areas of Solvency II for an indefinite period of time.

Our reinsurance subsidiary, F&G Cayman Re, is licensed in the Cayman Islands by the CIMA and is subject to supervision by CIMA and CIMA may at any time direct F&G Cayman Re, in relation to a policy, a line of business or the entire business, to cease or refrain from committing an act or pursuing a course of conduct and to perform such acts as in the opinion of CIMA are necessary to remedy or ameliorate the situation.

Regulatory investigations of the insurance industry may lead to fines, settlements, new regulation or legal uncertainty, which could negatively affect our results of operations.

From time to time we receive inquiries and requests for information from state insurance departments, attorneys general and other regulatory agencies about various matters relating to our business. Sometimes these take the form of civil investigative demands or subpoenas. We cooperate with all such inquiries and we have responded to or are currently responding to inquiries from multiple governmental agencies. Also, regulators and courts have been dealing with issues arising from foreclosures and related processes and documentation. Various governmental entities are studying the insurance product, market, pricing, and business practices, and potential regulatory and legislative changes, which may materially affect our business and operations. From time to time, we are assessed fines for violations of regulations or other matters or enter into settlements with such authorities, which may require us to pay fines or claims or take other actions.

Risk Factors Relating to the Credit Risk of our Counterparties

We are subject to the credit risk of our counterparties, including companies with whom we have reinsurance agreements or we have purchased call options.

Our F&G insurance subsidiaries cede material amounts of insurance and transfer related assets and certain liabilities to other insurance companies through reinsurance. Accordingly, we bear credit risk with respect to our reinsurers. The failure, insolvency, inability or unwillingness of any reinsurer to pay under the terms of reinsurance agreements with us could materially adversely affect our business, financial condition and results of operations. We regularly monitor the credit rating and performance of our reinsurance parties. Wilton Re represents our largest reinsurance counterparty exposure. We also utilize funds withheld reinsurance counterparty risk. Under funds withheld arrangements, F&G retains possession and legal title to assets backing ceded liabilities.

Our F&G insurance subsidiaries are also exposed to credit loss in the event of non-performance by our counterparties on call options. We seek to reduce the risk associated with such agreements by purchasing such options from large, well-established financial institutions, and by holding collateral. There can be no assurance we will not suffer losses in the event of counterparty non-performance.

If financial institutions at which we hold escrow funds fail, it could have a material adverse impact on our company.

We hold customers' assets in escrow at various financial institutions, pending completion of real estate transactions. These assets are maintained in segregated bank accounts and have not been included in the accompanying Consolidated Balance Sheets. We have a contingent liability relating to proper disposition of these balances for our customers, which amounted to \$30.5 billion at December 31, 2021. Failure of one or more of these financial institutions may lead us to become liable for the funds owed to third parties and there is no guarantee that we would recover the funds deposited, whether through Federal Deposit Insurance Corporation coverage or otherwise.

Risk Factors Relating to Market Conditions

If economic and credit market conditions deteriorate, it could have a material adverse impact on our investment portfolio.

Our investment portfolio is exposed to economic and financial market risks, including changes in interest rates, credit markets and prices of marketable equity and fixed-income securities. Our investment policy in our title business is designed to maximize total return through investment income and capital appreciation consistent with moderate risk of principal, while providing adequate liquidity and complying with internal and regulatory guidelines. To achieve this objective, our marketable debt investments are primarily investment grade, liquid, fixed-income securities and money market instruments denominated in U.S. dollars. We make investments in certain equity securities and preferred stock in order to take advantage of perceived value and for strategic purposes. Economic and credit market conditions may adversely affect the ability of some issuers of investment securities to repay their obligations and affect the values of investment securities. If the carrying value of our investments exceeds the fair value, and the decline in fair value is deemed to be other-than-temporary, we will be required to write down the value of our investments, which could have a material negative impact on our results of operations and financial condition.

Fixed maturities, equity securities and derivatives represent the majority of total cash and invested assets reported at fair value on our balance sheets. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). Fair value estimates are made based on available market information and judgments about the financial instrument at a specific point in time. Expectations that our investments will continue to perform in accordance with their contractual terms are based on evidence gathered through our normal credit surveillance process and on assumptions a market participant would use in determining the current fair value.

The value and performance of certain of our assets are dependent upon the performance of collateral underlying these investments. It is possible the collateral will not meet performance expectations leading to adverse changes in the cash flows on our holdings of these types of securities.

Equity market volatility could negatively impact our business.

The estimated cost of providing GMWB associated with our annuity products incorporates various assumptions about the overall performance of equity markets over certain time periods. Periods of significant and sustained downturns in equity markets or increased equity volatility could result in an increase in the valuation of the future policy benefit or policyholder account balance liabilities associated with such products, resulting in a reduction in our revenues and net earnings (loss). The rate of amortization of DAC, DSI, and VOBA relating to FIA products could also increase if equity market performance is worse than assumed and have a materially adverse impact on our results of operations and financial condition.

Our investments are subject to market and credit risks. These risks could be heightened during periods of extreme volatility or disruption in financial and credit markets.

Our invested assets and derivative financial instruments are subject to risks of credit defaults and changes in market values. Periods of extreme volatility or disruption in the financial and credit markets could increase these risks. Changes in interest rates and credit spreads could cause market price and cash flow variability in the fixed income instruments in our investment portfolio. Significant volatility and lack of liquidity in the credit markets could cause issuers of the fixed-income securities we own to default on either principal or interest payments. Additionally, market price valuations may not accurately reflect the underlying expected cash flows of securities within our investment portfolio. Finally, market volatility could cause investment income fluctuations in regards to our alternative investments that may differ significantly from period to period.

The value of our mortgage-backed securities and our commercial and residential mortgage loan investments depends in part on the financial condition of the borrowers and tenants for the properties underlying those investments, as well as general and specific economic trends affecting the overall default rate. We are also subject to the risk that cash flows resulting from the payments on pools of mortgages that serve as collateral underlying the mortgage-backed securities we own may differ from our expectations in timing or size. Any event reducing the estimated fair value of these securities, other than on a temporary basis, could have an adverse effect on our business, results of operations and financial condition.

If adverse changes in the levels of real estate activity occur, our revenues may decline.

Title insurance revenue is closely related to the level of real estate activity that includes sales, mortgage financing and mortgage refinancing. The levels of real estate activity are primarily affected by the average price of real estate sales, the availability of funds to finance purchases and mortgage interest rates.

We have found that residential real estate activity generally decreases in the following situations:

- when mortgage interest rates are high or increasing;
- when the mortgage funding supply is limited;
- when housing inventory is limited or home prices are high or increasing; and

- when the United States economy is weak, including high unemployment levels.

Declines in the level of real estate activity or the average price of real estate sales are likely to adversely affect our title insurance revenues. The Mortgage Bankers Association's ("MBA") Mortgage Finance Forecast as of January 21, 2022 calculates an approximately \$4.0 trillion mortgage origination market for 2021, which would be a decrease from 2020 resulting primarily from decreased refinance activity. The MBA predicts overall mortgage originations in 2022 and 2023 will also decrease when compared to 2021 as a result of decreases in refinance activity. Our revenues in future periods will continue to be subject to these and other factors that are beyond our control and, as a result, are likely to fluctuate. See discussion under 'Business Trends and Conditions' within *Management's Discussion and Analysis of Financial Condition and Results of Operations* included in Item 7 of Part II of this Annual Report for further discussion of current market trends.

Interest rate fluctuations could adversely affect our business, financial condition, liquidity, results of operations and cash flows.

Interest rate risk is a significant market risk as our F&G business involves issuing interest rate sensitive obligations backed primarily by investments in fixed income assets. For the past several years interest rates have remained at or near historically low levels. The prolonged period of low rates exposes us to the risk of not achieving returns sufficient to meet our earnings targets and/or our contractual obligations. Furthermore, low or declining interest rates may reduce the rate of policyholder surrenders and withdrawals on our life insurance and annuity products, thus increasing the duration of the liabilities, creating asset and liability duration mismatches and increasing the risk of having to reinvest assets at yields below the amounts required to support our obligations. Lower interest rates may also result in decreased sales of certain insurance products, negatively impacting our profitability from new business.

During periods of increasing interest rates, which are expected in 2022, we may offer higher crediting rates on interest-sensitive products, such as universal life insurance and fixed annuities, and we may increase crediting rates on in-force products to keep these products competitive. We may be required to accept lower spread income (the difference between the returns we earn on our investments and the amounts we credit to contractholders) thus reducing our profitability, as returns on our portfolio of invested assets may not increase as quickly as current interest rates. Rapidly rising interest rates may also expose us to the risk of financial disintermediation, which is an increase in policy surrenders, withdrawals and requests for policy loans as customers seek to achieve higher returns elsewhere requiring us to liquidate assets in an unrealized loss position. If we experience unexpected withdrawal activity, we could exhaust our liquid assets and be forced to liquidate other less liquid assets such as limited partnership investments. We may have difficulty selling these investments in a timely manner and/or be forced to sell them for less than we otherwise would have been able to realize, which could have a material adverse effect on our business, financial condition and results of operations. We have developed and maintain ALM programs and procedures designed to mitigate interest rate risk by matching asset cash flows to expected liability cash flows. In addition, we assess surrender charges on withdrawals in excess of allowable penalty-free amounts that occur during the surrender charge period. There can be no assurance actual withdrawals, contract benefits, and maturities will match our estimates. Despite our efforts to reduce the impact of rising interest rates, we may be required to sell assets to raise the cash necessary to respond to an increase in surrenders, withdrawals and loans, thereby realizing capital losses on the assets sold.

We may experience spread income compression, and a loss of anticipated earnings, if credited interest rates are increased on renewing contracts in an effort to decrease or manage withdrawal activity. Our expectation for future spread income is an important component in amortization of DAC, DSI, and VOBA under U.S. GAAP. Significant reductions in spread income may cause us to accelerate DAC, DSI, and VOBA amortization. In addition, certain statutory capital and reserve requirements are based on formulas or models that consider interest rates and a prolonged period of low interest rates may increase the statutory capital we are required to hold as well as the amount of assets we must maintain to support statutory reserves.

The Setting Every Community Up for Retirement Enhancement Act of 2019 may impact our business and the markets in which we compete.

The Setting Every Community Up for Retirement Enhancement Act of 2019, Pub.L. 116-94 (the "SECURE Act"), was signed into law on December 20, 2019 as part of the Further Consolidated Appropriations Act and went into effect in certain respects as early as January 1, 2020. The SECURE Act contains provisions that may impact our F&G insurance subsidiaries, including elimination of the "stretch IRA" (funds from inherited IRAs must now be fully withdrawn by beneficiaries within 10 years of the account owner's death and, as a result, IRAs may be less desirable to our customers, and our administrative system for handling distributions from IRAs invested in our annuity products may need to be updated to reflect the shortened distribution period for IRA beneficiaries); elimination of age limit for making traditional IRA contributions; raising of the age for required minimum distributions from IRAs from 70½ to 72 (particularly impacting our administrative system for handling distributions from IRAs invested in our annuity products); expansion of 401K plan eligibility for part-time workers; creation of new employer protections for offering annuities, including a fiduciary safe harbor for employer retirement plan sponsors that wish to add in-plan annuity products (particularly impacting how we and our competitors may now sell annuity products to employers or provide certifications necessary to meet the SECURE Act fiduciary safe harbor requirements); and lowering of

barriers for offering multiple employer plans. The SECURE Act changes may also affect, to some extent, the length of time that IRA assets remain in our annuity products. While we cannot predict whether, or to what extent, the SECURE Act will ultimately impact us, the SECURE Act may have implications for our business operations and the markets in which we compete. See section titled “F&G - Regulation” in Item 1. Business.

Risk Factors Related to a National Crisis, Global Crisis, Climate Change and Other Catastrophic Events

Our business could be materially and adversely affected by the occurrence of a catastrophe, including natural or man-made disasters.

Any catastrophic event, such as pandemic diseases, terrorist attacks, floods, severe storms or hurricanes or computer cyber-terrorism, could have a material and adverse effect on our business in several respects:

- the outbreak of a pandemic disease, like the novel coronavirus COVID-19, could have a material adverse effect on our liquidity, financial condition and the operating results of our insurance business due to its impact on the economy and financial markets;
- the occurrence of any pandemic disease, natural disaster, terrorist attack or any other catastrophic event that results in our workforce being unable to be physically located at one of our facilities could result in lengthy interruptions in our service; or
- we could experience long-term interruptions in our service and the services provided by our significant vendors due to the effects of catastrophic events, including but not limited to government mandates to self-quarantine, work remotely and prolonged travel restrictions. Some of our operational systems are not fully redundant, and our disaster recovery and business continuity planning cannot account for all eventualities. Additionally, unanticipated problems with our disaster recovery systems could further impede our ability to conduct business, particularly if those problems affect our computer-based data processing, transmission, storage and retrieval systems and destroy valuable data;
- we manage our financial exposure for losses in our title insurance business and in our F&G segment with third-party reinsurance. Catastrophic events could adversely affect the cost and availability of that reinsurance;
- the value of our investment portfolio may decrease if the securities in which we invest are negatively impacted by climate change, pandemic diseases, severe weather conditions and other catastrophic events.

For example, in the second and third quarters of 2020 we experienced decreases in commercial volumes and commercial fee-per-file as a result of the outbreak of COVID-19. We also experienced a decrease in the number of opened residential purchase orders and increased volatility in our investment portfolio early in the pandemic.

General Risk Factors

Failure of our information security systems or processes could result in a loss or disclosure of confidential information, damage to our reputation, monetary losses, additional costs and impairment of our ability to conduct business effectively.

Our operations are highly dependent upon the effective operation of our computer systems. We use our computer systems to receive, process, store and transmit sensitive personal consumer data (such as names and addresses, social security numbers, driver's license numbers, credit cards and bank account information) and important business information of our customers. We also electronically manage substantial cash, investment assets and escrow account balances on behalf of ourselves and our customers, as well as financial information about our businesses generally. The integrity of our computer systems and the protection of the information that resides on such systems are important to our successful operation. If we fail to maintain an adequate security infrastructure, adapt to emerging security threats or follow our internal business processes with respect to security, the information or assets we hold could be compromised. Further, even if we, or third parties to which we outsource certain information technology services, maintain a reasonable, industry-standard information security infrastructure to mitigate these risks, the inherent risk that unauthorized access to information or assets remains. This risk is increased by transmittal of information over the internet and the increased threat and sophistication of cyber criminals. While, to date, we believe that we have not experienced a material breach of our computer systems, the occurrence or scope of such events is not always apparent. Examples of security threats which represent significant inherent risk with little to no warning are the SolarWinds supply chain compromise from 2020 and the Apache Software Foundation Log4j vulnerability in its product disclosed in December of 2021. With SolarWinds, we took all appropriate steps to evaluate any impact and we do not believe we were impacted by this incident. Similar supply chain incidents or breaches could occur to us directly or indirectly through our vendors with little or no warning. With Log 4j, we took all appropriate steps to mitigate exposure to our systems. We know that certain applications in our environment did utilize the affected versions of Log4j. Although we believe we identified and remediated the known Log4j vulnerabilities with no indication of compromise, the risk of additional vulnerabilities and potential attacks related to this issue

may continue for several months given the complexity and widespread nature of the situation. We are also working closely with our supply chain partners to ensure they are addressing these vulnerabilities. If additional information regarding an event previously considered immaterial is discovered, or a new event were to occur, it could potentially have a material adverse effect on our operations or financial condition. In addition, some laws and certain of our contracts require notification of various parties, including regulators, consumers or customers, in the event that confidential or personal information has or may have been taken or accessed by unauthorized parties. Such notifications can potentially result, among other things, in adverse publicity, diversion of management and other resources, the attention of regulatory authorities, the imposition of fines, and disruptions in business operations, the effects of which may be material. Any inability to prevent security or privacy breaches, or the perception that such breaches may occur, could inhibit our ability to retain or attract new clients and/or result in financial losses, litigation, increased costs, negative publicity, or other adverse consequences to our business.

Further, our financial institution clients have obligations to safeguard their information technology systems and the confidentiality of customer information. In certain of our businesses, we are bound contractually and/or by regulation to comply with the same requirements. If we fail to comply with these regulations and requirements, we could be exposed to suits for breach of contract, governmental proceedings or the imposition of fines. In addition, future adoption of more restrictive privacy laws, rules or industry security requirements by federal or state regulatory bodies or by a specific industry in which we do business could have an adverse impact on us through increased costs or restrictions on business processes.

Failure to respond to rapid changes in technology could adversely affect our results of operations or financial condition.

Rapidly evolving technologies and innovations in software and financial technology could drive changes in how real estate transactions are recorded and processed throughout the mortgage life cycle. There is no guarantee that we will be able to effectively adapt to and utilize changing technology. Existing or new competitors may be able to utilize or create technology more effectively than us, which could result in the loss of market share.

We are the subject of various legal proceedings that could have a material adverse effect on our results of operations.

We are involved from time to time in various legal proceedings, including in some cases class-action lawsuits and regulatory inquiries, investigations or other proceedings. If we are unsuccessful in our defense of litigation matters or regulatory proceedings, we may be forced to pay damages, fines or penalties and/or change our business practices, any of which could have a material adverse effect on our business and results of operations. See Note H *Commitments and Contingencies* to our Consolidated Financial Statements included in Item 8 of Part II of this Annual Report for further discussion of pending litigation and regulatory matters and our related accrual.

Our F&G insurance subsidiaries operate in a highly competitive industry, which could limit our ability to gain or maintain our position in the industry and could materially adversely affect our business, financial condition and results of operations.

Our F&G insurance subsidiaries operate in a highly competitive industry and encounter significant competition in all of our product lines from other insurance companies, many of which have greater financial resources and higher financial strength ratings than us and that may have a greater market share, offer a broader range of products, services or features, assume a greater level of risk, have lower operating or financing costs, or have different profitability expectations than us. Competition could result in, among other things, lower sales or higher lapses of existing products.

Our annuity products compete with fixed indexed, fixed rate and variable annuities sold by other insurance companies and also with mutual fund products, traditional bank investments and other retirement funding alternatives offered by asset managers, banks and broker-dealers. The ability of banks and broker dealers to increase their securities-related business or to affiliate with insurance companies may materially and adversely affect sales of all of our products by substantially increasing the number and financial strength of potential competitors. Our insurance products compete with those of other insurance companies, financial intermediaries and other institutions based on a number of factors, including premium rates, policy terms and conditions, service provided to distribution channels and policyholders, ratings by rating agencies, reputation and commission structures.

Our ability to compete is dependent upon, among other things, our ability to develop competitive and profitable products, our ability to maintain low unit costs, and our maintenance of adequate financial strength ratings from rating agencies. Our ability to compete is also dependent upon, among other things, our ability to attract and retain distribution channels to market our products, the competition for which is vigorous.

The loss of key personnel could negatively affect our financial results and impair our operating abilities.

Our success substantially depends on our ability to attract and retain key members of our senior management team and officers. If we lose one or more of these key employees, our operating results and in turn the value of our common stock could be materially adversely affected. Although we have employment agreements with many of our officers, there can be no assurance that the entire term of the employment agreement will be served or that the employment agreement will be renewed upon expiration.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Our corporate headquarters are in Jacksonville, Florida in owned facilities. Our F&G headquarters are in Des Moines, Iowa in leased facilities.

The majority of our branch offices are leased from third parties. See Note Q *Leases* to our Consolidated Financial Statements included in Item 8 of Part II of this Annual Report for further information on our outstanding leases. Our subsidiaries conduct their business operations primarily in leased office space in 45 states, Washington, DC, Canada, India, Bermuda and the Cayman Islands.

Item 3. Legal Proceedings

For a description of our legal proceedings see discussion of *Legal and Regulatory Contingencies* in Note H. *Commitments and Contingencies* to our Consolidated Financial Statements included in Item 8 of Part II of this Annual Report, which is incorporated by reference into this Item 3 of Part I.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common stock trades on the New York Stock Exchange under the trading symbol "FNE".

On January 31, 2022, the last reported sale price of our common stock on the New York Stock Exchange was \$50.35. We had approximately 6,187 shareholders of record on January 31, 2022.

Refer to Note U. *Employee Benefit Plans* to our Consolidated Financial Statements included in Item 8 of Part II of this Annual Report, which is incorporated by reference into this Item 5 of Part II, for further information on securities issued for employee stock compensation pursuant to our Omnibus Plan.

Information concerning securities authorized for issuance under our equity compensation plans will be included in Item 12 of Part III of this Annual Report.

Performance Graph

Set forth below is a graph comparing cumulative total shareholder return on our FNF common stock against the cumulative total return on the S&P 500 Index and against the cumulative total return of a peer group index consisting of certain companies in the primary industry in which we compete (SIC code 6361 — Title Insurance) for the period ending December 31, 2021. This peer group consists of the following companies: First American Financial Corporation and Stewart Information Services Corp. The peer group comparison has been weighted based on their stock market capitalization. The graph assumes an initial investment of \$100.00 on December 31, 2016, with dividends reinvested over the periods indicated.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN*

Among Fidelity National Financial, Inc., the S&P 500 Index, and a Peer Group

*\$100 invested on 12/31/16 in stock or index, including reinvestment of dividends. Fiscal year ending December 31.

	12/31/2016	12/31/2017	12/31/2018	12/31/2019	12/31/2020	12/31/2021
Fidelity National Financial, Inc.	100.00	165.16	136.68	203.31	182.62	252.0
S&P 500	100.00	121.83	116.49	153.17	181.35	233.4
Peer Group	100.00	144.51	122.40	158.10	150.91	239.1

Dividends

On February 16, 2022, our Board of Directors formally declared a \$0.44 per FNF share cash dividend that is payable on March 31, 2022 to FNF shareholders of record as of March 17, 2022. During the years ended December 31, 2021 and 2020, we declared dividend on our common stock of \$1.56 and \$1.35, respectively.

Our current dividend policy anticipates the payment of quarterly dividends in the future. The declaration and payment of dividends will be at the discretion of our Board of Directors and will be dependent upon our future earnings, financial condition and capital requirements.

Purchases of Equity Securities by the Issuer

On July 17, 2018, our Board of Directors approved a three-year stock repurchase program effective August 1, 2018 (the "2018 Repurchase Program") under which we were authorized to purchase up to 25 million shares of our FNF common stock through July 31, 2021. On August 3, 2021, our Board of Directors approved a new three-year stock repurchase program effective August 3, 2021 (the "2021 Repurchase Program") under which we may purchase up to 25 million shares of our FNF common stock through July 31, 2024. We may make repurchases from time to time in the open market, in block purchases or in privately negotiated transactions, depending on market conditions and other factors. The 2021 Repurchase Program replaces the 2018 Repurchase Program.

During the quarter ended December 31, 2021, we repurchased a total of 2,055,000 FNF common shares for an aggregate amount of \$104 million or an average of \$50.70 per share. Subsequent to December 31, 2021 and through market close on February 23, 2022, we repurchased a total of 250,000 shares for \$13 million, or an average of \$52.60 under the 2021 Repurchase Program. Since the original commencement of the 2021 Repurchase Program, we repurchased a total of 3,230,000 FNF common shares for an aggregate amount of \$161 million, or an average of \$49.90 per share.

The following table summarizes repurchases of equity securities by FNF during the quarter ended December 31, 2021:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs (2)
10/1/2021 - 10/31/2021	105,000	45.69	105,000	23,970,000
11/1/2021 - 11/30/2021	850,000	51.10	850,000	23,120,000
12/1/2021 - 12/31/2021	1,100,000	50.87	1,100,000	22,020,000
Total	2,055,000	\$ 50.70	2,055,000	

(1) On August 3, 2021 our Board of Directors approved the 2021 Repurchase Program, effective August 3, 2021, under which we may purchase up to 25 million shares of our FNF common stock through July 31, 2024. The 2021 Repurchase Program replaces the 2018 Repurchase Program.

(2) As of the last day of the applicable month.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with the Consolidated Financial Statements and the Notes thereto and Selected Financial Data included elsewhere in this Annual Report.

Overview

For a description of our business, including descriptions of segments, see the discussion under Business in Item 1 of Part I of this Annual Report, which is incorporated by reference into this Item 7 of Part II of this Annual Report.

Business Trends and Conditions*Title*

Our Title segment revenue is closely related to the level of real estate activity that includes sales, mortgage financing and mortgage refinancing. Declines in the level of real estate activity or the average price of real estate sales will adversely affect our title insurance revenues.

We have found that residential real estate activity is generally dependent on the following factors:

- mortgage interest rates;
- mortgage funding supply;
- housing inventory and home prices;
- supply and demand for commercial real estate; and
- the strength of the United States economy, including employment levels.

While we cannot predict the severity and duration of the impacts related to COVID-19, the most recent forecast of the MBA, as of January 21, 2022, estimated (actual for fiscal year 2020) the size of the U.S. residential mortgage originations market as shown in the following table for 2020 - 2024 in its "Mortgage Finance Forecast" (in trillions):

	2024	2023	2022	2021	2020
Purchase transactions	\$ 1.8	\$ 1.8	\$ 1.7	\$ 1.7	\$ 1.5
Refinance transactions	\$ 0.7	\$ 0.7	\$ 0.9	\$ 2.3	\$ 2.6
Total U.S. mortgage originations forecast	\$ 2.5	\$ 2.5	\$ 2.6	\$ 4.0	\$ 4.1

As of January 21, 2022, the MBA expects residential purchase transactions to steadily increase through 2023 before leveling out in 2024. Additionally, the MBA expects residential refinance transactions to steadily decrease in 2022 and 2023 before leveling out in 2024 as interest rates are expected to rise. The MBA expects overall mortgage originations to decrease in 2022 and thereafter.

In recent years, total originations have been reflective of a strong residential real estate market driven by increasing home prices and low mortgage interest rates. Mortgage rates rose consistently between 2016 and the beginning of 2019. Concerns over a slowing global economy and the impact of a prolonged trade war resulted in interest rate cuts in the second half of 2019, which significantly increased refinance transactions and slightly increased purchase transactions when compared to 2018. In the beginning of 2020, refinance and purchase transactions remained strong until the outbreak of COVID-19.

On March 15, 2020, the Federal Reserve took emergency action and reduced its benchmark interest rate by a full percentage point to nearly zero. Following this emergency action, average interest rates for a 30-year fixed rate mortgages fell throughout the remainder of 2020, bottoming out at 2.65% on January 7, 2021. The outbreak of COVID-19 resulted in significant uncertainty in the economic outlook in the second quarter of 2020, and as a result real estate activity decreased significantly as consumers moved to the sidelines to assess the ongoing impact of COVID-19. However, real estate activity began to rebound in June 2020, with increases in purchase activity and a surge in refinance transactions as a result of historically low interest rates.

Residential purchase and refinance activity remained strong in 2021. However, with the surge in residential refinance transactions in 2020, residential refinance transactions began to slow in 2021 as the population of eligible refinance candidates declined. Interest rates on a 30-year, fixed rate mortgage averaged 3.1% in 2021, up from 2.8% in 2020. Despite the recent increase in interest rates and fluctuation in existing-home sales, the market is still outperforming pre-pandemic levels.

Other economic indicators used to measure the health of the U.S. economy, including the unemployment rate and consumer confidence, indicated that the United States was on strong footing prior to the outbreak of COVID-19. However, the impact of COVID-19 reduced the outlook related to these economic indicators in March 2020. According to the U.S. Department of Labor's Bureau of Labor, the unemployment rate was at a historically low 3.5% in February 2020 but subsequently fluctuated dramatically before reaching 6.7% in December 2020. In 2021, the unemployment rate fell to 3.9% in December of 2021. Additionally, the Conference Board's monthly Consumer Confidence Index remained at high levels through

February 2020 before falling as a result of the COVID-19 outbreak. Consumer confidence has since rebounded, reaching its peak in June 2021 before decreasing in the third quarter of 2021 due to concerns over inflation. Consumer confidence remained flat in the fourth quarter of 2021.

Because commercial real estate transactions tend to be generally driven by supply and demand for commercial space and occupancy rates in a particular area rather than by interest rate fluctuations, we believe that our commercial real estate title insurance business is less dependent on the industry cycles discussed above than our residential real estate title business. Commercial real estate transaction volume is also often linked to the availability of financing. Factors including U.S. tax reform and a shift in U.S. monetary policy have had, or are expected to have, varying effects on availability of financing in the U.S. Lower corporate and individual tax rates and corporate tax-deductibility of capital expenditures have provided increased capacity and incentive for investments in commercial real estate. In recent years prior to the COVID-19 pandemic, we experienced strong demand in commercial real estate markets. In 2020, we experienced decreases in commercial volumes and commercial fee-per-file as a result of the outbreak of COVID-19. Commercial volumes and commercial fee-per-file recovered in the second half of 2020 and remained elevated throughout 2021.

We continually monitor mortgage origination trends and believe that, based on our ability to produce industry leading operating margins through all economic cycles, we are well positioned to adjust our operations for adverse changes in real estate activity and to take advantage of increased volume when demand increases.

See Item 1A of Part I of this Annual Report for further discussion of risk factors related to COVID-19.

Seasonality. Historically, real estate transactions have produced seasonal revenue fluctuations in the real estate industry. The first calendar quarter is typically the weakest quarter in terms of revenue due to the generally low volume of home sales during January and February. The second and third calendar quarters are typically the strongest quarters in terms of revenue, primarily due to a higher volume of residential transactions in the spring and summer months. The fourth quarter is typically strong due to the desire of commercial entities to complete transactions by year-end. Seasonality in 2020 and 2021 deviated from historical patterns due to COVID-19. We have noted short-term fluctuations through recent years in resale and refinance transactions as a result of changes in interest rates.

Geographic Operations. Our direct title operations are divided into approximately 180 profit centers. Each profit center processes title insurance transactions within its geographical area, which is usually identified by a county, a group of counties forming a region, or a state, depending on the management structure in that part of the country. We also transact title insurance business through a network of approximately 5,400 agents, primarily in those areas in which agents are the more prevalent title insurance provider. Substantially all of our revenues are generated in the United States.

The following table sets forth the approximate dollar and percentage volumes of our title insurance premium revenue by state:

	Year Ended December 31,					
	2021		2020		2019	
	Amount	%	Amount	%	Amount	%
	(Dollars in millions)					
California	\$ 1,251	14.6 %	\$ 958	15.2 %	\$ 764	14.3 %
Texas	1,112	13.0 %	778	12.3	734	13.8
Florida	799	9.3	540	8.6	492	9.2
Pennsylvania	439	5.1	303	4.8	252	4.7
Illinois	436	5.1	312	5.0	273	5.1
All others	4,516	52.9	3,407	54.1	2,827	52.9
Totals	\$ 8,553	100.0 %	\$ 6,298	100.0 %	\$ 5,342	100.0 %

F&G

The following factors represent some of the key trends and uncertainties that have influenced the development of our F&G segment and its historical financial performance, and we believe these key trends and uncertainties will continue to influence the business and financial performance of our F&G segment in the future.

COVID-19 Pandemic

While still evolving, the COVID-19 pandemic has already caused significant economic and financial turmoil in the U.S. and around the world. At this time, it is still not possible to estimate the longer term-effects the COVID-19 pandemic could have on our F&G segment or our consolidated financial statements. Increased economic uncertainty and increased unemployment that could potentially result from the spread of COVID-19 and its variants may result in F&G policyholders seeking sources of liquidity and withdrawing at rates greater than was previously expected. Additionally, adverse events or conditions resulting from COVID-19 could also have a negative effect on its sales of new policies and could result in more volatility from the impact of mortality experience. As of December 31, 2021, F&G's investment portfolio has recovered from earlier volatility and F&G has not seen a sustained elevated level of adverse policyholder experience from the impact of COVID-19 on the overall business. The full extent to which the COVID-19 pandemic impacts our F&G segment's financial condition, results of operations, liquidity or prospects will depend on future developments which cannot be predicted at this time.

Market Conditions

Market volatility has affected, and may continue to affect, our business and financial performance in varying ways. Volatility can pressure sales and reduce demand as consumers hesitate to make financial decisions. To enhance the attractiveness and profitability of our products and services, we continually monitor the behavior of our customers, as evidenced by annuitization rates and lapse rates, which vary in response to changes in market conditions. See Item 1A of Part I of this Annual Report for further discussion of risk factors that could affect market conditions.

Interest Rate Environment

Some of our F&G products include guaranteed minimum crediting rates, most notably our fixed rate annuities. As of December 31, 2021, our reserves, net of reinsurance, and average crediting rate on our fixed rate annuities were \$5.0 billion and 3%, respectively. We are required to pay the guaranteed minimum crediting rates even if earnings on our investment portfolio decline, which would negatively impact earnings. In addition, we expect more policyholders to hold policies with comparatively high guaranteed rates for a longer period in a low interest rate environment. Conversely, a rise in average yield on our investment portfolio would increase earnings if the average interest rate we pay on our products does not rise correspondingly. Similarly, we expect that policyholders would be less likely to hold policies with existing guarantees as interest rates rise and the relative value of other new business offerings are increased, which would negatively impact our earnings and cash flows.

See "Item 7A. Quantitative and Qualitative Disclosure about Market Risk" for a more detailed discussion of interest rate risk.

Aging of the U.S. Population

We believe that the aging of the U.S. population will increase the demand for our FIA and IUL products. As the "baby boomer" generation prepares for retirement, we believe that demand for retirement savings, growth, and income products will grow. Over 10,000 people will turn 65 each day in the United States over the next 15 years, and according to the U.S. Census Bureau, the proportion of the U.S. population over the age of 65 is expected to grow from 17% in 2021 to 21% in 2035. The impact of this growth may be offset to some extent by asset outflows as an increasing percentage of the population begins withdrawing assets to convert their savings into income.

Industry Factors and Trends Affecting Our Results of Operations

We operate in the sector of the insurance industry that focuses on the needs of middle-income Americans. The underserved middle-income market represents a major growth opportunity for us. As a tool for addressing the unmet need for retirement planning, we believe that many middle-income Americans have grown to appreciate the financial certainty that we believe annuities such as our FIA products afford. Accordingly, the FIA market grew from nearly \$12 billion of sales in 2002 to \$58 billion of sales in 2020. Additionally, this market demand has positively impacted the IUL market as it has expanded from \$100 million of annual premiums in 2002 to \$3 billion of annual premiums in 2020.

Critical Accounting Policies and Estimates

The accounting estimates described below are those we consider critical in preparing our Consolidated Financial Statements. Management is required to make estimates and assumptions that can affect the reported amounts of assets and liabilities and disclosures with respect to contingent assets and liabilities at the date of the Consolidated Financial Statements and the reported amounts of revenues and expenses during the reporting period. Actual amounts could differ from those estimates. See Note A *Business and Summary of Significant Accounting Policies* to our Consolidated Financial Statements included in Item 8 of Part II of this Annual Report for additional description of the significant accounting policies that have been followed in preparing our Consolidated Financial Statements.

Reserve for Title Claim Losses

Title companies issue two types of policies, owner's and lender's policies, since both the new owner and the lender in real estate transactions want to know that their interest in the property is insured against certain title defects outlined in the policy. An owner's policy insures the buyer against such defects for as long as he or she owns the property (as well as against warranty claims arising out of the sale of the property by such owner). A lender's policy insures the priority of the lender's security interest over the claims that other parties may have in the property. The maximum amount of liability under a title insurance policy is generally the face amount of the policy plus the cost of defending the insured's title against an adverse claim; however, occasionally we do incur losses in excess of policy limits. While most non-title forms of insurance, including property and casualty, provide for the assumption of risk of loss arising out of unforeseen future events, title insurance serves to protect the policyholder from risk of loss for events that predate the issuance of the policy.

Unlike many other forms of insurance, title insurance requires only a one-time premium for continuous coverage until another policy is warranted due to changes in property circumstances arising from refinance, resale, additional liens, or other events. Unless we issue the subsequent policy, we receive no notice that our exposure under our policy has ended and, as a result, we are unable to track the actual terminations of our exposures.

Our reserve for title claim losses includes reserves for known claims as well as for losses that have been incurred but not yet reported to us ("IBNR"), net of recoupments. We reserve for each known claim based on our review of the estimated amount of the claim and the costs required to settle the claim. Reserves for IBNR claims are estimates that are established at the time the premium revenue is recognized and are based upon historical experience and other factors, including industry trends, claim loss history, legal environment, geographic considerations, and the types of policies written. We also reserve for losses arising from closing and disbursement functions due to fraud or operational error.

The table below summarizes our reserves for known claims and incurred but not reported claims related to title insurance:

	December 31, 2021		December 31, 2020	
	(in millions)	%	(in millions)	%
Known claims	\$ 337	17.9 %	\$ 226	13.9 %
IBNR	1,546	82.1	1,397	86.1
Total Reserve for Title Claim Losses	\$ 1,883	100.0 %	\$ 1,623	100.0 %

Although claims against title insurance policies can be reported relatively soon after the policy has been issued, claims may be reported many years later. Historically, approximately 60% of claims are paid within approximately five years of the policy being written. By their nature, claims are often complex, vary greatly in dollar amounts and are affected by economic and market conditions, as well as the legal environment existing at the time of settlement of the claims. Estimating future title loss payments is difficult because of the complex nature of title claims, the long periods of time over which claims are paid, significantly varying dollar amounts of individual claims and other factors.

Our process for recording our reserves for title claim losses begins with analysis of our loss provision rate. We forecast ultimate losses for each policy year based upon historical policy year loss emergence and development patterns and adjust these to reflect policy year and policy type differences that affect the timing, frequency and severity of claims. We also use a technique that relies on historical loss emergence and on a premium-based exposure measurement. The latter technique is particularly applicable to the most recent policy years, which have few reported claims relative to an expected ultimate claim volume. After considering historical claim losses, reporting patterns and current market information, and analyzing quantitative and qualitative data provided by our legal, claims and underwriting departments, we determine a loss provision rate, which is recorded as a percentage of current title premiums. This loss provision rate is set to provide for losses on current year policies, but due to development of prior years and our long claim duration, it periodically includes amounts of estimated adverse or positive development on prior years' policies. Any significant adjustments to strengthen or release loss reserves resulting from the comparison with our actuarial analysis are made in addition to this loss provision rate. At each quarter end, our recorded reserve for claim losses is initially the result of taking the prior recorded reserve for claim losses, adding the current provision

and subtracting actual paid claims, resulting in an amount that management then compares to the range of reasonable estimates provided by the actuarial calculation.

We recorded our loss provision rate at 4.5% for the years ended December 31, 2021, 2020 and 2019. Of such annual loss provision rates, 4.5%, for each of the years ended December 31, 2021, 2020 and 2019, respectively, related to losses on policies written in the current year, and the remainder, if any related to developments on prior year policies. The provision rate in 2021, 2020, and 2019 is supported by stability in payments for prior policy years, and qualitative factors that would indicate consistency, including consistency in lender underwriting standards, extension of credit to quality borrowers, a high proportion of refinance activity, better claims expense management, better mechanic's lien underwriting practices, and better fraud awareness by lenders, title insurers and settlement agents.

Due to the uncertainty inherent in the process and due to the judgment used by both management and our actuary, our ultimate liability may be greater or less than our carried reserves. If the recorded amount is within the actuarial range but not at the central estimate, we assess the position within the actuarial range by analysis of other factors in order to determine that the recorded amount is our best estimate. These factors, which are both qualitative and quantitative, can change from period to period, and include items such as current trends in the real estate industry (which we can assess, but for which there is a time lag in the development of the data), any adjustments from the actuarial estimates needed for the effects of unusually large or small claims, improvements in our claims management processes, and other cost saving measures. If the recorded amount is not within a reasonable range of our actuary's central estimate, we may have to record a charge or credit and reassess the loss provision rate on a go forward basis. We will continue to reassess the provision to be recorded in future periods consistent with this methodology.

The table below presents our title insurance loss development experience for the past three years:

	2021	2020	2019
	(In millions)		
Beginning balance	\$ 1,623	\$ 1,509	\$ 1,488
Change in reinsurance recoverable	94	34	1
Claims loss provision related to:			
Current year	385	283	240
Prior years	—	—	—
Total title claim loss provision	385	283	240
Claims paid, net of recoupments related to:			
Current year	(14)	(11)	(11)
Prior years	(205)	(192)	(209)
Total title claims paid, net of recoupments	(219)	(203)	(220)
Ending balance of claim loss reserve for title insurance	\$ 1,883	\$ 1,623	\$ 1,509
Title premiums	\$ 8,553	\$ 6,298	\$ 5,342

	2021	2020	2019
Provision for title insurance claim losses as a percentage of title insurance premiums:			
Current year	4.5 %	4.5 %	4.5 %
Prior years	—	—	—
Total provision	4.5 %	4.5 %	4.5 %

Actual claims payments consist of loss payments and claims management expenses offset by recoupments and were as follows (in millions):

	Loss Payments	Claims Management Expenses	Recoupments	Net Loss Payments
Year ended December 31, 2021	\$ 171	\$ 124	\$ (76)	\$ 219
Year ended December 31, 2020	120	122	(39)	203
Year ended December 31, 2019	139	112	(31)	220

As of December 31, 2021 and 2020, our recorded reserves were \$1,883 million and \$1,623 million, respectively, which we determined were reasonable and represented our best estimate and these recorded amounts were within a reasonable range of the central estimates provided by our actuaries. Our recorded reserves were \$59 million above the mid-point of the provided range of \$1.5 billion to \$2.0 billion of our actuarial estimates as of December 31, 2021. Our recorded reserves were \$62 million above the mid-point of the provided range of our actuarial estimates of \$1.4 billion to \$1.8 billion as of December 31, 2020.

During 2021, 2020, and 2019, payment patterns were consistent with our actuaries' and management's expectations. Also, compared to prior years we have seen a leveling off of the ultimate loss ratios in more mature policy years, particularly 2006-2009. While we still see claims opened on these policy years, the proportion of our claims inventory represented by these policy years has continued to decrease. Additionally, we continued to see positive development relating to the 2010 through 2021 policy years, which we believe is indicative of more stringent underwriting standards by us and the lending industry. Further, we have seen significant positive development in residential owner's policies due to increased payments on residential lender's policies, which inherently limit the potential loss on the related owner's policy to the differential in coverage amount between the amount insured under the owner's policy and the amount paid under the residential lender's policy. Also, any residential lender's policy claim paid relating to a property that is in foreclosure negates any potential loss under an owner's policy previously issued on the property as the owner has no equity in the property. Our ending open claim inventory decreased from approximately 10,700 claims at December 31, 2020 to approximately 9,600 claims at December 31, 2021. If actual claims loss development varies from what is currently expected and is not offset by other factors, it is possible that our recorded reserves may fall outside a reasonable range of our actuaries' central estimate, which may require additional reserve adjustments in future periods.

An approximate \$86 million increase (decrease) in our annualized provision for title claim losses would occur if our loss provision rate were 1% higher (lower), based on 2021 title premiums of \$8,553 million. A 10% increase (decrease) in our reserve for title claim losses, as of December 31, 2021, would result in an increase (decrease) in our provision for title claim losses of approximately \$188 million.

Reserves for Future Policy Benefits and Product Guarantees

The determination of future policy benefit reserves is dependent on actuarial assumptions. The principal assumptions used to establish liabilities for future policy benefits are based on our experience. These assumptions are established at issue of the contract and include mortality, morbidity, contract full and partial surrenders, investment returns, annuitization rates and expenses. The assumptions used require considerable judgment. We review overall policyholder experience at least annually and update these assumptions when deemed necessary based on additional information that becomes available. For traditional life and immediate annuity products, assumptions used in the reserve calculation can only be changed if the reserve is deemed to be insufficient. For all other insurance products, changes in assumptions will be used to calculate reserves. These changes in assumptions will also incorporate changes in risk free rates and option market values. Changes in, or deviations from, the assumptions previously used can significantly affect our reserve levels and related results of operations.

Mortality is the incidence of death amongst policyholders triggering the payment of underlying insurance coverage by the insurer. In addition, mortality also refers to the ceasing of payments on life-contingent annuities due to the death of the annuitant. We utilize a combination of actual and industry experience when setting our mortality assumptions.

A surrender rate is the percentage of account value surrendered by the policyholder. A lapse rate is the percentage of account value canceled by us due to nonpayment of premiums. We make estimates of expected full and partial surrenders of our fixed annuity products. Our surrender rate experience in the twelve months ended December 31, 2021 and the seven month period ended December 31, 2020 on the fixed annuity products averaged 7% and 4%, respectively, which is within our assumed ranges. Management's best estimate of surrender behavior incorporates actual experience over the entire period, as we believe that, over the duration of the policies, we will experience the full range of policyholder behavior and market conditions. If actual surrender rates are significantly different from those assumed, such differences could have a significant effect on our reserve levels and related results of operations.

The assumptions used to establish the liabilities for our product guarantees require considerable judgment and are established as management's best estimate of future outcomes. We periodically review these assumptions and, if necessary, update them based on additional information that becomes available. Changes in or deviations from the assumptions used can significantly affect our reserve levels and related results of operations.

At issue, and at each subsequent valuation, we determine the present value of the cost of the Guaranteed Minimum Withdrawal Benefit ("GMWB") rider benefits and certain Guaranteed Minimum Death Benefit ("GMDB") riders in excess of benefits that are funded by the account value. We also calculate the present value of total expected policy assessments, including investment margins, if applicable. We accumulate a reserve equal to the portion of these assessments that would be required to fund the future benefits less benefits paid to date. In making these projections, a number of assumptions are made and we update these assumptions as experience emerges, and determined necessary. We began issuing our GMWB products in 2008, and future experience could lead to significant changes in our assumptions. If emerging experience deviates from our

assumptions on GMWB utilizations, such deviations could have a significant effect on our reserve levels and related results of operations.

Our aggregate reserves for contractholder funds, future policy benefits and product guarantees on a direct and net basis as of December 31, 2021 are summarized as follows:

(Dollars in millions)	Direct	Reinsurance Recoverable	Net
Fixed indexed annuities	\$ 23,370	\$ —	\$ 23,370
Fixed rate annuities	6,369	(1,689)	4,680
Immediate annuities	3,657	(133)	3,524
Universal life	1,981	(983)	998
Traditional life	1,823	(805)	1,018
Funding agreement backed notes ("FABN")	1,904	—	1,904
Pension risk transfer ("PRT")	1,153	—	1,153
Total	<u>\$ 40,257</u>	<u>\$ (3,610)</u>	<u>\$ 36,647</u>

Fixed indexed annuities ("FIA") and indexed universal life ("IUL") products contain an embedded derivative; a feature that permits the holder to elect an interest rate return or an equity-index linked component, where interest credited to the contract is linked to the performance of various equity indices. The FIA/ IUL embedded derivatives are valued at fair value and included in the liability for contractholder funds in our Consolidated Balance Sheets with changes in fair value included as a component of Benefits and other changes in policy reserves in our Consolidated Statements of Earnings.

Valuation of Fixed Maturity, Preferred and Equity Securities, and Derivatives and Reinsurance Recoverable.

Our fixed maturity securities have been designated as available-for-sale and are carried at fair value, net of allowance for expected credit losses, with unrealized gains and losses included in accumulated other comprehensive income (loss) ("AOCI"), net of associated adjustments for deferred acquisition costs ("DAC"), value of business acquired ("VOBA"), deferred sales inducements ("DSI"), unearned revenue ("UREV"), SOP 03-1 reserves, and deferred income taxes. Our equity securities are carried at fair value with unrealized gains and losses included in net income (loss). Realized gains and losses on the sale of investments are determined on the basis of the cost of the specific investments sold and are credited or charged to income on a trade date basis.

Management's assessment of all available data when determining fair value of the AFS securities is necessary to appropriately apply fair value accounting. Management utilizes information from independent pricing services, who take into account perceived market movements and sector news, as well as a security's terms and conditions, including any features specific to that issue that may influence risk and marketability. Depending on the security, the priority of the use of observable market inputs may change as some observable market inputs may not be relevant or additional inputs may be necessary. We generally obtain one value from our primary external pricing service. In situations where a price is not available from the independent pricing service, we may obtain broker quotes or prices from additional parties recognized to be market participants. We believe the broker quotes are prices at which trades could be executed based on historical trades executed at broker-quoted or slightly higher prices. When quoted prices in active markets are not available, the determination of estimated fair value is based on market standard valuation methodologies, including discounted cash flows, matrix pricing, or other similar techniques.

We validate external valuations at least quarterly through a combination of procedures that include the evaluation of methodologies used by the pricing services, comparisons to valuations from other independent pricing services, analytical reviews and performance analysis of the prices against trends, and maintenance of a securities watch list. See Note D *Fair Value of Financial Instruments* and Note E *Investments* to our Consolidated Financial Statements included in Item 8 of Part II of this Annual Report.

The fair value of derivative assets and liabilities is based upon valuation pricing models and represents what we would expect to receive or pay at the balance sheet date if we canceled the options, entered into offsetting positions, or exercised the options. Fair values for these instruments are determined internally using a conventional model and market observable inputs, including interest rates, yield curve volatilities and other factors. Credit risk related to the counterparty is considered when estimating the fair values of these derivatives. However, we are largely protected by collateral arrangements with counterparties when individual counterparty exposures exceed certain thresholds. The fair value of futures contracts at the balance sheet date represents the cumulative unsettled variation margin (open trade equity net of cash settlements). The fair values of the embedded derivatives in our FIA and IUL contracts are derived using market value of options, use of current and budgeted option cost, swap rates, mortality rates, surrender rates, partial withdrawals, and non-performance spread and are classified as Level 3. The discount rate used to determine the fair value of our FIA/ IUL embedded derivative liabilities includes an adjustment to reflect the risk that these obligations will not be fulfilled ("non-performance risk"). For the period ended December 31, 2021, our non-performance risk adjustment was based on the expected loss due to default in debt obligations for

similarly rated financial companies. See Note D *Fair Value of Financial Instruments* and Note F *Derivative Financial Instruments* to our Consolidated Financial Statements included in Item 8 of Part II of this Annual Report.

As discussed in Note O *Reinsurance* of our Consolidated Financial Statements included in Item 8 of Part II of this Report, F&G entered into a reinsurance agreement with Kubera Insurance (SAC) Ltd. ("Kubera") effective December 31, 2018, to cede certain multi-year guaranteed annuities ("MYGA") and deferred annuity GAAP and statutory reserves on a coinsurance funds withheld basis, net of applicable existing reinsurance. Effective October 31, 2021, this agreement was novated from Kubera to Somerset. Additionally, F&G entered into a reinsurance agreement with Aspida Re effective January 1, 2021, to cede a quota share of certain deferred annuity business on a funds withheld basis. Fair value movements in the funds withheld balances associated with these arrangements create an obligation for F&G to pay Somerset and Aspida Re at a later date, which results in embedded derivatives. These embedded derivatives are considered total return swaps with contractual returns that are attributable to the assets and liabilities associated with the reinsurance arrangements. The fair value of the total return swaps are based on the change in fair value of the underlying assets held in the funds withheld portfolio. Investment results for the assets that support the coinsurance with funds withheld reinsurance arrangement, including gains and losses from sales, are passed directly to the reinsurer pursuant to contractual terms of the reinsurance arrangement. The reinsurance related embedded derivatives are reported in Accounts payable and accrued liabilities on the Consolidated Balance Sheets and the related gains or losses are reported in Recognized gains and losses, net on the Consolidated Statements of Earnings.

We categorize our fixed maturity securities, preferred securities, equity securities and derivatives into a three-level hierarchy based on the priority of the inputs to the valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument. The following table presents the fair value of fixed maturity securities and equity securities by pricing source and hierarchy level as of December 31, 2021 and 2020.

As of December 31, 2021					
(Dollars in millions)	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total	
Fixed maturity securities available-for-sale and equity securities:					
Prices via third party pricing services	\$ 1,892	\$ 26,389	\$ 920	\$	29,201
Prices via independent broker quotations	—	—	4,538		4,538
Prices via other methods	—	—	66		66
Total	\$ 1,892	\$ 26,389	\$ 5,524	\$	33,805
% of Total	6 %	78 %	16 %		100 %

As of December 31, 2020					
(Dollars in millions)	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total	
Fixed maturity securities available-for-sale and equity securities:					
Prices via third party pricing services	\$ 1,823	\$ 24,883	\$ 1,167	\$	27,873
Prices via independent broker quotations	—	—	2,095		2,095
Prices via other methods	—	—	5		5
Total	\$ 1,823	\$ 24,883	\$ 3,267	\$	29,973
% of Total	6 %	83 %	11 %		100 %

Goodwill

We have made acquisitions that have resulted in a significant amount of goodwill. As of December 31, 2021 and 2020, goodwill was \$4,539 million and \$4,495 million, respectively. The majority of our goodwill as of December 31, 2021 relates to goodwill recorded in connection with the Chicago Title merger in 2000, our acquisition of ServiceLink in 2014 and our acquisition of F&G in 2020. Refer to Note N *Goodwill* to our Consolidated Financial Statements included in Item 8 of Part II of this Annual Report for a summary of recent changes in our Goodwill balance.

In evaluating the recoverability of goodwill, we perform a qualitative analysis at the reporting unit level to determine whether it is more likely than not that the fair value of our recorded goodwill exceeds its carrying value. Based on the results of this analysis, an annual goodwill impairment test may be completed based on an analysis of the discounted future cash flows generated by the underlying assets. The process of determining whether or not goodwill is impaired or recoverable relies on projections of future cash flows, operating results and market conditions. Future cash flow estimates are based partly on projections of market conditions such as the volume and mix of refinance and purchase transactions and interest rates, which are beyond our control and are likely to fluctuate. While we believe that our estimates of future cash flows are reasonable, these estimates are not guarantees of future performance and are subject to risks and uncertainties that may cause actual results to differ from what is assumed in our impairment tests. Such analyses are particularly sensitive to changes in estimates of future cash flows and discount rates. Changes to these estimates might result in material changes in fair value and determination of the recoverability of goodwill, which may result in charges against earnings and a reduction in the carrying value of our goodwill in the future. We completed annual goodwill impairment analyses in the fourth quarter of each period presented using a September 30 measurement date. For the years ended December 31, 2021, 2020 and 2019, we determined there were no events or circumstances that indicated that the carrying value exceeded the fair value.

VOBA, DAC and DSI

Our intangible assets include an intangible asset reflecting the value of insurance and reinsurance contracts acquired (VOBA), DAC, and DSI.

VOBA is an intangible asset that reflects the amount recorded as insurance contract liabilities less the estimated fair value of in-force contracts (“VIF”) in a life insurance company acquisition. It represents the portion of the purchase price that is allocated to the value of the rights to receive future cash flows from the business in force at the acquisition date. VOBA is a function of the VIF, current GAAP reserves, GAAP assets, and deferred tax liability. The VIF is determined by the present value of statutory distributable earnings less opening required capital, and is sensitive to assumptions including the discount rate, surrender rates, partial withdrawals, utilization rates, projected investment spreads, mortality, and expenses.

DAC consists principally of commissions. Additionally, acquisition costs that are incremental, direct costs of successful contract acquisition are capitalized as DAC. Indirect or unsuccessful acquisition costs, maintenance, product development and overhead expenses are charged to expense as incurred. DSI consists of contract enhancements such as premium and interest bonuses credited to policyholder account balances.

DAC, DSI, and VOBA are subject to loss recognition testing on a quarterly basis or when an event occurs that may warrant loss recognition.

For annuity and IUL products, DAC, DSI and VOBA are generally being amortized in proportion to estimated gross profits from net investment spread margins, surrender charges and other product fees, policy benefits, maintenance expenses, mortality, and recognized gains and losses on investments. Current and future period gross profits for FIA contracts also include the impact of amounts recorded for the change in fair value of derivatives and the change in fair value of embedded derivatives. At each valuation date, the most recent quarter’s estimated gross profits are updated with actual gross profits and the assumptions underlying future estimated gross profits are evaluated for continued reasonableness. If the update of assumptions causes estimated gross profits to increase, DAC, DSI and VOBA amortization will decrease, resulting in lower amortization expense in the period. The opposite result occurs when the assumption update causes estimated gross profits to decrease. Current period amortization is adjusted retrospectively through an unlocking process when estimates of current or future gross profits (including the impact of recognized investment gains and losses) to be realized from a group of products are revised. Our estimates of future gross profits are based on actuarial assumptions related to the underlying policies’ terms, lives of the policies, duration of contract, yield on investments supporting the liabilities, cost to fund policy obligations, and level of expenses necessary to maintain the policies over their entire lives.

Changes in assumptions can have a significant impact on DAC, DSI and VOBA, amortization rates and results of operations. Assumptions are management’s best estimate of future outcomes, and require considerable judgment. We periodically review assumptions against actual experience, and update our assumptions based on historical results and our best estimates of future experience when additional information becomes available.

Estimated future gross profits are sensitive to changes in interest rates, which are the most significant component of gross profits. Assumptions related to interest rate spreads and credit losses also impact estimated gross profits for products with credited rates. These assumptions are based on the current investment portfolio yields and credit quality, estimated future crediting rates, capital markets, and estimates of future interest rates and defaults. Significant assumptions also include policyholder behavior assumptions, such as surrender, lapse, and annuitization rates. We use a combination of actual and industry experience when setting and updating our policyholder behavior assumptions.

We perform sensitivity analyses to assess the impact that certain assumptions have on DAC, DSI, VOBA. The following table presents the estimated instantaneous net impact to income before income taxes of various assumption changes on our

DAC, DSI, and VOBA. The effects, increase or (decrease), presented are not representative of the aggregate impacts that could result if a combination of such changes to interest rates and other assumptions occurred.

(Dollars in millions)	As of December 31, 2021	
A change to the long-term interest rate assumption of -50 basis points	\$	(91)
A change to the long-term interest rate assumption of +50 basis points		75
An assumed 10% increase in surrender rate		(4)

Assumptions regarding shifts in market factors may be overly simplistic and not indicative of actual market behavior in stress scenarios.

Lower assumed interest rates or higher assumed annuity surrender rates tend to decrease the balances of DAC, DSI and VOBA, thus decreasing income before income taxes. Higher assumed interest rates or lower assumed annuity surrender rates tend to increase the balances of DAC, DSI and VOBA, thus increasing income before income taxes.

Accounting for Income Taxes

As part of the process of preparing the consolidated financial statements, we are required to determine income taxes in each of the jurisdictions in which we operate. This process involves estimating actual current tax expense together with assessing temporary differences resulting from differing recognition of items for income tax and accounting purposes. These differences result in deferred income tax assets and liabilities, which are included within the Consolidated Balance Sheets. We must then assess the likelihood that deferred income tax assets will be recovered from future taxable income and, to the extent we believe that recovery is not likely, establish a valuation allowance. To the extent we establish a valuation allowance or increase this allowance in a period, we must reflect this increase as expense within Income tax expense in the Consolidated Statement of Earnings. Determination of income tax expense requires estimates and can involve complex issues that may require an extended period to resolve. Further, the estimated level of annual pre-tax income can cause the overall effective income tax rate to vary from period to period. We believe that our tax positions comply with applicable tax law and that we adequately provide for any known tax contingencies. We believe the estimates and assumptions used to support our evaluation of tax benefit realization are reasonable. Final determination of prior-year tax liabilities, either by settlement with tax authorities or expiration of statutes of limitations, could be materially different than estimates reflected in assets and liabilities and historical income tax provisions. The outcome of these final determinations could have a material effect on our income tax provision, net income or cash flows in the period that determination is made.

Refer to Note T *Income Taxes* to our Consolidated Financial Statements in Item 8 of Part II of this Annual Report for details.

Results of Operations

Consolidated Results of Operations

Net Earnings. The following table presents certain financial data for the years indicated:

	Year Ended December 31,		
	2021	2020	2019
	(In millions)		
Revenues:			
Direct title insurance premiums	\$ 3,571	\$ 2,699	\$ 2,381
Agency title insurance premiums	4,982	3,599	2,961
Escrow, title-related and other fees	4,795	3,092	2,584
Interest and investment income	1,961	900	225
Recognized gains and losses, net	334	488	318
Total revenues	15,643	10,778	8,469
Expenses:			
Personnel costs	3,528	2,951	2,696
Agent commissions	3,821	2,749	2,258
Other operating expenses	1,929	1,759	1,681
Benefits and other changes in policy reserves	2,138	866	—
Depreciation and amortization	645	296	178
Provision for title claim losses	385	283	240
Interest expense	114	90	47
Total expenses	12,560	8,994	7,100
Earnings before income taxes and equity in earnings of unconsolidated affiliates	3,083	1,784	1,369
Income tax expense	713	322	308
Equity in earnings of unconsolidated affiliates	64	15	15
Net earnings from continuing operations	\$ 2,434	\$ 1,477	\$ 1,076

Revenues.

Total revenues increased by \$4,865 million in 2021 compared to 2020, primarily attributable to increases in both direct and agency premiums, increases in escrow title-related and other fees and increases in interest and investment income, partially offset by a decrease in recognized gains on our investment holdings. Total revenue in 2020 increased \$2,309 million compared to 2019, primarily attributable to increases in both direct and agency premiums, increases in escrow title-related and other fees and increases in interest and investment income and recognized gains on our investment holdings.

See Note L *Revenue Recognition* to our Consolidated Financial Statements included in Item 8 of Part II of this Annual Report for a breakout of our consolidated revenues.

Total net earnings from continuing operations increased by \$957 million in 2021 compared to 2020, and increased by \$401 million in 2020 compared to 2019.

The change in revenue and net earnings from our reportable segments is discussed in further detail at the segment level below.

Interest and investment income levels are primarily a function of securities markets, interest rates and the amount of cash available for investment. Interest and investment income was \$1,961 million, \$900 million, and \$225 million for the years ended December 31, 2021, 2020, and 2019, respectively. The increase in 2021 as compared to 2020 is primarily attributable to a full year of activity in our F&G segment. The increase in 2020 as compared to 2019 is primarily attributable to the addition of our F&G segment, partially offset by decreased interest income from lower average balances and of cash and cash equivalents and short term investments, and lower investment yields as a result of declining interest rates year-over-year.

Recognized gains and losses, net totaled \$334 million, \$488 million, and \$318 million for the years ended December 31, 2021, 2020, and 2019, respectively. Recognized gains and losses, net for the year ended December 31, 2021 are primarily attributable to realized gains on derivatives of \$655 million, gains on sales of fixed maturity securities of \$114 million and gains on sales of mortgages and other assets of \$13 million, partially offset by losses on sales of equity and preferred securities of \$19 million and non-cash net valuation losses on equity and preferred securities of \$429 million. Recognized gains and losses, net for the year ended December 31, 2020 are primarily attributable to non-cash valuation gains on equity and preferred security holdings of \$208 million, realized gains on derivatives of \$192 million, gains on sales of fixed maturity, preferred and equity securities of \$148 million, losses on other assets of \$25 million and losses on mortgage loans of \$32 million. Recognized gains and losses, net for the year ended December 31, 2019 are primarily attributable to non-cash valuation gains on equity and preferred security holdings of \$316 million, non-cash valuation gains on other long-term investments of \$11 million, gains on sales of equity securities of \$10 million, partially offset by impairments of lease assets of \$8 million, net realized losses of \$5 million on sales and maturities of fixed maturity investment securities, and \$7 million of other net realized losses.

See Note E *Investments* to our Consolidated Financial Statements included in Item 8 of Part II of this Annual Report for a breakout of our consolidated interest and investment income and realized gains and losses.

Expenses.

Our operating expenses consist primarily of Personnel costs; Other operating expenses, which in our Title segment are incurred as orders are received and processed; Agent commissions, which are incurred as title agency revenue is recognized; and Benefits and other changes in policy reserves, which in our F&G segment are charged to earnings in the period they are earned by the policyholder based on their selected strategy. For traditional life and immediate annuities, policy benefit claims are charged to expense in the period that the claims are incurred, net of reinsurance recoveries. Title insurance premiums, escrow and title-related fees are generally recognized as income at the time the underlying transaction closes or other service is provided. Direct title operations revenue often lags approximately 45-60 days behind expenses and therefore gross margins may fluctuate. The changes in the market environment, mix of business between direct and agency operations and the contributions from our various business units have historically impacted margins and net earnings. We have implemented programs and have taken necessary actions to maintain expense levels consistent with revenue streams. However, a short-term lag exists in reducing controllable fixed costs and certain fixed costs are incurred regardless of revenue levels.

Personnel costs include base salaries, commissions, benefits, stock-based compensation and bonuses paid to employees, and are one of our most significant operating expenses.

Agent commissions represent the portion of premiums retained by our third-party agents pursuant to the terms of their respective agency contracts.

Benefit expenses for deferred annuity, FIA and IUL policies include index credits and interest credited to contractholder account balances and benefit claims in excess of contract account balances, net of reinsurance recoveries. Other changes in policy reserves include the change in the fair value of the FIA embedded derivative and the change in the reserve for secondary guarantee benefit payments. Other changes in policy reserves also include the change in reserves for life insurance products.

Other operating expenses consist primarily of facilities expenses, title plant maintenance, premium taxes (which insurance underwriters are required to pay on title premiums in lieu of franchise and other state taxes), appraisal fees and other cost of sales on ServiceLink product offerings and other title-related products, postage and courier services, computer services, professional services, travel expenses, general insurance and bad debt expense on our trade and notes receivable.

The Provision for title claim losses includes an estimate of anticipated title and title-related claims, and escrow losses.

The change in expenses attributable to our reportable segments is discussed in further detail at the segment level below.

Income tax expense was \$713 million, \$322 million, and \$308 million for the years ended December 31, 2021, 2020, and 2019 respectively. Income tax expense as a percentage of earnings before income taxes was 23.1%, 18.0%, and 22.5% in the years ended December 31, 2021, 2020, and 2019 respectively. The increase in income tax expense as a percentage of earnings before taxes in 2021 when compared to 2020 and the decrease in income tax expense as a percentage of earnings before taxes in 2020 as compared to 2019 is primarily attributable to valuation allowance releases and the tax status change recorded by F&G in 2020.

Title

The following table presents the results of operations of our Title segment for the years indicated:

	Year Ended December 31,		
	2021	2020	2019
	(In millions)		
Revenues:			
Direct title insurance premiums	\$ 3,571	\$ 2,699	\$ 2,381
Agency title insurance premiums	4,982	3,599	2,961
Escrow, title-related and other fees	3,228	2,782	2,389
Interest and investment income	109	151	202
Recognized gains and losses, net	(393)	143	326
Total revenues	11,497	9,374	8,259
Expenses:			
Personnel costs	3,292	2,778	2,562
Agent commissions	3,821	2,749	2,258
Other operating expenses	1,725	1,536	1,509
Depreciation and amortization	138	149	154
Provision for title claim losses	385	283	240
Interest expense	—	1	—
Total expenses	9,361	7,496	6,723
Earnings from continuing operations, before income taxes and equity in earnings of unconsolidated affiliates	\$ 2,136	\$ 1,878	\$ 1,536
Orders opened by direct title operations (in thousands)	2,689	2,950	2,066
Orders closed by direct title operations (in thousands)	2,169	2,052	1,448
Fee per file by direct title operations (in dollars)	\$ 2,467	\$ 2,067	\$ 2,511

Total revenues for the Title segment increased by \$2,123 million, or 23%, in the year ended December 31, 2021 when compared to 2020. Total revenues increased by \$1,115 million or 14% in the year ended December 31, 2020 when compared to 2019. The increase in the year ended December 31, 2021 as compared to 2020 is primarily attributable to increases in both our direct and agency premiums, and increases in escrow, title-related and other fees, partially offset by a decrease in interest and investment income, and an increase in non-cash valuation losses on our equity and preferred investment holdings. The increase in the year ended December 31, 2020 as compared to 2019 is primarily attributable to increases in both our direct and agency premiums, and increases in escrow, title-related and other fees, partially offset by decreases in interest and investment income, and non-cash valuation gains on our equity and preferred investment holdings.

The following table presents the percentages of title insurance premiums generated by our direct and agency operations:

	Year Ended December 31,					
	2021		2020		2019	
	Amount	%	Amount	%	Amount	%
	(Dollars in Millions)					
Title premiums from direct operations	\$ 3,571	41.8 %	\$ 2,699	42.9 %	\$ 2,381	44.6 %
Title premiums from agency operations	4,982	58.2	3,599	57.1	2,961	55.4
Total title premiums	\$ 8,553	100.0 %	\$ 6,298	100.0 %	\$ 5,342	100.0 %

Title premiums increased by 36% in the year ended December 31, 2021 as compared to 2020. The increase is primarily attributable to an increase in Title premiums from direct operations of \$872 million, or 32%, and an increase in Title premiums from agency operations of \$1,383 million, or 38%. Title premiums increased 18% in the year ended December 31, 2020 as compared to 2019. The increase was a result of an increase in Title premiums from direct operations of \$318 million, or 13%, and an increase in Title premiums from agency operations of \$638 million, or 22%.

The following table presents the percentages of opened and closed title insurance orders generated by purchase and refinance transactions by our direct operations:

	Year Ended December 31,		
	2021	2020	2019
Opened title insurance orders from purchase transactions (1)	48.9 %	39.0 %	56.7 %
Opened title insurance orders from refinance transactions (1)	51.1	61.0	43.3
	100.0 %	100.0 %	100.0 %
Closed title insurance orders from purchase transactions (1)	44.9 %	39.8 %	57.6 %
Closed title insurance orders from refinance transactions (1)	55.1	60.2	42.4
	100.0 %	100.0 %	100.0 %

(1) Percentages exclude consideration of an immaterial number of non-purchase and non-refinance orders.

Title premiums from direct operations increased in the year ended December 31, 2021 as compared to 2020. The increase is primarily attributable to an increase in total closed order volume, driven by an increase in purchase order volume and an increase in fee per file, partially offset by a decline in refinance volume. Title premiums from direct operations increased in 2020 as compared to 2019, primarily due to an increase in total closed order volume, driven by an increase in refinance order volume, partially offset by a decline in total fee per file. The residential refinance market has considerably lower fees per closed order than commercial or residential purchase transactions.

We experienced an increase in closed title insurance order volumes from purchase transactions and a decrease in closed order volume from refinance transactions in the year ended December 31, 2021 as compared to 2020. Total closed order volumes were 2,169,000 in the year ended December 31, 2021 compared to 2,052,000 in the year ended December 31, 2020, an overall increase of 5.7%. The decrease in refinance transactions in 2021 is primarily attributable to the surge in residential refinance transactions in 2020 and the first half of 2021, resulting in a decline in the population of eligible refinance candidates in the second half of 2021. Closed order volumes were 2,052,000 in the year ended December 31, 2020 compared with 1,448,000 in the year ended December 31, 2019, an overall increase of 41.7%. The increase in refinance transactions in 2020 is primarily due to lower average interest rates when compared to 2019.

Total opened title insurance order volumes decreased in the year ended December 31, 2021, as compared to 2020. The decrease in the year ended 2021 was attributable to decreased opened title orders from refinance transactions, partially offset by an increase in purchase transactions. Total opened title insurance order volumes increased in the year ended December 31, 2020, as compared to 2019. The increase in the year ended 2020 was attributable to increased opened title orders from purchase and refinance transactions.

The average fee per file in our direct operations was \$2,467 in the year ended December 31, 2021, compared to \$2,067 in the year ended December 31, 2020. The increase in average fee per file in 2021 as compared to 2020 reflects an increased proportion of purchase transactions relative to total closed orders and a stronger commercial market compared to 2020. The fee per file tends to change as the mix of refinance and purchase transactions changes, because purchase transactions involve the issuance of both a lender's policy and an owner's policy, resulting in higher fees, whereas refinance transactions only require a lender's policy, resulting in lower fees. The average fee per file in our direct operations in the year ended December 31, 2019 was \$2,511. The decrease in average fee per file in 2020 as compared to 2019 reflects an increased proportion of refinance transactions relative to total closed orders and a weaker commercial market compared to the corresponding prior year period.

Title premiums from agency operations increased \$1,383 million, or 38%, in the year ended December 31, 2021 as compared to 2020, and increased \$638 million, or 22%, in the year ended December 31, 2020 as compared to 2019. The current trends in the agency business reflect an improving residential purchase environment in many markets throughout the country and a concerted effort by management to increase remittances with existing agents as well as cultivate new relationships with potential new agents. In addition, lower mortgage rates have resulted in a surge in refinance business with agents, which is further impacted by changes in underlying real estate activity in the geographic regions in which the independent agents operate.

Escrow, title-related and other fees increased by \$446 million, or 16%, in the year ended December 31, 2021 as compared to 2020, and increased by \$393 million, or 16%, in the year ended December 31, 2020 as compared to 2019. Escrow fees, which are more closely related to our direct operations, increased by \$225 million, or 19%, in the year ended December 31, 2021, as compared to 2020, and increased \$271 million, or 30%, in the year ended December 31, 2020 as compared to 2019. The increases in the year ended December 31, 2021 as compared to 2020 are primarily due to the increase in closed order volume. The increase in the year ended December 31, 2020 as compared to 2019 is primarily due to stronger residential refinance revenue, which has relatively higher escrow fees than residential purchase and commercial transactions. Other fees in the Title segment, excluding escrow fees, increased by \$221 million, or 14%, in the year ended December 31, 2021 as compared to 2020, and increased \$122 million, or 8%, in the year ended December 31, 2020 as compared to 2019. The increase in Other fees in the year ended December 31, 2021 as compared to 2020, and the increase in Other fees in the year ended December 31, 2020 as compared to 2019 was primarily driven by an increase in revenues related to our ServiceLink business in addition to increases in various individually immaterial items. The change in both escrow fees and other fees is directionally consistent with the change in title premiums from direct operations in 2021 and 2020.

Interest and investment income levels are primarily a function of securities markets, interest rates and the amount of cash available for investment. Interest and investment income decreased \$42 million, or 28%, in the year ended December 31, 2021, as compared to 2020, and decreased \$51 million in the year ended December 31, 2020 as compared to 2019. The decrease in the year ended December 31, 2021 as compared to 2020 was primarily attributable to decreased average fixed maturity portfolio balances, decreased dividends on preferred and common stocks and a decline in interest on cash and short-term investments. The decrease in the year ended December 31, 2020 as compared to 2019 was primarily driven by a decline in interest income related to the Company's tax-deferred property exchange business and a decline in interest on cash and short-term investments, due to a decline in short-term rates in 2020 as compared to 2019.

Recognized net losses were \$393 million in the year ended December 31, 2021. Recognized net gains were \$143 million and \$326 million in the years ended December 31, 2020 and 2019, respectively. The variability in recognized gains and losses, net is primarily attributable to fluctuations in non-cash valuation changes on our equity and preferred security holdings in addition to various other individually immaterial items.

Personnel costs include base salaries, commissions, benefits, stock-based compensation and bonuses paid to employees, and are one of our most significant operating expenses. Personnel costs increased \$514 million, or 19%, in the year ended December 31, 2021, as compared to 2020, and increased \$216 million, or 8% in the year ended December 31, 2020 as compared to 2019. The increases in the year ended December 31, 2021 as compared to 2020, and the year ended December 31, 2020 as compared to 2019 are primarily attributable to increased commissions driven by the increases in year-over-year closed title order volumes. Personnel costs as a percentage of total revenues from direct title premiums and escrow, title-related and other fees were 48%, 51% and 54% for the years ended December 31, 2021, 2020 and 2019, respectively. Average employee count in the Title segment was 27,297, 24,638, and 23,484 in the years ended December 31, 2021, 2020 and 2019, respectively.

Other operating expenses increased by \$189 million, or 12%, in the year ended December 31, 2021 as compared to 2020, and increased \$27 million, or 2%, in the year ended December 31, 2020 compared to 2019. Other operating expenses as a percentage of total revenue excluding agency premiums, interest and investment income, and recognized gains and losses were 25%, 28% and 32% in the years ended December 31, 2021, 2020 and 2019, respectively.

Agent commissions represent the portion of premiums retained by agents pursuant to the terms of their respective agency contracts. Agent commissions and the resulting percentage of agent premiums that we retain vary according to regional differences in real estate closing practices and state regulations.

The following table illustrates the relationship of agent premiums and agent commissions:

	2021		Year Ended December 31, 2020		2019	
	Amount	%	Amount	%	Amount	%
	(Dollars in millions)					
Agent premiums	\$ 4,982	100.0 %	\$ 3,599	100.0 %	\$ 2,961	100.0 %
Agent commissions	3,821	76.7	2,749	76.4	2,258	76.3
Net retained agent premiums	\$ 1,161	23.3 %	\$ 850	23.6 %	\$ 703	23.7 %

The claim loss provision for title insurance was \$385 million, \$283 million, and \$240 million for the years ended December 31, 2021, 2020, and 2019 respectively. The provision reflects a provision rate of 4.5% of title premiums in all periods. We continually monitor and evaluate our loss provision level, actual claims paid, and the loss reserve position each quarter. This loss provision rate is set to provide for losses on current year policies, but due to development of prior years and our long claim duration, it periodically includes amounts of estimated adverse or positive development on prior years' policies.

F&G

Segment Overview

Through our wholly owned F&G subsidiary, which we acquired on June 1, 2020, we provide our principal annuity and life insurance products through the insurance subsidiaries composing our F&G segment, FGL Insurance and FGL NY Insurance. Our customers range across a variety of age groups and are concentrated in the middle-income market. Our Fixed Indexed Annuity ("FIA") products provide for pre-retirement wealth accumulation and post-retirement income management. Our Indexed Universal Life Insurance ("IUL") products provide wealth protection and transfer opportunities. Life and annuity products are primarily distributed through Independent Marketing Organizations ("IMOs") and independent insurance agents, and beginning in 2020, independent broker dealers and banks. Additionally, we provide funding agreements and pension risk transfer ("PRT") solutions to various institutions through consultants and brokers.

In setting the features and pricing of new FIA products relative to our targeted net margin, we take into account our expectations regarding (1) net investment spread (see Non-GAAP Financial Measures section), which is the difference between the net investment income we earn and the sum of the interest credited to policyholders and the cost of hedging our risk on the policies; (2) fees, including surrender charges and rider fees, partly offset by vesting bonuses that we pay our policyholders; and (3) a number of related expenses, including benefits and changes in reserves, acquisition costs, and general and administrative expenses.

Key Components of Our Historical Results of Operations

Through our insurance subsidiaries, we issue a broad portfolio of deferred annuities (fixed indexed and fixed rate annuities), indexed universal life insurance, immediate annuities, funding agreements and pension risk transfer solutions. A deferred annuity is a type of contract that accumulates value on a tax deferred basis and typically begins making specified periodic or lump sum payments a certain number of years after the contract has been issued. Indexed universal life insurance is a complementary type of contract that accumulates value in a cash value account and provides a payment to designated beneficiaries upon the policyholder's death. An immediate annuity is a type of contract that begins making specified payments within one annuity period (e.g., one month or one year) and typically makes payments of principal and interest earnings over a period of time.

Under U.S. GAAP, premium collections for fixed indexed annuities, fixed rate annuities, immediate annuities and PRT without life contingency, and deposits received for funding agreements are reported in the financial statements as deposit liabilities (i.e., contractholder funds) instead of as sales or revenues. Similarly, cash payments to customers are reported as decreases in the liability for contractholder funds and not as expenses. Sources of revenues for products accounted for as deposit liabilities are net investment income, surrender, cost of insurance and other charges deducted from contractholder funds, and net realized gains (losses) on investments. Components of expenses for products accounted for as deposit liabilities are interest-sensitive and index product benefits (primarily interest credited to account balances or the hedging cost of providing index credits to the policyholder), amortization of DAC, DSI, and VOBA, other operating costs and expenses, and income taxes.

F&G hedges certain portions of its exposure to product related equity market risk by entering into derivative transactions. We purchase derivatives consisting predominantly of call options and, to a lesser degree, futures contracts (specifically for FIA contracts) on the equity indices underlying the applicable policy. These derivatives are used to offset the statutory reserve impact of the index credits due to policyholders under the FIA and IUL contracts. The majority of all such call options are one-year options purchased to match the funding requirements underlying the FIA/IUL contracts. We attempt to manage the cost of these purchases through the terms of our FIA/IUL contracts, which permit us to change caps, spread, or participation rates on each policy's annual anniversary, subject to certain guaranteed minimums that must be maintained. The call options and futures contracts are marked to fair value with the change in fair value included as a component of net investment gains (losses). The change in fair value of the call options and futures contracts includes the gains and losses recognized at the expiration of the instruments' terms or upon early termination and the changes in fair value of open positions.

Earnings from products accounted for as deposit liabilities are primarily generated from the excess of net investment income earned over the sum of interest credited to policyholders and the cost of hedging our risk on FIA/IUL policies, known as the net investment spread. With respect to FIAs/IULs, the cost of hedging our risk includes the expenses incurred to fund the index credits. Proceeds received upon expiration or early termination of call options purchased to fund annual index credits are recorded as part of the change in fair value of derivatives, and are largely offset by an expense for index credits earned on annuity contractholder fund balances.

Our profitability depends in large part upon the amount of assets under management ("AUM" - see Non-GAAP Financial Measures section), the net investment spreads earned on our AUM, our ability to manage our operating expenses and the costs of acquiring new business (principally commissions to agents and bonuses credited to policyholders). As we grow AUM, earnings generally increase. AUM increases when cash inflows, which include sales, exceed cash outflows. Managing net investment spreads involves the ability to maximize returns on our AUM and minimize risks such as interest rate changes and defaults or impairment of investments. It also includes our ability to manage interest rates credited to policyholders and costs of the options and futures purchased to fund the annual index credits on the FIA/IULs. We analyze returns on average assets under management ("AAUM" - see Non-GAAP Financial Measures section) pre- and post-DAC, DSI and VOBA as well as pre- and post-tax to measure our profitability in terms of growth and improved earnings.

In June 2021, we established a funding agreement-backed notes program (the "FABN Program"), pursuant to which FGL Insurance may issue funding agreements to a special purpose statutory trust (the "Trust") for spread lending purposes. The maximum aggregate principal amount permitted to be outstanding at any one time under the FABN Program is currently \$5.0 billion. We also issue funding agreements through the Federal Home Loan Bank of Atlanta ("FHLB").

In July 2021, we entered the PRT market, pursuant to which FGL Insurance and FGL NY Insurance may issue group annuity contracts to discharge pension plan liabilities from a pension plan sponsor. Life contingent pension risk transfer premiums are included in life insurance premiums and other fees below.

Non-GAAP Financial Measures

In addition to reporting financial results in accordance with GAAP, this document includes non-GAAP financial measures, which the Company believes are useful to help investors better understand its financial performance, competitive position and prospects for the future. Management believes these non-GAAP financial measures may be useful in certain instances to provide additional meaningful comparisons between current results and results in prior operating periods. Our non-GAAP measures may not be comparable to similarly titled measures of other organizations because other organizations may not calculate such non-GAAP measures in the same manner as we do. The presentation of this financial information is not intended to be considered in isolation of or as a substitute for, or superior to, the financial information prepared and presented in accordance with GAAP. By disclosing these non-GAAP financial measures, the Company believes it offers investors a greater understanding of, and an enhanced level of transparency into, the means by which the Company's management operates the Company. Any non-GAAP measures should be considered in context with the GAAP financial presentation and should not be considered in isolation or as a substitute for GAAP net earnings, net earnings attributable to common shareholders, or any other measures derived in accordance with GAAP as measures of operating performance or liquidity. Reconciliations of these non-GAAP financial measures to the most directly comparable GAAP measures are provided within.

Adjusted net earnings attributable to common shareholders ("adjusted net earnings") is a non-GAAP economic measure we use to evaluate financial performance each period. Adjusted net earnings is calculated by adjusting net earnings (loss) from continuing operations attributable to common shareholders to eliminate:

- (i) Recognized (gains) and losses, net: the impact of net investment gains/losses, including changes in allowance for expected credit losses and other than temporary impairment ("OTTI") losses, recognized in operations; the impact of market volatility on the alternative asset portfolio that differ from management's expectation of returns over the life of these assets; and the effect of changes in fair value of the reinsurance related embedded derivative;
- (ii) Indexed product related derivatives: the impacts related to changes in the fair value, including both realized and unrealized gains and losses, of index product related derivatives and embedded derivatives, net of hedging cost;
- (iii) Purchase price amortization: the impacts related to the amortization of certain intangibles (internally developed software, trademarks and value of distribution asset ("VODA")) recognized as a result of acquisition activities;
- (iv) Transaction costs: the impacts related to acquisition, integration and merger related items; and
- (v) Other "non-recurring", "infrequent" or "unusual items": Management excludes certain items determined to be "non-recurring", "infrequent" or "unusual" from adjusted net earnings when incurred if it is determined these expenses are not a reflection of the core business and when the nature of the item is such that it is not reasonably likely to recur within two years and/or there was not a similar item in the preceding two years.

Adjustments to adjusted net earnings are net of the corresponding impact on amortization of intangibles, as appropriate. The income tax impact related to these adjustments is measured using an effective tax rate, as appropriate by tax jurisdiction. While these adjustments are an integral part of the overall performance of F&G, market conditions and/or the non-operating nature of these items can overshadow the underlying performance of the core business. Accordingly, management considers this to be a useful measure internally and to investors and analysts in analyzing the trends of our operations. Adjusted net earnings should not be used as a substitute for net earnings (loss). However, we believe the adjustments made to net earnings (loss) in order to derive adjusted net earnings provide an understanding of our overall results of operations.

For example, we could have strong operating results in a given period, yet report net income that is materially less, if during such period the fair value of our derivative assets hedging the FIA and IUL index credit obligations decreased due to general equity market conditions but the embedded derivative liability related to the index credit obligation did not decrease in the same proportion as the derivative assets because of non-equity market factors such as interest rate and non-performance credit spread movements. Similarly, we could also have poor operating results in a given period yet show net earnings (loss) that is materially greater, if during such period the fair value of the derivative assets increases but the embedded derivative liability did not increase in the same proportion as the derivative assets. We hedge our index credits with a combination of static and dynamic strategies, which can result in earnings volatility, the effects of which are generally likely to reverse over time. Our management and board of directors review adjusted net earnings and net earnings (loss) as part of their examination of our overall financial results. However, these examples illustrate the significant impact derivative and embedded derivative movements can have on our net earnings (loss). Accordingly, our management performs a review and analysis of these items, as part of their review of our hedging results each period.

Amounts attributable to the fair value accounting for derivatives hedging the FIA and IUL index credits and the related embedded derivative liability fluctuate from period to period based upon changes in the fair values of call options purchased to fund the annual index credits, changes in the interest rates and non-performance credit spreads used to discount the embedded derivative liability, and the fair value assumptions reflected in the embedded derivative liability. The accounting standards for fair value measurement require the discount rates used in the calculation of the embedded derivative liability to be based on risk-free interest rates adjusted for our non-performance as of the reporting date. The impact of the change in fair values of FIA-related derivatives, embedded derivatives and hedging costs has been removed from net earnings (loss) in calculating adjusted net earnings.

AUM is a non-GAAP measure we use to assess the rate of return on assets available for reinvestment. AUM is calculated as the sum of:

- (i) total invested assets at amortized cost, excluding derivatives;
- (ii) related party loans and investments;
- (iii) accrued investment income;
- (iv) the net payable/receivable for the purchase/sale of investments, and
- (v) cash and cash equivalents excluding derivative collateral at the beginning of the period and the end of each month in the period, divided by the total number of months in the period plus one.

Management considers this non-GAAP financial measure to be useful internally and to investors and analysts when assessing the rate of return on assets available for reinvestment.

AAUM is calculated as AUM at the beginning of the period and the end of each month in the period, divided by the total number of months in the period plus one. Management considers this non-GAAP financial measure to be useful internally and to investors and analysts when assessing rate of return on assets available for reinvestment.

Yield on AAUM is calculated by dividing annualized net investment income by AAUM. Management considers this non-GAAP financial measure to be useful internally and to investors and analysts when assessing the level of return earned on AAUM.

Alternative investment yield adjustment is the current period yield impact of market volatility on the alternative investment portfolio that differ from management's expectation of returns over the life of these assets. Management considers this non-GAAP financial measure to be useful internally and to investors and analysts when assessing the level of return earned on AAUM.

Adjusted Yield on AAUM is calculated by dividing annualized net investment income by AAUM, plus or minus the alternative investment yield adjustment. Management considers this non-GAAP financial measure to be useful internally and to investors and analysts when assessing the level of return earned on AAUM.

Net investment spread is the excess of net investment income, adjusted for market volatility on the alternative asset investment portfolio, earned over the sum of interest credited to policyholders and the cost of hedging our risk on indexed

product policies. Management considers this non-GAAP financial measure to be useful internally and to investors and analysts when assessing the performance of the Company's invested assets against the level of investment return provided to policyholders, inclusive of hedging costs.

Sales

Annuity, IUL and funding agreement sales are not derived from any specific GAAP income statement accounts or line items and should not be viewed as a substitute for any financial measure determined in accordance with GAAP. Sales from these products are recorded as deposit liabilities (i.e. contractholder funds) within the Company's consolidated financial statements in accordance with GAAP. PRT sales are recorded as premiums in revenues within the consolidated financial statements. Management believes that presentation of sales, as measured for management purposes, enhances the understanding of our business and helps depict longer term trends that may not be apparent in the results of operations due to the timing of sales and revenue recognition.

F&G Results of Operations

The results of operations of our F&G segment for the year ended December 31, 2021 and seven months ended December 31, 2020 (following our June 1, 2020 acquisition of F&G), were as follows:

	Twelve months ended December 31, 2021	Seven months ended December 31, 2020
(In millions)		
Revenues:		
Life insurance premiums and other fees (a)	\$ 1,395	\$ 138
Interest and investment income	1,852	743
Recognized gains and losses, net	715	352
Total revenues	3,962	1,233
Expenses:		
Benefits and other changes in policy reserves	2,138	866
Personnel costs	129	65
Other operating expenses	105	75
Depreciation and amortization	484	123
Interest expense	29	18
Total expenses	2,885	1,147
Earnings before income taxes	1,077	86
Income tax (expense) benefit	(220)	75
Net earnings	\$ 857	\$ 161
Earnings (loss) from discontinued operations, net of tax	8	(25)
Net earnings	\$ 865	\$ 136

(a) Included within Escrow, title-related and other fees in Consolidated Statements of Earnings

The following table summarizes sales by product type of our F&G segment, which are not affected by the June 1, 2020 Business Combination, and are comparable to prior period data:

	Year ended December 31,	
	2021	2020
(In millions)		
Fixed indexed annuities (FIA)	\$ 4,310	\$ 3,459
Fixed rate annuities (MYGA)	1,738	776
Total annuity	6,048	4,235
Indexed universal life (IUL)	87	50
Funding agreements (FABN/FHLB)	2,310	200
Pension risk transfer (PRT)	1,147	—
Flow reinsurance	—	352
Total Sales	\$ 9,592	\$ 4,837

- FIA and MYGA sales were strong during the year ended December 31, 2021 compared to the year ended December 31, 2020 and reflect F&G's productive and expanding retail distribution through independent agents, banks and broker dealers.
- Funding agreements and pension risk transfer sales during the year ended December 31, 2021 reflect F&G's expansion into institutional markets during 2021 and are subject to fluctuation period to period.

Revenues**Life insurance premiums and other fees**

Life insurance premiums and other fees primarily reflect premiums on life-contingent pension risk transfers and traditional life insurance products, which are recognized as revenue when due from the policyholder, as well as the cost of insurance on IUL policies, policy rider fees primarily on FIA policies, and surrender charges assessed against policy withdrawals in excess of the policyholder's allowable penalty-free amounts (up to 10% of the prior year's value, subject to certain limitations). The following table summarizes the Life insurance premiums and other fees, included within Escrow, title-related and other fees on the Consolidated Statements of Earnings (in millions), for the year ended December 31, 2021 and seven months ended December 31, 2020 (following our June 1 acquisition of F&G):

	Year ended	Seven months ended
	December 31, 2021	December 31, 2020
	(In millions)	
Life-contingent pension risk transfer premiums	\$ 1,146	\$ —
Traditional life insurance premiums	18	13
Life-contingent immediate annuity premiums	13	10
Surrender charges	33	13
Cost of insurance fees and other income	185	102
Life insurance premiums and other fees	\$ 1,395	\$ 138

- Pension risk transfer premiums for the twelve months ended December 31, 2021 reflect new PRT deals for the period.
- Traditional life insurance premiums for the twelve months ended December 31, 2021, and seven months ended December 31, 2020 are related to the return of premium riders on traditional life contracts. FGL Insurance has ceded the majority of its traditional life business to unaffiliated third party reinsurers. While the base contract has been reinsured, we continue to retain the return of premium rider.
- Immediate annuity premiums for the twelve months ended December 31, 2021 and seven months ended December 31, 2020 reflect policyholder behavior for annuitizations.
- Surrender charges for the twelve months ended December 31, 2021 and seven months ended December 31, 2020 reflect amounts assessed against policy withdrawals in excess of the policyholder's allowable penalty-free amounts.
- Cost of insurance fees and other income for the twelve months ended December 31, 2021 and seven months ended December 31, 2020 primarily reflects GMWB rider fees of \$137 million and \$72 million, respectively, and cost of insurance charges on IUL policies, net of unearned revenue deferrals, of \$31 million and \$22 million, respectively. GMWB rider fees are based on the policyholder's benefit base and are collected at the end of the policy year.

Interest and investment income

Below is a summary of interest and investment income:

	Year ended December 31, 2021	Seven months ended December 31, 2020
	(In millions)	
Fixed maturity securities, available-for-sale	\$ 1,213	\$ 643
Equity securities	58	42
Mortgage loans	131	50
Limited partnerships	589	76
Other investments	24	8
Gross investment income	2,015	819
Investment expense	(163)	(76)
Interest and investment income	\$ 1,852	\$ 743

Our net investment spread and AAUM are summarized as follows (annualized) (see Non-GAAP Financial Measures Section):

	Year ended December 31, 2021	Seven months ended December 31, 2020
	(Dollars in millions)	
Yield on AAUM (at amortized cost)	5.80 %	4.66 %
Alternative investment yield adjustment	(1.04)%	0.07 %
Adjusted yield on AAUM	4.76 %	4.73 %
Less: Interest credited and option cost	(1.95)%	(1.99)%
Net investment spread	2.81 %	2.74 %
AAUM	\$ 31,938	\$ 27,322

- AAUM for the twelve months ended December 31, 2021 and seven months ended December 31, 2020 reflect new business asset flows.
- The \$1,852 million NII for the twelve months ended December 31, 2021 was primarily driven by \$1,213 million in fixed maturity securities, \$589 million of interest and investment income related to our investments in limited partnerships, \$24 million in other investments and \$131 million in mortgage loans, partially offset by \$163 million in investment expenses. The \$743 million NII for the seven months ended December 31, 2020 was primarily driven by \$643 million in fixed maturity securities, \$76 million of interest and investment income related to our investments in limited partnerships, and \$50 million in mortgage loans, partially offset by \$76 million in investment expenses.
- The alternative investment yield adjustment reflects the yield impact of market volatility on the alternative investment portfolio that differ from management's expectation of returns over the life of these assets.

Recognized gains and losses, net

Below is a summary of the major components included in recognized gains and losses, net:

	<u>Year ended</u>	<u>Seven months ended</u>
	<u>December 31, 2021</u>	<u>December 31, 2020</u>
	<u>(In millions)</u>	
Net realized and unrealized gains (losses) on fixed maturity available-for-sale securities, equity securities and other invested assets	\$ 58	\$ 179
Change in allowance for expected credit losses	4	(19)
Net realized and unrealized gains (losses) on certain derivatives instruments	614	237
Change in fair value of reinsurance related embedded derivatives	34	(53)
Change in fair value of other derivatives and embedded derivatives	5	8
Recognized gains and losses, net	<u>\$ 715</u>	<u>\$ 352</u>

- For the year ended December 31, 2021 and seven months ended December 31, 2020, net realized and unrealized gains on fixed maturity available-for-sale securities, equity securities and other invested assets is primarily the result of realized gains on fixed maturity available-for-sale securities, partially offset and increased by mark-to-market movement on our equity securities, respectively.
- Allowance for expected credit losses during the year ended December 31, 2021 decreased primarily due to improved economic conditions for residential mortgage loans, partially offset by higher reserves for commercial mortgage loans. As of the June 1, 2020 acquisition of F&G, due to purchase accounting adjustments, our expected credit loss reserve was valued at \$0. For the seven months ended December 31, 2020, the expected credit loss reserve increased primarily due to reserves established for residential mortgage loans.
- For the year ended December 31, 2021 and the seven months ended December 31, 2020, net realized and unrealized gains on certain derivative instruments primarily relates to the net realized and unrealized gains on options and futures used to hedge FIA and IUL products, including gains on option and futures expiration. See the table below for primary drivers of gains (losses) on certain derivatives.
- The fair value of reinsurance related embedded derivative is based on the change in fair value of the underlying assets held in the funds withheld ("FWH") portfolio.

We utilize a combination of static (call options) and dynamic (long futures contracts) instruments in our hedging strategy. A substantial portion of the call options and futures contracts are based upon the S&P 500 Index with the remainder based upon other equity, bond and gold market indices.

The components of the realized and unrealized gains (losses) on certain derivative instruments hedging our indexed annuity and universal life products are summarized in the table below:

	<u>Year ended</u> <u>December 31, 2021</u>	<u>Seven months ended</u> <u>December 31, 2020</u>
(Dollars in millions)		
Call Options:		
Gains on option expiration	\$ 437	\$ 62
Change in unrealized (losses) gains	160	167
Futures contracts:		
Gains on futures contracts expiration	9	21
Change in unrealized losses	(1)	(6)
Foreign currency forward:		
Gains (losses) on foreign currency forward	9	(7)
Total net change in fair value	\$ 614	\$ 237
Point-to-Point Change in S&P 500 Index during twelve and seven month periods	27 %	23 %

- Realized gains and losses on certain derivative instruments are directly correlated to the performance of the indices upon which the call options and futures contracts are based and the value of the derivatives at the time of expiration compared to the value at the time of purchase. Gains on option expiration reflect the movement during the twelve months ended December 31, 2021 and the seven months ended December 31, 2020, on options settled during the period.
- The change in unrealized gains (losses) due to fair value of call options is primarily driven by the underlying performance of the S&P 500 Index during each respective year relative to the S&P 500 Index on the policyholder buy dates.
- The net change in fair value of the call options and futures contracts was primarily driven by movements in the S&P 500 Index relative to the policyholder buy dates.

The average index credits to policyholders are as follows:

	<u>Year ended</u> <u>December 31, 2021</u>	<u>Seven months ended</u> <u>December 31, 2020</u>
Average Crediting Rate	5 %	3 %
S&P 500 Index:		
Point-to-point strategy	4 %	5 %
Monthly average strategy	3 %	2 %
Monthly point-to-point strategy	7 %	— %
3 year high water mark	16 %	19 %

- Actual amounts credited to contractholder fund balances may differ from the index appreciation due to contractual features in the FIA and certain IUL contracts (caps, spreads and participation rates), which allow F&G to manage the cost of the options purchased to fund the annual index credits.
- The credits for the periods presented were based on comparing the S&P 500 Index on each issue date in the period to the same issue date in the respective prior year periods.

Benefits and expenses

Benefits and other changes in policy reserves

Below is a summary of the major components included in Benefits and other changes in policy reserves:

	Year ended	Seven months ended
	December 31, 2021	December 31, 2020
	(In millions)	
FIA/ IUL market related liability movements	\$ (378)	\$ 317
Index credits, interest credited & bonuses	1,005	319
Annuity payments	574	74
PRT agreements	1,157	—
Other	(220)	156
Total benefits and other changes in policy reserves	\$ 2,138	\$ 866

- The FIA/IUL market related liability movements during the twelve and seven months ended December 31, 2021 and December 31, 2020, respectively, are mainly driven by changes in the equity markets, non-performance spreads, and risk free rates during the periods. Additionally, 2021 includes the system implementation and assumption review process impacts discussed below. The change in risk free rates decreased the FIA market related liability by \$145 million and \$63 million during the twelve and seven months ended December 31, 2021 and 2020, respectively. During the twelve and seven months ended December 31, 2021 and 2020, the change in non-performance spread decreased the FIA market related liability by \$34 million and increased the FIA market related liability by \$205 million, respectively. The remaining change in market value of the market related liability movements was driven by equity market impacts. See table in the net investment gains/losses discussion above for summary and discussion of net unrealized gains (losses) on certain derivative instruments.
- Annually, typically in the third quarter, we review assumptions associated with reserves for policy benefits and product guarantees. In addition, during the third quarter of 2021, we implemented a new actuarial valuation system, and as a result, our third quarter 2021 assumption updates include model refinements and assumption updates resulting from the implementation. The system implementation and assumption review process included refinements in the calculation of the fair value of the embedded derivative component of our fixed indexed annuities. These changes, taken together, resulted in a decrease in contractholder funds and future policy reserves of \$397 million.
- The index credits, interest credited and bonuses were primarily due to index credits on FIA policies. Refer to average policyholder index discussion above for details on drivers.
- PRT agreements for the twelve months ended December 31, 2021 reflect new PRT deals for the period.

Personnel Costs and Other Operating Expenses

Below is a summary of personnel costs and other operating expenses:

	Year ended	Seven months ended
	December 31, 2021	December 31, 2020
	(In millions)	
Personnel costs	\$ 129	\$ 65
Other operating expenses	105	75
Total personnel costs and other operating expenses	\$ 234	\$ 140

- Personnel costs for the twelve months ended December 31, 2021 and seven months ended December 31, 2020 primarily reflect employee-related expenses.
- Other operating expenses for the twelve months ended December 31, 2021 and seven months ended December 31, 2020 reflect certain operating expenses other than personnel costs and non-deferred acquisition costs.

Depreciation and amortization

Below is a summary of the major components included in depreciation and amortization:

	Year ended		Seven months ended	
	December 31, 2021		December 31, 2020	
(In millions)				
Amortization of DAC, VOBA, and DSI	\$	517	\$	131
Interest		(44)		(22)
Unlocking		(12)		(2)
Amortization of other intangible assets and other depreciation		23		16
Total depreciation and amortization	\$	484	\$	123

- Amortization of DAC, VOBA, and DSI is based on current and future expected gross margins (pre-tax operating income before amortization) and includes the system implementation discussed below. The amortization for the year ended December 31, 2021 and the seven months ended December 31, 2020 is the result of actual gross profits ("AGPs") in the periods.
- Annually, typically in the third quarter, we review assumptions associated with the amortization of intangibles. In addition, during the third quarter of 2021, we implemented a new actuarial valuations system and as a result, our third quarter 2021 assumption updates include model refinements and assumption updates resulting from the implementation. The changes, taken together, increased amortization of intangibles by \$136 million.

Other items affecting net earnings

Income tax expense (benefit)

Below is a summary of the major components included in income tax expense (benefit):

	Year ended		Seven months ended	
	December 31, 2021		December 31, 2020	
(Dollars in millions)				
Income before taxes	\$	1,077	\$	86
Income tax expense before valuation allowance		234		(21)
Change in valuation allowance		(14)		(54)
Federal income tax expense (benefit)	\$	220	\$	(75)
Effective rate		20 %		(87)%

- Income tax benefit for the period ended December 31, 2020 was \$75 million. The income tax benefit was primarily driven by various valuation allowance releases as a result of merger activity, partially offset by taxes on income.
- See "Note T - Income Taxes" for further information.

Adjusted Net Earnings (See Non-GAAP Financial Measures section)

The table below shows the adjustments made to reconcile net earnings to adjusted net earnings :

	Year ended		Seven months ended	
	December 31, 2021		December 31, 2020	
	(In millions)			
Net earnings	\$	857	\$	161
Non-GAAP adjustments:				
Recognized (gains), net		(319)		(45)
Indexed product related derivatives		(52)		111
Purchase price amortization		26		16
Transaction costs		5		21
Other non-recurring items (a)		(284)		—
Income taxes on non-GAAP adjustments		128		(29)
Adjusted net earnings	\$	361	\$	235

(a) Reflects adjustments to benefits and other changes in policy reserves and depreciation and amortization resulting from the implementation of a new actuarial valuation system

- Adjusted net earnings for the twelve months ended December 31, 2021 primarily reflects net investment income for the period, partially offset by product costs and other expenses, and includes \$31 million of net favorable mortality primarily driven by the single premium immediate annuity ("SPIA") line of business, partially offset by \$(19) million net unfavorable mortality driven by the indexed universal life ("IUL") line of business, \$8 million of favorable DAC unlocking and \$46 million of other net favorable items, primarily net investment income related to CLO redemptions held at a discount to par.
- Adjusted net earnings for the seven months ended December 31, 2020 primarily reflects net investment income for the period, partially offset by product costs and other expenses, and includes \$14 million of net favorable mortality driven by the SPIA line of business, and \$72 million of other net favorable items, primarily related to a favorable income tax benefit.

Investment Portfolio

The types of assets in which we may invest are influenced by various state laws, which prescribe qualified investment assets applicable to insurance companies. Within the parameters of these laws, we invest in assets giving consideration to four primary investment objectives: (i) maintain robust absolute returns; (ii) provide reliable yield and investment income; (iii) preserve capital and (iv) provide liquidity to meet policyholder and other corporate obligations.

Our investment portfolio is designed to contribute stable earnings and balance risk across diverse asset classes and is primarily invested in high quality fixed income securities.

As of December 31, 2021 and December 31, 2020, the fair value of our investment portfolio was approximately \$39 billion and \$31 billion, respectively, and was divided among the following asset classes and sectors:

	December 31, 2021		December 31, 2020	
	Fair Value	Percent	Fair Value	Percent
(Dollars in millions)				
Fixed maturity securities, available for sale:				
United States Government full faith and credit	\$ 50	— %	\$ 45	— %
United States Government sponsored entities	74	— %	106	— %
United States municipalities, states and territories	1,441	4 %	1,309	4 %
Foreign Governments	205	1 %	140	— %
Corporate securities:				
Finance, insurance and real estate	5,109	13 %	4,572	15 %
Manufacturing, construction and mining	932	2 %	936	3 %
Utilities, energy and related sectors	2,987	8 %	2,762	9 %
Wholesale/retail trade	2,627	7 %	2,106	7 %
Services, media and other	3,349	8 %	2,793	9 %
Hybrid securities	881	2 %	963	3 %
Non-agency residential mortgage-backed securities	648	2 %	694	2 %
Commercial mortgage-backed securities	2,964	7 %	2,806	9 %
Asset-backed securities	4,550	12 %	1,999	6 %
Collateral loan obligations ("CLO")	4,145	11 %	4,268	14 %
Total fixed maturity available for sale securities	29,962	77 %	25,499	81 %
Equity securities (a)	1,171	3 %	1,047	3 %
Alternative investments:				
Private equity	1,181	3 %	614	2 %
Real assets	340	1 %	288	1 %
Credit	829	2 %	254	1 %
Commercial mortgage loans	2,265	6 %	926	3 %
Residential mortgage loans	1,549	4 %	1,123	4 %
Other (primarily derivatives and company owned life insurance)	1,305	3 %	997	4 %
Short term investments	373	1 %	456	1 %
Total investments	\$ 38,975	100 %	\$ 31,204	100 %

(a) Includes investment grade non-redeemable preferred stocks (\$928 million and \$853 million at December 31, 2021 and 2020, respectively).

Insurance statutes regulate the type of investments that our life insurance subsidiaries are permitted to make and limit the amount of funds that may be used for any one type of investment. In light of these statutes and regulations, and our business and investment strategy, we generally seek to invest in (i) corporate securities rated investment grade by established nationally recognized statistical rating organizations (each, an "NRSRO"), (ii) U.S. Government and government-sponsored agency securities, or (iii) securities of comparable investment quality, if not rated.

As of December 31, 2021 and December 31, 2020, our fixed maturity available-for-sale ("AFS") securities portfolio was approximately \$30 billion and \$25 billion, respectively. The following table summarizes the credit quality, by NRSRO rating, of our fixed income portfolio:

Rating	December 31, 2021		December 31, 2020	
	Fair Value	Percent	Fair Value	Percent
	(Dollars in millions)			
AAA	\$ 660	2 %	\$ 488	2 %
AA	2,181	7 %	1,590	6 %
A	7,667	26 %	7,040	28 %
BBB	10,462	35 %	9,669	38 %
Not rated (b)	6,642	22 %	4,336	17 %
Total investment grade	27,612	92 %	23,123	91 %
BB	1,372	5 %	1,493	6 %
B and below (a)	432	1 %	612	2 %
Not rated (b)	546	2 %	271	1 %
Total below investment grade	2,350	8 %	2,376	9 %
Total	\$ 29,962	100 %	\$ 25,499	100 %

(a) Includes \$68 million and \$106 million at December 31, 2021 and December 31, 2020, respectively, of non-agency RMBS that carry a NAIC 1 designation.

(b) Securities denoted as not-rated by an NRSRO were classified as investment or non-investment grade according to the securities' respective NAIC designation.

The NAIC's Securities Valuation Office ("SVO") is responsible for the day-to-day credit quality assessment and valuation of securities owned by state regulated insurance companies. Insurance companies report ownership of securities to the SVO when such securities are eligible for regulatory filings. The SVO conducts credit analysis on these securities for the purpose of assigning an NAIC designation or unit price. Typically, if a security has been rated by an NRSRO, the SVO utilizes that rating and assigns an NAIC designation based upon the following system:

NAIC Designation	NRSRO Equivalent Rating
1	AAA/AA/A
2	BBB
3	BB
4	B
5	CCC and lower
6	In or near default

The NAIC uses designation methodologies for non-agency RMBS, including RMBS backed by subprime mortgage loans and for commercial mortgage-backed securities ("CMBS"). The NAIC's objective with the designation methodologies for these structured securities is to increase accuracy in assessing expected losses and to use the improved assessment to determine a more appropriate capital requirement for such structured securities. Prior to 2021, the NAIC designations for structured securities, including subprime and Alternative A-paper ("Alt-A") RMBS, were based upon a comparison of the bond's amortized cost to the NAIC's loss expectation for each security. Securities where modeling does not generate an expected loss in all scenarios are given the highest designation of NAIC 1. In 2021, the NAIC eliminated the comparison of non-legacy (issued after 2012) bond's amortized cost to the NAIC's loss expectation and instead assigned a NAIC designation based on the loss expectation alone. Several of our RMBS securities carry a NAIC 1 designation while the NRSRO rating indicates below investment grade. The revised methodologies reduce regulatory reliance on rating agencies and allow for greater regulatory input into the assumptions used to estimate expected losses from such structured securities. In the tables below, we present the rating of structured securities based on ratings from the NAIC rating methodologies described above (which in some cases do not correspond to rating agency designations). All NAIC designations (e.g., NAIC 1-6) are based on the NAIC methodologies.

The table below presents our fixed maturity securities by NAIC designation as of December 31, 2021 and December 31, 2020 (dollars in millions):

NAIC Designation	December 31, 2021		
	Amortized Cost	Fair Value	Percent of Total Fair Value
1	\$ 15,636	\$ 15,848	54 %
2	10,779	11,441	38 %
3	1,603	1,850	6 %
4	567	669	2 %
5	80	93	— %
6	59	61	— %
Total	\$ 28,724	\$ 29,962	100 %

NAIC Designation	December 31, 2020		
	Amortized Cost	Fair Value	Percent of Total Fair Value

Non-Agency RMBS Exposure

Our investment in non-agency RMBS securities is predicated on the conservative and adequate cushion between purchase price and NAIC 1 rating, general lack of sensitivity to interest rates, positive convexity to prepayment rates and correlation between the price of the securities and the unfolding recovery of the housing market.

The fair value of our investments in subprime and Alt-A RMBS securities was \$52 million and \$75 million as of December 31, 2021, respectively, and \$68 million and \$94 million as of December 31, 2020, respectively.

The following tables summarize our exposure to subprime and Alt-A RMBS by credit quality using NAIC designations, NRSRO ratings and vintage year as of December 31, 2021 and December 31, 2020 (dollars in millions):

NAIC Designation:	December 31, 2021		December 31, 2020

Total	\$ 127	100 %	\$ 162	100 %

(a) Securities denoted as not-rated by an NRSRO were classified as investment or non-investment grade according to the securities' respective NAIC designation.

ABS and CLO Exposures

Our ABS exposures are largely diversified by underlying collateral and issuer type. Our CLO exposures are generally senior tranches of CLOs which have leveraged loans as their underlying collateral.

As of December 31, 2021, the CLO and ABS positions were trading at a net unrealized gain position of \$145 million and \$37 million, respectively. As of December 31, 2020, the CLO and ABS positions were trading at a net unrealized gain position of \$247 million and \$79 million, respectively.

Municipal Bond Exposure

Our municipal bond exposure is a combination of general obligation bonds (fair value of \$258 million and an amortized cost of \$247 million as of December 31, 2021) and special revenue bonds (fair value of \$1,183 million and amortized cost of \$1,138 million as of December 31, 2021).

Across all municipal bonds, the largest issuer represented 7% of the category, less than 1% of the entire portfolio and is rated NAIC 1. Our focus within municipal bonds is on NAIC 1 rated instruments, and 91% of our municipal bond exposure is rated NAIC 1.

Mortgage Loans

We rate all CMLs to quantify the level of risk. We place those loans with higher risk on a watch list and closely monitor them for collateral deficiency or other credit events that may lead to a potential loss of principal and/or interest. If we determine the value of any CML to be impaired (i.e., when it is probable that we will be unable to collect on amounts due according to the contractual terms of the loan agreement), the carrying value of the CML is reduced to either the present value of expected cash flows from the loan, discounted at the loan's effective interest rate, or fair value of the collateral. For those mortgage loans that are determined to require foreclosure, the carrying value is reduced to the fair value of the underlying collateral, net of estimated costs to obtain and sell at the point of foreclosure. The carrying value of the impaired loans is reduced by establishing a specific write-down recorded in Recognized gains and losses, net in the Consolidated Statements of Earnings included in Item 8 of Part II of this Annual Report.

LTV and DSC ratios are utilized as part of the review process described above. As of December 31, 2021, our mortgage loans on real estate portfolio had a weighted average DSC ratio of 2.4 times, and a weighted average LTV ratio of 56%. See Note E to the Consolidated Financial Statements included in Item 8 of Part II of this Annual Report for additional information regarding our LTV and DSC ratios.

F&G's RMLs are closed end, amortizing loans and 100% of the properties are located in the United States. F&G diversifies its RML portfolio by state to attempt to reduce concentration risk. RMLs have a primary credit quality indicator of either a performing or nonperforming loan. F&G defines non-performing RMLs as those that are 90 or more days past due and/or in nonaccrual status, which is assessed monthly.

Unrealized Losses

The amortized cost and fair value of the fixed maturity securities and the equity securities that were in an unrealized loss position as of December 31, 2021 and 2020, were as follows (in millions):

	December 31, 2021				
	Number of securities	Amortized Cost	Allowance for Expected Credit Losses	Unrealized Losses	Fair Value

Equity securities	1	16	—	—	16
Total investments	202	\$ 1,601	\$ (1)	\$ (38)	\$ 1,562

The gross unrealized loss position on the fixed maturity available-for-sale fixed and equity portfolio was \$249 million and \$38 million as of December 31, 2021 and 2020, respectively. Most components of the portfolio exhibited price depreciation as treasury rates increased, offset by narrower credit spreads. The total amortized cost of all securities in an unrealized loss position was \$11,968 million and \$1,601 million as of December 31, 2021 and 2020, respectively. The average market value/book value of the investment category with the largest unrealized loss position was 96% for Utilities, energy and related sectors as of December 31, 2021. In the aggregate, Utilities, energy and related sectors represented 18% of the total unrealized loss position as of December 31, 2021. The average market value/book value of the investment category with the largest unrealized loss position was 97% for Asset backed securities as of December 31, 2020. In the aggregate, Asset backed securities represented 47% of the total unrealized loss position as of December 31, 2020.

The amortized cost and fair value of fixed maturity available for sale securities under watch list analysis and the number of months in a loss position with investment grade securities (NRSRO rating of BBB/Baa or higher) were as follows (dollars in millions):

	December 31, 2021

Expected Credit Losses and Watch List

F&G prepares a watch list to identify securities to evaluate for expected credit losses. Factors used in preparing the watch list include fair values relative to amortized cost, ratings and negative ratings actions and other factors. Detailed analysis is performed for each security on the watch list to further assess the presence of credit impairment loss indicators and, where present, calculate an allowance for expected credit loss or direct write-down of a security's amortized cost. At December 31, 2021, our watch list included seven securities in an unrealized loss position with an amortized cost of \$132 million, allowance for expected credit losses of \$0 million, unrealized losses of \$7 million and a fair value of \$125 million.

At December 31, 2020, our watch list included four securities in an unrealized loss position with an amortized cost of \$102 million, allowance for expected credit losses of \$6 million, unrealized losses of \$1 million and a fair value of \$95 million.

The watch list excludes structured securities due to a revision of processes as a result of ASU 2016-13.

There were 36 structured securities to which we had a potential credit disclosure with a fair value of \$45 million and \$65 million as of December 31, 2021 and 2020, respectively. Our analysis of these structured securities, which included cash flow testing, resulted in allowances for expected credit losses of \$8 million and \$3 million as of December 31, 2021 and 2020, respectively.

Exposure to Sovereign Debt

Our investment portfolio had no direct exposure to European sovereign debt as of December 31, 2021 and 2020.

As of December 31, 2021 and 2020, we also had no material exposure risk related to financial investments in Puerto Rico.

Interest and investment income

For discussion regarding our net investment income and net investment gains (losses) refer to Note E to the Consolidated Financial Statements included in Item 8 of Part II of this Annual Report.

AFS Securities

For additional information regarding our AFS securities, including the amortized cost, gross unrealized gains (losses), and fair value as well as the amortized cost and fair value of fixed maturity AFS securities by contractual maturities, as of December 31, 2021 and 2020, refer to Note E *Investments* to the Consolidated Financial Statements included in Item 8 of Part II of this Annual Report.

Concentrations of Financial Instruments

For detail regarding our concentration of financial instruments refer to Item 7A. of Part II of this Annual Report.

Derivatives

We are exposed to credit loss in the event of nonperformance by our counterparties on call options. We attempt to reduce this credit risk by purchasing such options from large, well-established financial institutions.

We also hold cash and cash equivalents received from counterparties for call option collateral, as well as U.S. Government securities pledged as call option collateral, if our counterparty's net exposures exceed pre-determined thresholds.

We are required to pay counterparties the effective federal funds rate each day for cash collateral posted to F&G for daily mark to market margin changes. We reduce the negative interest cost associated with cash collateral posted from counterparties under various ISDA agreements by reinvesting derivative cash collateral. This program permits collateral cash received to be invested in short term Treasury securities, bank deposits and commercial paper rated A1/P1, which are included in Cash and cash equivalents in the accompanying Consolidated Balance Sheets.

See Note F *Derivative Financial Instruments* to the Consolidated Financial Statements included in Item 8 of Part II of this Annual Report for additional information regarding our derivatives and our exposure to credit loss on call options.

Corporate and Other

The Corporate and Other segment consists of the operations of the parent holding company, our various real estate brokerage businesses and our real estate technology subsidiaries. This segment also includes certain other unallocated corporate overhead expenses and eliminations of revenues and expenses between it and our Title segment.

The following table presents the results of operations of our Corporate and Other segment for the years indicated:

	Year Ended December 31,		
	2021	2020	2019
(In millions)			
Revenues:			
Escrow, title-related and other fees	\$ 172	\$ 172	\$ 195
Interest and investment income	—	6	23
Recognized gains and losses, net	12	(7)	(8)
Total revenues	184	171	210
Expenses:			
Personnel costs	107	108	134
Other operating expenses	99	148	172
Depreciation and amortization	23	24	24
Interest expense	85	71	47
Total expenses	314	351	377
Loss from continuing operations, before income taxes and equity in earnings of unconsolidated affiliates	\$ (130)	\$ (180)	\$ (167)

The revenue in the Corporate and Other segment for all years represents revenue generated by our non-title real estate technology and brokerage subsidiaries as well as mark-to-market valuation changes on certain corporate deferred compensation plans.

Total revenues in the Corporate and Other segment increased \$13 million, or 8% in the year ended December 31, 2021 as compared to 2020, and decreased \$39 million, or 19%, in the year ended December 31, 2020 as compared to 2019. The increase in the year ended December 31, 2021 as compared to 2020 is primarily attributable to increased Recognized gains and losses, net of approximately \$19 million, partially offset by decreased interest and investment income of \$6 million associated with a year-over-year reduction in fixed-income investment holdings. The decrease in the year ended December 31, 2020 as compared to 2019 is primarily attributable to valuation losses associated with our deferred compensation plan assets in 2020 and decreased interest and investment income of \$17 million associated with a year-over-year reduction in cash holdings.

Personnel costs in the Corporate and Other segment decreased \$1 million, or 1% in the year ended December 31, 2021 as compared to 2020, and decreased \$26 million, or 19%, in the year ended December 31, 2020 compared to 2019. The decrease in the year ended December 31, 2020 as compared to 2019 is attributable to the aforementioned decrease in the valuation of deferred compensation plan assets compared to the corresponding period in 2019.

Other operating expenses in the Corporate and Other segment decreased \$49 million, or 33%, in the year ended December 31, 2021 as compared to 2020, and decreased \$24 million, or 14% in the year ended December 31, 2020 as compared to 2019. The decrease in 2021 as compared to 2020 is primarily attributable to a decrease in F&G transaction costs of approximately \$38 million and reduced real estate brokerage expenses of \$24 million in 2021 related to previous divestitures, partially offset by growth in our real estate technology businesses. The decrease in the year ended December 31, 2020 as compared to 2019 is primarily attributable to the reverse termination fee paid in 2019 related to the abandoned Stewart Information Services Corporation acquisition, partially offset by F&G acquisition costs in 2020.

Interest expense increased \$14 million, or 20%, in the year ended December 31, 2021 as compared to 2020, and increased \$24 million, or 51%, in the year ended December 31, 2020 as compared to 2019. The increase in the year ended December 31, 2021 as compared to 2020 is primarily attributable to increased average debt outstanding in 2021 associated with issuance of our 3.20% Notes in September 2021 as well as having a full year outstanding of our 3.40% Notes and our 2.45% Notes issued in 2020. The increase in the year ended December 31, 2020 as compared to 2019 is primarily attributable to increased average debt outstanding in 2020 associated with the Term Loan Credit Agreement, our 3.40% Notes and our 2.45% Notes.

Liquidity and Capital Resources

Cash Requirements. Our current cash requirements include personnel costs, operating expenses, claim payments, taxes, payments of interest and principal on our debt, capital expenditures, business acquisitions, stock repurchases and dividends on our common stock. We paid dividends of \$1.56 per share in 2021, or approximately \$446 million to our common shareholders. On February 16, 2022, our Board of Directors declared cash dividends of \$0.44 per share, payable on March 31, 2022, to FNF common shareholders of record as of March 17, 2022. There are no restrictions on our retained earnings regarding our ability to pay dividends to our shareholders, although there are limits on the ability of certain subsidiaries to pay dividends to us, as described below. The declaration of any future dividends is at the discretion of our Board of Directors. Additional uses of cash flow are expected to include acquisitions, stock repurchases and debt repayments, including the repayment of \$400 million in outstanding principal amount associated with our 5.50% Notes due in September 2022.

As of December 31, 2021, we had cash and cash equivalents of \$4,360 million, short term investments of \$491 million and available capacity under our Revolving Credit Facility of \$800 million. On September 17, 2021, we completed our underwritten public offering of \$450 million aggregate principal amount of our 3.20% Notes due 2051, pursuant to our registration statement on Form S-3 (File No. 333-239002) and the related prospectus supplement. The net proceeds from the registered offering of the 3.20% Notes were approximately \$443 million, after deducting underwriting discounts, commissions and offering expenses. We plan to use the net proceeds from the offering for general corporate purposes. For further information related to the 3.20% Notes, refer to Note G *Notes Payable* to the Consolidated Financial Statements included in Item 8 of Part II of this Annual Report. We continually assess our capital allocation strategy, including decisions relating to the amount of our dividend, reducing debt, repurchasing our stock, investing in growth of our subsidiaries, making acquisitions and/or conserving cash. We believe that all anticipated cash requirements for current operations will be met from internally generated funds, through cash dividends from subsidiaries, cash generated by investment securities, potential sales of non-strategic assets, potential issuances of additional debt or equity securities, and borrowings on our Revolving Credit Facility. Our short-term and long-term liquidity requirements are monitored regularly to ensure that we can meet our cash requirements. We forecast the needs of all of our subsidiaries and periodically review their short-term and long-term projected sources and uses of funds, as well as the asset, liability, investment and cash flow assumptions underlying such forecasts.

Our title insurance subsidiaries generate cash from premiums earned and their respective investment portfolios, and these funds are adequate to satisfy the payments of claims and other liabilities. Due to the magnitude of our title segment investment portfolio in relation to our title claim loss reserves, we do not specifically match durations of our investments to the cash outflows required to pay claims, but do manage outflows on a shorter time frame.

Our two significant sources of internally generated funds are dividends and other payments from our subsidiaries. As a holding company, we receive cash from our subsidiaries in the form of dividends and as reimbursement for operating and other administrative expenses we incur. The reimbursements are paid within the guidelines of management agreements among us and our subsidiaries. Our insurance subsidiaries are restricted by state regulation in their ability to pay dividends and make distributions. Each applicable state of domicile regulates the extent to which our title underwriters can pay dividends or make other distributions. As of December 31, 2021, \$2,375 million of our net assets were restricted from dividend payments without prior approval from the relevant departments of insurance. We anticipate that our title insurance subsidiaries will pay or make dividends to us in 2021 of approximately \$831 million. Our underwritten title companies and non-insurance subsidiaries are not regulated to the same extent as our insurance subsidiaries.

The maximum dividend permitted by law is not necessarily indicative of an insurer's actual ability to pay dividends, which may be constrained by business and regulatory considerations, such as the impact of dividends on surplus, which could affect an insurer's ratings or competitive position, the amount of premiums that can be written and the ability to pay future dividends. Further, depending on business and regulatory conditions, we may in the future need to retain cash in our underwriters or even contribute cash to one or more of them in order to maintain their ratings or their statutory capital position. Such a requirement could be the result of investment losses, reserve charges, adverse operating conditions in the current economic environment or changes in statutory accounting requirements by regulators.

Cash flow from our operations will be used for general corporate purposes including to reinvest in operations, repay debt, pay dividends, repurchase stock, pursue other strategic initiatives and/or conserve cash.

Operating Cash Flow. Our cash flows provided by operations for the years ended December 31, 2021, 2020, 2019 were \$4,090 million, \$1,578 million, and \$1,121 million respectively. The increase in cash provided by operating activities of \$2,512 million in 2021 as compared to 2020 is primarily attributable to the increase in pre-tax earnings in 2021, non-cash valuation changes in equity, preferred and derivative securities of \$821 million, increased cash inflows associated with the change in future policy benefits of \$726 million, increased cash inflows associated with the change in funds withheld from reinsurers of \$865 million, partially offset by gains on sales of investments and other assets of \$668 million, increased cash outflows associated with increased deferred policy acquisition costs and deferred sales inducements of \$409 million and the timing of

receipts and payments of prepaid assets, payables, receivables and income taxes. The primary driver of the increased cash flows associated with the change in future policy benefits in 2021 as compared to 2020 was cash received for PRT transactions associated with our F&G business. The increase in cash provided by operating activities of \$457 million in 2020 as compared to 2019 is primarily attributable to the increase in pre-tax earnings in 2020 and the addition of interest credited to contractholder account balances of \$750 million in 2020, partially offset by deferred policy acquisition costs and deferred sales inducements of \$266 million in 2020, charges assessed to contractholders for mortality and administration of \$100 million in 2020, and the timing of receipts and payments of prepaid assets, payables, receivables and income taxes.

Investing Cash Flows. Our cash used in investing activities for the years ended December 31, 2021, 2020, and 2019 were \$7,449 million, \$2,331 million, and \$520 million respectively. The increase in cash used in investing activities of \$5,118 million in 2021 as compared to 2020 is primarily associated with increased purchases of investment securities of \$11,055 million, increased investment in unconsolidated affiliates of \$1,419 million, partially offset by increased proceeds from sales, calls and maturities of investment securities of \$6,204 million, increased distributions from unconsolidated affiliates of \$250 million and reduced cash outflows associated with acquisitions of \$818 million. The increase in cash used in investing activities of \$1,811 million in 2020 as compared to 2019 is primarily attributable to the net cash outflow of \$1,076 million associated with the F&G acquisition, increased purchases of investment securities of \$4,092 million and additional investments in unconsolidated affiliates of \$293 million, partially offset by increased sales, calls, and maturities of investment securities of \$2,761 million, sales and maturities of short-term investments of \$540 million and increased distributions from unconsolidated affiliates of \$195 million. The increased activity related to purchases, sales and calls of investment securities in the 2020 period is primarily associated with our F&G segment.

Capital Expenditures. Total capital expenditures for property and equipment and capitalized software were \$131 million, \$110 million, and \$96 million for the year ended December 31, 2021, 2020, and 2019 respectively.

Financing Cash Flows. Our cash flows provided by (used in) financing activities for the year ended December 31, 2021, 2020, and 2019 were \$5,000 million and \$2,096 million, and \$(482) million respectively. The increase in cash provided by financing activities of \$2,904 million in 2021 as compared to 2020 is primarily associated with increased cash inflows associated with the change in contractholder accounts of \$3,595 million, increased cash inflows associated with the change in secured trust deposits of \$304 million and reduced debt service payments of \$1,000 million, partially offset by reduced debt offerings and borrowings of \$1,797 million and increased purchases of treasury stock of \$227 million. The increase in cash provided by financing activities of \$2,578 million in 2020 as compared to 2019 is primarily attributable to cash inflows from the offerings of our 3.40% Notes of \$648 million and 2.45% Notes of \$593 million, and increased cash inflows from contractholder account deposits of \$2,967 million, partially offset by increased cash outflows from contractholder withdrawals of \$1,327 million, increased purchases of treasury stock of \$150 million and the purchase of the outstanding Class A units of ServiceLink held by minority owners of \$90 million. The increased activity in contractholder deposits and withdrawals in the 2020 period is associated with our F&G segment.

Financing Arrangements. For a description of our financing arrangements see Note G *Notes Payable* included in Item 8 of Part II of this Annual Report, which is incorporated by reference into this Item 7 of Part II.

Obligations - Contractual and Other. As of December 31, 2021, our required annual payments relating to contractual and other obligations were as follows:

	2022	2023	2024	2025	2026	Thereafter	Total
	(In millions)						
Notes payable principal repayment	\$ 400	\$ —	\$ —	\$ 550	\$ —	\$ 2,150	\$ 3,10
Operating lease payments	145	116	83	44	26	27	44
Pension and other benefit payments	15	14	13	12	11	90	15
Annuity and universal life products	2,995	3,404	2,975	3,093	3,022	28,962	44,45
Pension risk transfer annuity payments	92	88	85	81	77	875	1,29
Funding agreements (FABN/FHLB)	308	506	855	375	750	649	3,44
Title claim loss estimated payments	210	210	220	179	121	943	1,88
Interest on fixed rate notes payable	132	117	117	117	117	571	1,17
Total	\$ 4,297	\$ 4,455	\$ 4,348	\$ 4,451	\$ 4,124	\$ 34,267	\$ 55,94

As of December 31, 2021, we had title insurance reserves of \$1,883 million. The amounts and timing of these obligations are estimated and are not set contractually. While we believe that historical loss payments are a reasonable source for projecting future claim payments, there is significant inherent uncertainty in this payment pattern estimate because of the potential impact of changes in:

- future mortgage interest rates, which will affect the number of real estate and refinancing transactions and; therefore, the rate at which title insurance claims will emerge;
- the legal environment whereby court decisions and reinterpretations of title insurance policy language to broaden coverage could increase total obligations and influence claim payout patterns;
- events such as fraud, escrow theft, multiple property title defects, foreclosure rates and individual large loss events that can substantially and unexpectedly cause increases in both the amount and timing of estimated title insurance loss payments; and
- loss cost trends whereby increases or decreases in inflationary factors (including the value of real estate) will influence the ultimate amount of title insurance loss payments.

Based on historical title insurance claim experience, we anticipate the above payment patterns. The uncertainty and variation in the timing and amount of claim payments could have a material impact on our cash flows from operations in a particular period.

We sponsor certain frozen pension and other post-retirement benefit plans. See Note U. *Employee Benefit Plans* to our Consolidated Financial Statements included in Item 8 of Part II of this Annual Report for further information.

Capital Stock Transactions. On July 17, 2018, our Board of Directors approved a three-year stock repurchase program effective August 1, 2018 (the "2018 Repurchase Program") under which we may purchase up to 25 million shares of our FNF common stock through July 31, 2021. On August 3, 2021, our Board of Directors approved the 2021 Repurchase Program under which we may purchase up to 25 million shares of our FNF common stock through July 31, 2024. We may make repurchases from time to time in the on market, in block purchases or in privately negotiated transactions, depending on market conditions and other factors. We repurchased 10,180,000 shares of FNF common stock during the year ended December 31, 2021 for approximately \$461 million, or an average of \$45.22 per share. Subsequent to December 31, 2021 and through market close on February 23, 2022, we repurchased a total of 250,000 shares for \$13 million, or an average of \$52.60 under the 2021 Repurchase Program. Since the original commencement of the 2021 Repurchase Program, we repurchased a total of 3,230,000 FNF common shares for an aggregate amount of \$161 million, or an average of \$49.90 per share.

Equity and Preferred Security Investments. Our equity and preferred security investments may be subject to significant volatility. Currently prevailing accounting standards require us to record the change in fair value of equity and preferred security investments held as of any given period end within earnings. Our results of operations in future periods is anticipated to be subject to such volatility.

Off-Balance Sheet Arrangements. In conducting our operations, we routinely hold customers' assets in escrow, pending completion of real estate transactions, and are responsible for the proper disposition of these balances for our customers. Certain of these amounts are maintained in segregated bank accounts and have not been included in the accompanying Consolidated Balance Sheets, consistent with Generally Accepted Accounting Principles and industry practice. These balances amounted to \$30.5 billion and \$26.5 billion at December 31, 2021 and 2020, respectively. As a result of holding these customers' assets in escrow, we have ongoing programs for realizing economic benefits during the year through favorable borrowing and vendor arrangements with various banks.

We have unfunded investment commitments as of December 31, 2021 based upon the timing of when investments are executed compared to when the actual investments are funded, as some investments require that funding occur over a period of months or years. Please refer to Note E *Investments* and Note H *Commitments and Contingencies* to the Consolidated Financial Statements included in Item 8 of Part II of this Annual Report for additional details on unfunded investment commitments.

FHLB Collateral. We are currently a member of the FHLB and are required to maintain a collateral deposit that backs any funding agreements issued. We use these funding agreements as part of a spread enhancement strategy. We have the ability to obtain funding from the FHLB based on a percentage of the value of our assets, subject to the availability of eligible collateral. Collateral is pledged based on the outstanding balances of FHLB funding agreements. The amount of funding varies based on the type, rating and maturity of the collateral posted to the FHLB. Generally, U.S. government agency notes and mortgage-backed securities are pledged to the FHLB as collateral. Market value fluctuations resulting from changes in interest rates, spreads and other risk factors for each type of asset are monitored and additional collateral is either pledged or released as needed.

Our borrowing capacity under these credit facilities does not have an expiration date as long as we maintain a satisfactory level of creditworthiness based on the FHLB's credit assessment. As of December 31, 2021 and 2020, we had \$1,543 million and \$1,203 million, respectively, in FHLB non-putable funding agreements included under contractholder funds on our consolidated balance sheet. As of December 31, 2021 and 2020, we had assets with a fair value of approximately \$2,420 million and \$1,471 million, respectively, which collateralized the FHLB funding agreements. Assets pledged to the FHLB are included in fixed maturities, AFS, on our consolidated balance sheets.

Collateral-Derivative Contracts. Under the terms of our ISDA agreements, we may receive from, or deliver to, counterparties collateral to assure that all terms of the ISDA agreements will be met with regard to the Credit Support Annex ("CSA"). The terms of the CSA call for us to pay interest on any cash received equal to the federal funds rate. As of December 31, 2021 and 2020, respectively, \$790 million and \$491 million of collateral was posted by our counterparties as they did not meet the net exposure thresholds. Collateral requirements are monitored on a daily basis and incorporate changes in market values of both the derivatives contract as well as the collateral pledged. Market value fluctuations are due to changes in interest rates, spreads and other risk factors.

Item 7A. Quantitative and Qualitative Disclosure about Market Risk

In the normal course of business, we are routinely subject to a variety of risks, as described in Item 1A. *Risk Factors* of this Annual Report and in our other filings with the Securities and Exchange Commission. For example, we are exposed to the risk that decreased real estate activity, which depends in part on the level of interest rates, may reduce our revenues.

The risks related to our business also include certain market risks that may affect our debt and other financial instruments. At present, we face the market risks associated with our marketable equity securities subject to equity price volatility and with interest rate movements on our fixed income investments.

We regularly assess these market risks and have established policies and business practices designed to protect against the adverse effects of these exposures.

At December 31, 2021, we had \$3,096 million in long-term debt, none of which bears interest at a floating rate. Accordingly, fluctuations in market interest rates will not have a material impact on our resulting interest expense.

Our fixed maturity investments, certain preferred securities and our floating rate debt are subject to an element of market risk from changes in interest rates. Increases and decreases in prevailing interest rates generally translate into decreases and increases in fair values of those instruments. Additionally, fair values of interest rate sensitive instruments may be affected by the creditworthiness of the issuer, prepayment options, relative values of alternative investments, the liquidity of the instrument and other general market conditions. We manage interest rate risk through a variety of measures. We monitor our interest rate risk and make investment decisions to manage the perceived risk.

Equity price risk is the risk that we will incur economic losses due to adverse changes in equity prices. In the past, our exposure to changes in equity prices primarily resulted from our holdings of equity securities. At December 31, 2021, we held \$1,263 million in marketable equity securities (not including our investments in preferred securities of \$1,401 million and our investments in unconsolidated affiliates of \$2,486 million). The carrying values of investments subject to equity price risks are based on quoted market prices as of the balance sheet date. Market prices are subject to fluctuation and, consequently, the amount realized in the subsequent sale of an investment may significantly differ from the reported market value. Fluctuation in the market price of a security may result from perceived changes in the underlying economic characteristics of the investee, the relative price of alternative investments and general market conditions. Furthermore, amounts realized in the sale of a particular security may be affected by the relative quantity of the security being sold.

Financial instruments, which potentially subject us to concentrations of credit risk, consist primarily of cash equivalents, short-term investments, and trade receivables. We require placement of cash in financial institutions evaluated as highly creditworthy.

For purposes of this Annual Report, we perform a sensitivity analysis to determine the effects that market risk exposures may have on the fair values of our debt and other financial instruments.

The financial instruments that are included in the sensitivity analysis with respect to interest rate risk include fixed maturity investments, preferred securities and notes payable. The financial instruments that are included in the sensitivity analysis with respect to equity price risk include marketable equity securities. With the exception of our equity method investments, it is not anticipated that there would be a significant change in the fair value of other long-term investments or short-term investments if there were a change in market conditions, based on the nature and duration of the financial instruments involved.

To perform the sensitivity analysis, we assess the risk of loss in fair values from the effect of hypothetical changes in interest rates and equity prices on market-sensitive instruments. The changes in fair values for interest rate risks are determined by estimating the present value of future cash flows using various models, primarily duration modeling. The changes in fair

values for equity price risk are determined by comparing the market price of investments against their reported values as of the balance sheet date.

Information provided by the sensitivity analysis does not necessarily represent the actual changes in fair value that we would incur under normal market conditions because, due to practical limitations, all variables other than the specific market risk factor are held constant. For example, our reserve for title claim losses (representing 3.7% of total liabilities at December 31, 2021) is not included in the hypothetical effects.

Market Risk Factors

Market risk is the risk of the loss of fair value resulting from adverse changes in market rates and prices, such as interest rates, foreign currency exchange rates, commodity prices and equity prices. Market risk is directly influenced by the volatility and liquidity in the markets in which the related underlying financial instruments are traded. We have significant holdings in financial instruments, which are naturally exposed to a variety of market risks. They are primarily exposed to interest rate risk, credit risk and equity price risk and have some exposure to counterparty risk, which affect the fair value of financial instruments subject to market risk.

We have no market risk sensitive instruments entered into for trading purposes; therefore, all of our market risk sensitive instruments were entered into for purposes other than trading. The results of the sensitivity analysis at December 31, 2021 and 2020, are as follows:

Interest Rate Risk

At December 31, 2021, an increase (decrease) in the levels of interest rates of 100 basis points, with all other variables held constant, would result in a (decrease) increase in the fair value of our fixed maturity securities and certain of our investments in preferred securities, which are tied to interest rates of \$2.3 billion as compared with a (decrease) increase of \$1.3 billion at December 31, 2020.

The actuarial models used to estimate the impact of a one percentage point change in market interest rates incorporate numerous assumptions, require significant estimates and assume an immediate and parallel change in interest rates without any management of the investment portfolio in reaction to such change. Consequently, potential changes in value of financial instruments indicated by these simulations will likely be different from the actual changes experienced under given interest rate scenarios, and the differences may be material. Because we actively manage our investments and liabilities, the net exposure to interest rates can vary over time. However, any such decreases in the fair value of fixed maturity securities, unless related to credit concerns of the issuer requiring allowances for credit losses, would generally be realized only if we were required to sell such securities at losses prior to their maturity to meet liquidity needs. Within our F&G segment, liquidity needs are managed using the surrender and withdrawal provisions of the annuity contracts and through other means.

Equity Price Risk

At December 31, 2021, a 10% increase (decrease) in market prices, with all other variables held constant, would result in an increase (decrease) in the fair value of our equity securities portfolio of \$126 million, as compared with an increase (decrease) of \$196 million at December 31, 2020.

Interest Rate Risk Related to our F&G Segment

Interest rate risk is the F&G segment's primary market risk exposure. We define interest rate risk as the risk of an economic loss due to adverse changes in interest rates. This risk arises from F&G's holdings in interest sensitive assets and liabilities, primarily as a result of investing life insurance premiums and fixed annuity deposits received in interest-sensitive assets and carrying these funds as interest-sensitive liabilities. Substantial and sustained increases or decreases in market interest rates can affect the profitability of the insurance products and the fair value of our investments, as the majority of F&G's insurance liabilities are backed by fixed maturity securities.

The profitability of most of F&G's products depends on the spreads between interest yield on investments and rates credited on insurance liabilities. F&G has the ability to adjust the rates credited, primarily caps and credit rates, on the majority of the annuity liabilities at least annually, subject to minimum guaranteed values. In addition, the majority of the annuity products have surrender and withdrawal penalty provisions designed to encourage persistency and to help ensure targeted spreads are earned. However, competitive factors, including the impact of the level of surrenders and withdrawals, may limit F&G's ability to adjust or maintain crediting rates at the levels necessary to avoid a narrowing of spreads under certain market conditions.

In order to meet F&G's policy and contractual obligations, F&G must earn a sufficient return on invested assets. Significant changes in interest rates exposes F&G to the risk of not earning the anticipated spreads between the interest rate earned on its investments and the credited interest rates paid on outstanding policies and contracts. Both rising and declining interest rates can negatively affect interest earnings, spread income and the attractiveness of certain products.

During periods of increasing interest rates, F&G may offer higher crediting rates on interest-sensitive products, such as IUL insurance and fixed annuities, and may increase crediting rates on in-force products to keep these products competitive. A rise in interest rates, in the absence of other countervailing changes, will result in a decline in the market value of F&G's investment portfolio.

As part of F&G's asset liability management ("ALM") program, F&G has made a significant effort to identify the assets appropriate to different product lines and ensure investing strategies match the profile of these liabilities. The ALM strategy is designed to align the expected cash flows from the investment portfolio with the expected liability cash flows. As such, a major component of F&G's effort to manage interest rate risk has been to structure the investment portfolio with cash flow characteristics that are consistent with the cash flow characteristics of the insurance liabilities. F&G uses actuarial models to simulate the cash flows expected from the existing business under various interest rate scenarios. These simulations enable F&G to measure the potential gain or loss in the fair value of interest rate-sensitive financial instruments, to evaluate the adequacy of expected cash flows from assets to meet the expected cash requirements of the liabilities and to determine if it is necessary to lengthen or shorten the average life and duration of our investment portfolio. Duration measures the price sensitivity of a security to a small change in interest rates. When the durations of assets and liabilities are similar, exposure to interest rate risk is minimized because a change in the value of assets could be expected to be largely offset by a change in the value of liabilities.

The duration of the investment portfolio, excluding cash and cash equivalents, derivatives, policy loans, and common stocks as of December 31, 2021, is summarized as follows:

(Dollars in millions)		
Duration (years)	Amortized Cost	% of Total
0-4	\$ 17,765	48 %
5-9	8,414	23 %
10-14	5,619	15 %
15-19	4,474	12 %
20-30	883	2 %
Total	\$ 37,155	100 %

Equity Price Risk Related to our F&G Segment

Our F&G segment is exposed to equity price risk through certain insurance products. F&G offers a variety of FIA/ IUL contracts with crediting strategies linked to the performance of indices such as the S&P 500 Index, Dow Jones Industrials or the NASDAQ 100 Index, and target volatility indices. Additionally, the estimated cost of providing GMWB on FIA products incorporates various assumptions about the overall performance of equity markets over certain time periods. Periods of significant and sustained downturns in equity markets, increased equity volatility or reduced interest rates could result in an increase in the valuation of the future policy benefit or policyholder account balance liabilities associated with such products, resulting in a reduction in F&G's net earnings. The rate of amortization of intangibles related to FIA/ IUL products and the cost of providing GMWB could also increase if equity market performance is worse than assumed.

To economically hedge the equity returns on these products, F&G purchases derivatives to hedge the FIA and IUL equity exposures. The primary way F&G hedges FIA/ IUL equity exposure is to purchase over the counter equity index call options from broker-dealer derivative counterparties approved by F&G. The second way to hedge FIA equity exposure is by purchasing exchange traded equity index futures contracts. This hedging strategy enables F&G to reduce the overall hedging costs and achieve a high correlation of returns on the call options purchased relative to the index credits earned by the FIA/ IUL contractholders. The majority of the call options are one-year options purchased to match the funding requirements underlying the FIA/ IUL contracts. These hedge programs are limited to the current policy term of the FIA/ IUL contracts. Future returns, which may be reflected in FIA/ IUL contracts' credited rates beyond the current policy term, are not hedged. F&G attempts to manage the costs of these purchases through the terms of its FIA/ IUL contracts, which permit F&G to change cap, spread or participation rates, subject to certain guaranteed minimums that must be maintained.

The derivatives are used to fund the FIA/ IUL contract index credits and the cost of the call options purchased is treated as a component of spread earnings. While the FIA/ IUL hedging program does not explicitly hedge GAAP income volatility, the FIA/ IUL hedging program tends to mitigate a significant portion of the GAAP reserve changes associated with movements in the equity market. This is due to the fact that a key component in the calculation of GAAP reserves is the market valuation of

the current term embedded derivative. Due to the alignment of the embedded derivative reserve component with hedging of this same embedded derivative, there should be a reasonable match between changes in this component of the reserve and changes in the assets backing this component of the reserve. However, there may be an interim mismatch due to the fact that the hedges, which are put in place are only intended to cover exposures expected to remain until the end of an indexing term. To the extent index credits earned by the contractholder exceed the proceeds from option expirations and futures income, F&G incurs a raw hedging loss.

See Note F *Derivative Financial Instruments* in the Consolidated Financial Statements included in Item 8 of Part II of this Annual Report for additional details on the derivatives portfolio.

Fair value changes associated with these investments are intended to, but do not always, substantially offset the increase or decrease in the amounts added to policyholder account balances for indexed products. When index credits to policyholders exceed option proceeds received at expiration related to such credits, any shortfall is funded by F&G's net investment spread earnings and futures income. See "Non-GAAP Financial Measures" for further information. For the year ended December 31, 2021 and the seven months ended December 31, 2020, the annual index credits to policyholders on their anniversaries were \$628 million and \$178 million, respectively. Proceeds received at expiration on options related to such credits were \$702 million and \$185 million, respectively.

Other market exposures are hedged periodically depending on market conditions and our risk tolerance. The FIA/ IUL hedging strategy economically hedges the equity returns and exposes us to the risk that unhedged market exposures result in divergence between changes in the fair value of the liabilities and the hedging assets. F&G uses a variety of techniques, including direct estimation of market sensitivities, to monitor this risk daily. F&G intends to continue to adjust the hedging strategy as market conditions and risk tolerance change.

Credit Risk and Counterparty Risk Related to our F&G Segment

Our F&G segment is exposed to the risk that a counterparty will default on its contractual obligation resulting in financial loss. F&G's major source of credit risk arises predominantly in its insurance operations' portfolios of debt and similar securities. The fair value of F&G's fixed maturity portfolio totaled \$30 billion and \$25 billion at December 31, 2021 and 2020, respectively. F&G's credit risk materializes primarily as impairment losses. F&G is exposed to occasional cyclical economic downturns, during which impairment losses may be significantly higher than the long-term historical average. This is offset by years where it expects the actual impairment losses to be substantially lower than the long-term average. Credit risk in the portfolio can also materialize as increased capital requirements as assets migrate into lower credit qualities over time. The effect of rating migration on its capital requirements is also dependent on the economic cycle and increased asset impairment levels may go hand in hand with increased asset related capital requirements.

F&G attempts to manage the risk of default and rating migration by applying disciplined credit evaluation and underwriting standards and limiting allocations to lower quality, higher risk investments. In addition, F&G diversifies exposure by issuer and country, using rating based issuer and country limits. F&G also sets investment constraints that limit our exposure by industry segment. To limit the impact that credit risk can have on earnings and capital adequacy levels, F&G has portfolio-level credit risk constraints in place. Limit compliance is monitored on a monthly or, in some cases, daily basis.

In connection with the use of call options, F&G is exposed to counterparty credit risk—the risk that a counterparty fails to perform under the terms of the derivative contract. F&G has adopted a policy of only dealing with credit worthy counterparties and obtaining sufficient collateral where appropriate, as a means of attempting to mitigate the financial loss from defaults. The exposure and credit rating of the counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst different approved counterparties to limit the concentration in one counterparty. This policy allows for the purchase of derivative instruments from counterparties and/or clearinghouses that meet the required qualifications under the Iowa Code. F&G reviews the ratings of all the counterparties periodically. Collateral support documents are negotiated to further reduce the exposure when deemed necessary. See Note F *Derivative Financial Instruments* in the Consolidated Financial Statements included in Item 8 of Part II of this Annual Report for additional information regarding our exposure to credit loss.

F&G also has credit risk related to the ability of reinsurance counterparties to honor their obligations to pay the contract amounts under various agreements. To minimize the risk of credit loss on such contracts, F&G diversifies exposures among many reinsurers and limits the amount of exposure to each based on credit rating. F&G also generally limits selection of counterparties with which to do new transactions to those with an "A-" credit rating or above and/or that are appropriately collateralized and provide credit for reinsurance. When exceptions are made to that principle, F&G ensures that collateral is obtained to mitigate risk of loss. The following table presents F&G's reinsurance recoverable balances and financial strength ratings for our five largest reinsurance recoverable balances as of December 31, 2021:

Parent Company/Principal Reinsurers	Reinsurance Recoverable	Financial Strength Rating			
		AM Best	S&P	Fitch	Moody's
Wilton Reinsurance Company	\$1,269	A+	not rated	A+	not rated
Aspida Re	873	A-	not rated	BBB	not rated
Somerset	780	A-	BBB+	not rated	not rated
Security Life of Denver Insurance Company	102	not rated	A-	A-	Baa1
London Life	102	A+	not rated	not rated	not rated

In the normal course of business, certain reinsurance recoverables are subject to reviews by the reinsurers. We are not aware of any material disputes arising from these reviews or other communications with the counterparties as of December 31, 2021 that would require an allowance for uncollectible amounts.

For information on concentrations of reinsurance risk, refer to Note O *Reinsurance* in the Consolidated Financial Statements included in Item 8 of Part II of this Annual Report.

For information on counter party risk associated with our title business, refer to Note H *Commitments and Contingencies* in the Consolidated Financial Statements included in Item 8 of Part II of this Annual Report.

Use of Estimates and Assumptions

The preparation of our Consolidated Financial Statements included in Item 8 of Part II of this Annual Report in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates and assumptions used.

Concentrations of Financial Instruments Related to our F&G Segment

As of December 31, 2021, our F&G segment's most significant investment in one industry, excluding United States ("U.S.") and Foreign Government securities, was its investment securities in the Banking industry with a fair value of \$2,919 million or 8% of the invested assets portfolio and an amortized cost of \$2,854 million. As of December 31, 2021, F&G's holdings in this industry include investments in 132 different issuers with the top ten investments accounting for 37% of the total holdings in this industry. As of December 31, 2021, F&G had one issuer, Blackstone Wave Asset Holdco, in which investments exceeded 10% of shareholders' equity and was F&G's largest concentration in any single issuer with a total fair value of \$870 million or 2% of the invested assets portfolio. Blackstone Wave Asset Holdco is a special purpose vehicle that holds investments in numerous limited partnership investments. Those limited partnership investments are further diversified by holding interest in multiple individual investments and industries.

Concentrations of Financial and Capital Markets Risk Related to our F&G Segment

Our F&G segment is exposed to financial and capital markets risk, including changes in interest rates and credit spreads, which can have an adverse effect on its results of operations, financial condition and liquidity. Exposure to such financial and capital markets risk relates primarily to the market price and cash flow variability associated with changes in interest rates. A rise in interest rates, in the absence of other countervailing changes, will increase the net unrealized loss position and, if long-term interest rates rise dramatically within a six to twelve month time period, certain of F&G's products may be exposed to disintermediation risk. Disintermediation risk refers to the risk that policyholders surrender their contracts in a rising interest rate environment, requiring F&G to liquidate assets in an unrealized loss position. We attempt to mitigate the risk, including changes in interest rates by investing in less rate-sensitive investments, including senior tranches of collateralized loan obligations, non-agency residential mortgage-backed securities, and various types of asset backed securities. Management believes this risk is also mitigated to some extent by surrender charge protection provided by F&G's products. We expect to continue to face these challenges and uncertainties that could adversely affect our results of operations and financial condition.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Directors of Fidelity National Financial, Inc.

Opinion on Internal Control over Financial Reporting

We have audited Fidelity National Financial, Inc. and subsidiaries' internal control over financial reporting as of December 31, 2021, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, Fidelity National Financial, Inc. and subsidiaries (the Company) maintained, in all material respects, effective internal control over financial reporting as of December 31, 2021, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of December 31, 2021 and 2020, the related consolidated statements of earnings, comprehensive earnings, equity and cash flows for each of the three years in the period ended December 31, 2021, and the related notes and financial statement schedules listed in the Index at Item 15(a)(2) and our report dated February 25, 2022 expressed an unqualified opinion thereon.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and the Board of Directors of Fidelity National Financial, Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Fidelity National Financial, Inc. and subsidiaries (the Company) as of December 31, 2021 and 2020, the related consolidated statements of earnings, comprehensive earnings, equity and cash flows for each of the three years in the period ended December 31, 2021, and the related notes and financial statement schedules listed in the Index at Item 15(a)(2) (collectively referred to as the “consolidated financial statements”). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company at December 31, 2021 and 2020, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2021, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2021, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated February 25, 2022 expressed an unqualified opinion thereon.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Loss Provision Rate Assumption related to the Reserve for Title Claim Losses

Description of the Matter

The Company's reserve for title claim losses totaled \$1.9 billion as of December 31, 2021. As discussed in Note A to the consolidated financial statements, the reserve for title claim losses includes known claims as well as losses that have been incurred but not yet reported, net of recoupments. The Company establishes reserves for claims which are incurred but not reported at the time premium revenue is recognized based on estimated loss provision rates. There is significant uncertainty inherent in determining the loss provision rates.

Auditing the Company's reserve for title claim losses was complex because of the highly judgmental nature of the determination of the loss provision rates used in the valuation of the reserve for title claim losses. The significant judgment was primarily due to the sensitivity of management's estimate to claim loss history, industry trends, current legal environment, and geographic considerations.

How we Addressed the Matter in Our Audit

We obtained an understanding, evaluated the design, and tested the operating effectiveness of the Company's controls over management's process for the development of the loss provision rates and the recorded reserve for title claim losses. These controls included, among others, the review and approval process management has in place for the development of the loss provision rates and the estimation of the reserve for title claim losses.

To evaluate the judgment used by management in determining the loss provision rates, among other procedures, we considered claim loss history, industry trends, current legal environment and geographic considerations, and how management assessed these factors in the current period as compared to prior periods. We involved actuarial professionals with specialized skills and industry knowledge, who assisted in performing an evaluation of the Company's current year loss provision rates compared with those used in prior periods, as well as a review of loss development experience for prior years. We also independently calculated a range of reasonable reserve estimates which we compared to management's recorded reserve for title claim losses.

Value of Business Acquired (VOBA), Deferred Acquisition Costs (DAC), Deferred Sales Inducements (DSI) and secondary guarantee liabilities*Description of the Matter*

At December 31, 2021 VOBA, DAC, and DSI reported within other intangible assets, net totaled \$2.0 billion and contractholder funds totaled \$35.5 billion, a portion of which related to indexed universal life (IUL)-type and Investment-type contracts with secondary guarantees. As discussed in Note A to the consolidated financial statements, VOBA, DAC, and DSI are generally amortized over the lives of the policies in relation to the emergence of actual gross profits (AGPs) and estimated gross profits (EGPs). Secondary guarantee liabilities on IUL-type products or Investment-type contracts are calculated by multiplying the benefit ratio by the cumulative assessments recorded from contract inception through the balance sheet date less the cumulative secondary guarantee benefit payments plus interest. The benefit ratio is the ratio of the present value of secondary guarantees to the present value of the assessments used to provide the secondary guarantees. The assessments are calculated using the same assumptions used in VOBA, DAC, and DSI EGPs. There is significant uncertainty inherent in calculating EGPs and assessments as the calculation is sensitive to management's best estimate of assumptions such as earned rate, budgeted option costs, surrender rates, mortality, and guaranteed minimum withdrawal benefit (GMWB) utilization. Changes in assumptions, including the Company's earned rate, budgeted option costs, surrender rates, mortality, and GMWB utilization can have a significant impact on the pattern of EGPs of the underlying business and as a result the amortization of VOBA, DAC and DSI balances. Management's assumptions are adjusted, also known as unlocking, based on actual policyholder behavior and market experience and projecting for expected trends. The unlocking results in amortization being recalculated using the new assumptions for estimated gross profits, resulting either in additional or less cumulative amortization expense. Additionally, if experience or assumption changes result in a new benefit ratio, the secondary guarantee liabilities are adjusted to reflect the changes in a manner similar to the unlocking of VOBA, DAC, and DSI.

Auditing the valuation of the Company's VOBA, DAC, and DSI that are amortized in relation to the emergence of AGPs/EGPs and valuation of secondary guarantee liabilities on IUL-type products or Investment-type contracts was complex because of the highly judgmental nature of the methods used and determination of the assumptions applied to determine the EGPs and assessments. The high degree of judgment was primarily due to the sensitivity of the EGPs and assessments to the methods used and assumptions applied which have a significant effect on the valuation of VOBA, DAC, DSI and secondary guarantee liabilities on IUL-type products or Investment-type contracts.

How we Addressed the Matter in Our Audit

We obtained an understanding, evaluated the design and tested the operating effectiveness of the Company's controls over the VOBA, DAC, DSI, and contractholder funds estimation processes. These controls included, among others, the review and approval process management has in place for the development of the significant assumptions described above.

To evaluate the judgment used by management in determining the EGPs and assessments, among other procedures, we involved actuarial specialists and evaluated the methodology applied by management in determining the EGPs and assessments with those used in prior periods. To evaluate the significant assumptions used by management, we compared policyholder behavior assumptions that we identified as being higher risk to prior actual experience, observable market data or management's estimates of prospective changes in these assumptions. We performed an independent recalculation of EGPs and secondary guarantee liabilities for a sample of product cohorts, which we compared to the actuarial model used by management.

Valuation of Investments in Securities

Description of the Matter

The Company's fair value of fixed maturity securities totaled \$32.0 billion as of December 31, 2021. The fair value of a subset of these securities, including asset backed securities and bonds, is based on non-binding broker quotes as described in Note D to the consolidated financial statements. The lack of visibility into assumptions used in non-binding broker quotes is a significant unobservable input, which creates greater subjectivity when determining the fair values.

Auditing the fair value of the securities valued by brokers was especially challenging because determining the fair value is complex and highly judgmental and involves using inputs and assumptions that are not directly observable in the market.

How we Addressed the Matter in Our Audit

We obtained an understanding, evaluated the design and tested the operating effectiveness of management's valuation process for broker-quoted securities. These controls included management's evaluation of the broker-quoted values compared to an independently calculated range of values.

To test the fair value of the securities, we utilized the support of our valuation specialists which included, among other procedures, independently calculating a reasonable range of fair values for a sample of securities based on independently obtained information or available transaction data for similar securities. We compared these ranges to management's estimates of fair value for the selected securities.

Description of the Matter

Assumptions related to Fixed Indexed Annuity Embedded Derivative Liability

As of December 31, 2021, the fair value of the Company's fixed indexed annuity embedded derivative liability totaled \$3.9 billion. Certain of the Company's fixed indexed annuity contracts allow the policyholder to elect an equity index linked feature, where amounts credited to the contract's account value are linked to the performance of designated equity indices selected by the policyholder. The equity index crediting feature is accounted for as an embedded derivative liability and reported at fair value as discussed in Note D to the consolidated financial statements.

Auditing the valuation of the Company's fixed indexed annuity embedded derivative was complex because of the highly judgmental nature of the determination of the assumptions required to determine the fair value of the embedded derivative. In particular, the fair value was sensitive to the significant assumptions used to determine future policy growth including the mortality, surrender rates, partial withdrawals, GMWB utilization, non-performance spread, and option cost. There is significant uncertainty inherent in determining the mortality, surrender rates, partial withdrawals, GMWB utilization, non-performance spread and option cost assumptions.

How we Addressed the Matter in Our Audit

We obtained an understanding, evaluated the design, and tested the operating effectiveness of the Company's controls over management's process for the development of the significant assumptions used in measuring the fair value of the embedded derivative for fixed indexed annuities. These controls included, among others, the review and approval process management has in place for the development of the significant assumptions.

To evaluate the judgment used by management in determining the assumptions used in measuring the fair value of the fixed indexed annuity embedded derivative, among other procedures, we involved actuarial specialists and evaluated the methodology applied by management in determining the fair value with those used in the prior period and in the industry. To evaluate the significant assumptions used by management in the methodology applied, we compared policyholder behavior assumptions to prior actual experience and management's estimate of prospective changes in the assumptions. In addition, we compared the nonperformance spread and option costs assumptions to observable market data. We performed an independent recalculation of the embedded derivative for a sample of products for comparison with the actuarial model used by management.

/s/ Ernst & Young LLP

We have served as the Company's auditor since 2017.

FIDELITY NATIONAL FINANCIAL, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note A. Business and Summary of Significant Accounting Policies

The following describes the business and significant accounting policies of Fidelity National Financial, Inc. and its subsidiaries (collectively, “we,” “us,” “our,” the “Company” or “FNF”), which have been followed in preparing the accompanying Consolidated Financial Statements.

Description of the Business

We are a leading provider of (i) title insurance, escrow and other title-related services, including trust activities, trustee sales guarantees, recordings and reconveyances and home warranty products, (ii) technology and transaction services to the real estate and mortgage industries and (iii) annuity and life insurance products. FNF is one of the nation’s largest title insurance companies operating through its title insurance underwriters - Fidelity National Title Insurance Company (“FNTIC”), Chicago Title Insurance Company (“Chicago Title”), Commonwealth Land Title Insurance Company (“Commonwealth Title”), Alamo Title Insurance and National Title Insurance of New York Inc. - which collectively issue more title insurance policies than any other title company in the United States. Through our subsidiary, ServiceLink Holdings, LLC (“ServiceLink”), we provide mortgage transaction services, including title-related services and facilitation of production and management of mortgage loans. We are also a leading provider of insurance solutions serving retail annuity and life customers and institutional clients through our wholly-owned subsidiary, F&G Annuities & Life (“F&G”).

For information about our reportable segments refer to Note J *Segment Information*.

Recent Developments

3.20% Senior Notes

On September 17, 2021, we completed our underwritten public offering of \$450 million aggregate principal amount of our 3.20% Notes due 2051 (the “3.20% Notes”), pursuant to our registration statement on Form S-3 (File No. 333-239002) and the related prospectus supplement. The net proceeds from the registered offering of the 3.20% Notes were approximately \$443 million, after deducting underwriting discounts, commissions and offering expenses. We plan to use the net proceeds from the offering for general corporate purposes. For further information related to the 3.20% Notes, refer to Note G *Notes Payable*.

Approval of the 2021 Repurchase Program

On August 3, 2021, our Board of Directors approved a new three-year stock repurchase program effective August 3, 2021 (the “2021 Repurchase Program”) under which we may purchase up to 25 million shares of our FNF common stock through July 31, 2024. We may make repurchases from time to time in the open market, in block purchases or in privately negotiated transactions, depending on market conditions and other factors.

Merger of Alight, Inc. (“Alight”) and Foley Trasimene Acquisition Corp. (“FTAC”)

On January 25, 2021, each of our wholly-owned subsidiaries, FNTIC, Commonwealth Title and Chicago Title (collectively, the “FTAC Subscribers”) entered into common stock subscription agreements (the “FTAC Subscription Agreements”) with Alight (f/k/a Acrobat Holdings, Inc.) and FTAC to purchase in the aggregate \$150 million (the “Alight Purchase Price”) of Class A Common Stock, par value \$.001 per share, of Alight at a purchase price of \$10.00 per share.

On June 29, 2021, we funded the Alight Purchase Price. Additionally, Alight paid the FTAC Subscribers a fee of 2.5% of the Alight Purchase Price upon closing of the transactions in accordance with the Business Combination Agreement dated January 25, 2021, as amended and restated April 29, 2021, by and among FTAC, Alight and other parties thereto.

On July 2, 2021, FTAC merged with Alight. The combined company operates as Alight, Inc. and is traded on the New York Stock Exchange (“NYSE”) under the symbol “ALIT.” As of December 31, 2021 our shares of Alight are fully registered and are included in equity securities within the accompanying Consolidated Balance Sheets.

F&G Enters Funding Agreement Backed Note (“FABN”) Market

In June 2021, we established a funding agreement-backed notes program (the “FABN Program”), pursuant to which Fidelity & Guaranty Life Insurance Company (“FGL Insurance”) may issue funding agreements to a special purpose statutory trust (the “Trust”) for spread lending purposes. The maximum aggregate principal amount permitted to be outstanding at any one time under the FABN Program is currently \$5.0 billion. As of December 31, 2021, we had approximately \$1.9 billion outstanding under the FABN program. In January 2022, we issued an additional \$400 million funding agreement.

F&G Enters Pension Risk Transfer ("PRT") Market

In July 2021, we entered the PRT market, pursuant to which FGL Insurance and Fidelity & Guaranty Life Insurance Company of New York ("FGL NY Insurance") may issue group annuity contracts to discharge pension plan liabilities from a pension plan sponsor. As of December 31, 2021, we closed PRT transactions which represent pension obligations of \$1.1 billion.

Merger of Paysafe Limited ("Paysafe") and Foley Trasimene Acquisition Corp. II ("FTAC II")

On December 7, 2020, each of our wholly-owned subsidiaries, FNTIC, Commonwealth Title, Chicago Title and F&G (collectively, the "FTAC II Subscribers"), entered into common stock subscription agreements with Paysafe and FTAC II to purchase in the aggregate \$500 million (the "Paysafe Purchase Price") of common shares, par value \$0.001 per share, of Paysafe at a purchase price of \$10.00 per share ("the PIPE Investment"). On March 30, 2021, FTAC II merged with Paysafe, an exempted limited company incorporated under the laws of Bermuda and a leading integrated payments platform (the "FTAC II Paysafe Merger"), in accordance with the agreement and plan of merger dated December 7, 2020. The newly combined company operates as Paysafe and is traded on the NYSE under the symbol PSFE. The FTAC II Paysafe Merger was funded with the cash held in trust at FTAC II, forward purchase commitments, private investment in public equity ("PIPE") commitments and equity of Paysafe.

On March 30, 2021, the FTAC II Subscribers funded the Paysafe Purchase Price and received 50 million common shares of Paysafe. As of December 31, 2021, we hold approximately 7% of the outstanding common shares of Paysafe, which are included in equity securities in the accompanying Consolidated Balance Sheets. In connection with the PIPE Investment, we received a fee of 1.6% of the Paysafe Purchase Price as described in the agreement and plan of merger dated December 7, 2020.

Principles of Consolidation and Basis of Presentation

The accompanying Consolidated Financial Statements are prepared in accordance with generally accepted accounting principles in the United States ("GAAP") and include our accounts as well as our wholly-owned and majority-owned subsidiaries. All intercompany profits, transactions and balances have been eliminated. In our title segment, our investments in unconsolidated subsidiaries and affiliates are accounted for using the equity method until such time that they become wholly or majority-owned. Earnings attributable to noncontrolling interests are recorded on the Consolidated Statements of Earnings relating to majority-owned subsidiaries with the appropriate noncontrolling interest that represents the portion of equity not related to our ownership interest recorded on the Consolidated Balance Sheets in each period.

We are also involved in certain entities that are considered variable interest entities ("VIEs") as defined under GAAP. Our involvement with VIEs is primarily to invest in assets that allow us to gain exposure to a broadly diversified portfolio of asset classes. A VIE is an entity that does not have sufficient equity to finance its own activities without additional financial support, where investors lack certain characteristics of a controlling financial interest, or where the entity is structured with non-substantive voting rights. We assess our relationships to determine if we have the ability to direct the activities, or otherwise exert control, to evaluate if we are the primary beneficiary of the VIE. If we determine we are the primary beneficiary of a VIE, we consolidate the assets and liabilities of the VIE in our Consolidated Financial Statements. See Note E *Investments* for additional information on our investments in VIEs.

Investments

Fixed Maturity Securities Available-for-Sale

Fixed maturity securities are purchased to support our investment strategies, which are developed based on factors including rate of return, maturity, credit risk, duration, tax considerations and regulatory requirements. Our investments in fixed maturity securities have been designated as available-for-sale ("AFS") and are carried at fair value, net of allowance for expected credit losses, with unrealized gains and losses included within accumulated other comprehensive income (loss) ("AOCI"), net of associated adjustments for deferred acquisition costs ("DAC"), value of business acquired ("VOBA"), deferred sales inducements ("DSI"), unearned revenue ("UREV"), Statement of Position 03-1, "Accounting and Reporting by Insurance Enterprises for Certain Nontraditional Long-Duration Contracts and for Separate Accounts," ("SOP 03-1") reserves, and deferred income taxes. Fair values for fixed maturity securities are principally a function of current market conditions and are valued based on quoted prices in markets that are not active or model inputs that are observable or unobservable. We recognize investment income on fixed maturities based on the interest method, which results in the recognition of a constant rate of return on the investment equal to the prevailing rate at the time of purchase or at the time of subsequent adjustments of book value. Changes in prepayment assumptions are accounted for prospectively. In our title segment, realized gains and losses on sales of our fixed maturity securities are determined on the basis of the cost of the specific investments sold and are credited or charged to income on a trade date basis. Our F&G segment uses FIFO cost basis and generally records security transactions on a trade date basis except for private placements, which are recorded on a settlement date basis. Realized gains and losses on sales of fixed maturity securities are reported within Recognized gains and losses, net in the accompanying Consolidated Statements of

Earnings. For details on our policy around allowance for expected credit losses on available-for-sale securities, refer to Note E *Investments*.

Preferred and Equity Securities

Equity and preferred securities held are carried at fair value as of the balance sheet dates. The fair values of our equity and preferred securities are based on quoted prices in active markets, or are valued based on quoted prices in markets that are not active or model inputs that are observable or unobservable. Changes in fair value and realized gains and losses on sales of our preferred and equity securities are reported within Recognized gains and losses, net in the accompanying Consolidated Statements of Earnings. Recognized gains and losses on sales of our preferred and equity securities are credited or charged to income on a trade date basis, unless the security is a private placement in which case settlement date basis is used.

Derivative Financial Instruments

In our F&G segment, we hedge certain portions of our exposure to product related equity market risk by entering into derivative transactions (primarily call options). All such derivative instruments are recognized as either assets or liabilities in the accompanying Consolidated Balance Sheets at fair value. The changes in fair value are reported within Recognized gains and losses, net in the accompanying Consolidated Statements of Earnings.

We purchase financial instruments and issue products that may contain embedded derivative instruments. If it is determined that the embedded derivative possesses economic characteristics that are not clearly and closely related to the economic characteristics of the host contract, and a separate instrument with the same terms would qualify as a derivative instrument, the embedded derivative is bifurcated from the host contract for measurement purposes. The embedded derivative is carried at fair value, which is determined through a combination of market observable inputs such as market value of option and interest swap rates and unobservable inputs such as the mortality multiplier, surrender and withdrawal rates and non-performance spread. The changes in fair value are reported within Benefits and other changes in policy reserves in the accompanying Consolidated Statements of Earnings. See a description of the fair value methodology used in Note D *Fair Value of Financial Instruments*.

Reinsurance Related Embedded Derivatives

As discussed in Note O *Reinsurance*, F&G entered into reinsurance agreements with Kubera Insurance (SAC) Ltd. ("Kubera"), effective December 31, 2018, and ASPIDA Life Re Ltd ("Aspida Re"), effective January 1, 2021, to cede certain multi-year guaranteed annuities ("MYGA") and deferred annuity GAAP and statutory reserves on a coinsurance funds withheld basis, net of applicable existing reinsurance. Effective October 31, 2021, the Kubera agreement was novated from Kubera to Somerset Reinsurance Ltd. ("Somerset"), a certified third-party reinsurer. Funds withheld arrangements allow the Company to retain legal ownership of assets backing reinsurance arrangements until they are earned by the reinsurer while passing credit risk associated with the assets in the funds withheld account to the reinsurer. These arrangements create embedded derivatives considered to be total return swaps with contractual returns that are attributable to the assets and liabilities associated with the reinsurance arrangement. The fair value of the total return swap is based on the change in fair value of the underlying assets held in the funds withheld portfolio. Investment results for the assets that support the coinsurance with funds withheld reinsurance arrangement, including gains and losses from sales, are passed directly to the reinsurer pursuant to contractual terms of the reinsurance arrangement. These total return swaps are not clearly and closely related to the underlying reinsurance contract and thus require bifurcation. The reinsurance related embedded derivative is reported in Prepaid expenses and other assets if in a net gain position, or Accounts payable and accrued liabilities, if in a net loss position on the Consolidated Balance Sheets and the related gains or losses are reported in Recognized gains (losses) on the Consolidated Statements of Earnings.

Mortgage Loans

Our investment in mortgage loans consists of commercial and residential mortgage loans on real estate, which are reported at amortized cost, less allowance for expected credit losses. For details on our policy around allowance for expected credit losses on mortgage loans, refer to Note E *Investments*.

Commercial mortgage loans are continuously monitored by reviewing appraisals, operating statements, rent revenues, annual inspection reports, loan specific credit quality, property characteristics, market trends and other factors.

Commercial mortgage loans are rated for the purpose of quantifying the level of risk. Loans are placed on a watch list when the debt service coverage ("DSC") ratio falls below and the loan-to-value ("LTV") ratios exceeds certain thresholds. Loans on the watchlist are closely monitored for collateral deficiency or other credit events that may lead to a potential loss of principal or interest. We define delinquent mortgage loans as 30 days past due, consistent with industry practice.

Residential mortgage loans have a primary credit quality indicator of either a performing or nonperforming loan. We define nonperforming residential mortgage loans as those that are 90 or more days past due and/or in nonaccrual status, which is assessed monthly. Generally, nonperforming residential mortgage loans have a higher risk of experiencing a credit loss. We

consider residential mortgage loans that are 90 or more days past due and have an LTV greater than 90% to be foreclosure probable.

Interest on loans is recognized on an accrual basis at the applicable interest rate on the principal amount outstanding. Loan origination fees and direct costs, as well as premiums and discounts, are amortized as level yield adjustments over the respective loan terms. Unamortized net fees or costs are recognized upon early repayment of the loans. Loan commitment fees are deferred and amortized on an effective yield basis over the term of the loan.

Short-term investments

Short-term investments consist primarily of money market instruments, which are carried at fair value, and commercial paper and loans, which have an original maturity of one year or less and are carried at amortized cost, which approximates fair value.

Investments in Unconsolidated Affiliates

In our F&G segment, we account for our investments in unconsolidated affiliates (primarily limited partnerships) using the equity method and use net asset value ("NAV") as a practical expedient to determine the carrying value. Income from investments in unconsolidated affiliates is included within Interest and investment income in the accompanying Consolidated Statements of Earnings. Recognition of income is delayed due to the availability of the related financial statements, which are obtained from the general partner generally on a one to three-month delay. Management meets quarterly with the general partner to determine whether any credit or other market events have occurred since prior quarter financial statements to ensure any material events are properly included in current quarter valuation and investment income. In our title business we account for our Investments in unconsolidated affiliates using the equity method of accounting and earnings on our investments in unconsolidated affiliates are recorded within Equity in earnings of unconsolidated affiliates within the Consolidated Statements of Earnings.

Interest and investment income

Dividends and interest income are recorded in Interest and investment income and recognized when earned. Income or losses upon call or prepayment of fixed maturity securities are recognized in Interest and investment income. Amortization of premiums and accretion of discounts on investments in fixed maturity securities are reflected in Interest and investment income over the contractual terms of the investments, and for callable investments at a premium, based on the earliest call date of the investments, in a manner that produces a constant effective yield.

For mortgage-backed and asset-backed securities, included in the fixed maturity securities portfolios, we recognize income using a constant effective yield based on anticipated cash flows and the estimated economic life of the securities. When actual prepayments differ significantly from originally anticipated prepayments, the effective yield is recalculated prospectively to reflect actual payments to date plus anticipated future payments. Any adjustments resulting from changes in effective yield are reflected in Interest and investment income.

Interest and investment income is presented net of earned investment management fees.

Cash and Cash Equivalents

Highly liquid instruments purchased as part of cash management with original maturities of three months or less are considered cash equivalents. The carrying amounts reported in the Consolidated Balance Sheets for these instruments approximate fair value.

Trade and Notes Receivables

The carrying values reported in the Consolidated Balance Sheets for trade and notes receivables approximate their fair value.

Premium revenues from agency title operations are recognized when the underlying title order and transaction closing, if applicable, are complete and reported to us. Premium revenues from agency operations and related commissions include an accrual based on estimated historical transaction volume data for policies that have closed in a particular period in which premiums have not yet been reported to us. Historically, the time lag between the closing of these transactions by our agents and the reporting of these policies, or premiums, to us has been up to 15 months, with 69% - 84% reported within three months following closing, an additional 14% - 26% reported within the next three months and the remainder within seven to fifteen months. In addition to accruing these earned but unreported agency premiums, we also accrue agent commission expense, which was 76.7% of agent premiums earned in 2021, 76.4% of agent premiums earned in 2020, and 76.3% of agent premiums earned in 2019. The amount due from our agents relating to this accrual, i.e., the agent premium less their contractual retained commission, was approximately \$113 million and \$65 million at December 31, 2021 and 2020, respectively. Due to the offsetting effects of reversing prior period accruals, the impact of this accrual to our recorded Agency title insurance premiums, Agent commissions and net earnings in any given period is not considered material.

Fair Value of Financial Instruments

The fair values of financial instruments presented in the Consolidated Financial Statements are estimates of the fair values at a specific point in time using available market information and appropriate valuation methodologies. These estimates are subjective in nature and involve uncertainties and significant judgment in the interpretation of current market data. See a description of the fair value methodology used in Note D *Fair Value of Financial Instruments*.

Fair Value of Assets Acquired and Liabilities Assumed in Business Combinations

FASB Accounting Standards Codification ("ASC") Topic 805, Business Combinations, requires an acquirer to recognize, separately from goodwill, the identifiable assets acquired, liabilities assumed, and any noncontrolling interest in the acquiree, and to measure these items generally at their acquisition date fair values. Goodwill is recorded as the residual amount by which the purchase price exceeds the fair value of the net assets acquired. If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, we are required to report provisional amounts in the financial statements for the items for which the accounting is incomplete. Adjustments to provisional amounts initially recorded that are identified during the measurement period are recognized in the reporting period in which the adjustment amounts are determined. This includes any effect on earnings of changes in depreciation, amortization, or other income effects as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date. During the measurement period, we are also required to recognize additional assets or liabilities if new information is obtained about facts and circumstances that existed as of the acquisition date that, if known, would have resulted in the recognition of those assets and liabilities as of that date. The measurement period ends the sooner of one year from the acquisition date or when we receive the information we were seeking about facts and circumstances that existed as of the acquisition date or learn that more information is not obtainable. Contingent consideration liabilities or receivables recorded in connection with business acquisitions must also be adjusted for changes in fair value until settled.

Goodwill

Goodwill represents the excess of cost over fair value of identifiable net assets acquired and assumed in a business combination. Goodwill and other intangible assets with indefinite useful lives are reviewed for impairment at the reporting unit level on an annual basis or more frequently if circumstances indicate potential impairment, through a comparison of fair value to the carrying amount. In evaluating the recoverability of goodwill, we perform an annual goodwill impairment analysis based on a review of qualitative factors to determine if events and circumstances exist, which will lead to a determination that the fair value of a reporting unit is greater than its carrying amount, prior to performing a full fair-value assessment.

We completed annual goodwill impairment analyses in the fourth quarter of each period presented using a September 30 measurement date. For the years ended December 31, 2021, 2020 and 2019, we determined there were no events or circumstances which indicated that the carrying value of a reporting unit exceeded the fair value.

VOBA, DAC and DSI

Our intangible assets include an intangible asset reflecting the value of insurance and reinsurance contracts acquired (hereafter referred to as VOBA, DAC, and DSI).

VOBA is an intangible asset that reflects the amount recorded as insurance contract liabilities less the estimated fair value of in-force contracts ("VIF") in a life insurance company acquisition. It represents the portion of the purchase price that is allocated to the value of the rights to receive future cash flows from the business in force at the acquisition date. VOBA is a function of the VIF, current GAAP reserves, GAAP assets, and deferred tax liability. The VIF is determined by the present value of statutory distributable earnings less opening required capital, and is sensitive to assumptions including the discount rate, surrender rates, partial withdrawals, utilization rates, projected investment spreads, mortality, and expenses. DAC consists principally of commissions that are related directly to the successful sale of new or renewal insurance contracts, which may be deferred to the extent recoverable. Indirect or unsuccessful acquisition costs, maintenance, product development and overhead expenses are charged to expense as incurred. DSI represents up front bonus credits and vesting and persistency bonuses to policyholder account values, which may be deferred to the extent recoverable.

The methodology for determining the amortization of DAC, DSI and VOBA varies by product type. For all insurance contracts accounted for under long-duration contract deposit accounting, amortization is based on assumptions consistent with those used in the development of the underlying contract liabilities, adjusted for emerging experience and expected trends. For all of the insurance intangibles (DAC, DSI and VOBA), the balances are generally amortized over the lives of the policies in relation to the expected emergence of estimated gross profits ("EGPs") from investment income, surrender charges and other product fees, less policy benefits, maintenance expenses, mortality, and expense margins. Recognized gains (losses) on investments and changes in fair value of the embedded derivative on our FIA and IUL products are included in actual gross profits in the period realized as described further below. Amortization is reported within Depreciation and amortization in the accompanying Consolidated Statements of Earnings.

Changes in assumptions, including our earned rate (i.e., long term assumptions of the Company's expected earnings on related investments), budgeted option costs (i.e., the expected cost to purchase call options in future periods to fund the equity indexed linked feature) and surrender rates can have a significant impact on VOBA, DAC and DSI balances and amortization rates. Due to the relative size and sensitivity to minor changes in underlying assumptions of those intangible balances, we perform quarterly and annual analyses of the VOBA, DAC and DSI balances for recoverability to ensure that the unamortized portion does not exceed the expected recoverable amounts. At each evaluation date, actual historical gross profits are reflected with the impact on the intangibles reported as "unlocking" as a component of amortization expense, and estimated future gross profits and related assumptions are evaluated for continued reasonableness. Any adjustment in estimated future gross profits requires that the amortization rate be revised ("unlocking") retroactively to the date of the contract issuance or acquisition date with respect to VOBA. The cumulative unlocking adjustment is recognized as a component of current period amortization.

Amortization expense of VOBA, DAC and DSI reflects an assumption for an expected level of credit-related investment losses. When actual credit-related investment losses are realized, we perform a retrospective unlocking of amortization for those intangibles as actual margins vary from expected margins. This unlocking is reflected within Depreciation and amortization in the accompanying Consolidated Statements of Earnings.

For investment-type products, the VOBA, DAC and DSI assets are adjusted for the impact of unrealized gains (losses) on available-for-sale ("AFS") investments as if these gains (losses) had been realized, with corresponding credits or charges included in AOCI ("shadow adjustments").

Other Intangible Assets

We have other intangible assets, not including goodwill, VOBA, DAC or DSI, which consist primarily of customer relationships and contracts, the value of distribution network acquired ("VODA"), trademarks and tradenames and state licenses, and computer software, which are generally recorded in connection with acquisitions at their fair value. Intangible assets with estimable lives are amortized over their respective estimated useful lives to their estimated residual values and reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. In general, customer relationships are amortized over their estimated useful lives, generally ten years, using an accelerated method, which takes into consideration expected customer attrition rates. VODA is an intangible asset that represents the value of an acquired distribution network and is amortized using the sum of years digits method. Contractual relationships are generally amortized over their contractual life. Trademarks and tradenames are generally amortized over ten years. Capitalized computer software includes the fair value of software acquired in business combinations, purchased software and capitalized software development costs. Purchased software is recorded at cost and amortized using the straight-line method over its estimated useful life. Software acquired in business combinations is recorded at its fair value and amortized using straight-line or accelerated methods over its estimated useful life, ranging from five to ten years. For internal-use computer software products, internal and external costs incurred during the preliminary project stage are expensed as they are incurred. Internal and external costs incurred during the application development stage are capitalized and amortized on a product by product basis commencing on the date the software is ready for its intended use. We do not capitalize any costs once the software is ready for its intended use.

We recorded no impairment expense to other intangible assets during the years ended December 31, 2021, 2020, or 2019.

Title Plants

Title plants are recorded at the cost incurred to construct or obtain and organize historical title information to the point it can be used to perform title searches. Costs incurred to maintain, update and operate title plants are expensed as incurred. Title plants are not amortized as they are considered to have an indefinite life, if maintained. Sales of title plants are reported at the amount received net of the adjusted costs of the title plant sold. Sales of title plant copies are reported at the amount received. No cost is allocated to the sale of copies of title plants unless the carrying value of the title plant is diminished or impaired. Title plants are reviewed for impairment whenever events or circumstances indicate that the carrying amounts may not be recoverable. We recorded \$1 million in impairment expense to title plants during the year ended December 31, 2019, for two title plants, which are no longer in use. We reviewed title plants for impairment but recorded no impairment expense related to title plants in the years ended December 31, 2021 or 2020.

Property and Equipment

Property and equipment are recorded at cost, less accumulated depreciation. Depreciation is computed primarily using the straight-line method based on the estimated useful lives of the related assets: twenty to thirty years for buildings and three to twenty-five years for furniture, fixtures and equipment. Leasehold improvements are amortized on a straight-line basis over the lesser of the term of the applicable lease or the estimated useful lives of such assets. Property and equipment are reviewed for impairment whenever events or circumstances indicate that the carrying amounts may not be recoverable.

Contractholder Funds

Contractholder Funds include FIAs, fixed rate annuities, IULs, funding agreements and PRT and immediate annuities contracts without life contingencies. The liabilities for contractholder funds for fixed rate annuities, funding agreements and PRT and immediate annuities contracts without life contingencies consist of contract account balances that accrue to the benefit of the contractholders. The liabilities for FIA and IUL policies consist of the value of the host contract plus the fair value of the indexed crediting feature of the policy, which is accounted for as an embedded derivative. The embedded derivative is carried at fair value in Contractholder funds in the accompanying Consolidated Balance Sheets with changes in fair value reported in Benefits and other changes in policy reserves in the accompanying Consolidated Statements of Earnings. See a description of the fair value methodology used in Note D *Fair Value of Financial Instruments*.

Liabilities for the Guaranteed Minimum Withdrawal Benefits ("GMWB") and Guaranteed Minimum Death Benefit ("GMDB") riders on FIA and DA products are calculated by multiplying the benefit ratio by the cumulative assessments recorded from contract inception through the balance sheet date less the cumulative guaranteed minimum withdrawal and death benefit payments plus interest. The benefit ratio is the ratio of the present value of future guaranteed minimum withdrawal and death benefit payments to the present value of the assessments used to provide the guaranteed minimum withdrawal and death benefit payments using the same assumptions as we use for our intangible assets. If experience or assumption changes result in a new benefit ratio, the reserves are adjusted to reflect the changes in a manner similar to the unlocking of DAC, DSI and VOBA. The accounting for these GMWB and GMDB benefit liabilities (also referred to as SOP 03-1 liabilities) impact EGPs used to calculate amortization of DAC, DSI and VOBA. The related reserve is adjusted for the impact of unrealized gains (losses) on AFS investments as if these gains (losses) had been realized, with corresponding credits or charges included in AOCI ("shadow adjustments").

Contractholder funds include funds related to funding agreements that have been issued pursuant to the FABN Program as well as to the Federal Home Loan Bank of Atlanta ("FHLB"), the latter being in the form of advances. Single premiums were received at the initiation of the funding agreements. As of December 31, 2021, we had approximately \$1,900 million outstanding under the FABN program, which provides for semi-annual interest payments with principal maturities. Reserves for the FHLB funding agreements totaled \$1,543 million and \$1,203 million as of December 31, 2021 and 2020, respectively. Additionally, on February 18, 2022, F&G executed a \$200 million short term borrowing with the FHLB that matures on March 4, 2022. The FHLB agreements provide a guaranteed stream of payments or provide for a bullet payment at maturity with renewal provisions. In accordance with the FHLB agreements, the investments supporting the funding agreement liabilities are pledged as collateral to secure the FHLB funding agreement liabilities and are not available to settle our general obligations. The collateral investments had a fair value of \$2,420 million and \$1,471 million as of December 31, 2021 and 2020, respectively. Payments pursuant to FABN and FHLB funding agreements extend through 2028.

Future Policy Benefits

The liabilities for future policy benefits and claim reserves for traditional life policies, life contingent pay-out annuity policies (which includes PRT annuities with life contingencies) are computed using assumptions for investment yields, mortality and withdrawals, with a provision for adverse deviation, based on generally accepted actuarial methods and assumptions at the time of acquisition or contract issue. The investment yield assumption is 4.3% for traditional direct life reserves for all contracts, 4.1% for life contingent pay-out annuities, and ranges from 3.6% to 3.9% for PRT annuities with life contingencies. Policies are terminated through surrenders and maturities, where surrenders represent the voluntary terminations of policies by policyholders and maturities are determined by policy contract terms. Surrender assumptions are based upon policyholder experience adjusted for expected future conditions.

For long-duration contracts the assumptions are locked in at contract inception and only modified if we deem the reserves to be inadequate. We periodically review actual and anticipated experience compared to the assumptions used to establish policy benefits. If the net GAAP liability (gross reserves less DAC, DSI and VOBA) is less than the gross premium liability, impairment is deemed to have occurred, and the DAC, DSI and VOBA asset balances are reduced until the net GAAP liability is equal to the gross premium liability. If the DAC, DSI and VOBA asset balances are completely written off and the net GAAP liability is still less than the gross premium liability, then an additional liability is recorded to arrive at the gross premium liability.

Reserve for Title Claim Losses

Our reserve for title claim losses includes known claims as well as losses we expect to incur, net of recoupments. Each known claim is reserved based on our review as to the estimated amount of the claim and the costs required to settle the claim. Reserves for claims, which are incurred but not reported are established at the time premium revenue is recognized based on historical loss experience and also take into consideration other factors, including industry trends, claim loss history, current legal environment, geographic considerations and the type of policy written.

The reserve for title claim losses also includes reserves for losses arising from closing and disbursement functions due to fraud or operational error.

If a loss is related to a policy issued by an independent agent, we may proceed against the independent agent pursuant to the terms of the agency agreement. In any event, we may proceed against third parties who are responsible for any loss under the title insurance policy under rights of subrogation.

Secured Trust Deposits

In the state of Illinois, a trust company is permitted to commingle and invest customers' assets with its own assets, pending completion of real estate transactions. Accordingly, our Consolidated Balance Sheets reflect a secured trust deposit liability of \$934 million and \$711 million at December 31, 2021 and 2020, respectively, representing customers' assets held by us and corresponding assets including cash and investments pledged as security for those trust balances.

Income Taxes

We recognize deferred tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of our assets and liabilities and expected benefits of utilizing net operating loss and credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The impact on deferred taxes of changes in tax rates and laws, if any, is applied to the years during which temporary differences are expected to be settled and reflected in the financial statements in the period enacted.

Reinsurance

Title

In our Title segment, in a limited number of situations, we limit our maximum loss exposure by reinsuring certain risks with other title insurers. We also earn a small amount of additional income, which is reflected in our direct premiums, by assuming reinsurance for certain risks of other title insurers. We cede a portion of certain policy and other liabilities under agent fidelity, excess of loss and case-by-case reinsurance agreements. Reinsurance agreements provide that in the event of a loss (including costs, attorneys' fees and expenses) exceeding the retained amounts, the reinsurer is liable for the excess amount assumed. However, the ceding company remains primarily liable in the event the reinsurer does not meet its contractual obligations.

F&G

In our F&G segment, our insurance subsidiaries enter into reinsurance agreements with other companies in the normal course of business. For arrangements in which F&G follows reinsurance accounting and for most arrangements that are accounted for as separate investment contracts, we present the amounts consistently and on a gross basis in our Consolidated Balance Sheet with the ceded reserves balance presented as a Reinsurance recoverable. Where applicable, deferred gains associated with the reinsurance of insurance and investment contracts will be included within Accounts payable and accrued expenses with the related accretion reflected within Escrow, title-related and other fees on the Consolidated Balance Sheet and Statement of Earnings, respectively. Where applicable, deferred costs associated with the reinsurance of insurance and investment contracts will be included within the Prepaid expense and other assets with the related amortization reflected within Other operating expenses in the Consolidated Balance Sheet and Statement of Earnings, respectively. Premium and expense are recorded net of reinsurance ceded for both insurance and investment contracts.

For some arrangements in which deposit accounting is applied or the arrangement is accounted for as a separate investment contract, the assets and liabilities of certain reinsurance contracts are presented on a net basis in the accompanying Consolidated Balance Sheet. F&G intends to apply the offset where there is a right of offset explicit in the reinsurance agreement. See Note O *Reinsurance* for more details over F&G's reinsurance agreements.

Revenue Recognition

Refer to Note L *Revenue Recognition* for a description of our accounting for our various revenue streams.

Benefits and Other Changes in Policy Reserves

Benefit expenses for FIAs, fixed rate annuities, IUL policies and funding agreements include interest credited and, for FIA and IUL policies, index credits, to contractholder account balances. Benefit claims in excess of contract account balances, net of reinsurance recoveries, are charged to expense in the period that they are earned by the policyholder based on their selected strategy or strategies. Interest crediting rates associated with funds invested in the general account of our insurance subsidiaries range from 0.5% to 6.0% for fixed rate annuities and FIAs combined, 3.0% to 4.8% for IULs, and 0.9% to 2.0% for funding agreements. Other changes in policy reserves include the change in the fair value of the FIA embedded derivative and the change in the SOP 03-1 reserve for GMWB and GMDB benefits.

Other changes in policy reserves also include the change in reserves for life insurance products. For traditional life and immediate annuities (which includes PRT annuities with life contingencies), policy benefit claims are charged to expense in the period that the claims are incurred, net of reinsurance recoveries.

Stock-Based Compensation Plans

We account for stock-based compensation plans using the fair value method. Using the fair value method of accounting, compensation cost is measured based on the fair value of the award at the grant date using quoted market prices, and recognized over the service period.

Earnings Per Share

Basic earnings per share, as presented on the Consolidated Statement of Earnings, is computed by dividing net earnings available to common shareholders by the weighted average number of common shares outstanding during the period. In periods when earnings are positive, diluted earnings per share is calculated by dividing net earnings available to common shareholders by the weighted average number of common shares outstanding plus the impact of assumed conversions of potentially dilutive securities. For periods when we recognize a net loss, diluted earnings per share is equal to basic earnings per share as the impact of assumed conversions of potentially dilutive securities is considered to be antidilutive. We have granted certain stock options, shares of restricted stock, convertible debt instruments and certain other convertible share based payments, which have been treated as common share equivalents for purposes of calculating diluted earnings per share for periods in which positive earnings have been reported.

Restricted stock, options or other instruments, which provide the ability to acquire shares of our common stock that are antidilutive are excluded from the computation of diluted earnings per share. There were 1 million antidilutive instruments outstanding for the years ended December 31, 2021 and 2020. There were no antidilutive instruments outstanding for the year ended December 31, 2019.

Comprehensive Earnings (Loss)

We report Comprehensive earnings (loss) in accordance with GAAP on the Consolidated Statements of Comprehensive Earnings. Total comprehensive earnings are defined as all changes in shareholders' equity during a period, other than those resulting from investments by and distributions to shareholders. While total comprehensive earnings is the activity in a period and is largely driven by net earnings in that period, accumulated other comprehensive earnings or loss represents the cumulative balance of other comprehensive earnings, net of tax, as of the balance sheet date. Amounts reclassified to net earnings relate to the realized gains (losses) on our investments and other financial instruments, excluding investments in unconsolidated affiliates, and are included in Recognized gains and losses, net on the Consolidated Statements of Earnings.

Changes in the balance of Other comprehensive earnings (loss) by component are as follows:

	Unrealized gain (loss) on investments and other financial instruments, net (excluding investments in unconsolidated affiliates)	Unrealized gain (loss) relating to investments in unconsolidated affiliates	Unrealized (loss) gain on foreign currency translation and cash flow hedging	Minimum pension liability adjustment	Total Accumulated Other Comprehensive Earnings (Loss)
	(In millions)				
Balance January 1, 2020	\$ 46	\$ 18	\$ (11)	\$ (10)	\$ 43
Reclassification adjustments	(73)	—	—	—	(73)
Other comprehensive earnings	1,307	3	10	14	1,334
Balance December 31, 2020	1,280	21	(1)	4	1,304
Reclassification adjustments	(123)	—	—	—	(123)
Other comprehensive earnings	(410)	22	(7)	(7)	(402)
Balance December 31, 2021	\$ 747	\$ 43	\$ (8)	\$ (3)	\$ 779

Redeemable Non-controlling Interest

Subsequent to our acquisition of Lender Processing Services, Inc. ("LPS") in January 2014, we issued a 35% ownership interest in ServiceLink to funds affiliated with Thomas H. Lee Partners ("THL" or "the minority interest holder"). THL had an option to put its ownership interests of ServiceLink to us if no public offering of the corresponding business was consummated after four years from the date of FNF's purchase of LPS. The Class A units owned by THL (the "redeemable noncontrolling

interests") could have been settled in cash or common stock of FNF or a combination of both at our election. As of January 2018, no public offering was made and the redeemable noncontrolling interests were no longer subject to a holding requirement. The redeemable noncontrolling interests were settled at the current fair value at the time we received notice of THL's put election as determined by the parties or by a third party appraisal under the terms of the Unit Purchase Agreement. As a result of a recapitalization of ServiceLink in 2015, the ownership interest by the minority interest holder was reduced from 35% to 21%. The redeemable noncontrolling interests were recorded at their initial value of \$344 million in our Consolidated Balance Sheets and would have been adjusted to fair value were such value to rise above the initial value. As these redeemable noncontrolling interests provided for redemption features not solely within our control, we classified the redeemable noncontrolling interests outside of permanent equity. On July 29, 2020, we purchased for \$90 million the outstanding Class A units of ServiceLink held by THL. As of the purchase date, ServiceLink is a wholly-owned subsidiary of FNF.

Management Estimates

The preparation of these Consolidated Financial Statements in conformity with GAAP requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the Consolidated Financial Statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Periodically, and at least annually, typically in the third quarter, we review the assumptions associated with reserves for policy benefits, product guarantees, and amortization of intangibles. Additionally, during the third quarter of 2021, we implemented a new actuarial valuation system. As a result, our third quarter 2021 assumption updates include model refinements and assumption updates resulting from the implementation. The system implementation and assumption review process that occurred in the third quarter of 2021, included refinements in the calculation of the fair value of the embedded derivative component of our fixed indexed annuities within contractholder funds and updates to the surrender rates, GMWB utilization, IUL premium persistency, maintenance expenses, and earned rate assumptions to reflect our current and expected future experience. These changes, taken together, resulted in a decrease in contractholder funds and future policy reserves of \$425 million and a decrease to intangible assets of \$136 million. These model refinements and assumptions are also used in the SOP 03-1 liability for GMWB and GMDB benefits and resulted in an increase in the liability of \$28 million. There was no material change to underlying policyholder behavior. The majority of the changes represent one-time adjustments in the third quarter of 2021 related to the cumulative impact of the system implementation and are not expected to re-occur in the future.

Note B — Acquisitions

F&G

On June 1, 2020, we acquired 100% of the outstanding equity of F&G for approximately \$2.7 billion pursuant to the Agreement and Plan of Merger, dated February 7, 2020, as amended (the "Merger Agreement"). In connection with the Merger, we issued approximately 24 million shares of FNF common stock and paid approximately \$1.8 billion in cash to former holders of F&G ordinary and preferred shares. On August 26, 2020, we issued an additional 1 million shares of FNF common stock and paid approximately \$100 million in cash to Kingfishers, LP., Kingstown Partners Master, LTD., Kingstown Partners II, LP., Kingstown 1740 Fund, LP. and Ktown, LP. (collectively the "Kingstown Dissenters"), who are former owners of F&G common stock. For more information related to the Kingstown Dissenters, refer to Note H *Commitments and Contingencies*. At closing, all outstanding shares of F&G common stock, excluding shares associated with the liability to former owners, were converted into the right to receive the Merger Consideration (as defined in the Merger Agreement). Additionally, each outstanding F&G Option and F&G Phantom unit was canceled and converted into options to purchase FNF common stock and phantom units denominated in FNF common stock, and each outstanding warrant to purchase F&G common stock was converted into the right to purchase and receive upon exercise \$8.18 in cash and .0833 shares of FNF common stock. At closing, our subsidiaries' ownership of F&G common and preferred shares was converted into approximately 7 million shares of FNF common stock, which are reflected as treasury shares in the accompanying Consolidated Financial Statements.

The initial purchase price is as follows (in millions):

Cash paid for outstanding F&G shares	\$	1,903
Less: Cash Acquired		827
Net cash paid for F&G		<u>1,076</u>
Value of FNF share consideration		806
Value of outstanding converted equity awards attributed to services already rendered		<u>28</u>
Total net consideration paid	\$	<u><u>1,910</u></u>

The acquisition was accounted for as a business combination under FASB Accounting Standards Codification Topic 805, Business Combinations ("Topic 805"). The purchase price was allocated to F&G's assets acquired and liabilities assumed based on their fair values as of the acquisition date. Goodwill has been recorded based on the amount that the purchase price exceeds

the fair value of the net assets acquired. Goodwill consists primarily of intangible assets that do not qualify for separate recognition. The goodwill recorded is not expected to be deductible for tax purposes, except for \$16 million related to a prior F&G transaction.

Pursuant to Topic 805, the financial statements were not retrospectively adjusted for any provisional amount changes that occurred during the measurement period. Rather, we recognized provisional adjustments as we obtained information not available as of the completion of the preliminary fair value calculation. We also recorded, in the same period as the financial statements, the effect on earnings of changes in depreciation, amortization, or other income effects, as a result of any changes to the provisional amounts, calculated as if the accounting had been completed at the acquisition date.

The following table summarizes the fair value amounts recognized for the assets acquired and liabilities assumed as of the acquisition date (dollars in millions):

	Fair Value
Fixed maturity securities	\$ 22,3
Preferred securities	8
Equity securities	
Derivative instruments	3
Mortgage loans	1,7
Investments in unconsolidated affiliates	1,0
Other long-term investments	4
Short-term investments	
Trade and notes receivable	
Reinsurance recoverable	2,9
Goodwill	1,7
Prepaid expenses and other assets	3
Lease assets	
Other intangible assets	2,1
Deferred tax asset	2
Assets of discontinued operations	2,3
Total assets acquired	36,8
Contractholder funds	26,4
Future policy benefits	3,8
Accounts payable and accrued liabilities	8
Notes payable	5
Funds withheld for reinsurance liabilities	8
Lease liabilities	
Liabilities of discontinued operations	2,2
Total liabilities assumed	34,9
Net assets acquired	\$ 1,9

The gross carrying value and weighted average estimated useful lives of Other intangible assets acquired in the F&G acquisition consist of the following (dollars in millions):

	Gross Carrying Value	Estimated Useful Life (in years)
Other intangible assets:		
Value of business acquired	\$ 1,908	Various
Value of distribution network acquired	140	15
Trademarks and licenses	38	10
Software	21	2
Total Other intangible assets	\$ 2,107	

We completed our assessment of the fair value of assets acquired and liabilities assumed within the one-year period from the date of acquisition. During the year ended December 31, 2021, we recorded measurement period adjustments as of the acquisition date to reflect new information obtained about facts and circumstances that existed as of the acquisition date that, if known, would have affected the measurement of the amounts recognized as of the acquisition date. Such adjustments resulted in a decrease in Reinsurance recoverable of approximately \$289 million, an increase in Other intangible assets of approximately \$61 million, a decrease in Future policy benefits of \$227 million and various other, individually immaterial items. There was no material impact on Consolidated Statements of Earnings as a result of the measurement period adjustments recorded.

Unaudited Supplemental Pro-forma Financial Results

F&G's financial results since the acquisition date are reflected in our Consolidated Financial Statements. F&G's revenues and net earnings for the period from June 1, 2020 through December 31, 2020 of \$1,233 million and \$136 million, respectively, are included in the Consolidated Statements of Earnings for the year ended December 31, 2020. For comparative purposes, selected unaudited pro-forma consolidated results of operations of FNF for the years ended December 31, 2020 and 2019 are presented below. Unaudited pro-forma results presented assume the consolidation of F&G occurred as of January 1, 2019.

	Year Ended December 31,	
	2020	2019
	(In millions)	
Total revenues	\$ 10,897	\$ 10,386
Net earnings attributable to FNF common shareholders	1,233	1,419

Amounts reflect certain pro forma adjustments to revenue and net earnings that were directly attributable to the acquisition, and for the elimination of historical activity between FNF and F&G prior to the acquisition. These adjustments include the following:

- elimination of valuation changes on FNF's investment in F&G common and preferred shares prior to the acquisition;
- elimination of dividends received by FNF related to its holdings of F&G's common and preferred shares prior to the acquisition;
- elimination of advisory fees F&G paid to FNF;
- elimination of transaction costs paid by F&G;
- adjustment to record interest expense related to financing associated with the acquisition;
- adjustment to reflect the elimination of historical amortization of F&G intangibles and the additional amortization of F&G intangibles measured at fair value as of the acquisition date; and
- adjustment to reflect the prospective reclassification from accumulated other comprehensive earnings of the unrealized gains on available-for-sale securities to a premium, which will be amortized into income based on the expected life of the investment securities.

Note C — Summary of Reserve for Title Claim Losses

A summary of the reserve for title claim losses follows:

	Year Ended December 31,		
	2021	2020	2019
	(Dollars in millions)		
Beginning balance	\$ 1,623	\$ 1,509	\$ 1,488
Change in insurance recoverable	94	34	1
Claim loss provision related to:			
Current year	385	283	240
Prior years	—	—	—
Total title claim loss provision	385	283	240
Claims paid, net of recoupments related to:			
Current year	(14)	(11)	(11)
Prior years	(205)	(192)	(209)
Total title claims paid, net of recoupments	(219)	(203)	(220)
Ending balance of claim loss reserve for title insurance	\$ 1,883	\$ 1,623	\$ 1,509
Provision for title insurance claim losses as a percentage of title insurance premiums	4.5 %	4.5 %	4.5 %

Several lawsuits have been filed by various parties against Chicago Title Company and Chicago Title Insurance Company as its principal (collectively, the “Named Companies”). Generally, plaintiffs claim they are investors who were solicited by Gina Champion-Cain through her former company, ANI, or other affiliates to provide funds that purportedly were to be used for high-interest, short-term loans to parties seeking to acquire California alcoholic beverage licenses. Plaintiffs contend they were told that under California state law, alcoholic beverage license applicants are required to deposit into escrow an amount equal to the license purchase price while their applications remain pending with the State. Plaintiffs further alleged that employees of Chicago Title Company participated with Ms. Champion-Cain and her entities in a fraud scheme involving an escrow account maintained by Chicago Title Company into which the plaintiffs’ funds were deposited.

The following lawsuits are pending in the Superior Court of San Diego County for the State of California and have been set for jury trial on December 2, 2022. While they have not been consolidated into one action, they have been deemed by the court to be related and are assigned to the same judge for purposes of judicial economy.

On December 13, 2019, a lawsuit styled, *Kim Funding, LLC, Kim H. Peterson, Joseph J. Cohen, and ABC Funding Strategies, LLC v. Chicago Title Co., Chicago Title Ins. Co., Thomas Schwiebert, Adelle Ducharme, and Betty Elixman*, was filed in San Diego County Superior Court. Plaintiffs claim losses of more than \$250 million as a result of the alleged fraud scheme, and also seek statutory, treble, and punitive damages. The Named Companies have filed a cross-complaint against Ms. Champion-Cain, and others. The Named Companies have reached a conditional settlement with the members of ABC Funding Strategies, LLC plaintiffs under confidential terms.

On March 6, 2020, a lawsuit styled, *Wakefield Capital, LLC, Wakefield Investments, LLC, 2Budz Holding, LLC, Doug and Kristine Heidrich, and Jeff and Heidi Orr v. Chicago Title Co. and Chicago Title Ins. Co.*, was filed in San Diego County Superior Court. Plaintiffs claim losses in excess of \$7 million as a result of the alleged fraud scheme, and also seek punitive damages, recovery of attorneys’ fees, and disgorgement.

On June 29, 2020, a lawsuit styled, *Susan Heller Fenley Separate Property Trust, DTD 03/04/2010, Susan Heller Fenley Inherited Roth IRA, Shelley Lynn Tarditi Trust and ROJ, LLC v. Chicago Title Co., Chicago Title Ins. Co., Thomas Schwiebert, Adelle Ducharme, and Betty Elixman*, was filed in San Diego County Superior Court. Plaintiffs claim losses in excess of \$6 million as a result of the alleged fraud scheme, and seek statutory, treble, and punitive damages. The Named Companies have filed a cross-complaint against Ms. Champion-Cain, and others.

On July 7, 2020, a cross-claim styled, *Laurie Peterson v. Chicago Title Co., Chicago Title Ins. Co., Thomas Schwiebert, Adelle Ducharme, and Betty Elixman*, was filed in an existing lawsuit styled, *Banc of California, National Association v. Laurie Peterson*, which is pending in San Diego County Superior Court. Cross-complaint plaintiff was sued by a bank to recover in excess of \$35 million that she allegedly guaranteed to repay for certain investments made by the Banc of California in the alcoholic beverage license scheme. Cross-complaint plaintiff has, in turn, sued the Named

Companies in that action seeking in excess of \$250 million in monetary losses as well as exemplary damages and attorneys' fees. The Named Companies have filed a cross-complaint against Ms. Champion-Cain, and others.

On September 3, 2020, a cross-claim styled, *Kim H. Peterson Trustee of the Peterson Family Trust dated April 14 1992 v. Chicago Title Co., Chicago Title Ins. Co., Thomas Schwiebert, Adelle Ducharme, and Betty Elixman*, was filed in an existing lawsuit styled, *CalPrivate Bank v. Kim H. Peterson Trustee of the Peterson Family Trust dated April 14 1992*, which is pending in Superior Court of San Diego County for the State of California. Cross-complaint plaintiff was sued by a bank to recover in excess of \$12 million that the trustee allegedly guaranteed to repay for certain investments made by CalPrivate Bank in the alcoholic beverage license scheme. Cross-complaint plaintiff has, in turn, sued the Named Companies in that action seeking in excess of \$250 million in monetary losses as well as exemplary damages and attorneys' fees.

On October 1, 2020, a lawsuit styled, *Ovation Fin. Holdings 2 LLC, Ovation Fund Mgmt. II, LLC, Banc of California, N.A. v. Chicago Title Ins. Co.*, was filed in San Diego County Superior Court. Plaintiffs claim losses of more than \$75 million, as well as consequential and punitive damages. The Named Companies have filed a cross-complaint against Ms. Champion-Cain, and others. The Named Companies have reached a conditional settlement with the Ovation plaintiffs under confidential terms.

On November 2, 2020, a lawsuit styled, *CalPrivate Bank v. Chicago Title Co. and Chicago Title Ins. Co.*, was also filed in the Superior Court of San Diego County for the State of California. Plaintiff claims losses in excess of \$12 million based upon business loan advances made in the alcoholic beverage license scheme, and seeks punitive damages and the recovery of attorneys' fees. The Named Companies have filed a cross-complaint against Ms. Champion-Cain, and others.

The following matters pending in the Superior Court of San Diego County for the State of California have conditionally settled under confidential terms: *Yuan Yu and Polly Yu v. Chicago Title Co., et al.*, and *Blake E. Allred and Melissa M. Allred v. Chicago Title Co., et al.*

Additionally, in connection with the alcoholic beverage license scheme, the Securities and Exchange Commission ("SEC") filed a lawsuit in the United States District Court for the Southern District of California against Ms. Champion-Cain and certain of her affiliated entities asserting claims for securities fraud. A receiver was appointed by the court to preserve the assets of the defendant affiliated entities (the "receivership entities"), pay their debts, operate the businesses and pursue any claims they may have against third-parties. Pursuant to the authority granted to her by the federal court on the SEC action, on January 7, 2022, a lawsuit styled, *Krista Freitag v. Chicago Title Co. and Chicago Title Ins. Co.*, was filed in San Diego County Superior Court by the receiver on behalf of the receivership entities against the Named Companies. The receiver seeks compensatory, incidental, consequential, and punitive damages, and seeks the recovery of attorneys' fees. In turn, the Named Companies have filed a motion in the SEC action seeking permission to sue ANI, via the receiver, to pursue indemnity and other claims against the receivership entities as joint tortfeasors.

Chicago Title Company has also resolved a number of other pre-suit claims and previously-disclosed lawsuits from both individual and groups of alleged investors under confidential terms. Based on the facts and circumstances of the remaining claims, including applicable insurance coverage and the settlements already reached, the Company has recorded reserves included in its reserve for title claim losses which it believes are adequate to cover losses related to this matter, and believes that its reserves for title claim losses are adequate.

We continually update loss reserve estimates as new information becomes known, new loss patterns emerge or as other contributing factors are considered and incorporated into the analysis of reserve for claim losses. Estimating future title loss payments is difficult because of the complex nature of title claims, the long periods of time over which claims are paid, significantly varying dollar amounts of individual claims and other factors.

Due to the uncertainty inherent in the process and to the judgment used by management, the ultimate liability may be greater or less than our current reserves. If actual claims loss development varies from what is currently expected and is not offset by other factors, it is possible that additional reserve adjustments may be required in future periods in order to maintain our recorded reserve within a reasonable range of our actuary's central estimate.

Note D — Fair Value of Financial Instruments

Our measurement of fair value is based on assumptions used by market participants in pricing the asset or liability, which may include inherent risk, restrictions on the sale or use of an asset, or non-performance risk, which may include our own credit risk. We estimate an exchange price is the price in an orderly transaction between market participants to sell the asset or transfer the liability (“exit price”) in the principal market, or the most advantageous market for that asset or liability in the absence of a principal market as opposed to the price that would be paid to acquire the asset or assume a liability (“entry price”). We categorize financial instruments carried at fair value into a three-level fair value hierarchy, based on the priority of inputs to the respective valuation technique. The three-level hierarchy for fair value measurement is defined as follows:

Level 1 - Values are unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.

Level 2 - Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Such inputs include market interest rates and volatilities, spreads, and yield curves.

Level 3 - Certain inputs are unobservable (supported by little or no market activity) and significant to the fair value measurement. Unobservable inputs reflect the Company’s best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date based on the best information available in the circumstances.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment’s level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Our assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the investment.

When a determination is made to classify an asset or liability within Level 3 of the fair value hierarchy, the determination is based upon the significance of the unobservable inputs to the overall fair value measurement. Because certain securities trade in less liquid or illiquid markets with limited or no pricing information, the determination of fair value for these securities is inherently more difficult. In addition to the unobservable inputs, Level 3 fair value investments may include observable components, which are components that are actively quoted or can be validated to market-based sources.

The carrying amounts and estimated fair values of our financial instruments for which the disclosure of fair values is required, including financial assets and liabilities measured and carried at fair value on a recurring basis, with the exception of investment contracts, portions of other long-term investments and debt, which are disclosed later within this footnote, was summarized according to the hierarchy previously described, as follows (in millions):

	December 31, 2021

Valuation Methodologies

Fixed Maturity, Preferred and Equity Securities

We measure the fair value of our securities based on assumptions used by market participants in pricing the security. The most appropriate valuation methodology is selected based on the specific characteristics of the fixed maturity or equity security, and we will then consistently apply the valuation methodology to measure the security's fair value. Our fair value measurement is based on a market approach, which utilizes prices and other relevant information generated by market transactions involving identical or comparable securities. Sources of inputs to the market approach include third-party pricing services, independent broker quotations, or pricing matrices. We use observable and unobservable inputs in our valuation methodologies. Observable inputs include benchmark yields, reported trades, broker-dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, and reference data including market research publications. In addition, market indicators and industry and economic events are monitored and further market data will be acquired when certain thresholds are met.

For certain security types, additional inputs may be used, or some of the inputs described above may not be applicable. The significant input used in the fair value measurement of equity securities for which the market approach valuation technique is employed is yield for comparable securities. Increases or decreases in the yields would result in lower or higher, respectively, fair value measurements. For broker-quoted only securities, quotes from market makers or broker-dealers are obtained from sources recognized to be market participants. We believe the broker quotes are prices at which trades could be executed based on historical trades executed at broker-quoted or slightly higher prices.

We analyze the third-party valuation methodologies and related inputs to perform assessments to determine the appropriate level within the fair value hierarchy. However, we did not adjust prices received from third parties as of December 31, 2021 or December 31, 2020.

Derivative Financial Instruments

The fair value of call options is based upon valuation pricing models, which represents what we would expect to receive or pay at the balance sheet date if we canceled the options, entered into offsetting positions, or exercised the options. Fair values for these instruments are determined internally, based on industry accepted valuation pricing models, which use market-observable inputs, including interest rates, yield curve volatilities, and other factors.

The fair value of futures contracts (specifically for FIA contracts) represents the cumulative unsettled variation margin (open trade equity, net of cash settlements), which represents what we would expect to receive or pay at the balance sheet date if we canceled the contracts or entered into offsetting positions. These contracts are classified as Level 1.

The fair value measurement of the FIA/ IUL embedded derivatives included in contractholder funds is determined through a combination of market observable information and significant unobservable inputs using the option budget method. The market observable inputs are the market value of option and treasury rates. The significant unobservable inputs are the budgeted option cost (i.e., the expected cost to purchase call options in future periods to fund the equity indexed linked feature), surrender rates, mortality multiplier and non-performance spread. The mortality multiplier at December 31, 2021 was applied to the 2012 Individual Annuity mortality tables. Increases or decreases in the market value of an option in isolation would result in a higher or lower, respectively, fair value measurement. Increases or decreases in treasury rates, mortality multiplier, surrender rates, or non-performance spread in isolation would result in a lower or higher fair value measurement, respectively. Generally, a change in any one unobservable input would not directly result in a change in any other unobservable input. Also refer to Management's Estimates in Note A *Business and Summary of Significant Accounting Policies* regarding the implementation of a new actuarial valuation system and assumption updates during the three-months ended September 30, 2021. The system implementation and assumption review process included refinements in the calculation of the fair value of the embedded derivative component of our fixed indexed annuities.

The fair value of the reinsurance-related embedded derivatives in the funds withheld reinsurance agreements with Kubera (effective October 31, 2021, this agreement was novated from Kubera to Somerset) and Aspida Re are estimated based upon the fair value of the assets supporting the funds withheld from reinsurance liabilities. The fair value of the assets is based on a quoted market price of similar assets (Level 2), and therefore the fair value of the embedded derivative is based on market-observable inputs and classified as Level 2. Please see Note O *Reinsurance* for further discussion on F&G reinsurance agreements.

Other long-term investments

We hold a fund-linked note which provides for an additional payment at maturity based on the value of an embedded derivative based on the actual return of a dedicated return fund. Fair value of the available-for-sale embedded derivative is based on an unobservable input, the net asset value of the fund at the balance sheet date. The embedded derivative is similar to a call option on the net asset value of the fund with a strike price of zero since FGL Insurance will not be required to make any additional payments at maturity of the fund-linked note in order to receive the net asset value of the fund on the maturity date. A Black-Scholes model determines the net asset value of the fund as the fair value of the call option regardless of the values used for the other inputs to the option pricing model. The net asset value of the fund is provided by the fund manager at the end of each calendar month and represents the value an investor would receive if it withdrew its investment on the balance sheet date. Therefore, the key unobservable input used in the Black-Scholes model is the value of the fund. As the value of the fund increases or decreases, the fair value of the embedded derivative will increase or decrease. See further discussion on the available-for-sale embedded derivative in Note F *Derivative Financial Instruments*.

The fair value of the credit-linked note is based on a weighted average of a broker quote and a discounted cash flow analysis. The discounted cash flow approach is based on the expected portfolio cash flows and amortization schedule reflecting investment expectations, adjusted for assumptions on the portfolio's default and recovery rates, and the note's discount rate. The fair value of the note is provided by the fund manager at the end of each quarter.

Quantitative information regarding significant unobservable inputs used for recurring Level 3 fair value measurements of financial instruments carried at fair value as of December 31, 2021 and December 31, 2020 are as follows:

	Fair Value at December 31, 2021 (in millions)	Valuation Technique	Unobservable Input(s)	Range (Weighted average) December 31, 2021
Assets				
Asset-backed securities	\$ 3,844	Broker-quoted	Offered quotes	52.56% - 260.7% (97.06%)

The following tables summarize changes to the Company's financial instruments carried at fair value and classified within Level 3 of the fair value hierarchy for the years ended December 31, 2021 and 2020, respectively. F&G related activity for the year ended December 31, 2020 in the table below is comprised of the period from June 1, 2020 through December 31, 2020 only. This summary excludes any impact of amortization of VOBA, DAC and DSI. The gains and losses below may include changes in fair value due in part to observable inputs that are a component of the valuation methodology.

Valuation Methodologies and Associated Inputs for Financial Instruments Not Carried at Fair Value

The following discussion outlines the methodologies and assumptions used to determine the fair value of our financial instruments not carried at fair value. Considerable judgment is required to develop these assumptions used to measure fair value. Accordingly, the estimates shown are not necessarily indicative of the amounts that would be realized in a one-time, current market exchange of all of our financial instruments.

Mortgage Loans

The fair value of mortgage loans is established using a discounted cash flow method based on internal credit rating, maturity and future income. This yield-based approach is sourced from our third-party vendor. The internal ratings for mortgages in good standing are based on property type, location, market conditions, occupancy, debt service coverage, loan-to-value, quality of tenancy, borrower, and payment record. The inputs used to measure the fair value of our mortgage loans are classified as Level 3 within the fair value hierarchy.

Policy Loans (included within Other long-term investments)

Fair values for policy loans are estimated from a discounted cash flow analysis, using interest rates currently being offered for loans with similar credit risk. Loans with similar characteristics are aggregated for purposes of the calculations.

Company Owned Life Insurance

Company owned life insurance (COLI) is a life insurance program used to finance certain employee benefit expenses. The fair value of COLI is based on net realizable value, which is generally cash surrender value. COLI is classified as Level 3 within the fair value hierarchy.

Other Invested Assets (included within Other long-term investments)

The fair value of the bank loan is estimated using a discounted cash flow method with the discount rate based on weighted average cost of capital ("WACC"). This yield-based approach is sourced from a third-party vendor and the WACC establishes a market participant discount rate by determining the hypothetical capital structure for the asset should it be underwritten as of each period end. Other invested assets are classified as Level 3 within the fair value hierarchy.

Investment Contracts

Investment contracts include deferred annuities (FIAs and fixed rate annuities), indexed universal life policies ("IULs"), funding agreements and PRT and immediate annuity contracts without life contingencies. The FIA/ IUL embedded derivatives, included in contractholder funds, are excluded as they are carried at fair value. The fair value of the FIA, fixed rate annuity and IUL contracts is based on their cash surrender value (i.e. the cost the Company would incur to extinguish the liability) as these contracts are generally issued without an annuitization date. The fair value of funding agreements and PRT and immediate annuity contracts without life contingencies is derived by calculating a new fair value interest rate using the updated yield curve and treasury spreads as of the respective reporting date. The Company is not required to, and has not, estimated the fair value of the liabilities under contracts that involve significant mortality or morbidity risks, as these liabilities fall within the definition of insurance contracts that are exceptions from financial instruments that require disclosures of fair value.

Other

FHLB common stock, Accounts receivable and Notes receivable are carried at cost, which approximates fair value. FHLB common stock is classified as Level 2 within the fair value hierarchy. Accounts receivable and Notes receivable are classified as Level 3 within the fair value hierarchy.

Debt

The fair value of debt is based on quoted market prices. The inputs used to measure the fair value of our outstanding debt are classified as Level 2 within the fair value hierarchy.

The following tables provide the carrying value and estimated fair value of our financial instruments that are carried on the accompanying Consolidated Balance Sheets at amounts other than fair value, summarized according to the fair value hierarchy previously described.

	December 31, 2021 (in millions)				
	Level 1	Level 2	Level 3	Total Estimated Fair Value	Carrying Amount

The following table includes assets that have not been classified in the fair value hierarchy as the value of these investments are measured using the equity method of accounting or the net asset value ("NAV") per share practical expedient (in millions):

	December 31, 2021	December 31, 2020
Investments in unconsolidated affiliates (equity method of accounting)	\$ 136	\$ 146
Equity securities (NAV)	48	—
Investments in unconsolidated affiliates (NAV)	2,350	1,148
Total	\$ 2,534	\$ 1,294

For investments for which NAV is used as a practical expedient for fair value, we do not have any significant restrictions in our ability to liquidate our positions in these investments, other than obtaining general partner approval, nor do we believe it is probable a price less than NAV would be received in the event of a liquidation. Equity method investments are reported on a lag of up to three months for investee information not received timely.

We review the fair value hierarchy classifications each reporting period. Changes in the observability of the valuation attributes may result in a reclassification of certain financial assets or liabilities. Such reclassifications are reported as transfers in and out of Level 3, or between other levels, at the beginning fair value for the reporting period in which the changes occur. The transfers into and out of Level 3 were related to changes in the primary pricing source and changes in the observability of external information used in determining the fair value.

Note E — Investments

Our fixed maturity securities investments have been designated as available-for-sale and are carried at fair value, net of allowance for expected credit losses, with unrealized gains and losses included in AOCI, net of associated adjustments for DAC, VOBA, DSI, UREV, SOP 03-1 reserves, and deferred income taxes. Our preferred and equity securities investments are carried at fair value with unrealized gains and losses included in net income (loss). The Company's consolidated investments are summarized as follows (in millions):

Securities held on deposit with various state regulatory authorities had a fair value of \$22,343 million and \$16,714 million at December 31, 2021 and 2020, respectively.

At December 31, 2021 and 2020, the Company held no material investments that were non-income producing for a period greater than twelve months.

At December 31, 2021 and 2020, the Company's accrued interest receivable balance was \$253 million and \$235 million, respectively. Accrued interest receivable is classified within Prepaid expenses and other assets within the Consolidated Balance Sheets.

In accordance with our FHLB agreements, the investments supporting the funding agreement liabilities are pledged as collateral to secure the FHLB funding agreement liabilities and are not available to the Company for general purposes. The collateral investments had a fair value of \$2,469 million and \$1,622 million at December 31, 2021 and 2020, respectively.

The amortized cost and fair value of fixed maturity securities by contractual maturities, as applicable, are shown below. Actual maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations.

Allowance for Current Expected Credit Loss

We regularly review AFS securities for declines in fair value that we determine to be credit related. For our fixed maturity securities, we generally consider the following in determining whether our unrealized losses are credit related, and if so, the magnitude of the credit loss:

- The extent to which the fair value is less than the amortized cost basis;
- The reasons for the decline in value (credit event, currency or interest-rate related, including general credit spread widening);
- The financial condition of and near-term prospects of the issuer (including issuer's current credit rating and the probability of full recovery of principal based upon the issuer's financial strength);
- Current delinquencies and nonperforming assets of underlying collateral;
- Expected future default rates;
- Collateral value by vintage, geographic region, industry concentration or property type;
- Subordination levels or other credit enhancements as of the balance sheet date as compared to origination; and
- Contractual and regulatory cash obligations and the issuer's plans to meet such obligations.

We recognize an allowance for current expected credit losses on fixed maturity securities in an unrealized loss position when it is determined, using the factors discussed above, a component of the unrealized loss is related to credit. We measure the credit loss using a discounted cash flow model that utilizes the single best estimate cash flow and the recognized credit loss is limited to the total unrealized loss on the security (i.e. the fair value floor). Cash flows are discounted using the implicit yield of bonds at their time of purchase and the current book yield for asset and mortgage backed securities as well as variable rate securities. We recognize the expected credit losses in Recognized gains and losses, net in the Consolidated Statements of Earnings, with an offset for the amount of non-credit impairments recognized in AOCI. We do not measure a credit loss allowance on accrued investment income because we write-off accrued interest through to Interest and investment income when collectability concerns arise.

We consider the following in determining whether write-offs of a security's amortized cost is necessary:

- We believe amounts related to securities have become uncollectible; or
- We intend to sell a security; or
- It is more likely than not that we will be required to sell a security prior to recovery.

If we intend to sell a fixed maturity security or it is more likely than not that we will be required to sell the security before recovery of its amortized cost basis and the fair value of the security is below amortized cost, we will write down the security to current fair value, with a corresponding charge, net of any amount previously recognized as an allowance for expected credit loss, to Recognized gains and losses, net in the accompanying Consolidated Statements of Earnings. If we do not intend to sell a fixed maturity security or it is more likely than not that we will not be required to sell a fixed maturity security before recovery of its amortized cost basis but believe amounts related to a security are uncollectible (generally based on proximity to expected credit loss), an impairment is deemed to have occurred and the amortized cost is written down to the estimated recovery value with a corresponding charge, net of any amount previously recognized as an allowance for expected credit loss, to Recognized gains and losses, net in the accompanying Consolidated Statements of Earnings. The remainder of unrealized loss is held in AOCI.

The activity in the allowance for expected credit losses of available-for-sale securities aggregated by investment category was as follows (in millions):

	Year Ended December 31, 2021									
	Additions				Reductions					
	Balance at Beginning of Period	For credit losses on securities for which losses were not previously recorded	For initial credit losses on purchased securities accounted for as PCD financial assets (1)	(Additions) reductions in allowance recorded on previously impaired securities	For securities sold during the period	For securities intended/required to be sold prior to recovery of amortized cost basis	Write offs charged against the allowance	Recoveries of amounts previously written off	Balance at End of Period

(1) Purchased credit deteriorated financial assets ("PCD")

Purchased credit-deteriorated available-for-sale debt securities ("PCD"s) are AFS securities purchased at a discount, where part of that discount is attributable to credit. Credit loss allowances are calculated for these securities as of the date of their acquisition, with the initial allowance serving to increase amortized cost. The following table summarizes year to date PCD AFS security purchases (in millions).

Purchased credit-deteriorated available-for-sale debt securities	December 31, 2021		December 31, 2020	
Purchase price	\$	4	\$	265
Allowance for credit losses at acquisition		1		35
Discount (or premiums) attributable to other factors		—		84
AFS purchased credit-deteriorated par value	\$	5	\$	384

The fair value and gross unrealized losses of available-for-sale securities, excluding securities in an unrealized loss position with an allowance for expected credit loss, aggregated by investment category and duration of fair value below amortized cost were as follows (dollars in millions):

	December 31, 2021					
	Less than 12 months		12 months or longer		Total

Total number of available-for-sale securities in an unrealized loss position twelve months or longer						11
Total number of available-for-sale securities in an unrealized loss position						233

We determined the increase in unrealized losses was caused by the increasing treasury rates, offset by narrower credit spreads. Specific to asset-backed and mortgage-backed securities for which an expected credit loss was not determined, the effect of any increased expectations of underlying collateral defaults have not risen to the level of impacting the tranches of those securities.

Mortgage Loans

Our mortgage loans are collateralized by commercial and residential properties.

Commercial Mortgage Loans

Commercial mortgage loans ("CMLs") represented approximately 7% of our total investments at December 31, 2021. We primarily invest in mortgage loans on income producing properties including hotels, industrial properties, retail buildings, multifamily properties and office buildings. We diversify our CML portfolio by geographic region and property type to attempt to reduce concentration risk. We continuously evaluate CMLs based on relevant current information to ensure properties are performing at a consistent and acceptable level to secure the related debt. The distribution of CMLs, gross of valuation allowances, by property type and geographic region is reflected in the following tables (dollars in millions):

Property Type:	December 31, 2021		December 31, 2020	
	Gross Carrying Value	% of Total	Gross Carrying Value	% of Total
Hotel	\$ 19	1 %	\$ 19	2 %

Allowance for expected credit loss	(6)		(2)	
Total commercial mortgage loans	\$ 2,168		\$ 903	

LTV and debt service coverage ("DSC") ratios are measures commonly used to assess the risk and quality of mortgage loans. The LTV ratio is expressed as a percentage of the amount of the loan relative to the value of the underlying property. A LTV ratio in excess of 100% indicates the unpaid loan amount exceeds the underlying collateral. The DSC ratio, based upon the most recently received financial statements, is expressed as a percentage of the amount of a property's net income to its debt service payments. A DSC ratio of less than 1.00 indicates that a property's operations do not generate sufficient income to cover debt payments. We normalize our DSC ratios to a 25-year amortization period for purposes of our general loan allowance evaluation.

All of our investments in CMLs had a loan-to-value ("LTV") ratio of less than 75% at December 31, 2021, as measured at inception of the loans unless otherwise updated.

The following tables presents the recorded investment in CMLs by LTV and DSC ratio categories and estimated fair value by the indicated loan-to-value ratios (dollars in millions):

	Debt-Service Coverage Ratios			Total Amount	% of Total	Estimated Fair Value	% of Total
	>1.25	1.00 - 1.25	<1.00				
December 31, 2021							
LTV Ratios:							
Less than 50%	\$ 626	\$ 33	\$ 9	\$ 668	31 %	\$ 745	33 %
50% to 60%	470	—	—	470	22	481	21
60% to 75%	1,036	—	—	1,036	47	1,039	46
Commercial mortgage loans	<u>\$ 2,132</u>	<u>\$ 33</u>	<u>\$ 9</u>	<u>\$ 2,174</u>	<u>100 %</u>	<u>\$ 2,265</u>	<u>100 %</u>
December 31, 2020							
LTV Ratios:							
Less than 50%	\$ 519	\$ 18	\$ —	\$ 537	60 %	\$ 557	60 %
50% to 60%	237	9	—	246	27	251	27
60% to 75%	122	—	—	122	13	119	13
Commercial mortgage loans	<u>\$ 878</u>	<u>\$ 27</u>	<u>\$ —</u>	<u>\$ 905</u>	<u>100 %</u>	<u>\$ 927</u>	<u>100 %</u>

We recognize a mortgage loan as delinquent when payments on the loan are greater than 30 days past due. As of December 31, 2021 and 2020, we had no CMLs that were delinquent in principal or interest payments.

Allowance for Expected Credit Loss

We estimate expected credit losses for our commercial mortgage loan portfolio using a probability of default/loss given default model. Significant inputs to this model include the loans current performance, underlying collateral type, location, contractual life, LTV, and DSC. The model projects losses using a two year reasonable and supportable forecast and then reverts over a three year period to market-wide historical loss experience. Changes in our allowance for expected credit losses on commercial mortgage loans are recognized in Recognized gains and losses, net in the accompanying Consolidated Statements of Earnings.

An allowance for expected credit loss is not measured on accrued interest income for commercial mortgage loans as we have a process to write-off interest on loans that enter into non-accrual status (over 90 days past due).

Residential Mortgage Loans

Residential mortgage loans ("RMLs") represented approximately 4% of our total investments at December 31, 2021. Our residential mortgage loans are closed end, amortizing loans and 100% of the properties are located in the United States. We diversify our RML portfolio by state to attempt to reduce concentration risk. The distribution of RMLs by state with highest-to-lowest concentration are reflected in the following tables (dollars in millions):

U.S. State:	December 31, 2021	
	Unpaid Principal Balance	% of Total
Florida	\$ 231	15 %
Texas	167	10
New Jersey	150	10
All Other States (1)	1,027	65
Total mortgage loans	<u>\$ 1,575</u>	<u>100 %</u>

(1) The individual concentration of each state is less than or equal to 9%.

U.S. State:	December 31, 2020	
	Unpaid Principal Balance	% of Total
California	\$ 164	15 %
Florida	188	16 %
New Jersey	96	8 %
All Other States (1)	704	61 %
Total residential mortgage loans	\$ 1,152	100 %

(1) The individual concentration of each state is less than 8%.

Residential mortgage loans have a primary credit quality indicator of either a performing or nonperforming loan. We define non-performing residential mortgage loans as those that are 90 or more days past due or in nonaccrual status, which is assessed monthly. The credit quality of RMLs was as follows (dollars in millions):

Performance indicators:	December 31, 2021		December 31, 2020	
	Carrying Value	% of Total	Carrying Value	% of Total
Performing	\$ 1,533	95 %	\$ 1,059	91 %
Non-performing	73	5	106	9 %
Total residential mortgage loans, gross of valuation allowance	\$ 1,606	100 %	\$ 1,165	100 %
Allowance for expected loan loss	(25)	—	(37)	— %
Total residential mortgage loans	\$ 1,581	100 %	\$ 1,128	100 %

Loans segregated by risk rating exposure were as follows (in millions):

Non-accrual loans by amortized cost were as follows (in millions):

Amortized cost of loans on non-accrual	December 31, 2021	December 31, 2020
Residential mortgage:	\$ 72	\$ 99
Commercial mortgage:	—	—
Total non-accrual loans	\$ 72	\$ 99

Immaterial interest income was recognized on non-accrual financing receivables for the years ended December 31, 2021 and 2020.

It is our policy to cease to accrue interest on loans that are over 90 days delinquent. For loans less than 90 days delinquent, interest is accrued unless it is determined that the accrued interest is not collectible. If a loan becomes over 90 days delinquent, it is our general policy to initiate foreclosure proceedings unless a workout arrangement to bring the loan current is in place. At December 31, 2021 and 2020, we had \$72 million and \$99 million, respectively, of mortgage loans that were over 90 days past due, of which \$39 million and \$24 million, respectively, were in the process of foreclosure. We will continue to evaluate these policies with regard to the economic challenges for mortgage debtors related to COVID-19. Our ability to initiate foreclosure proceedings may be limited by legislation passed and executive orders issued in response to COVID-19.

Allowance for Expected Credit Loss

We estimate expected credit losses for our residential mortgage loan portfolio using a probability of default/loss given default model. Significant inputs to this model include the loans' current performance, underlying collateral type, location, contractual life, LTV, and Debt to Income or FICO. The model projects losses using a two year reasonable and supportable forecast and then reverts over a three year period to market-wide historical loss experience. Changes in our allowance for expected credit losses on mortgage loans are recognized in Recognized gains and losses, net in the accompanying Consolidated Statements of Earnings.

The allowances for our mortgage loan portfolio is summarized as follows:

	Year ended December 31, 2021			Seven months ended December 31, 2020		
	Residential Mortgage	Commercial Mortgage	Total	Residential Mortgage	Commercial Mortgage	Total
Beginning Balance	\$ 37	\$ 2	\$ 39	—	—	—
Provision for loan losses	(12)	4	(8)	\$ 30	\$ 2	\$ 32
For initial credit losses on purchased loans accounted for as PCD financial assets	—	—	—	7	—	7
Ending Balance	<u>\$ 25</u>	<u>\$ 6</u>	<u>\$ 31</u>	<u>\$ 37</u>	<u>\$ 2</u>	<u>\$ 39</u>

An allowance for expected credit loss is not measured on accrued interest income for commercial mortgage loans as we have a process to write-off interest on loans that enter into non-accrual status (over 90 days past due). Allowances for expected credit losses are measured on accrued interest income for residential mortgage loans and were immaterial as of December 31, 2021 and 2020.

Interest and Investment Income

The major sources of Interest and investment income reported on the accompanying Consolidated Statements of Earnings were as follows (in millions):

	Year ended		
	December 31, 2021	December 31, 2020	December 31, 2019
Fixed maturity securities, available-for-sale	\$ 1,267	\$ 708	\$ 70
Equity securities	23	19	10
Preferred securities	63	59	24
Mortgage loans	131	50	—
Invested cash and short-term investments	7	8	34
Limited partnerships	589	76	—
Tax deferred property exchange income	16	33	72
Other investments	32	25	19
Gross investment income	2,128	978	229
Investment expense	(167)	(78)	(4)
Interest and investment income	\$ 1,961	\$ 900	\$ 225

Recognized Gains and Losses, net

Details underlying Recognized gains and losses, net reported on the accompanying Consolidated Statements of Earnings were as follows (in millions):

	Year ended		
	December 31, 2021	December 31, 2020	December 31, 2019
Net realized gains (losses) on fixed maturity available-for-sale securities	\$ 111	\$ 102	\$ (6)
Net realized/unrealized gains (losses) on equity securities (2)	(434)	241	309
Net realized/unrealized gains (losses) on preferred securities (3)	(14)	15	28
Realized gains (losses) on other invested assets	8	(25)	(13)
Change in allowance for expected credit losses	8	(37)	—
Derivatives and embedded derivatives:			
Realized gains on certain derivative instruments	456	76	—
Unrealized gains on certain derivative instruments	159	161	—
Change in fair value of reinsurance related embedded derivatives (1)	34	(53)	—
Change in fair value of other derivatives and embedded derivatives	6	8	—
Realized gains on derivatives and embedded derivatives	655	192	—
Recognized gains and losses, net	\$ 334	\$ 488	\$ 318

(1) Change in fair value of reinsurance related embedded derivatives is due to activity related to the reinsurance treaties with Kubera (novated from Kubera to Somerset effective October 31, 2021) and Aspidia Re.

(2) Includes net valuation (losses) gains of \$(436) million, \$248 million and \$299 million for the years ended December 31, 2021, 2020, and 2019 respectively.

(3) Includes net valuation (losses) gains of \$(14) million, \$(40) million, and \$17 million for the years ended December 31, 2021, 2020 and 2019, respectively.

The proceeds from the sale of fixed-maturity securities and the gross gains and losses associated with those transactions were as follows (in millions):

	Year ended		
	December 31, 2021	December 31, 2020	December 31, 2019
Proceeds	\$ 4,749	\$ 1,946	\$ 614
Gross gains	158	116	4
Gross losses	(49)	(12)	(9)

Unconsolidated Variable Interest Entities

The Company owns investments in VIEs that are not consolidated within our financial statements. A VIE is an entity that does not have sufficient equity to finance its own activities without additional financial support, where investors lack certain characteristics of a controlling financial interest, or where the entity is structured with non-substantive voting rights. VIEs are consolidated by their 'primary beneficiary', a designation given to an entity that receives both the benefits from the VIE as well as the substantive power to make its key economic decisions. While the Company participates in the benefits from VIEs in which it invests, but does not consolidate, the substantive power to make the key economic decisions for each respective VIE resides with entities not under common control with the Company. It is for this reason that the Company is not considered the primary beneficiary for the VIE investments that are not consolidated.

We invest in various limited partnerships and limited liability companies primarily as a passive investor. These investments are primarily in credit funds with a bias towards current income, real assets, or private equity. Limited partnership and limited liability company interests are accounted for under the equity method and are included in Investments in unconsolidated affiliates on our Consolidated Balance Sheets. In addition, we invest in structured investments which may be VIEs, but for which we are not the primary beneficiary. These structured investments typically invest in fixed income investments and are managed by third parties and include asset-backed securities, commercial mortgage-backed securities and residential mortgage-backed securities included in fixed maturity securities available for sale on our Consolidated Balance Sheets.

Our maximum exposure to loss with respect to these VIEs is limited to the investment carrying amounts reported in our Consolidated Balance Sheets for limited partnerships and the amortized costs of our fixed maturity securities, in addition to any required unfunded commitments (also refer to Note H - Commitments and Contingencies).

The following table summarizes the carrying value and the maximum loss exposure of our unconsolidated VIEs:

	December 31, 2021		December 31, 2020	
	Carrying Value	Maximum Loss Exposure	Carrying Value	Maximum Loss Exposure
Investments in unconsolidated affiliates	\$ 2,350	\$ 3,496	\$ 1,156	\$ 1,550
Fixed maturity securities	12,382	12,802	9,873	9,513
Total unconsolidated VIE investments	\$ 14,732	\$ 16,298	\$ 11,029	\$ 11,063

Investment with Related Party

Included in equity securities as of December 31, 2021 and 2020 are 5,775,598 and 5,706,134 shares, respectively, of Cannae common stock (NYSE: CNNE). The fair value of our related party investment based on quoted market prices was \$203 million and \$253 million as of December 31, 2021 and December 31, 2020, respectively. In order to maintain the tax-free treatment of the November 17, 2017 split-off of Cannae Holdings, Inc. we are required to dispose of these shares by November 17, 2022.

Note F — Derivative Financial Instruments

The carrying amounts of derivative instruments, including derivative instruments embedded in FIA and IUL contracts, and reinsurance is as follows (in millions):

	December 31, 2021	December 31, 2020
Assets:		
Derivative investments:		
Call options	\$ 816	\$ 548
Other long-term investments:		
Other embedded derivatives	33	27

	<u>\$ 3,956</u>	<u>\$ 3,505</u>

The change in fair value of derivative instruments included in the accompanying Consolidated Statements of Earnings is as follows (in millions):

	Year Ended December 31, 2021	Seven Months Ended December 31, 2020
Net investment gains (losses):		
Call options	\$ 597	\$ 229
Futures contracts	8	15
Foreign currency forwards	9	(7)
Other derivatives and embedded derivatives	5	8
Reinsurance related embedded derivatives	34	(53)
Total net investment gains	<u>\$ 653</u>	<u>\$ 192</u>
Benefits and other changes in policy reserves:		
FIA/ IUL embedded derivatives	\$ 479	\$ 552

Additional Disclosures
FIA/ IUL Embedded Derivative and Call Options and Futures

We have FIA and IUL contracts that permit the holder to elect an interest rate return or an equity index linked component, where interest credited to the contracts is linked to the performance of various equity indices, primarily the S&P 500 Index. This feature represents an embedded derivative under GAAP. The FIA/IUL embedded derivatives are valued at fair value and included in the liability for contractholder funds in the accompanying Consolidated Balance Sheets with changes in fair value included as a component of Benefits and other changes in policy reserves in the Consolidated Statements of Earnings. See a description of the fair value methodology used in Note D *Fair Value of Financial Instruments*.

We purchase derivatives consisting of a combination of call options and futures contracts (specifically for FIA contracts) on the applicable market indices to fund the index credits due to FIA/ IUL contractholders. The call options are one, two, three, and five year options purchased to match the funding requirements of the underlying policies. On the respective anniversary dates of the indexed policies, the index used to compute the interest credit is reset and we purchase new call options to fund the next index credit. We manage the cost of these purchases through the terms of our FIA/IUL contracts, which permit us to change caps, spreads or participation rates, subject to guaranteed minimums, on each contract's anniversary date. The change in

the fair value of the call options and futures contracts is generally designed to offset the portion of the change in the fair value of the FIA/IUL embedded derivatives related to index performance through the current credit period. The call options and futures contracts are marked to fair value with the change in fair value included as a component of Recognized gains and losses, net. The change in fair value of the call options and futures contracts includes the gains and losses recognized at the expiration of the instrument term or upon early termination and the changes in fair value of open positions.

Other market exposures are hedged periodically depending on market conditions and our risk tolerance. Our FIA/IUL hedging strategy economically hedges the equity returns and exposes us to the risk that unhedged market exposures result in divergence between changes in the fair value of the liabilities and the hedging assets. We use a variety of techniques, including direct estimation of market sensitivities, to monitor this risk daily. We intend to continue to adjust the hedging strategy as market conditions and our risk tolerance changes.

Credit Risk

We are exposed to credit loss in the event of non-performance by our counterparties on the call options and reflect assumptions regarding this non-performance risk in the fair value of the call options. The non-performance risk is the net counterparty exposure based on the fair value of the open contracts less collateral held. We maintain a policy of requiring all derivative contracts to be governed by an International Swaps and Derivatives Association (“ISDA”) Master Agreement.

Information regarding our exposure to credit loss on the call options we hold is presented in the following table (in millions):

Counterparty	Credit Rating (Fitch/Moody's/S&P) (1)	December 31, 2021			
		Notional Amount	Fair Value	Collateral	Net Credit Risk
Merrill Lynch	AA/*A+	\$ 3,307	\$ 128	\$ 86	\$ 42

(1) An * represents credit ratings that were not available.

Collateral Agreements

We are required to maintain minimum ratings as a matter of routine practice as part of our over-the-counter derivative agreements on ISDA forms. Under some ISDA agreements, we have agreed to maintain certain financial strength ratings. A downgrade below these levels provides the counterparty under the agreement the right to terminate the open option contracts between the parties, at which time any amounts payable by us or the counterparty would be dependent on the market value of the underlying option contracts. Our current rating does not allow any counterparty the right to terminate ISDA agreements. In certain transactions, both we and the counterparty have entered into a collateral support agreement requiring either party to post collateral when the net exposures exceed pre-determined thresholds. For all counterparties, except Merrill Lynch, this threshold is set to zero. As of December 31, 2021 and 2020, counterparties posted \$790 million and \$491 million, respectively, of collateral, of which \$576 million and \$415 million, respectively, is included in cash and cash equivalents with an associated payable for this collateral included in accounts payable and accrued liabilities on the Consolidated Balance Sheet. Accordingly, the maximum amount of loss due to credit risk that we would incur if parties to the call options failed completely to perform according to the terms of the contracts was \$42 million at December 31, 2021 and \$58 million at December 31, 2020.

We are required to pay counterparties the effective federal funds rate each day for cash collateral posted to F&G for daily mark to market margin changes. We reinvest derivative cash collateral to reduce the interest cost. Cash collateral is invested in overnight investment sweep products, which are included in cash and cash equivalents in the accompanying Consolidated Balance Sheets.

We held 329 and 384 futures contracts at December 31, 2021 and 2020, respectively. The fair value of the futures contracts represents the cumulative unsettled variation margin (open trade equity, net of cash settlements). We provide cash collateral to the counterparties for the initial and variation margin on the futures contracts, which is included in cash and cash equivalents in the accompanying Consolidated Balance Sheets. The amount of cash collateral held by the counterparties for such contracts was \$3 million and \$4 million at December 31, 2021 and 2020, respectively.

Reinsurance Related Embedded Derivatives

As discussed in Note O *Reinsurance*, F&G entered into a reinsurance agreement with Kubera, effective December 31, 2018, to cede certain MYGA and deferred annuity business on a coinsurance funds withheld basis, net of applicable existing reinsurance. Effective October 31, 2021, this agreement was novated from Kubera to Somerset, a certified third party reinsurer. Additionally, F&G entered into a reinsurance agreement with Aspida Re effective January 1, 2021, to cede a quota share of certain deferred annuity business on a funds withheld basis. Fair value movements in the funds withheld balances associated with these arrangements creates an obligation for FGL Insurance to pay Somerset and Aspida Re at a later date, which results in embedded derivatives. These embedded derivatives are considered total return swaps with contractual returns that are attributable to the assets and liabilities associated with the reinsurance arrangements.

Note G — Notes Payable

Notes payable consists of the following:

	December 31, 2021	December 31, 2020
	(In millions)	
4.50% Notes, net of discount	\$ 444	\$ 443
5.50% Notes, net of discount	400	399
3.40% Notes, net of discount	643	643
2.45% Notes, net of discount	593	592
3.20% Notes, net of discount	443	—
Revolving Credit Facility	(4)	(4)
5.50% F&G Notes	577	589
	<u>\$ 3,096</u>	<u>\$ 2,662</u>

On September 17, 2021, we completed our underwritten public offering of \$450 million aggregate principal amount of our 3.20% Notes due 2051, pursuant to our registration statement on Form S-3 ASR (File No. 333-239002) and the related prospectus supplement. The net proceeds from the registered offering of the 3.20% Notes were approximately \$443 million, after deducting underwriting discounts, commissions and offering expenses. We plan to use the net proceeds from the offering for general corporate purposes.

On October 29, 2020, we entered into the Fifth Restated Credit Agreement for our Amended Revolving Credit Facility with Bank of America, N.A., as administrative agent and the other agents party thereto. Among other changes, the Fifth Restated Credit Agreement amends the Fourth Restated Credit Agreement to extend the maturity date from April 27, 2022 to October 29, 2025. The material terms of the Fourth Restated Credit Agreement are set forth in our Annual Report for the year ended December 31, 2019. As of December 31, 2021, there was no principal outstanding, \$4 million of unamortized debt issuance costs, and \$800 million of available borrowing capacity under the Revolving Credit Facility.

On September 15, 2020, we completed our underwritten public offering of \$600 million aggregate principal amount of our 2.45% Notes due March 15, 2031 (the "2.45% Notes") pursuant to an effective registration statement filed with the Securities and Exchange Commission ("SEC"). The net proceeds from the registered offering of the 2.45% Notes were approximately \$593 million, after deducting underwriting discounts and commissions and offering expenses. We used the net proceeds from the offering (i) to repay the remaining \$260 million outstanding indebtedness under our prior term loan credit agreement dated April 22, 2020, among us, as borrower, various lenders, and Bank of American N.A., as administrative agent (the "Term Loan"), which provided for an aggregate principal borrowing of \$1.0 billion and which we entered into to fund a portion of the acquisition of F&G and (ii) for general corporate purposes.

On June 12, 2020, we completed our underwritten public offering of \$650 million aggregate principal amount of the 3.40% Notes due 2030 (the "3.40% Notes") pursuant to an effective registration statement filed with the SEC. The net proceeds from the registered offering of the 3.40% Notes were approximately \$642 million, after deducting underwriting discounts, and commissions and offering expenses. We used the net proceeds from the offering (i) to repay \$640 million of the then outstanding principal amount under the Term Loan, and (ii) for general corporate purposes.

On June 1, 2020, as a result of the F&G acquisition, we assumed \$550 million aggregate principal amount of 5.50% senior notes due 2025 (the "5.50% F&G Notes"), originally issued on April 20, 2018 at 99.5% of face value for proceeds of \$547 million.

On August 13, 2018, we completed an offering of \$450 million in aggregate principal amount of 4.50% notes due August 2028 (the "4.50% Notes"), pursuant to Rule 144A and Regulation S under the Securities Act of 1933, as amended. The 4.50% Notes were priced at 99.252% of par to yield 4.594% annual interest. We pay interest on the 4.50% Notes semi-annually on the 15th of February and August, beginning February 15, 2019. The 4.50% Notes contain customary covenants and events of default for investment grade public debt, which primarily relate to failure to make principal or interest payments. On May 16, 2019, we completed an offering to exchange the 4.50% Notes for substantially identical notes registered pursuant to Rule 424 under the Securities Act of 1933 (the "4.50% Notes Exchange"). There were no material changes to the terms of the 4.50% Notes as a result of the 4.50% Notes Exchange and all holders of the 4.50% Notes accepted the offer to exchange.

On August 28, 2012, we completed an offering of \$400 million in aggregate principal amount of 5.50% notes due September 2022 (the "5.50% Notes"), pursuant to an effective registration statement previously filed with the SEC. The notes were priced at 99.513% of par to yield 5.564% annual interest. We pay interest on the 5.50% semi-annually on the 1st of March and September, beginning March 1, 2013. These notes contain customary covenants and events of default for investment grade public debt. These events of default include a cross default provision, with respect to any other debt of the Company in an aggregate amount exceeding \$100 million for all such debt, arising from (i) failure to make a principal payment when due or (ii) the occurrence of an event, which results in such debt being due and payable prior to its scheduled maturity.

Gross principal maturities of notes payable at December 31, 2021 are as follows (in millions):

2022	\$	4
2023		.
2024		.
2025		5
2026		.
Thereafter		2,1
	\$	3,1

Note H — Commitments and Contingencies

Legal and Regulatory Contingencies

In the ordinary course of business, we are involved in various pending and threatened litigation matters related to our operations, some of which include claims for punitive or exemplary damages. With respect to our title insurance operations, this customary litigation includes but is not limited to a wide variety of cases arising out of or related to title and escrow claims, for which we make provisions through our loss reserves. See Note C Summary of Reserve for Title Claim Losses. Additionally, like other companies, our ordinary course litigation includes a number of class action and purported class action lawsuits, which make allegations related to aspects of our operations. We believe that no actions, other than the matters discussed below, if any, depart from customary litigation incidental to our business.

We review lawsuits and other legal and regulatory matters (collectively "legal proceedings") on an ongoing basis when making accrual and disclosure decisions. When assessing reasonably possible and probable outcomes, management bases its decision on its assessment of the ultimate outcome assuming all appeals have been exhausted. For legal proceedings in which it has been determined that a loss is both probable and reasonably estimable, a liability based on known facts and represents our best estimate has been recorded. Our accrual for legal and regulatory matters was \$12 million and \$13 million as of December 31, 2021 and 2020, respectively. None of the amounts we have currently recorded are considered to be material to our financial condition individually or in the aggregate. Actual losses may materially differ from the amounts recorded and the ultimate outcome of our pending legal proceedings is generally not yet determinable. While some of these matters could be material to our operating results or cash flows for any particular period if an unfavorable outcome results, at present we do not believe that the ultimate resolution of currently pending legal proceedings, either individually or in the aggregate, will have a material adverse effect on our financial condition.

Two lawsuits have been filed related to FNF's acquisition of F&G. On August 4, 2020, a stockholder derivative lawsuit styled, *City of Miami General Employees' and Sanitation Employees' Retirement Trust v. Fidelity National Financial, et al.*, was filed in the Court of Chancery of the State of Delaware against the Company, its Board of Directors and others alleging breach of fiduciary duties as directors and officers relating to FNF's acquisition of F&G. The Company's Board of Directors ("Board") designated a Special Litigation Committee (the "SLC") consisting of three of the Board's Directors, and authorized the SLC, among other things, to investigate and evaluate the claims and allegations asserted in the lawsuit. The Board gave the SLC the sole authority and power to consider and determine whether or not prosecution of the claims asserted in the lawsuit is in the best interest of the Company and its shareholders, and what action the Company should take with respect to the lawsuit.

On January 24, 2022, the SLC, acting on behalf of FNF, and the other parties to the lawsuit reached an agreement in principle to settle the action subject to various terms and conditions. The settlement will be presented to the court for approval, and if approved, is expected to be finalized during the second quarter of 2022.

On August 17, 2020, a lawsuit styled, *In the Matter of FGL Holdings*, was filed in the Grand Court of the Cayman Islands where dissenting shareholders, Kingfishers LP, Kingstown 1740 Fund LP, Kingstown Partners II LP, Kingstown Partners Master Ltd., and Ktown LP, have asserted statutory appraisal rights relative to their ownership of 12,000,000 shares of F&G stock in connection with the acquisition. They seek a judicial determination of the fair value of their shares of F&G stock under the law of the Cayman Islands, together with interest. The parties have exchanged expert reports, and the matter is scheduled for trial during the second quarter of 2022. We do not believe the result in either case will have a material adverse effect on our financial condition.

From time to time we receive inquiries and requests for information from state insurance departments, attorneys general and other regulatory agencies about various matters relating to our business. Sometimes these take the form of civil investigative demands or subpoenas. We cooperate with all such inquiries and we have responded to or are currently responding to inquiries from multiple governmental agencies. Also, regulators and courts have been dealing with issues arising from foreclosures and related processes and documentation. Various governmental entities are studying the title insurance product, market, pricing, and business practices, and potential regulatory and legislative changes, which may materially affect our business and operations. From time to time, we are assessed fines for violations of regulations or other matters or enter into settlements with such authorities, which may require us to pay fines or claims or take other actions. We do not anticipate such fines and settlements, either individually or in the aggregate, will have a material adverse effect on our financial condition.

Acquired Contingencies - F&G

We have received inquiries from a number of state regulatory authorities regarding our use of the U.S. Social Security Administration's Death Master File ("Death Master File") and compliance with state claims practices regulations and unclaimed property or escheatment laws. We have established procedures to periodically compare our in-force life insurance and annuity policies against the Death Master File or similar databases; investigate any identified potential matches to confirm the death of the insured; and determine whether benefits are due and attempt to locate the beneficiaries of any benefits due or, if no beneficiary can be located, escheat the benefit to the state as unclaimed property. We believe we have established sufficient reserves with respect to these matters; however, it is possible that third parties could dispute these amounts and additional payments or additional unreported claims or liabilities could be identified, which could be significant and could have a material adverse effect on our results of operations.

Escrow Balances

In conducting our operations, we routinely hold customers' assets in escrow, pending completion of real estate transactions, and are responsible for the proper disposition of these balances for our customers. Certain of these amounts are maintained in segregated bank accounts and have not been included in the accompanying Consolidated Balance Sheets, consistent with GAAP and industry practice. These balances amounted to \$30.5 billion and \$26.5 billion at December 31, 2021 and 2020, respectively. As a result of holding these customers' assets in escrow, we have ongoing programs for realizing economic benefits during the year through favorable borrowing and vendor arrangements with various banks. There were no investments or loans outstanding as of December 31, 2021 and 2020 related to these arrangements.

F&G Commitments

The Company has unfunded investment commitments as of December 31, 2021 and 2020 based upon the timing of when investments are executed compared to when the actual investments are funded, as some investments require that funding occur over a period of months or years. A summary of unfunded commitments by invested asset class is included below (in millions):

Asset Type	December 31, 2021	December 31, 2020
Unconsolidated VIEs:		
Limited partnerships	\$ 1,146	\$ 394
Whole loans	589	—
Fixed maturity securities, ABS	306	384
Other fixed maturity securities, AFS	119	48
Other assets	156	135
Commercial mortgage loans	44	—
Residential mortgage loans	—	6
Total	\$ 2,360	\$ 967

See Note A - *Business and Summary of Significant Accounting Policies*, for discussion of funding agreements that have been issued pursuant to the FABN Program as well as to the FHLB that are included in Contractholder funds.

As discussed in Note O - *F&G Reinsurance*, to enhance Kubera's ability to pay its obligations under the amended reinsurance agreement, effective October 31, 2021, F&G entered into a Variable Note Purchase Agreement (the "NPA"), whereby F&G agreed to fund a note to Kubera to be used to ultimately settle with F&G, with principal increases up to a maximum amount of \$300 million, to the extent a potential funding shortfall (treaty assets are less than then the total funding requirement) is projected relative to the business ceded to Kubera from F&G as part of the amended reinsurance agreement. The potential funding shortfall will be determined quarterly and, among other items, is impacted by the market value of the assets in the funds withheld account related to the reinsurance agreement and Kubera's capital as calculated on a Bermuda regulatory basis. The NPA matures on November 30, 2071. Based on the current level of the treaty assets and projections that these policies will be profitable over the lifetime of the agreement, we do not expect significant fundings to occur under the NPA. At December 31, 2021, the amount funded under the NPA was insignificant.

Note I — Dividends

On February 16, 2022, our Board of Directors declared cash dividends of \$0.44 per share, payable on March 31, 2022, to FNF common shareholders of record as of March 17, 2022.

Note J — Segment Information

Summarized financial information concerning our reportable segments is shown in the following tables. On June 1, 2020, we completed our acquisition of F&G. As a result, the year ended December 31, 2021 and the seven months ended December 31, 2020 include our F&G segment.

As of and for the year ended December 31, 2021:

	Title	F&G	Corporate and Other	Total
	(In millions)			
Title premiums	\$ 8,553	\$ —	\$ —	\$ 8,553
Other revenues	3,228	1,395	172	4,795
Revenues from external customers	11,781	1,395	172	13,348

Goodwill	2,462	265	2,727

The activities in our segments include the following:

- *Title*. This segment consists of the operations of our title insurance underwriters and related businesses. This segment provides core title insurance and escrow and other title-related services including trust activities, trustee sales guarantees, and home warranty products. This segment also includes our transaction services business, which includes other title-related services used in the production and management of mortgage loans, including mortgage loans that experience default.
- *F&G*. This segment primarily consists of the operations of our annuities and life insurance related businesses. This segment issues a broad portfolio of annuity and life products, including deferred annuities (fixed indexed and fixed rate annuities), immediate annuities and indexed universal life insurance. This segment also provides funding agreements and pension risk transfer solutions.
- *Corporate and Other*. This segment consists of the operations of the parent holding company, our real estate technology subsidiaries and our remaining real estate brokerage businesses. This segment also includes certain other unallocated corporate overhead expenses and eliminations of revenues and expenses between it and our Title segment.

Refer to Note L *Revenue Recognition* for a description of our accounting for our various revenue streams.

Note K — Supplemental Cash Flow Information

The following supplemental cash flow information is provided with respect to certain cash payment and non-cash investing and financing activities.

	Year Ended December 31,		
	2021	2020	2019
(In millions)			
Cash paid for:			
Interest	\$ 112	\$ 73	\$ 44
Income taxes	653	315	251
Deferred sales inducements	90	46	—
Non-cash investing and financing activities:			
Equity financing associated with the acquisition of F&G	\$ —	\$ 609	\$ —
Investments received from pension risk transfer premiums	316	—	—
Change in proceeds of sales of investments available for sale receivable in period	(160)	(4)	1
Change in purchases of investments available for sale payable in period	18	14	(1)
Change in treasury stock purchases payable in period	(3)	8	(1)
Change in accrued dividends payable in period	1	1	2
Lease liabilities recognized in exchange for lease right-of-use assets	47	44	36
Remeasurement of lease liabilities	87	48	101
Liabilities assumed in connection with acquisitions (excluding F&G)(1)			
Fair value of assets acquired	85	32	1
Less: Total Purchase price	59	24	1
Liabilities and noncontrolling interests assumed	\$ 26	\$ 8	\$ —

(1) For further information related to the acquisition of F&G, refer to Note B *Acquisitions*

Note L — Revenue Recognition
Disaggregation of Revenue

Our revenue consists of:

Revenue Stream	Income Statement Classification	Segment	Year Ended December 31,		
			2021	2020	2019
Revenue from insurance contracts:			(in millions)		
Direct title insurance premiums	Direct title insurance premiums	Title	\$ 3,571	\$ 2,699	\$ 2,381

Recognized gains and losses, net	Recognized gains and losses, net	Various	334	488	318
Total revenues	Total revenues		\$ 15,643	\$ 10,778	\$ 8,469

(1) Includes \$1,146 of life-contingent pension risk transfer premiums in 2021

Our Direct title insurance premiums are recognized as revenue at the time of closing of the underlying transaction as the earnings process is then considered complete. Regulation of title insurance rates varies by state. Premiums are charged to customers based on rates predetermined in coordination with each states' respective Department of Insurance. Cash associated with such revenue is typically collected at closing of the underlying real estate transaction. Premium revenues from agency title operations are recognized when the underlying title order and transaction closing, if applicable, are complete.

Revenues from our home warranty business are generated from contracts with customers to provide warranty for major home appliances. Substantially all of our home warranty contracts are one year in length and revenue is recognized ratably over the term of the contract.

Escrow fees and Other title-related fees and income in our Title segment are closely related to Direct title insurance premiums and are primarily associated with managing the closing of real estate transactions including the processing of funds on behalf of the transaction participants, gathering and recording the required closing documents, providing notary and home inspection services, and other real estate or title-related activities. Revenue is primarily recognized upon closing of the underlying real estate transaction or completion of services. Cash associated with such revenue is typically collected at closing.

Revenues from ServiceLink, excluding its title premiums, escrow fees and loan subservicing fees primarily include revenues from real estate appraisal services and foreclosure processing and facilitation services. Revenues from real estate appraisal services are recognized when all appraisal work is complete, a final report is issued to the client and the client is billed. Revenues from foreclosure processing and facilitation services are primarily recognized upon completion of the services and when billing to the client is complete.

Life insurance premiums in our F&G segment reflect premiums for life-contingent PRT, traditional life insurance products and life-contingent immediate annuity products which are recognized as revenue when due from the policyholder. We have

ceded the majority of our traditional life business to unaffiliated third party reinsurers. While the base contract has been reinsured, we continue to retain the return of premium rider. Insurance and investment product fees and other consist primarily of the cost of insurance on IUL policies, unearned revenue ("UREV") on IUL policies, policy rider fees primarily on FIA policies and surrender charges assessed against policy withdrawals in excess of the policyholder's allowable penalty-free amounts.

Premium and annuity deposit collections for FIA, fixed rate annuities, immediate annuities and PRT without life contingency, and amounts received for funding agreements are reported in the financial statements as deposit liabilities (i.e., contractholder funds) instead of as sales or revenues. Similarly, cash payments to customers are reported as decreases in the liability for contractholder funds and not as expenses. Sources of revenues for products accounted for as deposit liabilities include net investment income, surrender, cost of insurance and other charges deducted from contractholder funds, and net realized gains (losses) on investments. Components of expenses for products accounted for as deposit liabilities are interest-sensitive and index product benefits (primarily interest credited to account balances or the hedging cost of providing index credits to the policyholder), amortization of DAC, DSI, and VOBA, other operating costs and expenses, and income taxes.

Premiums, annuity deposits (net of reinsurance) and funding agreements, which are not included as revenues in the accompanying Consolidated Statements of Earnings, collected by product type were as follows:

Product Type	Year ended	Seven months ended
	December 31, 2021	December 31, 2020
Fixed indexed annuities	4,420	1,966
Fixed rate annuities	878	631
Funding agreements (FABN/FHLB)	2,658	100
Life insurance and other (a)	329	152
Total	\$ 8,285	\$ 2,849

(a) Life insurance and other primarily includes indexed universal life insurance.

Real estate technology revenues are primarily comprised of subscription fees for use of software provided to real estate professionals. Subscriptions are only offered on a month-by-month basis and fees are billed monthly. Revenue is recognized in the month services are provided.

Real estate brokerage revenues are primarily comprised of commission revenues earned in association with the facilitation of real estate transactions and are recognized upon closing of the sale of the underlying real estate transaction.

Loan subservicing revenues are generated by certain subsidiaries of ServiceLink and are associated with the servicing of mortgage loans on behalf of its customers. Revenue is recognized when the underlying work is performed and billed. Loan subservicing revenues are subject to the recognition requirements of ASC Topic 860.

Interest and investment income consists primarily of interest payments received on fixed maturity security holdings and dividends received on equity and preferred security holdings along with the investment income of limited partnerships.

We do not disclose the value of unsatisfied performance obligations for (i) contracts with an original expected length of one year or less, primarily related to revenue from our home warranty business, and (ii) contracts for which we recognize revenue at the amount to which we have the right to invoice for services performed.

Contract Balances

The following table provides information about trade receivables and deferred revenue:

	December 31, 2021	December 31, 2020	
		(In millions)	
Trade receivables	\$ 524	\$	404
Deferred revenue (contract liabilities)	144		117

Deferred revenue is recorded primarily for our home warranty contracts. Revenues from home warranty products are recognized over the life of the policy, which is primarily one year. The unrecognized portion is recorded as deferred revenue in accounts payable and other accrued liabilities in the Consolidated Balance Sheets. During the years ended December 31, 2021 and 2020, we recognized \$106 million and \$103 million of revenue, respectively, which was included in deferred revenue at the beginning of the respective period.

Note M — Intangibles

A summary of the changes in the carrying amounts of our VOBA, DAC and DSI intangible assets are as follows (in millions):

	VOBA	DAC	DSI	Total
Balance at January 1, 2021	\$ 1,466	\$ 222	\$ 36	\$ 1,724
Purchase price allocation adjustments	61	—	—	61
Deferrals	—	585	90	675
Amortization	(436)	(46)	(35)	(517)
Interest	30	13	1	44
Unlocking	13	1	(2)	12
Adjustment for net unrealized investment losses (gains)	51	(14)	(2)	35
Balance at December 31, 2021	<u>\$ 1,185</u>	<u>\$ 761</u>	<u>\$ 88</u>	<u>\$ 2,034</u>
	VOBA	DAC	DSI	Total
Balance at January 1, 2020	\$ —	\$ —	\$ —	\$ —
F&G acquisition	1,847	—	—	1,847
Deferrals	—	251	46	297
Amortization	(120)	(6)	(5)	(131)
Interest	20	2	—	22
Unlocking	2	—	—	2
Adjustment for net unrealized investment gains	(283)	(25)	(5)	(313)
Balance at December 31, 2020	<u>\$ 1,466</u>	<u>\$ 222</u>	<u>\$ 36</u>	<u>\$ 1,724</u>

Amortization of VOBA, DAC, and DSI is based on the current and future expected gross margins or profits recognized, including investment gains and losses. The interest accrual rate utilized to calculate the accretion of interest on VOBA ranged from 0% to 4.71%. The adjustment for unrealized net investment losses (gains) represents the amount of VOBA, DAC, and DSI that would have been amortized if such unrealized gains and losses had been recognized. This is referred to as the “shadow adjustments” as the additional amortization is reflected in AOCI rather than the Consolidated Statements of Earnings. As of December 31, 2021 and 2020, the VOBA balances included cumulative adjustments for net unrealized investment gains of \$232 million and \$283 million respectively, the DAC balances included cumulative adjustments for net unrealized investment gains of \$39 million and \$25 million, respectively, and the DSI balance included net unrealized investment gains of \$7 million and \$5 million, respectively.

For the in-force liabilities as of December 31, 2021, the estimated amortization expense for VOBA in future fiscal periods is as follows (in millions):

Fiscal Year	Estimated Amortization Expense
2022	\$ 1
2023	1
2024	1
2025	1
2026	1
Thereafter	8

Definite and Indefinite Lived Other Intangible Assets

Other intangible assets as of December 31, 2021 consist of the following (in millions):

	Cost	Accumulated amortization	Net carrying amount	Weighted average useful life (years)
Customer relationships and contracts	\$ 803	\$ (651)	\$ 152	10
Computer software	488	(307)	181	2 to 10
Value of distribution asset (VODA)	140	(25)	115	15
Definite lived trademarks, tradenames, and other	49	(33)	16	10
Indefinite lived tradenames and other	59	N/A	59	Indefinite
Total			\$ 523	

Other intangible assets as of December 31, 2020 consist of the following (in millions):

	Cost	Accumulated amortization	Net carrying amount	Weighted average useful life (years)
Customer relationships and contracts	\$ 783	\$ (596)	\$ 187	10
Computer software	416	(262)	154	2 to 10
Value of distribution Asset (VODA)	140	(10)	130	15
Definite lived trademarks, tradenames, and other	73	(39)	34	10
Indefinite lived tradenames and other	35	N/A	35	Indefinite
Total			\$ 540	

Amortization expense for amortizable intangible assets, which consist primarily of VODA, customer relationships and computer software, was \$135 million, \$138 million, and \$131 million for the years ended December 31, 2021, 2020 and 2019, respectively. Estimated amortization expense for the next five years for assets owned at December 31, 2021, is \$116 million in 2022, \$93 million in 2023, \$61 million in 2024, \$44 million in 2025 and \$34 million in 2026.

Note N — Goodwill

A summary of the changes in Goodwill consists of the following:

	Title	F&G	Corporate and Other	Total
	(In millions)			
Balance, December 31, 2019	\$ 2,462	\$ —	\$ 265	\$ 2,727
Goodwill associated with acquisitions	16	1,751	1	1,768
Balance, December 31, 2020	\$ 2,478	\$ 1,751	\$ 266	\$ 4,495
Goodwill associated with acquisitions	38	—	—	38
Adjustments to prior year acquisitions	1	5	—	6
Balance, December 31, 2021	\$ 2,517	\$ 1,756	\$ 266	\$ 4,539

Note O — F&G Reinsurance

F&G reinsures portions of its policy risks with other insurance companies. The use of indemnity reinsurance does not discharge an insurer from liability on the insurance ceded. The insurer is required to pay in full the amount of its insurance liability regardless of whether it is entitled to or able to receive payment from the reinsurer. The portion of risks exceeding F&G's retention limit is reinsured. F&G primarily seeks reinsurance coverage in order to limit its exposure to mortality losses and enhance capital management. If the underlying policy being reinsured is an insurance contract, F&G follows reinsurance accounting when there is adequate risk transfer or deposit accounting if there is inadequate risk transfer. If the underlying policy being reinsured is an investment contract, the effects of the agreement are accounted for as a separate investment contract. Refer to Note A - *Business and Summary of Significant Accounting Policies* for more information over our accounting policy for reinsurance agreements.

The effect of reinsurance on net premiums earned and net benefits incurred (benefits paid and reserve changes) for the twelve and seven months ended December 31, 2021 and December 31, 2020 were as follows (in millions):

	Twelve months ended		Seven months ended	
	December 31, 2021		December 31, 2020	
	Net Premiums Earned	Net Benefits Incurred	Net Premiums Earned	Net Benefits Incurred
Direct	\$ 1,314	\$ 3,282	108	976
Assumed	—	—	—	1
Ceded	(137)	(1,144)	(85)	(111)
Net	\$ 1,177	\$ 2,138	23	866

Amounts payable or recoverable for reinsurance on paid and unpaid claims are not subject to periodic or maximum limits. F&G did not write off any significant reinsurance balances during the year ended December 31, 2021 or the seven months ended December 31, 2020. F&G did not commute any ceded reinsurance treaties during the year ended December 31, 2021 or the seven months ended December 31, 2020.

Following the adoption of ASC 326, F&G estimates expected credit losses on reinsurance recoverables using a probability of default/loss given default model. Significant inputs to the model include the reinsurer's credit risk, expected timing of recovery, industry-wide historical default experience, senior unsecured bond recovery rates, and credit enhancement features. As of the June 1, 2020 acquisition of F&G, due to purchase accounting adjustments, our expected credit loss reserve was valued at \$0. For the seven months ended December 31, 2020, the expected credit loss reserve increased from \$0 to \$21 million. During the year ended December 31, 2021, the expected credit loss reserve decreased by \$1 million to \$20 million.

No policies issued by F&G have been reinsured with any foreign company, which is controlled, either directly or indirectly, by a party not primarily engaged in the business of insurance.

F&G has not entered into any reinsurance agreements in which the reinsurer may unilaterally cancel any reinsurance for reasons other than non-payment of premiums or other similar credit issues.

On January 15, 2021, F&G executed a Funds Withheld Coinsurance Agreement with Aspida Re, a Bermuda reinsurer. In accordance with the terms of this agreement, F&G cedes to the reinsurer, on a fifty percent (50%) funds withheld coinsurance basis, certain multiyear guaranteed annuity business written effective January 1, 2021. The effects of this agreement are accounted for as a separate investment contract.

F&G has an indemnity reinsurance agreement with Hannover Re, a third party reinsurer, to cede a quota share percentage of the net retention of guarantee payments in excess of account value for GMWB and GMDB guarantees associated with an in-force block of its FIA and fixed deferred annuity contracts. The effects of this agreement are not accounted for as reinsurance as it does not satisfy the risk transfer requirements for GAAP; therefore, deposit accounting is applied. F&G incurred risk charge fees of \$21 million and \$12 million during the year ended December 31, 2021 and the seven months ended December 31, 2020, respectively in relation to this reinsurance agreement.

F&G entered into a reinsurance agreement with Kubera, a third party reinsurer, effective December 31, 2018, to cede certain MYGA and deferred annuity GAAP and statutory reserves on a coinsurance funds withheld basis, net of applicable existing reinsurance. In accordance with the terms of this agreement, F&G cedes a quota share percentage of MYGA and deferred annuity policies for certain issue years to Kubera. Effective October 31, 2021, this agreement was novated from Kubera to Somerset, a certified third party reinsurer. This agreement cedes GAAP and statutory reserves of approximately \$1 billion. As the policies ceded to Somerset are investment contracts, there is no significant insurance risk present and therefore the reinsurance agreement is accounted for as a separate investment contract. The presentation of this agreement is similar to other reinsurance agreements that apply reinsurance accounting as discussed in further detail within Note A - *Business and Summary of Significant Accounting Policies*.

F&G has a reinsurance agreement with Kubera to cede certain FIA statutory reserves on a coinsurance funds withheld basis, net of applicable existing reinsurance. In accordance with the terms of this agreement, F&G cedes a quota share percentage of FIA policies for certain issue years to Kubera. Effective October 31, 2021, this agreement was amended to increase the ceded reserves from approximately \$4 billion to approximately \$10 billion. As the policies ceded to Kubera are investment contracts, there is no significant insurance risk present and therefore the reinsurance agreement is accounted for as a separate investment contract. F&G incurred risk charge fees of \$5 million and \$4 million during the year ended December 31, 2021 and the seven months ended December 31, 2020, respectively, in relation to this reinsurance agreement.

To enhance Kubera's ability to pay its obligations under the amended reinsurance agreement, F&G entered into a Variable Note Purchase Agreement (the "NPA"), whereby F&G agreed to fund a note to Kubera to be used to ultimately settle with F&G, with principal increases up to a maximum amount of \$300 million, to the extent a potential funding shortfall (treaty assets

are less than the total funding requirement) is projected relative to the business ceded to Kubera from F&G as part of the amended reinsurance agreement. The potential funding shortfall will be determined quarterly and, among other items, is impacted by the market value of the assets in the funds withheld account related to the reinsurance agreement and Kubera's capital as calculated on a Bermuda regulatory basis. The NPA matures on November 30, 2071. Based on the current level of the treaty assets and projections that these policies will be profitable over the lifetime of the agreement, we do not expect significant fundings to occur under the NPA. At December 31, 2021, the amount funded under the NPA was insignificant.

Effective May 1, 2020, F&G entered into an indemnity reinsurance agreement with Canada Life Assurance Company United States Branch, a third party reinsurer, to reinsure FIA policies with GMWB. In accordance with the terms of this agreement, F&G cedes a quota share percentage of the net retention of guarantee payments in excess of account value for GMWB. The effects of this agreement are not accounted for as reinsurance as it does not satisfy the risk transfer requirements for GAAP; therefore, deposit accounting is applied. F&G incurred risk charge fees of \$2 million and \$1 million during the year ended December 31, 2021 and the seven months ended December 31, 2020, respectively, in relation to this reinsurance agreement.

Concentration of Reinsurance Risk

F&G has a significant concentration of reinsurance risk with third party reinsurers, Wilton Reassurance Company ("Wilton Re"), Aspida Re, and Somerset that could have a material impact on our financial position in the event that Wilton Re, Aspida Re, or Somerset fail to perform their obligations under the various reinsurance treaties. Wilton Re is a wholly-owned subsidiary of Canada Pension Plan Investment Board ("CPPIB"). CPPIB has an AAA issuer credit rating from Standard & Poor's Ratings Services ("S&P") as of December 31, 2021. Aspida Re has an A- issuer credit rating from AM Best and a BBB issuer credit rating from Fitch as of December 31, 2021, and the risk of non-performance is further mitigated through the funds withheld arrangement. Somerset has an A- issuer credit rating from AM Best and a BBB+ issuer credit rating from S&P as of December 31, 2021, and the risk of non-performance is further mitigated through the funds withheld arrangement. At December 31, 2021, the net amount recoverable from Wilton Re, Aspida Re, and Somerset were \$1,269 million, \$873 million, and \$780 million, respectively. We monitor both the financial condition of individual reinsurers and risk concentration arising from similar activities and economic characteristics of reinsurers to attempt to reduce the risk of default by such reinsurers. We believe that all amounts due from Wilton Re, Aspida Re, and Somerset for periodic treaty settlements are collectible as of December 31, 2021.

Intercompany Reinsurance Agreements

F&G has a reinsurance treaty with Raven Reinsurance Company ("Raven Re"), its wholly-owned captive reinsurance company, to cede the Commissioners Annuity Reserve Valuation Method ("CARVM") liability for annuity benefits where surrender charges are waived. In connection with the CARVM reinsurance agreement, FGL Insurance and Raven Re entered into an agreement with Nomura Bank International plc ("NBI") to establish a reserve financing facility in the form of a letter of credit issued by NBI. The financing facility has \$85 million available to draw on as of December 31, 2021. The facility may terminate earlier than the current termination date of October 1, 2022, in accordance with the terms of the Reimbursement Agreement. Under the terms of the reimbursement agreement, in the event the letter of credit is drawn upon, Raven Re is required to repay the amounts utilized, and Fidelity & Guaranty Life Holdings, Inc. ("FGLH") is obligated to repay the amounts utilized if Raven Re fails to make the required reimbursement. FGLH also is required to make capital contributions to Raven Re in the event that Raven Re's statutory capital and surplus falls below certain defined levels. As of December 31, 2021 and December 31, 2020, Raven Re's statutory capital and surplus was \$62 million and \$29 million, respectively, in excess of the minimum level required under the Reimbursement Agreement. As this letter of credit is provided by an unaffiliated financial institution, Raven Re is permitted to carry the letter of credit as an admitted asset on the Raven Re statutory balance sheet.

Note P — Regulation and Equity

Regulation

Title

Our insurance subsidiaries, including title insurers, underwritten title companies and insurance agencies, are subject to extensive regulation under applicable state laws. Each of the insurance underwriters is subject to a holding company act in its state of domicile that regulates, among other matters, the ability to pay dividends and enter into transactions with affiliates. The laws of most states in which we transact business establish supervisory agencies with broad administrative powers relating to issuing and revoking licenses to transact business, regulating trade practices, licensing agents, approving policy forms, accounting practices, financial practices, establishing reserve and capital and surplus as regards policyholders ("capital and surplus") requirements, defining suitable investments for reserves and capital and surplus and approving rate schedules. The process of state regulation of changes in rates ranges from states that set rates, to states where individual companies or

associations of companies prepare rate filings that are submitted for approval, to a few states in which rate changes do not need to be filed for approval.

Since we are regulated by both state and federal governments and the applicable insurance laws and regulations are constantly subject to change, it is not possible to predict the potential effects on our insurance operations, particularly the Title segment, of any laws or regulations that may become more restrictive in the future or if new restrictive laws will be enacted.

Statutory-basis financial statements are prepared in accordance with accounting practices prescribed or permitted by the various state insurance regulatory authorities. The National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures* manual ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by each of the states that regulate us. Each of our states of domicile for our title insurance underwriter subsidiaries have adopted a material prescribed accounting practice that differs from that found in NAIC SAP. Specifically, in both years, the timing of amounts released from the statutory unearned premium reserve under NAIC SAP differs from the states' required practice. Statutory surplus at December 31, 2021 and 2020 was lower by approximately \$29 million and \$28 million than if we had reported such amounts in accordance with NAIC SAP.

Pursuant to statutory accounting requirements of the various states in which our insurers are domiciled, these insurers must defer a portion of premiums earned as an unearned premium reserve for the protection of policyholders and must maintain qualified assets in an amount equal to the statutory requirements. The level of unearned premium reserve required to be maintained at any time is determined by statutory formula based upon either the age, number of policies and dollar amount of policy liabilities underwritten, or the age and dollar amount of statutory premiums written. As of December 31, 2021, the combined statutory unearned premium reserve required and reported for our title insurers was \$1,742 million. In addition to statutory unearned premium reserves, each of our insurers maintains reserves for known claims and surplus funds for policyholder protection and business operations.

Each of our insurance subsidiaries is regulated by the insurance regulatory authority in its respective state of domicile, as well as that of each state in which it is licensed. The insurance commissioners of their respective states of domicile are the primary regulators of our title insurance subsidiaries. Each of the insurers is subject to periodic regulatory financial examination by regulatory authorities.

Our insurance subsidiaries are subject to regulations that restrict their ability to pay dividends or make other distributions of cash or property to their immediate parent company without prior approval from the Department of Insurance of their respective states of domicile. As of December 31, 2021, \$2,375 million of our net assets are restricted from dividend payments without prior approval from the Departments of Insurance. During 2022, our title insurers can pay or make distributions to us of approximately \$831 million, without prior approval.

The combined statutory capital and surplus of our title insurers was approximately \$1,903 million and \$1,699 million as of December 31, 2021 and 2020, respectively. The combined statutory net earnings of our title insurance subsidiaries were \$936 million, \$629 million, and \$583 million for the years ended December 31, 2021, 2020, and 2019, respectively.

As a condition to continued authority to underwrite policies in the states in which our insurers conduct their business, the insurers are required to pay certain fees and file information regarding their officers, directors and financial condition. In addition, our escrow and trust business is subject to regulation by various state banking authorities.

Pursuant to statutory requirements of the various states in which our insurers are domiciled, such insurers must maintain certain levels of minimum capital and surplus. Required levels of minimum capital and surplus are not significant to the insurers individually or in the aggregate. Each of our insurers has complied with the minimum statutory requirements as of December 31, 2021.

Our underwritten title companies, primarily those domiciled in California, are also subject to certain regulation by insurance regulatory or banking authorities relating to their net worth and working capital. Minimum net worth and working capital requirements for each underwritten title company is less than \$1 million. These companies were in compliance with their respective minimum net worth and working capital requirements at December 31, 2021.

There are no restrictions on our retained earnings regarding our ability to pay dividends to shareholders although there are limits on the ability of certain subsidiaries to pay dividends to us, as described above.

F&G

Through our wholly owned F&G subsidiary, our U.S. insurance subsidiaries, FGL NY Insurance, and Raven Re, file financial statements with state insurance regulatory authorities and the NAIC that are prepared in accordance with SAP prescribed or permitted by such authorities, which may vary materially from GAAP. Prescribed SAP includes the Accounting Practices and Procedures Manual of the NAIC as well as state laws, regulations and administrative rules. Permitted SAP encompasses all accounting practices not so prescribed. The principal differences between SAP financial statements and financial statements prepared in accordance with GAAP are that SAP financial statements do not reflect DAC, DSI and VOBA,

some bond portfolios may be carried at amortized cost, assets and liabilities are presented net of reinsurance, contract holder liabilities are generally valued using more conservative assumptions and certain assets are non-admitted. Accordingly, SAP operating results and SAP capital and surplus may differ substantially from amounts reported in the GAAP basis financial statements for comparable items.

Our principal insurance subsidiaries' statutory (SAP and GAAP) financial statements are based on a December 31 year end. Statutory net income and statutory capital and surplus of our wholly owned insurance subsidiaries were as follows (in millions):

	Subsidiary (state/country of domicile) (a)		
	FGL Insurance (IA)	FGL NY Insurance (NY)	Raven Re (VT)
Statutory Net Income (loss):			
Year ended December 31, 2021	\$ 351	\$ 4	\$ 9
Statutory Capital and Surplus:			
December 31, 2021	\$ 1,522	\$ 99	\$ 115
	Subsidiary (state/country of domicile) (a)		
	FGL Insurance (IA)	FGL NY Insurance (NY)	Raven Re (VT)
Statutory Net (Loss) income:			
Seven months ended December 31, 2020	\$ (46)	\$ (2)	\$ 12
Statutory Capital and Surplus:			
December 31, 2020	\$ 1,249	\$ 93	\$ 84

(a) FGL NY Insurance and Raven Re are subsidiaries of FGL Insurance, and the columns should not be added together.

FGL Insurance, FGL NY Insurance and Raven Re's respective statutory capital and surplus satisfies the applicable minimum regulatory requirements.

Life insurance companies domiciled in the U.S. are subject to certain Risk-Based Capital ("RBC") requirements as specified by the NAIC. The RBC is used to evaluate the adequacy of capital and surplus maintained by an insurance company in relation to risks associated with: (i) asset risk, (ii) insurance risk, (iii) interest rate risk and (iv) business risk. We monitor the RBC of FGLH's insurance subsidiaries. As of December 31, 2021, each of FGLH's insurance subsidiaries had exceeded the minimum RBC requirements.

Our insurance subsidiaries domiciled in the U.S. are restricted by state laws and regulations as to the amount of dividends they may pay to their parent, our wholly owned F&G subsidiary, without regulatory approval in any year, the purpose of which is to protect affected insurance policyholders, depositors or investors. Any dividends in excess of limits are deemed "extraordinary" and require regulatory approval. In addition, and pursuant to an order issued by the Iowa Commissioner on November 28, 2017, FGL Insurance may not pay any dividend or other distribution to shareholders prior to November 28, 2020 without the prior approval of the Iowa Commissioner. As of December 31, 2021 and 2020, upon approval by the Iowa Commissioner, FGL Insurance declared and paid extraordinary dividends of \$38 million and \$151 million to its parent, respectively.

FGL Insurance applies Iowa-prescribed accounting practices that permit Iowa-domiciled insurers to report equity call options used to economically hedge FIA index credits at amortized cost for statutory accounting purposes and to calculate FIA statutory reserves such that index credit returns will be included in the reserve only after crediting to the annuity contract. This resulted in a \$106 million and \$144 million decrease to statutory capital and surplus at December 31, 2021 and 2020, respectively.

FGL Insurance's statutory carrying value of Raven Re reflects the effect of permitted practices Raven Re received to treat the available amount of a letter of credit as an admitted asset which increased Raven Re's statutory capital and surplus by \$85 million at December 31, 2021 and 2020.

Raven Re is also permitted to follow Iowa prescribed statutory accounting practice for its reserves on reinsurance assumed from FGL Insurance which increased Raven Re's statutory capital and surplus by \$0 million at December 31, 2021 and by \$5 million at December 31, 2020. Without such permitted statutory accounting practices, Raven Re's statutory capital and surplus (deficit) would be \$30 million as of December 31, 2021 and would be \$(6) million as of December 31, 2020, and its risk-based

capital would fall below the minimum regulatory requirements. The letter of credit facility is collateralized by NAIC 1 rated debt securities. If the permitted practice was revoked, the letter of credit could be replaced by the collateral assets with Nomura's consent as discussed in Note O F&G Reinsurance. FGL Insurance's statutory carrying value of Raven Re was \$115 million and \$84 million at December 31, 2021 and 2020, respectively.

As of December 31, 2021, FGL NY Insurance did not follow any prescribed or permitted statutory accounting practices that differ from the NAIC's statutory accounting practices.

The prescribed and permitted statutory accounting practices have no impact on our Condensed Consolidated Financial Statements which are prepared in accordance with GAAP.

Equity

On August 3, 2021, our Board of Directors approved the 2021 Repurchase Program under which we may purchase up to 25 million shares of our FNF common stock through July 31, 2024, replacing the prior stock repurchase program that expired on July 31, 2021. We may make repurchases from time to time in the open market, in block purchases or in privately negotiated transactions, depending on market conditions and other factors. During the year ended December 31, 2021, we repurchased a total of 10,180,000 FNF common shares for an aggregate of \$461 million or an average of \$45.22 per share. Subsequent to December 31, 2021 and through market close on February 23, 2022, we repurchased a total of 250,000 shares for \$13 million, or an average of \$52.60 under this program.

Note Q - Leases

Right-of-use assets and lease liabilities related to operating leases under ASC Topic 842 are recorded when we are party to a contract, which conveys the right for us to control an asset for a specified period of time. Substantially all of our operating lease arrangements relate to rented office space and real estate for our title operations. We generally are not a party to any material contracts considered finance leases. Right-of-use assets and lease liabilities under ASC Topic 842 are recorded as Lease assets and Lease liabilities, respectively, on the Consolidated Balance Sheet as of December 31, 2021.

Our operating leases range in term from one to ten years. As of December 31, 2021, the weighted-average remaining lease term of our operating leases was 4.0 years.

Our lease agreements do not contain material variable lease payments, buyout options, residual value guarantees or restrictive covenants.

Most of our leases include one or more options to renew, with renewal terms that can extend the lease term by varying amounts. The exercise of lease renewal options is at our sole discretion. We do not include options to renew in our measurement of lease assets and lease liabilities as they are not considered reasonably assured of exercise.

Our operating lease liability is determined by discounting future lease payments using a discount rate based on our incremental borrowing rate for similar collateralized borrowing. The discount rate is calculated as an average of the current yield on our unsecured notes payable and 140 basis points in excess of the current five year LIBOR swap rate. As of December 31, 2021 the weighted-average discount rate used to determine our operating lease liability was 3.4%.

We do not separate lease components from non-lease components for any of our right-of-use assets.

Our lease costs are included in Other operating expenses on the Consolidated Statements of Earnings and was \$139 million, \$150 million and \$146 million for the years ended December 31, 2021, 2020 and 2019, respectively. We do not have any material short term lease costs, variable lease costs, or sublease income.

Future payments under operating lease arrangements accounted for under ASC Topic 842 as of December 31, 2021 are as follows (in millions):

2022	\$	145
2023		116
2024		83
2025		44
2026		26
Thereafter		27
Total operating lease payments, undiscounted	\$	441
Less: present value discount		27
Lease liability, at present value	\$	414

See Note K. *Supplementary Cash Flow Information* for certain information on noncash investing and financing activities related to our operating lease arrangements.

Note R - Property and Equipment

Property and equipment consist of the following:

	December 31,	
	2021	2020
	(In millions)	
Furniture, fixtures and equipment	\$ 239	\$ 230
Data processing equipment	210	186
Leasehold improvements	121	115
Buildings	79	78
Land	14	14
Other	5	5
Total property and equipment, gross	668	628
Accumulated depreciation and amortization	(483)	(448)
Total property and equipment, net	\$ 185	\$ 180

Depreciation expense on property and equipment was \$45 million, \$48 million, and \$42 million for the years ended December 31, 2021, 2020, and 2019, respectively.

Note S - Accounts Payable and Other Accrued Liabilities

Accounts payable and other accrued liabilities consist of the following:

	December 31,	
	2021	2020
	(In millions)	
Salaries and incentives	\$ 537	\$ 519
Accrued benefits	447	373
Deferred revenue	144	117
Contingent consideration - acquisitions	30	11
Trade accounts payable	129	115
Accrued recording fees and transfer taxes	14	21
Accrued premium taxes	59	36
Liability for policy and contract claims	109	88
Retained asset account	148	144
Remittances and items not allocated	39	158
Option collateral liabilities	576	415
Funds withheld embedded derivative	73	101
Other accrued liabilities	391	304
	<u>\$ 2,696</u>	<u>\$ 2,402</u>

Note T — Income Taxes

Income tax expense (benefit) on continuing operations consists of the following:

	Year Ended December 31,		
	2021	2020	2019
	(In millions)		
Current	\$ 656	\$ 379	\$ 268
Deferred	57	(57)	40
	<u>\$ 713</u>	<u>\$ 322</u>	<u>\$ 308</u>

Total income tax expense was allocated as follows:

	Year Ended December 31,		
	2021	2020	2019
	(In millions)		
Net earnings from continuing operations	\$ 713	\$ 322	\$ 308
Other comprehensive (loss) earnings:			
Unrealized (loss) gain on investments and other financial instruments	(141)	332	16
Unrealized gain on foreign currency translation and cash flow hedging	—	1	1
Minimum pension liability adjustment	(2)	4	—
Total income tax (benefit) expense allocated to other comprehensive earnings	(143)	337	17
Total income taxes	<u>\$ 570</u>	<u>\$ 659</u>	<u>\$ 325</u>

A reconciliation of the federal statutory rate to our effective tax rate is as follows:

	Year Ended December 31,		
	2021	2020	2019
Federal statutory rate	21.0 %	21.0 %	21.0 %
State income taxes, net of federal benefit	1.6	2.5	1.7
Stock compensation	(0.2)	(0.3)	(0.8)
Tax credits	(0.2)	(0.4)	(0.1)
Consolidated partnerships	(0.1)	(0.3)	(0.2)
Tax gain on parent shares held	0.5	—	—
Valuation allowance for deferred tax assets	(0.3)	(3.0)	—
Change in tax status benefit	—	(2.0)	—
Non-deductible expenses and other, net	0.8	0.5	0.9
Effective tax rate	<u>23.1 %</u>	<u>18.0 %</u>	<u>22.5 %</u>

The significant components of deferred tax assets and liabilities consist of the following:

	December 31,	
	2021	2020
(In millions)		
Deferred Tax Assets:		
Employee benefit accruals	\$ 111	\$
Net operating loss carryforwards	27	
Accrued liabilities	1	
Allowance for uncollectible accounts receivable	5	
Pension plan	2	
Tax credits	77	
State income taxes	8	
Capital loss carryover	41	
Basis difference held-for-sale	—	
Life insurance and claim related adjustments	854	8
Funds held under reinsurance agreements	52	
Other	33	
Total gross deferred tax asset	1,211	1,2
Less: valuation allowance	33	
Total deferred tax asset	\$ 1,178	\$ 1,1
Deferred Tax Liabilities:		
Title plant	\$ (52)	\$ (
Amortization of goodwill and intangible assets	(140)	(1
Other investments	—	
Other	(2)	(
Investment securities	(401)	(6
Depreciation	(29)	(
Partnerships	(182)	(
Value of business acquired	(249)	(3
Derivatives	(68)	(
Deferred acquisition costs	(102)	
Transition reserve on new reserve method	(34)	(
Funds held under reinsurance agreements	(74)	(
Title Insurance reserve discounting	(50)	(
Total deferred tax liability	\$ (1,383)	\$ (1,4
Net deferred tax liability	\$ (205)	\$ (2

Our net deferred tax liability was \$205 million and \$292 million as of December 31, 2021 and 2020, respectively. The significant changes in the deferred taxes are as follows: the deferred tax liability for investment securities decreased by \$200 million primarily due to unrealized losses recorded on investment securities, of which \$97 million was related to unrealized losses in our Title segment and \$103 million was related to unrealized losses in our F&G segment's life insurance business. The deferred tax liability relating to partnerships increased by \$99 million, primarily due to increased investments in higher yield partnerships by F&G and the related unrealized gains. The F&G segment's life insurance business' deferred tax liability relating to VOBA decreased by \$59 million due to GAAP amortization. The deferred tax liability related to deferred acquisition costs increased by \$96 million, which is consistent with the growth in sales in our F&G segment. The deferred tax liability relating to derivatives in our F&G segment increased by \$30 million due to unrealized gains on call options. The deferred tax asset related to credit carryovers increased by \$18 million, of which \$11 million related to our F&G segment's life insurance business and \$7 million related to Title segment. The deferred tax asset for basis differences held-for-sale was reduced by \$19 million due to the sale of an F&G entity. The reinsurance receivable deferred tax asset decreased by \$33 million

and the reinsurance receivable deferred tax liability increased by \$16 million, both due to unrealized gains in the funds withheld portfolios within our F&G segment.

As of December 31, 2021, we have net operating losses ("NOLs") on a pretax basis of \$129 million, of which \$53 million related to our Title segment and \$76 million related to our F&G segment's life insurance business, which are available to carryforward and offset future federal taxable income. The NOLs are U.S. federal NOLs arising from acquisitions made since 2012, including Buyers Protection Group, Inc., Digital Insurance Holdings, Inc., ServiceLink/THL Corporations and F&G. Most of the NOLs are subject to an annual Internal Revenue Code Section 382 limitation. These losses will begin to expire in year 2023 and we fully anticipate utilizing these losses prior to expiration with the exception of \$24 million of gross net operating losses that are offset by a \$24 million valuation allowance in the title segment.

As of December 31, 2021 and 2020, we had \$77 million and \$59 million of tax credits, respectively, which expire between 2025 and 2041. The credits primarily consist of general business credits from historical acquisitions, including \$32 million associated with our F&G segment's life insurance business. We anticipate that these credits will be utilized prior to expiration after a valuation allowance of \$28 million on the general business credits in our title segment.

As of December 31, 2021 and 2020, the balance of unrecognized tax benefits which would, if recognized, favorably affect our effective tax rate was \$24 million and \$28 million, respectively. Interest and penalties accrued on income tax uncertainties are recorded as a component of income tax expense and were \$1 million as of December 31, 2021 and 2020. It is reasonably possible that as a result of the carryback request and approval of the Joint Committee of Taxation, unrecognized tax benefits could decrease as much as \$58 million within the next 12 months. This reserve relates to a timing difference.

A reconciliation of the beginning and ending unrecognized tax benefits is as follows (in millions):

	Year ended December 31,	
	2021	2020
Beginning balance	\$ 64	\$ 7
Additions based on positions taken in current year	—	58
Reductions related to statute of limitation lapses and audit payments	(4)	(1)
Ending balance	\$ 60	\$ 64

F&G's life insurance subsidiaries, as well as certain F&G non-life subsidiaries file separate tax returns from the FNF consolidated group. Prepaid expenses and other assets in the accompanying Consolidated Balance Sheets as of December 31, 2021 includes \$52 million of tax receivables related to F&G subsidiaries that file separate tax returns. Prepaid expenses and other assets in the accompanying Consolidated Balance Sheets as of December 31, 2020 includes \$20 million of tax receivables and \$8 million in deferred tax assets related to F&G subsidiaries who file separate tax returns.

The Internal Revenue Service ("IRS") has selected us to participate in the Compliance Assurance Program that is a real-time audit. We are currently under audit by the IRS for the 2021 through 2022 tax years. We file income tax returns in various foreign and US state jurisdictions. Our state income tax returns for the 2017 through 2021 tax years remain subject to examination by state jurisdictions. The F&G life insurance group files a separate consolidated return with the IRS. F&G is not currently under examination by the IRS.

Note U - Employee Benefit Plans

Stock Purchase Plan

During the three-year period ended December 31, 2021, our eligible employees could voluntarily participate in our employee stock purchase plan ("ESPP") sponsored by us. Pursuant to the ESPP, employees may contribute an amount between 3% and 15% of their base salary and certain commissions. We contribute varying amounts as specified in the ESPP.

We contributed \$24 million, \$30 million, and \$28 million to the ESPP in the years ended December 31, 2021, 2020, and 2019, respectively, in accordance with our matching contribution.

FNF 401(k) Profit Sharing Plan

During the three-year period ended December 31, 2021, we have offered our employees the opportunity to participate in our 401(k) profit sharing plan (the "401(k) Plan"), a qualified voluntary contributory savings plan that is available to substantially all of our employees. Eligible employees may contribute up to 40% of their pre-tax annual compensation, up to the amount allowed pursuant to the Internal Revenue Code. We make an employer match on the 401(k) Plan of \$0.375 on each \$1.00 contributed up to the first 6% of eligible earnings contributed to the 401(k) Plan by employees. The employer match was \$36 million, \$31 million, and \$29 million for the years ended December 31, 2021, 2020, and 2019, respectively, and was credited based on the participant's individual investment elections in the FNF 401(k) Plan.

Omnibus Incentive Plan

In 2005, we established the FNT 2005 Omnibus Incentive Plan (as amended and restated, the “Omnibus Plan”) authorizing the issuance of up to 8 million shares of common stock, subject to the terms of the Omnibus Plan. On October 23, 2006; May 29, 2008; May 25, 2011; May 22, 2013; and June 15, 2016 the shareholders of FNF approved amendments to increase the number of shares for issuance under the Omnibus Plan by 16 million, 11 million, 6 million, 6 million and 10 million shares, respectively. The primary purpose of the increases were to assure that we had adequate means to provide equity incentive compensation to our employees on a going-forward basis. The Omnibus Plan provides for the grant of stock options, stock appreciation rights, restricted stock, restricted stock units and performance shares, performance units, other cash and stock-based awards and dividend equivalents. As of December 31, 2021, there were 1,639,226 shares of restricted stock and 996,113 stock options outstanding under the Omnibus Plan. Awards granted are approved by the Compensation Committee of the Board of Directors. Options vest over a 3 year period and have a contractual life of 7 years. The exercise price for options granted equals the market price of the underlying stock on the grant date. Stock option grants vest according to certain time based and operating performance criteria. Option exercises by participants are settled on the open market.

F&G Omnibus Incentive Plan

On June 1, 2020, in connection with the acquisition of F&G, we assumed the shares that remained available for future awards under the FGL Holdings 2017 Omnibus Incentive Plan, as amended and restated (the “F&G Omnibus Plan”) and converted such shares into 2,096,429 shares of FNF common stock that may be issued pursuant to future awards granted under the F&G Omnibus Plan and 2,411,585 shares of FNF common stock that may be issued pursuant to outstanding stock options under the F&G Omnibus Plan. Each unvested stock option assumed under the F&G Omnibus Plan was converted into an FNF stock option and vests solely on the passage of time without any ongoing performance-vesting conditions. The options vest over a 3 year period, based on the option's initial grant date, and have a contractual life of 7 years. As of December 31, 2021, there were 718,641 shares of restricted stock and 1,527,936 stock options outstanding under the F&G Omnibus Plan.

FNF stock option transactions under the Omnibus Plan for 2021, 2020, and 2019 are as follows:

	Options	Weighted Average Exercise Price	Exercisable
Balance, January 1, 2019	7,543,787	\$ 20.55	7,530,137
Exercised	(2,009,112)	19.61	
Canceled	(4,550)	25.34	
Balance, December 31, 2019	5,530,125	\$ 20.88	5,530,125
Exercised	(3,208,712)	18.45	
Balance, December 31, 2020	2,321,413	\$ 24.24	2,321,413
Exercised	(1,325,300)	23.28	
Balance, December 31, 2021	996,113	\$ 25.53	996,113

FNF stock option transactions under the F&G Omnibus Plan for 2021 and 2020 are as follows:

	Options	Weighted Average Exercise Price	Exercisable
Balance, January 1, 2020	—	\$ —	—
Options assumed in connection with the F&G acquisition	2,411,585	36.04	
Exercised	(109,159)	27.64	
Canceled	(299,736)	38.41	
Balance, December 31, 2020	2,002,690	\$ 36.14	1,021,671
Exercised	(474,754)	36.68	
Canceled	—	—	
Balance, December 31, 2021	1,527,936	\$ 35.97	1,072,584

FNF restricted stock transactions under the Omnibus Plan in 2021, 2020, and 2019 are as follows:

	Shares	Weighted Average Grant Date Fair Value
Balance, December 31, 2018	1,821,238	\$ 32.35
Granted	640,698	45.84
Canceled	(14,937)	31.94
Vested	(929,823)	30.98
Balance, December 31, 2019	1,517,176	\$ 38.90
Granted	1,006,058	33.40
Canceled	(11,604)	38.93
Vested	(795,075)	37.60
Balance, December 31, 2020	1,716,555	\$ 36.26
Granted	772,189	48.27
Canceled	(7,577)	37.20
Vested	(841,941)	36.15
Balance, December 31, 2021	1,639,226	\$ 41.97

FNF restricted stock transactions under the F&G Omnibus Plan in 2021 and 2020 are as follows:

	Shares	Weighted Average Grant Date Fair Value
Balance, December 31, 2019	—	\$ —
Granted	474,025	34.13
Canceled	(24,155)	34.47
Balance, December 31, 2020	449,870	\$ 34.11
Granted	311,081	48.28
Canceled	(12,437)	33.40
Vested	(29,873)	34.59
Balance, December 31, 2021	718,641	\$ 40.24

The following table summarizes information related to stock options outstanding and exercisable as of December 31, 2021:

Range of Exercise Prices	Options Outstanding				Options Exercisable			
	Number of Options	Weighted Average Remaining Contractual Life	Weighted Average Exercise Price	Intrinsic Value	Number of Options	Weighted Average Remaining Contractual Life	Weighted Average Exercise Price	Intrinsic Value
		(In years)		(In millions)		(In years)		(In millions)
\$0.00 - \$25.53	996,113	0.83	\$ 25.53	\$ 27	996,113	0.83	\$ 25.53	\$ 27
\$25.54 - \$27.53	359,510	3.98	27.53	9	292,101	3.98	27.53	7

\$28.01 - \$35.89	34,106	4.87	35.89	1	6,821	4.87	35.89	—
\$35.90 - \$39.10	1,088,586	4.05	39.10	14	748,808	3.77	39.10	10
	2,524,049			\$ 52	2,068,697			\$ 45

We account for stock-based compensation plans in accordance with GAAP on share-based payments, which requires that compensation cost relating to share-based payments be recognized in the consolidated financial statements based on the fair value of each award. Using the fair value method of accounting, compensation cost is measured based on the fair value of the award at the grant date and recognized over the service period. Fair value of restricted stock awards and units is based on the grant date value of the underlying stock derived from quoted market prices. The total fair value of restricted stock awards granted in the years ended December 31, 2021, 2020 and 2019 was \$52 million, \$50 million, and \$29 million, respectively. The total fair value of restricted stock awards, which vested in the years ended December 31, 2021, 2020 and 2019 was \$43 million, \$25 million, and \$42 million, respectively. Option awards are measured at fair value on the grant date using the Black Scholes Option Pricing Model. The intrinsic value of options exercised in the years ended December 31, 2021, 2020 and 2019 was \$32 million, \$50 million, and \$48 million, respectively. Net earnings attributable to FNF Shareholders reflects stock-based compensation expense amounts of \$43 million for the year ended December 31, 2021, \$39 million for the year ended December 31, 2020, and \$38 million for the year ended December 31, 2019, which are included in personnel costs in the reported financial results of each period.

At December 31, 2021, the total unrecognized compensation cost related to non-vested stock option grants and restricted stock grants is \$71 million, which is expected to be recognized in pre-tax income over a weighted average period of 1.75 years.

Pension Plan

In 2000, FNF merged with Chicago Title Corporation ("CTC"). In connection with the merger, we assumed CTC's noncontributory defined contribution plan and noncontributory defined benefit pension plan (the "Pension Plan"). The Pension Plan covers certain CTC employees. The benefits are based on years of service and the employee's average monthly compensation in the highest 60 consecutive calendar months during the 120 months ending at retirement or termination. Effective December 31, 2000, the Pension Plan was frozen and there will be no future credit given for years of service or changes in salary. The accumulated benefit obligation is the same as the projected benefit obligation due to the pension plan being frozen as of December 31, 2000. Pursuant to GAAP on employers' accounting for defined benefit pension and other post retirement plans, the measurement date is December 31.

The discount rate used to determine the benefit obligation as of December 31, 2021 and 2020 was 2.35% and 1.85%, respectively. As of December 31, 2021 and 2020, the projected benefit obligation was \$154 million and \$153 million, respectively, and the fair value of plan assets was \$145 million and \$157 million, respectively. The net pension liability and net periodic expense included in our financial position and results of operations relating to the Pension Plan is not considered material for any period presented.

Note V - Financial Instruments with Off-Balance Sheet Risk and Concentration of Risk

In the normal course of business, we and certain of our subsidiaries enter into off-balance sheet credit arrangements associated with certain aspects of the title insurance business and other activities.

We generate a significant amount of title insurance premiums in Texas, California, Florida, Pennsylvania and Illinois. Title insurance premiums as a percentage of the total title insurance premiums written from those five states are detailed as follows:

	2021	2020	2019
California	14.6 %	15.2 %	14.3 %
Texas	13.0 %	12.3 %	13.8 %
Florida	9.3 %	8.6 %	9.2 %
Pennsylvania	5.1 %	4.8 %	4.7 %
Illinois	5.1 %	5.0 %	5.1 %

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash equivalents, short-term investments, and trade receivables.

We place cash equivalents and short-term investments with high credit quality financial institutions and, by policy, limit the amount of credit exposure with any one financial institution. Investments in commercial paper of industrial firms and financial institutions are rated investment grade by nationally recognized rating agencies.

Concentrations of credit risk with respect to trade receivables are limited because a large number of geographically diverse customers make up our customer base, thus spreading the trade receivables credit risk. We control credit risk through monitoring procedures.

Note W - Recent Accounting Pronouncements*Adopted Pronouncements*

In June 2016, the FASB issued ASU No. 2016-13 Financial Instruments - Credit Losses: Measurement of Credit Losses on Financial Instruments (Topic 326). The amendments in this ASU introduce broad changes to accounting for credit impairment of financial instruments. The primary updates include the introduction of a new current expected credit loss ("CECL") model that is based on expected rather than incurred losses and amendments to the accounting for impairment of fixed maturity securities available for sale. The method used to measure estimated credit losses for fixed maturity available-for-sale securities will be unchanged from current GAAP; however, the amendments require credit losses to be recognized through an allowance rather than as a reduction to the amortized cost of those securities. We adopted ASC 326 using the modified retrospective method for all financial assets measured at amortized cost. Results for reporting period beginning after December 15, 2019 are presented under ASC 326 while prior period amounts continue to be reported in accordance with previously applicable Generally Accepted Accounting Principles. We adopted this standard using the prospective transition approach for debt securities for which other than temporary impairment had been recognized prior to January 1, 2020. As a result, the amortized cost basis remains the same before and after the effective date of ASC 326. The effective interest rate on these debt securities was not changed. Amounts previously recognized in accumulated other comprehensive income as of January 1, 2020 relating to improvements in cash flows expected to be collected will be accreted into income over the remaining life of the asset. Recoveries of amounts previously written off relating to improvements in cash flows after January 1, 2020 will be recorded in earnings when received. See Note E *Investments* for further discussion of the adoption as it relates to our fixed maturity securities available for sale.

In January 2017, the FASB issued ASU 2017-04 Intangibles - Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment. The guidance simplifies the measurement of goodwill impairment by removing step 2 of the goodwill impairment test, which requires the determination of the fair value of individual assets and liabilities of a reporting unit. The new guidance requires goodwill impairment to be measured as the amount by which a reporting unit's carrying value exceeds its fair value; however, the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. We adopted this standard as of January 1, 2020 and are applying this guidance on a prospective basis. The overall effect of Topic 350 had no impact to the Consolidated Financial Statements upon adoption.

In August 2018, the FASB issued ASU 2018-13, Fair Value Measurement (Topic 820), Disclosure Framework-Changes to the Disclosure Requirements for Fair Value Measurement, effective for fiscal years beginning after December 15, 2019 including interim periods within those fiscal years. The new guidance introduces the following requirements: for investments in certain entities that calculate net asset value, investors are required to disclose the timing of liquidation of an investee's assets and the date when restrictions from redemption might lapse if the investee has communicated timing to the entity or announced timing publicly; entities should use the measurement uncertainty disclosure to communicate information about the uncertainty in measurement as of the reporting date; entities must disclose changes in unrealized gains and losses included in other comprehensive income for recurring Level 3 fair value measurements, as well as the range and weighted average of significant unobservable inputs used to develop Level 3 fair value measurements, or other quantitative information in lieu of weighted average if the entity determines such information would be more reasonable and rational; and entities are no longer required to disclose the amounts and reasons for transfers between Level 1 and Level 2 of the fair value hierarchy, the policy for timing of transfers between levels, and the valuation processes for Level 3 fair value measurements. We adopted this standard on June 1, 2020 as a result of our acquisition of F&G, and the overall effect of Topic 820 on our Consolidated Financial Statements was not material upon adoption.

In October 2018, the FASB issued ASU 2018-17, Consolidation (Topic 810), Targeted Improvements to Related Party Guidance for Variable Interest Entities, effective for fiscal years beginning after December 15, 2019 including interim periods within those fiscal years. Under this update, entities must consider indirect interests held through related parties under common control on a proportional basis to determine whether a decision-making fee is a variable interest. We adopted this standard on June 1, 2020 as a result of our acquisition of F&G, and it did not have an impact on our Consolidated Financial Statements.

In December 2019, the FASB issued ASU 2019-12 Income Taxes - Simplifying the Accounting for Income Taxes (Topic 740), which simplifies various aspects of the income tax accounting guidance and will be applied using different approaches depending on what the specific amendment relates to and, for public entities, are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2020. We adopted this standard as of January 1, 2021, and it had no impact on our Consolidated Financial Statements upon adoption.

In October 2020, the FASB issued ASU 2020-08, Codification Improvements to Subtopic 310-20, Receivables - Nonrefundable Fees and Other Costs. The amendments in this update clarify that callable debt securities should be re-evaluated each reporting period to determine if the amortized cost exceeds the amount repayable by the issuer at the next earliest call date,

and, if so, the excess should be amortized to the next call date. We adopted this standard as of January 1, 2021 and are applying this guidance on a prospective basis. This standard had no impact on our Consolidated Financial Statements upon adoption.

Pronouncements Not Yet Adopted

In August 2018, the FASB issued ASU 2018-12, Financial Services-Insurance (Topic 944), Targeted Improvements to the Accounting for Long-Duration Contracts, effective for fiscal years beginning after December 15, 2022 including interim periods within those fiscal years. In June of 2020, the FASB deferred the effective date of ASU 2018-12 for one-year in response to implementation challenges resulting from COVID-19. This update introduced the following requirements: assumptions used to measure cash flows for traditional and limited-payment contracts must be reviewed at least annually with the effect of changes in those assumptions being recognized in the statement of operations; the discount rate applied to measure the liability for future policy benefits and limited-payment contracts must be updated at each reporting date with the effect of changes in the rate being recognized in other comprehensive income; market risk benefits associated with deposit contracts must be measured at fair value, with the effect of the change in the fair value attributable to a change in the instrument-specific credit risk being recognized in other comprehensive income; deferred acquisition costs are required to be amortized in proportion to premiums, gross profits, or gross margins and those balances must be amortized on a constant level basis over the expected term of the related contracts; deferred acquisition costs must be written off for unexpected contract terminations; and disaggregated rollforwards of beginning to ending balances of the liability for future policy benefits, policyholder account balances, market risk benefits, separate account liabilities and deferred acquisition costs, as well as information about significant inputs, judgments, assumptions, and methods used in measurement are required to be disclosed.

The amendments in this ASU may be early adopted as of the beginning of an annual reporting period for which financial statements have not yet been issued, including interim financial statements. We do not currently expect to early adopt this standard. We have identified specific areas that will be impacted by the new guidance and are in the process of assessing the accounting, reporting and/or process changes that will be required to comply as well as the impact of the new guidance on our consolidated financial statements.

In December 2021, the FASB issued ASU 2021-10, Financial Services-Insurance (Topic 944), Government Assistance Requires Disclosures, effective for fiscal years beginning after December 15, 2022 including interim periods within those fiscal years.

The amendments in this ASU may be early adopted as of the beginning of an annual reporting period for which financial statements have not yet been issued, including interim financial statements. We do not currently expect to early adopt this standard. We have identified specific areas that will be impacted by the new guidance and are in the process of assessing the accounting, reporting and/or process changes that will be required to comply as well as the impact of the new guidance on our consolidated financial statements.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

As of the end of the year covered by this report, we carried out an evaluation, under the supervision and with the participation of our principal executive officer and principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures, as such term is defined in Rule 13a-15(e) under the Exchange Act. Based on this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures are effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is: (a) recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms; and (b) accumulated and communicated to management, including our principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

We completed the F&G acquisition on June 1, 2020 (see Note B *Acquisitions* to the Consolidated Financial Statements). F&G has been fully integrated into the assessment of internal control reporting as of December 31, 2021.

Other than the F&G acquisition, there were no changes in our internal control over financial reporting that occurred during the year ended December 31, 2021 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) or 15d-15(f). Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting. Management has adopted the framework in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on our evaluation under this framework, our management concluded that our internal control over financial reporting was effective as of December 31, 2021.

The effectiveness of our internal control over financial reporting as of December 31, 2021 has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their report, which is included herein.

Item 9B. Other Information

None.

Item 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections

Not applicable.

PART III

Items 10-14.

Within 120 days after the close of our fiscal year, we intend to file with the Securities and Exchange Commission the matters required by these items.

PART IV

Item 15. Exhibits and Financial Statement Schedules

(a) (1) *Financial Statements.* The following is a list of the Consolidated Financial Statements of Fidelity National Financial, Inc. and its subsidiaries included in Item 8 of Part II:

Report of Independent Registered Public Accounting Firm on Effectiveness of Internal Control over Financial Reporting	91
Report of Independent Registered Public Accounting Firm on Financial Statements	92
Consolidated Balance Sheets as of December 31, 2021 and 2020	96
Consolidated Statements of Earnings for the years ended December 31, 2021, 2020 and 2019	97
Consolidated Statements of Comprehensive Earnings for the years ended December 31, 2021, 2020 and 2019	98
Consolidated Statements of Equity for the years ended December 31, 2021, 2020 and 2019	99
Consolidated Statements of Cash Flows for the years ended December 31, 2021, 2020 and 2019	101
Notes to Consolidated Financial Statements	103

(a) (2) *Financial Statement Schedules.* The following is a list of financial statement schedules filed as part of this annual report on Form 10-K:

Schedule II: Fidelity National Financial, Inc. (Parent Company Financial Statements)	176
Schedule III: F&G Supplementary Insurance Information	180
Schedule IV: F&G Reinsurance	181

All other schedules are omitted because they are not applicable or not required, or because the required information is included in the Consolidated Financial Statements or notes thereto.

(a) (3) The following exhibits are incorporated by reference or are set forth on pages to this Form 10-K:

Exhibit Number	Description
2.1	Reorganization Agreement, dated as of November 17, 2017, by and between Fidelity National Financial, Inc. and Cannae Holdings, Inc. (incorporated by reference to Exhibit 2.1 to the Registrant's Current Report on Form 8-K filed on November 20, 2017)
2.2	Agreement and Plan of Merger, dated February 7, 2020, by and between FGL Holdings, Fidelity National Financial, Inc., F Corp I and F Corp II. (incorporated by reference to Exhibit 2.1 to the Registrant's Current Report on Form 8-K filed on February 7, 2020)
2.3	First Amendment to the Agreement and Plan of Merger, dated as of April 24, 2020, by and between Fidelity National Financial, Inc., F I Corp., F II Corp., and FGL Holdings (incorporated by reference to Exhibit 2.2 to the Registrant's Registration Statement on Form S-4/A filed on April 24, 2020)
3.1	Fifth Amended and Restated Certificate of Incorporation (incorporated by reference to Exhibit 3.1 to the Company's Current Report on Form 8-K filed on June 13, 2018)
3.2	Fifth Amended and Restated Bylaws of Fidelity National Financial, Inc., dated January 5, 2022 (incorporated by reference to Exhibit 3.2 to the Registrant's Current Report on Form 8-K filed on January 5, 2022)
4.1	Indenture between the Registrant and The Bank of New York Trust Company, N.A., dated December 8, 2005 (incorporated by reference to Exhibit 4.1 to the Registrant's Annual Report on Form 10-K for the year ended December 31, 2005)
4.2	First Supplemental Indenture between the Registrant and the Bank of New York Trust Company, N.A., dated as of January 6, 2006 (incorporated by reference to Exhibit 4.1 to the Registrant's Current Report on Form 8-K filed on January 24, 2006)
4.3	Second Supplemental Indenture, dated May 5, 2010, between the Registrant and The Bank of New York Mellon Trust Company, N.A. (incorporated by reference to Exhibit 4.1 to the Registrant's Current Report on Form 8-K filed on May 5, 2010)
4.4	Officers' Certificate, dated August 28, 2012, pursuant to the Indenture dated December 8, 2005, as supplemented by the First Supplemental Indenture dated as of January 6, 2006 and as further supplemented by the Second Supplemental Indenture dated as of May 5, 2010 (incorporated by reference to Exhibit 4.1 to the Registrant's Current Report on Form 8-K filed on August 28, 2012)
4.5	Form of Subordinated Indenture between the Registrant and the Bank of New York Trust Company, N.A. (incorporated by reference to Exhibit 4.2 (A) to the Registrant's Registration Statement on Form S-3 filed on November 14, 2007)
4.6	Fourth Supplemental Indenture, dated August 13, 2018, between the Registrant and The Bank of New York Mellon Trust Company, N.A. (incorporated by reference to Exhibit 4.4 to the Registrant's Current Report on Form 8-K filed on August 13, 2018)
4.7	Form of 4.50% Senior Note of the Registrant due 2028 (incorporated by reference to Exhibit A to Exhibit 4.4 to the Registrant's Current Report on Form 8-K filed on August 13, 2018).
4.8	Specimen certificate for shares of the Registrant's FNF Group common stock, par value \$0.0001 per Share (incorporated by reference to Exhibit 4.1 to the Registrant's Registration Statement on Form S-4/A filed on May 5, 2014)
4.9	Description of FNF Common Stock (incorporated by reference to Exhibit 4.9 to the Registrant's Annual Report on Form 10-K for the year ended December 31, 2019)
4.10	Supplemental Indenture, dated as of June 1, 2020, by and among Fidelity & Guaranty Life Holdings, Inc., Fidelity National Financial, Inc., and Wells Fargo Bank, National Association, as trustee (incorporated by reference to Exhibit 4.1 to the Registrant's Current Report on Form 8-K filed on June 1, 2020).
4.11	Indenture, dated as of April 20, 2018, by and among Fidelity & Guaranty Life Holdings, Inc., the guarantors party thereto and Wells Fargo Bank, National Association, as trustee (incorporated by reference to Exhibit 4.1 to the Current Report on Form 8-K filed by FGL Holdings (File No. 001-37779) on April 25, 2018).

Exhibit Number	Description
4.12	Fifth Supplemental Indenture, dated as of June 12, 2020, between Fidelity National Financial, Inc. and The Bank of New York Mellon Trust Company, N.A. (incorporated by reference to Exhibit 4.1 to the Registrant's Current Report on Form 8-K filed on June 12, 2020).
4.13	Form of 3.40% Senior Note of the Registrant due 2030 (included in Exhibit 4.12 hereto which is incorporated by reference to Exhibit 4.1 to the Registrant's Current Report on Form 8-K filed on June 12, 2020)
4.14	Sixth Supplemental Indenture, dated as of September 15, 2020, between Fidelity National Financial, Inc. and The Bank of New York Mellon Trust Company, N.A. (incorporated by reference to Exhibit 4.1 to the Registrant's Current Report on Form 8-K filed on September 15, 2020).
4.15	Form of 2.450% Senior Note of the Registrant due 2031 (included in Exhibit 4.14 hereto which is incorporated by reference to Exhibit 4.1 to the Registrant's Current Report on Form 8-K filed on September 15, 2020)
4.16	Seventh Supplemental Indenture, dated as of September 17, 2021, between Fidelity National Financial, Inc. and The Bank of New York Mellon Trust Company, N.A. (incorporated by reference to Exhibit 4.1 to the Registrant's Current Report on Form 8-K filed on September 17, 2021)
4.17	Form of 3.20% Senior Note of the Registrant due 2051 (included in exhibit 4.16 hereto which is incorporated by reference to Exhibit 4.1 to the Registrant's Current Report on Form 8-K filed on September 17, 2021)
10.1	Amended and Restated Fidelity National Financial, Inc. 2005 Omnibus Incentive Plan (incorporated by reference to Annex A to the Registrant's Schedule 14A filed on April 29, 2016).(1)
10.2	Amended and Restated Fidelity National Financial, Inc. 2013 Employee Stock Purchase Plan (incorporated by reference to Exhibit 10.3 to the Registrant's Annual Report on Form 10-K for the year ended December 31, 2018).(1)
10.3	Fidelity National Financial, Inc. Annual Incentive Plan (incorporated by reference to Annex B to the Registrant's Schedule 14A filed on April 29, 2016).(1)
10.4	Fidelity National Financial, Inc. Deferred Compensation Plan, as amended and restated, effective January 1, 2009 (incorporated by reference to Exhibit 10.18 to the Registrant's Annual Report on Form 10-K for the year ended December 31, 2008).(1)
10.5	Form of Notice of FNF Group Stock Option Award and FNF Group Stock Option Award Agreement under Amended and Restated Fidelity National Financial, Inc. 2005 Omnibus Incentive Plan for October 2015 Awards (incorporated by reference to Exhibit 10.12 to Registrant's Annual Report on Form 10-K for the year ended December 31, 2015).(1)
10.6	Amended and Restated Employment Agreement between the Registrant and Anthony J. Park, effective as of October 10, 2008 (incorporated by reference to Exhibit 10.11 to Registrant's Annual Report on Form 10-K for the year ended December 31, 2008).(1)
10.7	Amendment effective February 4, 2010 to Amended and Restated Employment Agreement between the Registrant and Anthony J. Park, effective as of October 10, 2008 (incorporated by reference to Exhibit 10.13 to the Registrant's Annual Report on Form 10-K for the year ended December 31, 2009).(1)
10.8	Director Services Agreement between Fidelity National Financial, Inc. and William P. Foley, II (incorporated by reference to Exhibit 10.27 to Registrant's Annual Report on Form 10-K for the year ended December 31, 2015).(1)

**Fidelity National Financial, Inc.
Amended and Restated
2005 Omnibus Incentive Plan**

Notice of Restricted Stock Grant

You (the "Grantee") have been granted the following award of restricted Shares (the "Restricted Stock"), of common stock, par value \$0.0001 per share (the "Shares"), by Fidelity National Financial, Inc. (the "Company"), pursuant to the Fidelity National Financial, Inc. Amended and Restated 2005 Omnibus Incentive Plan (the "Plan") and the terms set forth in the attached Restricted Stock Award Agreement:

Name of Grantee:	
Number of Shares:	
Effective Date of Grant:	November 4, 2021
Vesting and Period of Restriction:	Subject to the terms of the Plan and the Restricted Stock Award Agreement attached hereto, the Period of Restriction shall lapse, and the Shares shall vest and become free of the forfeiture provisions contained in the Restricted Stock Award Agreement, with respect to one third of the shares on each anniversary of the Effective Date of Grant and satisfaction of the Performance Restriction as set forth on Exhibit A of the Restricted Stock Award Agreement, attached hereto.

By your electronic acceptance/signature below, you agree and acknowledge that the Restricted Stock is granted under and governed by the terms and conditions of the Plan and the attached Restricted Stock Award Agreement, which are incorporated herein by reference, and that you have been provided with a copy of the Plan and Restricted Stock Award Agreement. If you have not accepted or declined this Restricted Stock Grant, including the terms of this Notice and Restricted Stock Award Agreement, prior to the first anniversary of the Effective Date of Grant, you are hereby advised and acknowledge that you shall be deemed to have accepted the terms of this Notice and Restricted Stock Award Agreement on such first anniversary of the Effective Date of Grant.

Accepted Date

Fidelity National Financial, Inc.
Amended and Restated 2005 Omnibus Incentive Plan

Restricted Stock Award Agreement

A. SECTION 1. GRANT OF RESTRICTED STOCK

- a. **Restricted Stock.** On the terms and conditions set forth in the Notice of Restricted Stock Grant and this Restricted Stock Award Agreement (the "Agreement"), the Company grants to the Grantee on the Effective Date of Grant the Shares of Restricted Stock (the "Restricted Stock") set forth in the Notice of Restricted Stock Grant.
- b. **Plan and Defined Terms.** The Restricted Stock is granted pursuant to the Plan. All terms, provisions, and conditions applicable to the Restricted Stock set forth in the Plan and not set forth herein are hereby incorporated by reference herein. To the extent any provision hereof is inconsistent with a provision of the Plan, the provisions of the Plan will govern. All capitalized terms that are used in the Notice of Restricted Stock Grant or this Agreement and not otherwise defined therein or herein shall have the meanings ascribed to them in the Plan.

B. SECTION 2. FORFEITURE AND TRANSFER RESTRICTIONS

- a. **Forfeiture.** Except as otherwise provided in Grantee's employment, director services or similar agreement in effect at the time of the employment termination:
 - i. If the Grantee's employment or service as a Director or Consultant is terminated for any reason other than death, or Disability (as defined below), the Grantee shall, for no consideration, forfeit to the Company the Shares of Restricted Stock to the extent such Shares are subject to a Period of Restriction at the time of such termination.
 - ii. If the Grantee's employment or service as a Director or Consultant is terminated due to the Grantee's death or Disability, a portion of the Shares which on the date of termination of employment remain subject to a Time-Based Restriction and/or the Performance Restriction (as defined in Exhibit A) shall vest and become free of the forfeiture and transfer restrictions contained in the Agreement (except as otherwise provided in Section 2(b) of this Agreement). The portion which shall vest shall be determined by the following formula (rounded to the nearest whole Share):

(A x B) – C, where

A = the total number of Shares granted under this Agreement,

B = the number of completed months to the date of termination of employment since the Effective Date of Grant divided by 36, and

C = the number of Shares granted under this Agreement which vested on or prior to the date of termination of employment.

All Shares that are subject to a Period of Restriction on the date of termination of employment or service as a Director or Consultant and which will not be vested pursuant to Section 2(a)(ii) above, shall be forfeited to the Company, for no consideration.

- iii. The term "Disability" shall have the meaning ascribed to such term in the Grantee's employment, director services or similar agreement with the Company. If the Grantee's employment, director services or similar agreement does not define the term "Disability," or if the Grantee has not entered into an employment, director services or similar agreement

with the Company or any Subsidiary, the term “Disability” shall mean the Grantee’s entitlement to long-term disability benefits pursuant to the long-term disability plan maintained by the Company or in which the Company’s employees participate.

- iv. If the Performance Restriction is not satisfied during the Measurement Period, all of the Shares that do not satisfy the performance criteria for the applicable Performance Period, shall be forfeited to the Company, for no consideration.
- b. **Transfer Restrictions.** During the Period of Restriction, the Restricted Stock may not be sold, assigned, pledged, exchanged, hypothecated or otherwise transferred, encumbered or disposed of, to the extent such Shares are subject to a Period of Restriction.
- c. **Holding Period.** If and when (i) the Grantee is an Officer (as defined in Rule 16a-1(f) of the Exchange Act) or holds the title of President - Agency Operations, and (ii) Grantee does not hold Shares with a value sufficient to satisfy the applicable stock ownership guidelines of the Company in place at that time, then Grantee must retain 50% of the Shares acquired by Grantee as a result of the lapse of a Period of Restriction (excluding from the calculation any Shares withheld for purposes of satisfying Grantee’s tax obligations in connection with such lapse of a Period of Restriction) until such time as the value of the Shares remaining in Grantee’s possession following any sale, assignment, pledge, exchange, gift or other transfer of the Shares shall be sufficient to meet any applicable stock ownership guidelines of the Company in place at that time. For the avoidance of doubt, at any time when Grantee holds, in the aggregate, Shares with a value sufficient to satisfy the applicable stock ownership guidelines of the Company in place at that time, Grantee may enter into a transaction with respect to any Shares acquired by Grantee as a result of the lapse of a Period of Restriction without regard to the holding period requirement contained in this Section 2(b) so long as Grantee shall continue to satisfy such stock ownership guidelines following such transaction.
- d. **Lapse of Restrictions.** The Period of Restriction shall lapse as to the Restricted Stock in accordance with the Notice of Restricted Stock Grant and the terms of this Agreement. Subject to the terms of the Plan and Section 6(a) hereof, upon lapse of the Period of Restriction, the Grantee shall own the Shares that are subject to this Agreement free of all restrictions other than the holding period described in Section 2(c) above. Upon the occurrence of a Change in Control, unless otherwise specifically prohibited under applicable laws, or by the rules and regulations of any governing governmental agencies or national securities exchanges, any Period of Restriction or other restriction imposed on the Restricted Stock that has not previously lapsed, including the holding period described in Section 2(c) above, shall lapse.

C. SECTION 3. STOCK CERTIFICATES

As soon as practicable following the grant of Restricted Stock, the Shares of Restricted Stock shall be registered in the Grantee’s name in certificate or book-entry form. If a certificate is issued, it shall bear an appropriate legend referring to the restrictions and it shall be held by the Company, or its agent, on behalf of the Grantee until the Period of Restriction has lapsed. If the Shares are registered in book-entry form, the restrictions shall be placed on the book-entry registration. The Grantee may be required to execute and return to the Company a blank stock power for each Restricted Stock certificate (or instruction letter, with respect to Shares registered in book-entry form), which will permit transfer to the Company, without further action, of all or any portion of the Restricted Stock that is forfeited in accordance with this Agreement.

D. SECTION 4. SHAREHOLDER RIGHTS

Except for the transfer and dividend restrictions, and subject to such other restrictions, if any, as determined by the Committee, the Grantee shall have all other rights of a holder of Shares, including the right to vote (or to execute proxies for voting) such Shares. Unless otherwise determined by the

Committee, if all or part of a dividend in respect of the Restricted Stock is paid in Shares or any other security issued by the Company, such Shares or other securities shall be held by the Company subject to the same restrictions as the Restricted Stock in respect of which the dividend was paid.

E. SECTION 5. DIVIDENDS

- a. Any dividends paid with respect to Shares which remain subject to a Period of Restriction shall not be paid to the Grantee but shall be held by the Company.
- b. Such held dividends shall be subject to the same Period of Restriction as the Shares to which they relate.
- c. Any dividends held pursuant to this Section 5 which are attributable to Shares which vest pursuant to this Agreement shall be paid to the Grantee within 30 days of the applicable vesting date.
- d. Dividends attributable to Shares forfeited pursuant to Section 2 of this Agreement shall be forfeited to the Company on the date such Shares are forfeited.

F. SECTION 6. MISCELLANEOUS PROVISIONS

- a. **Tax Withholding.** Pursuant to Article 20 of the Plan, the Committee shall have the power and right to deduct or withhold, or require the Grantee to remit to the Company, an amount sufficient to satisfy any federal, state and local taxes (including the Grantee's FICA obligations) required by law to be withheld with respect to this Award. The Committee may condition the delivery of Shares upon the Grantee's satisfaction of such withholding obligations. The Grantee may elect to satisfy all or part of such withholding requirement by tendering previously-owned Shares or by having the Company withhold Shares having a Fair Market Value equal to the minimum statutory withholding (based on minimum statutory withholding rates for federal, state and local tax purposes, as applicable, including payroll taxes) that could be imposed on the transaction, and, to the extent the Committee so permits, amounts in excess of the minimum statutory withholding to the extent it would not result in additional accounting expense. Such election shall be irrevocable, made in writing, signed by the Grantee, and shall be subject to any restrictions or limitations that the Committee, in its sole discretion, deems appropriate.
- b. **Ratification of Actions.** By accepting this Agreement, the Grantee and each person claiming under or through the Grantee shall be conclusively deemed to have indicated the Grantee's acceptance and ratification of, and consent to, any action taken under the Plan or this Agreement and Notice of Restricted Stock Grant by the Company, the Board or the Committee.
- c. **Notice.** Any notice required by the terms of this Agreement shall be given in writing and shall be deemed effective upon personal delivery or upon deposit with the United States Postal Service, by registered or certified mail, with postage and fees prepaid. Notice shall be addressed to the Company at its principal executive office and to the Grantee at the address that he or she most recently provided in writing to the Company.
- d. **Choice of Law.** This Agreement and the Notice of Restricted Stock Grant shall be governed by, and construed in accordance with, the laws of Florida, without regard to any conflicts of law or choice of law rule or principle that might otherwise cause the Plan, this Agreement or the Notice of Restricted Stock Grant to be governed by or construed in accordance with the substantive law of another jurisdiction.
- e. **Arbitration.** Subject to, and in accordance with the provisions of Article 3 of the Plan, any dispute or claim arising out of or relating to the Plan, this Agreement or the Notice of Restricted Stock Grant shall be settled by binding arbitration before a single arbitrator in Jacksonville, Florida and in accordance with the Commercial Arbitration Rules of the American Arbitration Association. The arbitrator shall decide any issues submitted in accordance with the provisions and commercial purposes of the Plan, this Agreement and the Notice of Restricted Stock Grant, provided that all

substantive questions of law shall be determined in accordance with the state and federal laws applicable in Florida, without regard to internal principles relating to conflict of laws.

- f. **Modification or Amendment.** This Agreement may only be modified or amended by written agreement executed by the parties hereto; provided, however, that the adjustments permitted pursuant to Section 4.3 of the Plan may be made without such written agreement.
- g. **Severability.** In the event any provision of this Agreement shall be held illegal or invalid for any reason, the illegality or invalidity shall not affect the remaining provisions of this Agreement, and this Agreement shall be construed and enforced as if such illegal or invalid provision had not been included.
- h. **References to Plan.** All references to the Plan shall be deemed references to the Plan as may be amended from time to time.
- i. **Section 409A Compliance.** To the extent applicable, it is intended that the Plan and this Agreement comply with the requirements of Code Section 409A and any related regulations or other guidance promulgated with respect to such Section by the U.S. Department of the Treasury or the Internal Revenue Service and the Plan and the Award Agreement shall be interpreted accordingly.

EXHIBIT A
Vesting and Restrictions

This grant is subject to both a Performance Restriction and a Time-Based Restriction, as described below (collectively, the “Period of Restriction”).

Performance Restriction

In order for the Restricted Stock to vest, the Compensation Committee of the Board of Directors of the Company (the “Committee”) must determine that the Company has achieved 9.5% or greater Title Operating Margin (as defined below) in at least two calendar quarters of any of the next five calendar quarters starting October 1, 2021 (the “Performance Restriction”). The five calendar quarters starting October 1, 2021 and ending December 31, 2022 are referred to as the “Measurement Period.” “Title Operating Margin” shall mean the Title Pre-Tax Margin as used for the annual bonus plan. Calculation of Title Operating Margin will exclude claim loss reserve adjustments (positive or negative) for prior period loss development, extraordinary events or accounting adjustments, acquisitions, divestitures, major restructuring charges, and non-budgeted discontinued operations. The Committee will evaluate whether the Title Operating Margin has been achieved following the completion of each calendar quarter during the Measurement Period.

Time-Based Restrictions

Anniversary Date	% of Restricted Stock
First (1 st) anniversary of the Effective Date of Grant	33.33%
Second (2 nd) anniversary of the Effective Date of Grant	33.33%
Third (3 rd) anniversary of the Effective Date of Grant	33.34%

Vesting

If the Performance Restriction has been achieved as of an Anniversary Date, the percentage of the Restricted Stock indicated next to such Anniversary Date shall vest on such indicated Anniversary Date (such three year vesting schedule referred to as the “Time-Based Restrictions”). If the Performance Restriction has not been achieved as of an Anniversary Date, but is achieved on or before the end of the Measurement Period, then the percentage of the Restricted Stock indicated next to such Anniversary Date shall vest at such time as the Committee determines that the Company has achieved the Performance Restriction. If the Performance Restriction is not achieved during the Measurement Period, none of the Restricted Stock granted hereunder shall vest and, for no consideration, will be automatically forfeited to the Company.

CERTIFICATIONS

I, Michael J. Nolan, certify that:

1. I have reviewed this annual report on Form 10-K of Fidelity National Financial, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - (a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
